Indeed, and I just looked it up.  I am not sure the off-air-recording issue
can be considered current any longer, though I can't find anything later
about it.

```

It's involved with the editing process in addition to simply recording.
Here's a dictionary definition, listing several uses:
http://www.wordwebonline.com/en/CUTTING
noun:
1: The activity of selecting the scenes to be shown and putting them together to create a film
- film editing

An example: In filming or taping, there's the "cutting room floor."

verb:
10: Cut and assemble the components of
"cut recording tape"
- edit , edit out

19: Make a recording of
"cut the songs"; "She cut all of her major titles again"

20: Record a performance on (a medium)
"cut a record"

Gary Schnabl

False advertising by a mfgr is not FCC domain. Under-the table payments from a mfgr to a talk show host (payola) IS their domain!

O.K. Mr. Apologist;

I'm sure you will correct me if wrong- if a MANUFACTURER mis-represents its product through false broadcast advertising- the FTC is supposed to investigate. If a RADIO D.J. takes money under-the-table to promote a song (payola) by whatever means (playing it all the time, etc.) this comes under the FCC. Likewise, if a RADIO TALK SHOW HOST takes money under the table to falsely promote a song, service or any product- this is also under FCC jurisdiction.

Here's the FCC's letter to me from Norman Goldstein; Complaints and Investigation Branch; Enforcement Div; Mass Media bureau of the FCC:

"The Commission has stated on several occassions that deliberate falsification or distortion of news or information is patenntly inconsistent with the public interest. However, in light of the sensitive First Amendment values that are involved, an inquiry will not be made of a station unless we receive extrinsic evidence of deliberate distortion or falsification--for example, statements from insiders or those who have direct personal knowledge that facts were deliberately falsified. In this way, the Commission does not become a national arbiter of the "truth" of what is broadcast over the airwaves, nor does it judge the wisdom or accuracy of what is broadcast.

In the "absence of substantial extrinsic evidence or documents that on their face reflect deliberate distortion" the Commission does not deem it useful or appropriate to investigate charges of distortion or the broadcast of false information."

Now what else can you make of that other than:

1. The affirmative is true, i.e. :In the PRESENCE of substantial extrinsic information which reflects deliberate distortion- the commission WILL make an inquiry!"

2. If the FCC becomes suspicious that broadcast laws are being violated- here is a crime investigating agency that does not go out and investigate their suspicions- rather, by their own admission- they sit in their offices by the phone- waiting for some "insider" to CONTACT THEM! Can you believe that "UNLESS WE RECEIVE STATEMENTS FROM INSIDERS- we will not take acton!"

Funny how playing a song over and over- inflames the public and FCC takes action on payola to D.J.s- but cntinually lying about products raises no red flags!

Well, good luck to you. I'm very interested in seeing what the FCC has to say, if anything, about lying.

But, if I understand your so-far-undocumented claim, if I go on the air and give a weather forecast wherein the National Weather Service says that the high temperature today will be 85 degrees and I intentionally say, read "lie" (just for the hell of it) that it's going to hit 90, I or the station (if a listener complains to the FCC or enough of them do--begging the question of how the heck they'd know I lied!) would be subject to action by the FCC.

I would have, in this instance intentionally falsified _news_--weather news. What if, when reading a news story that states that the governor will speak in the city park at 8:30 PM on a particular night, and just for the hell of it (intentionally) I tell the listeners that he's speaking at 9PM and a lot of folks, as a result, miss the speech. Those folks complain to the FCC that the station or yours truly gave out the wrong time for the speech. Liable to an FCC sanction? Give us a break.

By the way, there's a hell of a big difference between a _news event_ and the news--a difference that might make a difference in how you present your argument--you seem to use the terms as though their meanings are identical. They're not. Think about it.

Now, back in the old days, a station with a record for doing stuff like what's described above could result in--ah, the heck with the old days.

The whole subject is goofy, and I'm ashamed of myself for wasting so much of my time on it--and your time, too, for that matter.

Just read this novel called Radio Activity by Bill Fitzhugh and it reminds me of the cosmic consciousness of KPPC-FM Pasadena, California, the first FM Rock Underground Radio station in Southern California, broadcasting hippie rebop from November 1, 1967 until the entire airstaff was fired on October 24, 1971.
peace, ted alvy

KPPC Web Page  http://members.aol.com/tedalvy/mallard3.htm

A book that gives the reader a feel of Underground Radio when the disc jockey would select the music to play, Radio Activity is the new novel by Bill Fitzhugh, who worked at several FM rock radio stations in the 1970s and 1980s. Born and raised in Jackson, Mississippi, he prefers The Band, Little Feat, and Van Morrison to Led Zeppelin, Black Sabbath, and Iron Butterfly. Bill Fitzhugh lives in Los Angeles with his wife and his record collection.

Radio Activity by Bill Fitzhugh (William Morrow 2004): Rick Shannon is an unemployed FM rock DJ considering a change in career. But just as he begins selling off his record collection, a job ffer comes from a small station in Mississippi, where a DJ recently stopped showing up for work. After discovering an audiotape that might explain the fate of the missing DJ, Rick assumes another identity: Buddy Miles, PI.

...He pulled Robert Palmer's 1974 gem, Sneakin' Sally Through The Alley. He looked on the back and found the song that had come to mind. He thought for another moment, then pulled 10cc, The Original Soundtrack. It contained a song with the same title as the one on Palmer's album. Was it the same song? Rick had never thought about it until now. He looked at the writing credits. The first was by Palmer and the late Lowell George of Little Feat fame. The other was written by 10cc's Stewart and Gouldman. Different songs, but with the same potent one-word title: Blackmail...

Gosh, the FBI and the CIA must by in a bidding war for your services during
these trying times of security risks. You could tell them who is a terrorist
and who isn't.

Or, more simply, you engage in the same hyperbola you accuse others of.

This is just a reminder: let's try to keep it (relatively) civil. No one has said anything yet that would be cause for concern. I just don't want this thread to descend into unending name-calling and finger-pointing, and it definitely has the potential to head in that direction.

Cheers,

Ye Olde Newsgroupe Moderator

The original payola convictions were on IRS tax fraud.

Payola refers to playing a song without management consent and knowledge.

>  Likewise, if a RADIO
> TALK SHOW HOST takes money under the table to falsely promote a song,
> service or any product- this is also under FCC jurisdiction.

That is plugola. If it can be proven, it is an FCC violation only if there
was personal gain in exchange for promoting something unknown to management.
If management does know, then it is, by definition, not plugola.

This would fall under "fitness as a licencee" if the station is not being
operated in the public interest.

The FCC does not monitor programming. All complaints of a non-technical nature must be inititated by members of the public.

And, in case you did not notice when the sent you the "f--k off" letter, they would demand huge proof to enter into a character qualifications issue. False advertising is not even in their jurisdiction... and trying to prove the difference between "point of view" and "intentional lying" in news is next to impossible.

Example from outside the US: in 1967, Time reported on a coup attempt in Ecuador. The described violent street demonstrations, police and military brutality and such. I was part of a reporting team, and we reported minimal demonstrations, non-violent stand-offs with a few rocks thrown, and the use of a watter cannon to disperse. Perhaps the Time reporter form Iowa really thought that was violent; others, with more of a world view, thought it tame. Who lied? Who, simply, saw it from their own perspective?
>
> Funny how playing a song over and over- inflames the public and FCC

Payola is, in fact, a violation of sponsorship identification rules. Giving an opinion different from yours about Styrofoam is just that... opinion. Opinions are free in the USA.

The NRA, an organization that has been in business for over 100 years,
is an established national media outlet which has up till now been
involved in television and magazines (it has more subscribers than,
for example, "Newsweek").  Now they've added issue-oriented radio.

That's different from Air America, whose programming seems to
be entirely devoted to a particular canndidate (George Bush).

The only thing in common is that they are both are engaging in
what is supposed to be the most protected class of free speech.

Well let's see. Enough theorizing! Heres another actual case:
A county government jurisdiction proposed a law to ban the use of a
consumer product. This proposed ban made sense because according to

the product safety data sheet on the product- "continuous breathing of the fumes can cause permanent liver and reproductive cell damage."

The talk show host called the proposed government ban "stupid". He presented a false chemical analysis of the product which "PROOVED" that the product's fumes were NON-POISONOUS! It is quite obvious that by lying about the health risks-the host's intentions were to get the public to apply pressure in getting that ban lifted- because the ban had no health safety basis!

Well- let's see if that example gets any of your interest. Should we have this talk show host investigated for receiving money from the product's manufacturer- for promoting their product by lying about it. Or should we just sit by and twittle our thumbs and allow this kind of broadcast fraud to continue?

 Sir:
  To put it mildly- you're full of crap. According to the Chemical
Marketing Reporter "Styrofoam is non-biodegradable PLASTIC." The
magazine is put out by EXPERTS in the plastic industy.

  I've seen styrofoam cups burried for 15 years- and there still
intact! I'de be happy if you took me to court and sued me for
misinformation because I guarantee I would countersue for  your
frivilous clam- and I would WIN!

 Your statement on styrofoam forever puts you on the idiot list.
Better think before you speak next time.

Wanted to buy. AM radio station. Can be losing money or dark or both as long as FCC license is intact.

Prefer with some real estate and seller financing with little or no money down.

I do NOT want "pure" daytimers. Station must be authorized at least 50 watts power at mightnight local time.

I prefer to avoid directionals but they will be considered.

A finder's fee will be paid if I and/or "my people" actually acquire the station.

Tel: (478)741-1710 in Macon, GA. This is the "Radio Crazy".

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"
aka Moron Gottesman
aka Maven Gottesman.

Anyone who uses a talk show host as a reference of any sort of fact has more than just a few screws loose.

This has been posted in this and other newsgroups for more times than anyone can remember, but apparently you haven't bothered to read it even once:  Talk show hosts are entertainers.  They are NOT sources of fact and were never meant to be.

I think perhaps he was just hoping that you wouldn't come back here
for 15 years.  But the point is, people are free to say pretty much
whatever they want, regardless of how true you happen to judge it to be.
In the USA, we have found that putting up with everyone's random crap
is the more effective approach to fostering the responsibility of people
to think for themselves, and for the promulgation of truth.

Have you noticed that people are not seeking your help in your crusade?
That even those who would seem to agree with your notions of censorship
will actually disagree with you on the matter of the facts?
Perhaps you should consider why might be, and also task yourself with
uncovering the truth about the symptoms and causes of psychiatric
disorders involving egomania, messiah complex, and paranoia.
Then get yourself some help and eventually feel better.

First of all, David, I thought this was a low blow. I know that you're generally supportive of the broadcast industry, but for Mr Fact to call you this is unwarranted, and he should retract it.

> > [I]if a RADIO TALK SHOW HOST takes money under the table

> If management does know, then it is, by definition, not plugola.

If management, through stupidity or just plain greed, in the case of an otherwise popular host, allows stupid stuff to be aired and doesn't question why the host is saying stupid things, and in the process turns a blind eye to the issues being promoted so as not to uncover plugola, shouldn't management still be held responsible for failure to exersize reasonable diligence?

I know I had a "public affairs" show killed that we ran on WTAE years ago. The agency who provided, for free, the half-hour program (which aired in the middle of the night on Sunday, in order to meet minimum public affairs hours in the days when such minimums were still in force) was something like the National Coal Producers' Association. Routinely this program would extol the virtues of burning "King Coal" (often slamming other energy sources), an advocacy which I felt was too one-sided, and obviously so considering the source of the program. After a few listens, the continuity/public affairs director agreed with me and pulled the show. What we got in its place, though, was even more boring. Well, at least no one was listening.

> > Here's the FCC's letter to me from Norman Goldstein; Complaints and

> > inconsistent with the public interest.

> This would fall under "fitness as a licencee" if the station is not being
> operated in the public interest.

It's worth noting, though, how often this particular reason has been used to
refuse
renewal of a licensee.  I'd guess zero (Red Lion was fairness doctrine violations,
as
I recall, as was Media, PA...I've forgotten the calls for these....WGCL and WXUR?
But the Fairness Doctrine is gutted, now...there isn't a station on-air who would
be
liable for it, as it's so easily sidestepped by calling it entertainment
programming.
Then there was WHDH....RKO...these were financial shenanigans, if I remember
correctly.  So not a one lost a license based on "fitness".)

> > In the "absence of substantial extrinsic evidence or documents that
> > on their face reflect deliberate distortion" the Commission does not

> > the broadcast of false information."

> > Now what else can you make of that other than:

> I make of it: the FCC just said to you, "kiss off."

On that, I have to agree with you completely.  The FCC (when they're awake) has a
lot
more serious things on their plate than having to wade into a potentially
never-ending legal proceding, filled with lots of opinion, he-said/she-said and
other
soft disagreements, that I'd prefer the money be spent on the issues which
actually
have some relationship with mass media policy.  Don't forget...there are still a
number of people who are fooled when a station does an April Fool hoax.  Who's
fault
is it that people lack the necessary tools to make their own determination?  One
should never believe anything heard or seen unless it's verified from other,
preferably non-media, sources.  And if they're not doing their homework, then oh,
well.  But at the same time, one has to hope these people don't vote.  It may be a
privilege, but there are responsibilities that few people actually accept, and in
that regard I can see where Mr Fact is coming from.

Speaking of stupidity, by the way....I think you said that you can't legislate
against stupidity.  Oh, but what a better world it would be if you could?  Again,
the
FCC has abrogated that opportunity by eliminating news and public affairs minimums
(yes, I'm aware of the irony that WTAE ran their PA stuff when no one was
listening)
but people would be much better informed if, on occasion, they stumbled on a real
newscast once in a while!

That'd by my wish/

You certainly haven't presented the slightest but of evidence in the
specious example above to show that any fraud whatsoever has been committed.

Regards,

Don

I hardly think that a talk show host who continuously lies about facts- would qualify as an entertainer. A broadcast "fraud" would better apply.

I wasn't using the host as a reference. Since the airwaves are being used, I have a right to expect they are being used fairly. The host wasn't "entertaining". He was lying about a chemical analysis of the product which, if believed without obtaining the safety data sheet- (and I have no doubt that his analysis was believed by many listeners)- has no doubt caused some people to become sick at the very least.

The thing for YOU to decide is if yelling "fire" in a crowded theatre is an action that should be looked into by the police- i.e the sanity and the intent of the person who yelled it should be looked into-even if it should fortunately result in no casualties.
After you've made your mind up on that one-and you should come to the conclusion that it unlawful and should be investigated- then decide for yourself if yelling "fire" (or doing the same thing by broadcasting ANY false medical "information" on the air)- can have the same devestating effect on the health of others- and thus also be investigated.

While you're pondering that- I'll just build my case for an overwhelming appearance of impropriety- by posting more and more examples of radio talk show host fraud.

Certainly my intent is to discredit the whole lot of them. If they are merely "entertainers" as some of you think, instead of falsifying news events or lying about medical facts- they should all be relegated to playing a musical instrument and telling jokes on the air!

If you listen carefully enough, you can tell Hendrie does both voices in his interviews. They modify the alleged "guest" voice with a synthesizer.

He's as phony as Howard Stern's wig.

I wouldn't presume that. Most ATUs and phasors are designed for the carrier frequency. The fact that a transmitter may also transmit audio sidebands is a secondary issue. IBOC splatter was certainly not taken into consideration in the design of nearly, if not all, of the phasors in use today.

Firstly, I hate IBOC as it will likely destroy skywave listening at night, an 80-plus year heritage we have in the USA. Further, I don't like Ibiquity's technology. This isn't a scientific issue, but rather a personal one.

DRM is, in my opinion, the way to go, despite the fact the audio isn't High End, because it's a world standard that can effectively use different bandwidths as they are available.

I don't see why we can't have DRM on a portion of the AM band and also on frequencies at HF, VHF and UHF that aren't utilized now on a local basis. Clearly, the public interest demands that the number of channels available exceed the number the five or s1x largest broadcast companies can afford to buy up, because we need local radio.

The Gonset converter worked fine: it was the car radio which was wholly unsuited for the task. But they are fine for BCB DXing if the IF is narrowed down, or as is, given a good antenna, for audiophile AM.

Best is an aircraft ADF set. New ones are several thousand dollars but old tube and non-TSOd early SS types may be had cheaply. I got a huge pile of tube and early solid state avionics-dynamotors, tuner assemblies, and all-from a FBO who was grateful I'd haul it off.

In a sense, that proved the futility of putting program quotas on stations.
I recall many times when I did ascertainment or tried to get community
programs on the air, I would be told to bug off because the real community
leaders did not have time to talk to so many stations about "nonesense" or
to do so many radio shows.

Fitness has been used a few times, ususally when a licencee has been
convicted of a crime. The recent revocation of about 6 licences of a guy
from Terre Haute comes to mind.

IBOC is the system by which digital audio can be transmitted over a standard
analog radio channel. At least in theory. In practice, it splatters over
adjacent channels.

>BTW just finsihed hearing the Three Dog Night promo from the 60s show

>Then there was WHDH....RKO...these were financial shenanigans, if I remember correctly.  So not a one lost a license based on "fitness".<

The WHDH case stemmed from an improper contact between a representative of an applicant for a TV license in Boston and an FCC commissioner (chronicled in Sterling Quinlan's book "The Hundred Million Dollar Lunch").  In that case, the licensee (the Boston Herald-Traveler newspaper) had been granted the license, but at renewal time, by which time the ex-parte luncheon had come to light, lost their "expectation" of renewal and was treated equally with other applicants for the license.  RKO-General lost their licenses (was permitted to sell them instead of having them yanked by the FCC) for the felony bribery conviction of their corporate parent, General Tire and Rubber Company (which certainly qualifies as a "fitness" issue).

Thank you!

IBOC is the system of digital audio broadcasting on a standard analog audio channel. Needless to say, it doesn't fit. It's only going to get worse.

What time did you tune in?  Different programs have a different mix of content.

I believe it was an AFRTS broadcast of a US network program. However, the
FCC investigated the off-air-recording aspect, leaving unprotected the
copyright violation of the network broadcast.

The case is in the FCC historic file, I believe. Searching under George
Mayoral, Alfredo Ramirez de Arellano and WKYN will find it.

When AFRTS was available domestically on shortwave, the DOD-produced
programs were pretty much only one-minute info spots.  The rest was commercial
radio newscasts, feeds of voice actualities ("Stations, stand by for 'Cut 12' in
3...2...1") and play-by-play sports.

Any unaffiliated station using this material had to know it was hoping to get away with something.

Hiya People,

Creative FM is about to embark on it's 2nd week of a 28 day RSL (14th June - 11th July 2004).

If you're around the Huddersfield area you can tune in on 107.1 FM.  For those unable to tune in via the wireless, you can catch us on the internet at www.bssonair.co.uk

For the last two days (10th / 11th July) of the broadcast you'll be able to vist us live at Greenhead Park where we'll be broadcasting from this years Carnival and Mela.

Look forward to hearing any comments people might like to make, or maybe even seeing some of you at the Carnival and Mela.

Regards,

Paul Scarth
Broadcast Technician

Want to buy:

A "Dog" AM radio station. (With all respect to Dogs!).

The "Radio Crazy" is baaaaakkkkk!!!!

Ideal station would be with seller financing and real estate. I don't care what market size. I don't care if station is profitable or not.

I don't want "pure" daytimers. Must have at least 50 watts night power.

Should be cheap. Asking price $150,000 or less.

I will pay a 5 percent finders fee to anyone furnishing me a lead if I actually buy the station.

Tel: (478)741-1710 in Macon, Georgia.

73,

Meyer Gottesman, W6GIV
aka The "Radio Crazy"
aka Moron Gottesman
aka Maven Gottesman LOL!

AFTRA is a union representing announcers and air talent. It has nothing to
do with playing a song.

In the US, the artist is not compensated for Analog broadcast of music.
Composers and Authors are, via blanket collection agencies ASCAP, BMI and
SESAC. Each charges radio and TV stations (and even web streamers) a fee in
proportion to station size for usage of the music in the catalogs they
represent.

In the case of the FCC vs. George Mayoral, Alfredo Ramirez de Arellano, et.
al., the issue was rebroadcast without authorization of the program content
of another radio station. The FCC does not have jurisdiction on music
license issues.

I am just getting started in sports broadcasting and would like to
find a sample of a spotting board for football.  Any help is greatly
appreciated.
Thanks, Bruce

I'm working on a future best-seller about sports-talk radio.
Sports-talk junkies, please tell me:

Do you prefer stations that keep the focus tight on sports ... or
stations that emphasize lots of "guy talk" (sex, rock, movies, etc.)?
(Why?)

Do you give more credibility to what you read on the sports page, or
what you hear on sports-talk radio? (Why?)

What the stupidest thing you've ever heard on sports-talk radio?
What's the coolest thing you've ever heard?

For sports-talk listeners in Dallas only: In 25 words or less, tell me
why "The Ticket" is the hippest station on the air ... or why it's the
official station for 35-year-old career adolescents.

JMD

My tastes aren't as upscale as John's, but I love the BBC, too ... In fact, BBC-2. It's the most popular station in Britain, and they claim, in the world (I don't doubt it). It's the best combination of modern-day pop, rock and oldies with really smart chat, and, of course, that wonderful Brit wit. Steve Wright (on from 8 a.m.-11 a.m. U.S. Central time) is especially great. I listen, of course, on the 'net. U.S. public radio would do well to create something like it.

No. 2 would b KGSR in Austin. Terrific rootsy music, with jocks that know music and care about music. Also on the 'net.

Hi,

As someone new to the hobby of shortwave listening I am surprised by the quality of some of the programming available but hampered in my inability to unearth them. What I would like to ask is if anyone knows of a resource that reviews radio programs that are favorites among listeners? For example, the most recent issue of "Passport to World Band Radio" has a section entitled "First Tries: Ten Easy Catches" that alerted me to Radio Taiwan International's "Jade Bells and Bamboo Pipes" and Radio Canada's "The World this Weekend." There must be a number of shows that more seasoned listeners would recommend and I would welcome any individual suggestions or guidance to a more comprehensive listing of quality shows.

Thank you for your help, Steve.

Note: If there are a number of responses I will be glad to assemble a list and post it

Some day, business students will study the failure of the Air America network.

Though so many reasons can be explored, it's my opinion that the primary reason for the network's eventual fall has to do with its attempt to start out on top.

You can't simply target Rush on a national scale and expect to beat him. Rush is a consummate radio broadcasting professional who started at the very bottom and worked his way to the very top. He didn't start out trying to force his political opinion on any one. He took his top 40 superjock persona into the talk radio segment, and people enjoyed the product. Through hard work and perseverance, his show grew exponentially. He's not a conservative who happens to be a radio entertainer. He's a radio entertainer who happens to be a conservative. So could liberal talk radio succeed? Of course. Howard Stern and Don Imus are two fine examples who come to mind.

Radio is not an easy medium to conquer. It's not simply TV without pictures. To really succeed in radio requires one to start at the bottom, listen to radio every waking hour, find mentors to help you develop your personal style, and prepare to work very hard for very little money. You'll probably go through a couple of spouses pretty quickly.

Some day, there will be someone who beats Rush. But I don't think it will come from an organization like Air America. Instead, I think it will come from an individual who is in love with radio and can't stand being #2.

<< In the US, the artist is not compensated for Analog broadcast of music. Composers and Authors are, via blanket collection agencies ASCAP, BMI and SESAC. Each charges radio and TV stations (and even web streamers) a fee in proportion to station size for usage of the music in the catalogs they represent. >>

During my days in the broadcast field (late 1950s), periodically a day's play list would be perused and then assessments made and distributed to the above according to what was played. This was a convenient averaging out system that apparently worked well for all concerned.

In my opinion, Air America NEVER intended to be a success (not that they wouldn't mind being so). The new campaign finance laws exempt "media" (or words to that effect) from the law. So, you set up a "network", unabashedly attack on of the parties, and then shut the operation down after the election.

For the last few days I tuned in to WBLS 107.5 between 830 am - 900 am and there was no host(s) doing typical am drive time stuff - just music and commercials. What's going on there?

Funny thing, I heard a lot of NRA bashing on NPR last weekend
over this "loophole" in the law, I've never heard any Air America
bashing on NPR over this "loophole".

What media network is the NRA running that they intend as a sham
to get around campaign finance laws and then shut down next year?
I haven't heard of this until you mentioned it.

Amateur Radio Newsline™ Report 1401  June 18,  2004

Now, Amateur Radio Newsline report number 1401 with a release date of Friday, June 18 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  A new ham-sat is made ready for launch and the B-P-L struggle continues.  Find out the details on Amateur Radio Newsline report number 1401 coming your way right now.

(Billboard Cart Here)

**

HAM RADIO IN SPACE:  ECHO PREPARED FOR  LAUNCH

The soon to be launched ECHO ham radio satellite has arrived safely at the launch complex in Russia and is being made ready for launch. This, according to Chuck Green, N0ADI, who is traveling with the bird to the launch facility.  Bill Pasternak, WA6ITF, is here with more:

--

According to Green, once he and the team arrived at the launch site, the satellite shipping containers were opened and placed in the clean room.  ECHO was taken out of it's shipping case and set up for completion.  The bottom antennas were then installed.. So was the bottom solar panel, magnets, and corner reflectors.

ECHO was then powered on and the team successfully communicated with it over a hard wire connection from a computer.  The four two meter receivers and the two 70 cm transmitters were all successfully tested.  And that's good news for everyone waiting for the new hamsat to take its ride into space.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, in Los Angeles.

--

Currently the planned launch period for ECHO is four weeks beginning June 28th. Once in orbit the command teams will be working together to assure everything is working OK and get ECHO into its initial 'normal' modes as quickly as possible. After that it will be open to the users in the ham radio community. (AMSAT)

**

THE BPL FIGHT: AN UPDATE ON WHAT'S HAPPENING IN THE USA

The fight to keep Broadband Over Powerlines from going nationwide continues. Amateur Radio Newsline's Mark Abramowicz, NT3V, is here
with the latest:

--

With summer now here, expect the Broadband over Power Line Internet access issue to heat up - especially as more people get a chance to look over the latest filing from the National Telecommunications and Information Administration.

The federal agency, which advises the White House on telecommunications policies and oversees radio spectrum used by government agencies, weighed in with more BPL comments in a June 4 filing with the Federal Communications Commission.

And the American Radio Relay League and others who've analyzed the comments say it's clear the political considerations are overshadowing the engineering data which raises many questions about the viability of BPL.

In its filing with the FCC, the N-T-I-A's policy makers now call BPL a win-win situation for all and make what some call an outlandish claim - that deployment of the technology could actually lead to reduction, that's right, reduction of power line noise.

Now, the engineering types who've been studying the BPL and doing all kinds of test measurements are really scratching their heads trying to make sense out of that. The N-T-I-A filing also contains this comforting assertion for BPL opponents. It says that the current power line system is responsible for even greater local interference risks than what BPL would bring.

And, it says, B-P-L operators would implement procedures to eliminate any harmful interference.

The stack of complaints about BPL test sites and assertions by a lawyer representing one of the large utilities testing the technology might lead some to question that reassurance.

A source tells Amateur Radio Newsline the FCC has failed to "properly direct" BPL complaints to the appropriate FCC regulatory office for action. And, the source says, commissioners questioned about that haven't offered any explanation.

And a lawyer who has commented in writing to the FCC about some of the BPL complaints his utility company received claimed there was no basis for them, essentially saying the amateur radio operators making them don't know what they're talking about.

One thing the NTIA did suggest in its filing is the exclusion of certain bands and frequencies in specific geographical areas to protect critical government systems.

Does that suggest an agency confident BPL won't be an interference source?

The American Radio Relay League and others who've been vocal in this fight suggest otherwise.

They say BPL is far from a done deal and they're hopeful that the FCC's extension of reply comments to June 22 will net some helpful information. And, they say, they're not giving up or going away quietly.

In the meantime, there is a sense BPL is on a fast-track at the FCC where the majority of the commissioners view it as an engine to help stimulate the economy.

Could the FCC act on the BPL issue before the November election?

Anything is possible. And some close to the BPL debate say if the Bush administration believes it will generate a much-need bump in the public opinions polls or at the ballot box...well, you get the idea.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Mark will continue to monitor the B-P-L situation and report back in future Amateur Radio Newsline reports. (ARRL, CQ, Repeater Journal, Published news reports, others)

**

THE BPL FIGHT: AUSTRALIA REACTS TO THE BPL CHALLENGE

The United States is not the only place planning to introduce this controversial Internet access technology. Proposals for Power Line Communications or Broadband over Power Lines in Australia have become a concern many spectrum users down-under. This includes the Wireless Institute of Australia which is that nations Amateur Radio national society. From Brisbane, Q-News Graham Kemp, VK4BB, reports:

--

WIA President, Michael Owen, VK3KI has said that the WIA's position in relation to B-P-L is that it supports increasing broadband access and broadband competitiveness in Australia, but in a way that does not cause interference to legitimate users of the High Frequency spectrum. The WIA supports the development by the ACA of policies for BPL that protect existing users.

The WIA believes that one of the problems associated with B-P-L is that trials on a limited basis are not good indicators, and that the full effects of a problematic technology will not be seen with such trials. The WIA considers that B-P-L will not really serve the community's long run needs because of its limited bandwidth. A deep fibber network is to be preferred to using long runs of power lines.

The WIA has appointed a team to deal with this issue. WIA President has appointed Phil Wait, VK2DKN the director responsible for developing and advocating the WIA's position in relation to BPL. He has asked Owen Duffy, VK1OD Barry White, VK2AAB and David Wardlaw, VK3ADW to assist Phil, as the WIA's BPL Team.

--

A report on a recent small trial of B-P-L in the city of Hobart to some 4 houses and 2 floors of one building is on the WIA website.  (Q-News)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the VE9BSQ repeater serving St. John, New Brunswick, Canada.

(5 sec pause here)

**

RADIO RULES:  COMMISSION ADOPTS SPECTRUM SHARING PLAN FOR L AND S BAND

The Federal Communications Commission adopted a spectrum sharing plan for low earth orbit satellite systems in the 1.6 GHz and 2.4 GHz bands. The so-called Big Leo birds.  And here's how it will work

In the 1.6 GHz or "L-band," mobile-satellite service operators with satellite systems that utilize code division multiple access and time division multiple access technologies will share 3.1 megahertz of spectrum at 1618.25 to 1621.35 MHz.  At "S-band," the Commission allocated the 2495 to 2500 MHz band to fixed and mobile except aeronautical mobile services, in order to provide additional spectrum and to accommodate the relocation of Multipoint Distribution Service channels 1 and 2.

The commission says that its new spectrum sharing plan will further the agency's goal of efficient frequency utilization by increasing the number of providers offering services to consumers over the same spectrum.  It will promote the deployment of more innovative services to consumers.  (FCC)

**

## ENFORCEMENT:  COUNTY HAS DONE NOTHING WRONG

The FCC says that a complaint that a county is using ham radio for its routine business is without merit.  The agency's Daryl Duckworth, NN0W, is here with more:

--

Duckworth: "A complaint concerning Bell County Communications Center and club license W5BEC was dismissed.  There is no showing that this station is operated by anyone other than amateurs, nor is there a showing that it is there a showing that it is used or intended to be used for routine county business."

--

W5BEC is the club station license issued to the Bell County Emergency Operations Center in Belton, Texas.  Its also the call sign of a wide area two meter repeater that covers much of central Texas.  (FCC, RAIN)

**

## ENFORCEMENT:  STAY OFF 10 METERS

Meantime, the FCC's crackdown on 10 meter unlicensed intruders continues.  This time the agency acts in a New Jersey case.  Again, the FCC's Daryl Duckworth, NN0W:

--

Duckworth:  Auto Elite Transportation of Morristown, New Jersey, has been sent a warning notice about a vehicle of theirs; truck number 2113, as being the source of unlicensed radio transmissions on 28.085 Mhz."

--

Auto Elite was warned that continued unlicensed operation of radio transmitting equipment without is a violation of Section 301 of the Communications Act. That it could subject the operator to fine or imprisonment, as well as seizure of any non-certified radio transmitting equipment. Monetary forfeitures for this kind of violation normally ranges from $7,500 to $10,000. (FCC, RAIN)

**

ENFORCEMENT: SAN DIEGO'S 96.9 MHZ PIRATE REACTIVATES

According to a news bulletin from Chris Carmichael appearing in the CGC Communicator, San Diego's 96.9 MHz pirate is back on the air. Chris says that there is no news on the location of the transmitter, but he believes that will only take the Commission a short time to figure out. (CGC)

**

ENFORCEMENT: SPAMMER GOES TO JAIL

A New York state man who sent out millions of "spam" e-mails has been sentenced to three and a half to seven years in prison. This according to a May 27th news release from that states Attorney General's office which said that Howard Carmack, known as the "Buffalo Spammer," received the maximum sentence for 14 counts of identity theft and forgery.

A spokesman for New York Attorney General Eliot Spitzer said that Carmack sent out hundreds of millions of bulk e-mail messages. That he flooded inboxes and saddled Internet providers with millions of dollars in costs. But it was his use of stolen identities and forged addresses that caused action by state prosecutors. New York has no state laws specifically dealing with spam. Carmack was found guilty of violating state forgery and identity-theft laws in April.

Internet provider EarthLink Inc. won a $16.5 million judgment against

Carmack last year, and EarthLink officials testified in the criminal trial as well. (Published news reports)

**

## EMERGING TECHNOLOGY: EARTHLINK VS. PHISHERS

Meantime, EarthLink claims that it has developed a program to fight phony websites like this,. The sites, called phishers are those designed to deceive e-mail users into providing personal information such as passwords and credit card or Social Security numbers.

Phisher sites pronounced "fishers" but with a leading "p" are called that because they "fish" for personal information that can be used in identity theft. They work by telling an Internet user via e-mail that there is a problem with the service-provider account and providing directions to a Web site for clarification. The link takes the user to a hoax Web site that may be a perfect copy of a real page used by Earthlink, eBay or another legitimate business. That is where the user is deceived into providing personal information.

EarthLink's anti-phisher program will rely on a list of known fraudulent sites. When a subscriber responds to the e-mail message, he will be linked instead to a special Web page that warns the e-mail is a fraud. The site also will provide a chance to report the hoax attempt.

EarthLink says that it receives about 40,000 telephone calls or e-mails each month from subscribers who have received one of the fraudulent e-mails. (Earthlink)

**

## HAM RADIO BUSINESS: A SEARCHABLE CQ MAGAZINE ARCHIVE

Finding an article or an advertisement in a back issue of CQ Magazine is about to become only a mouse click away. This, as CQ Communications and Buckmaster Publishing announce plans to create a searchable on-line archive of CQ magazines back issues.

Buckmaster, which produces the Hamcall CD has for decades filmed issues of CQ onto microfiche for use by researchers and hobbyists.

Buckmaster also provides advanced scanning and searching technology for on-line posting of documents for major corporations. Now this same technology will be applied to back issues of CQ.

As currently envisioned, searches will be free, while access to reading and printing specific pages will require a subscription at a nominal fee.  Eventually Buckmaster plans to have every issue of CQ available dating back to the magazine's first issue in January 1945.

A beta test version covering CQ from 1990 to 2002 is already on-line.  The archive may be accessed at http://hamcall.net/cgi-bin/cqcgi.  (CQ)

**

WITH ARNEWSLINE:  YHOTY NOMINATIONS CLOSE JUNE 30TH

And a reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award closes midnight on Wednesday, June 30th.  If you are planning to nominate a youngster for this years award or, if you want to update a previous years nomination -- and have not yet done so  --  you have only about two weeks left to do so.

The Young Ham of the Year Award program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states.  He or she must have made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org.

Again, the cutoff for nominations this year is midnight on June 30th.  The award presentation takes place in August at the Huntsville Hamfest in Alabama.   (ARNewsline(tm))

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: INSTANT MESSAGING EXPANDING WORLDWIDE

Wonder where some of your ham radio buddies are these days? Maybe they are now using Instant messaging instead of 2 meter FM. Norm Seeley, KI7UP, has more:

--

According to Tech Web News, Instant Message use is growing steadily among corporate workers who use free services from companies like America Online, Microsoft, and Yahoo to send quick text messages to coworkers, family, and friends. And by 2008 closer to 80 percent of corporations worldwide are expected to use either public or private Instant Messaging networks.

A recent study by The Radicati Group says that by 2008 the number of Instant Message users worldwide is expected to reach 670 million. Business wise, this equates to revenues in the $413 million range.

Even so, the percentage of people using public networks and private networks is expected to remain the same. That's at 88 percent public and 12 percent private, respectively. The reason: Its hard to get people to pay for what someone else is giving away for free.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, reporting.

--

Ham radio groups are also turning to Instant Messaging. According to Internet postings, it comes in handy when there is a net to be held and propagation goes away. (TechWeb Online)

## HAM INTERNET NEWS: THE VHF REFLECTOR BACK ON LINE

And speaking about instant messaging, or almost instant messaging, news that the VHF Reflector is back on line. This, according to Bob Vaughan, KC6SXC, who oversees the systems operation.

In a posting, Vaughn explained that the W6YX server that hosts the VHF Reflector suffered a disk failure and was off line for the past month. Vaughn says that the team has now recovered the data from the failed disk and has put the system and the Reflector back on-line. (VHF Reflector)

## ON THE AIR: KY REPEATER NEEDS A NEW HOME

The Repeater Journal reports that the Danville, Kentucky, 146 point 655 WD4DZC repeater is looking for a new site. According to trustee George Griebe, WQ4Z, the tower supporting the systems antenna is to be taken down and will not be replaced.

Griebe says that the Wilderness Road Amateur Radio club which sponsors the repeater plans to keep it on the air from a temporary location with reduced coverage. Meantime the club is continuing its search for a suitable, high level, wide coverage permanent site. (Repeater Journal)

**

## THE SOCIAL SCENE: OHIO IN JULY

Turning to the ham radio social circuit, the 7th annual OH-KY-IN hamfest is slated for the July 24th at the Diamond Oaks Career Development Center in Cincinnati Ohio. The event will feature commercial vendors, a flea market and much more. Information is on line at www.ohkyin.org or by e-mail to n8bv@juno.com. (OH-KY-IN)

**

## THE SOCIAL SCENE: COLORADO IN JULY

And the Northern Colorado Amateur Radio Club will hold its 2004 Superfest at the Budweiser Events Center in the Larimer County Fairgrounds on July 17th. Talk-in is on the 145.115 Mhz repeater with a 100 hertz tone access. For information on this one contact Willis Whatley, WA5RVL, at his Callbook address. (E-mail)

**

## INTERNATIONAL - GREECE: HAM RADIO AT THE SUMMER OLYMPICS

Some more good news for foreign radio amateurs visiting Greece for the Summer Olympic Games. From the August 1st through September 15th hams from CEPT signatory nations will be permitted to operate in Greece without the need to submit any papers for a license. They will also be allowed to use the special prefix J42004. Meantime, Greek radio amateurs can use the special prefixes SX2004 or SY2004 through the 15th of November in celebration of the games. (GB2RS)

**

## DX

In D-X, word that MM0AFJ will be on the air from the Island of Harris. This, from the 27th of June until the 2nd of July, mainly in the mornings on 80 to 10 meters CW and SSB. There may be some activity on 160 meters in the evenings. Requests for skeds should be sent via e-mail to m0afj@tiscali.co.uk. QSL direct to MM0AFJ at his Callbook address. (RSGB)

Also, IK4RUX reports he will operate portable IF9 on HF SSB from Favignana between the 19th and the 26th of June. Side trips to other islands in the Egadis group as well as some lighthouse operations are also possible. QSL to the operators home call or via the bureau. (RSGB)

**

## THAT FINAL ITEM: HAM RADIO HONORS THE MEMORY OF PRESIDENT RONALD REAGAN

And finally this week, ham radio finds a way to honor the memory former President Ronald Reagan.  Here's Bruce Tennant, K6PZW with the rest of the story:

--

Two suburban Los Angeles area radio clubs are joing forces to honor the memory former President Ronald Wilson Reagan.  This, by operating Field Day in his honor from the Reagan Library in Simi Valley, California.

According to Peter Heins, N6ZE, the two groups joing forces to honor the late United States president are the Ventura County Amateur Radio Society and the Conejo Valley Amateur Radio Club.  The Ventura County group has operated Field Day before from the Reagan Library.  This year, the Conejo Valley club will be joining with them for the first time.

Heins says that 2004 is the fourth year a special event will have been held at the Reagan Library using the special N-6-R call sign. The previous three were dedicated to all members of the former first family. This years Field Day operation will be specific in its remembrance of President Reagan who died of Alzheimer's disease on June 5th at age 93.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Field Day 2004 is the weekend of June 26th and 27th.  Visitors to the Reagan Library will be able to listen in on amateur radio communication, talk to amateur radio stations located in other countries, and find out more about obtaining an FCC Amateur Radio License of their very own.

Also, the complete Field Day rules are on-line at the ARRL website. Its in cyberspace at www.arrl.org  (N6ZE)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Again, the cutoff for submitting nominations for this years Young Ham of the Year Award is midnight on June 30th. The award presentation takes place in August at the Huntsville. Full details are on our website at www.arnewsline.org

Also, don't forget Field Day the weekend of June 26th and 27th. We'll see you on the air.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Don
Wilbanks, AE5DW, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Wanted to buy:

I want to acquire a "Dog" cheap AM radio station. Any market considered. Need not be profitable. Can even be "dark" as long as FCC license is intact.

Stations with seller financing and/or real estate preferred. I do NOT want a "pure" daytimer! Station must have at least 50 watts of night power authorized.

I prefer stations that are NOT repeat NOT directional!

Asking price must not exceed $150,000.

Finders fee paid to any telling me about the station should I actually acquire it.

Tel: (478)741-1710 in Macon, GA.

I am a semi-retired broadcast engineer. The "Radio Crazy" ain't that crazy. My last job in radio was Chief Engineer for a 5 KW fulltime directional AM in New York City.

73,

Meyer Gottesman, W6GIV
aka The "Radio Crazy"
aka Moron Gottesman
aka Maven Gottesman
aka Meshugah Gottesman... Just teasing. Hi!

Subject: RACE-BAITING, "WHITE-TRASHING," ANTI-SEMITISM & IMPERMISSIBLE

# BEHAVIOR AT WBAI

## Race-Baiting, "White-Trashing," Anti-Semitism, Physical Intimidation, and Other Impermissible Behavior at WBAI

The following piece identifies real people, reproduces transcripts from actual sound checks, reprints excerpts from current list-servs and the public record, and describes actual incidents that I myself have personally witnessed, and that, in some cases, were also simultaneously witnessed by hundreds of others.

Those whom I have specifically singled out by name in this piece are not "small fry" or a few isolated "crazies," of which any organization such as WBAI must expect to have its share. On the contrary, all are prominent, long-time "personages" in the WBAI community. Most if not all are also prominent producers and on-air personalities at WBAI, or indeed are members of its highest management levels.

I wish to make it clear that (1) no one but myself is responsible for the information and conclusions expressed below. And (2) that I am writing, not as a member of the WBAI Local Station Board, but as a listener and private citizen.

If any of those named in this piece wish to dispute the truth or accuracy of what I have written, they are free to hold me responsible either in a court of law or in the court of public opinion.

I ask only that they address themselves specifically to the truth and accuracy of what I have written, and to the issues I have raised, not to whether I "... should be ignored because [he is] motivated by dreams of White supremacy," or should be "watched" because I am "just another old, rich White man who wants to rule Pacifica and keep people of color out."

The above are just two of the ad hominem, "arguments by race-baiting" that have often been directed at me whenever I attempt to call for a discussion of certain issues.
And that is one of the reasons I have written this piece.

For I would like to see an end to the corrosive and divisive race-baiting, "white-trashing," anti-Semitism, and physical intimidation that have been occurring in and around the station with increasing frequency.

It is my hope that those who encourage, or abet, or participate in such behavior will be replaced in their positions of authority and prestige by those more in tune with both the letter and the spirit of the Pacifica mission.
To The Members of the WBAI and Pacifica Community:

Recently, as a result of some of my postings on the issue of race-baiting, "White-trashing," anti-Semitism, physical intimidation and other impermissible behavior at WBAI, I have come under attack by a number of friends and colleagues of those whom I have accused of contributing to the current (and, in my opinion, deplorable) state of affairs at WBAI.

One such attack came from Dred-Scott Keyes, an WBAI engineer. He recently wrote an open letter to the Pacifica National Board (widely circulated on all of Pacifica's list-servs) entitled "Steve Brown and the Arbitron Myth", in which, among other things, he accuses me of unfairly criticizing WBAI's program director, Bernard White.

I do not know Mr Keyes personally, nor do I believe we have actually ever met. But I honor his long-time service to WBAI and =96 since Mr Keyes is a long-time associate of the WBAI Program Director =96 I also honor his praiseworthy attempt to defend a colleague whom, he feels, I have unjustly criticized.

Since Mr Keyes and others have raised important points around the above issues, I hope this piece will answer them in a manner that respects Mr Keyes' long service to WBAI as engineer, producer, and on-air personality.

I will start, not with an examination of WBAI Program Director Bernard White, but with WBAI engineer and producer Erroll Maitland. That is because, although not as highly placed as Mr White, his statements and behavior have been cruder, more inflammatory, and (but only marginally) more physically abusive.

For example, here is an excerpt from an Erroll Maitland interview that had been broadcast on KPFA (and was recently quoted on a WBAI list-serve).

The except seems rife with race-baiting and is shamefully full of crude anti- White characterizations. However, I reproduce it below, so you can judge for yourself.

The excerpt is 34 seconds from the sound-clip of an interview broadcast over KPFA, on July 8, 2003, regarding a debate over what should be included in Pacifica's new bylaws.

<BEGIN TRANSCRIPT>
Reporter : Local station board member Errol Maitland of WBAI in New York supported that draft [which was defeated, but which he says] would have sent a message to what he calls "the neer-do-good liberals in Pacifica-land."
Maitland: And that they shot down because at the core of their -- these white people on the Pacifica board felt that black folks, that niggers came in and messed up their nice laid back foundation and they wanted to take it back . They wanted to take it back to the bosom of Berkeley where it can become a lily white organization again, free from niggers.
<END TRANSCRIPT>

A WBAI Local Station Board member who had read Erroll's statement on the list-serve then wrote (with what I detected to be an underlying note of pride), that such statements could never been made at WBAI, because:

"... if Erroll [Maitland]'s [racially offensive] statement had been broadcast over WBAI, there would have been a major protest from [our] listeners, black and white."

But in fact, Erroll and others have been broadcasting offensive statements of that nature over WBAI for years. And though there have indeed been protests from listeners, by and large the management of WBAI (and certainly Erroll Maitland) has shrugged them off, usually without any response, let alone an apology to the listeners and an admonition to Erroll and those like him.

For whatever it is worth, I have heard Erroll Maitland make such statements myself.

So have countless others. And not just over the airwaves. But also at meetings, fundraisers, public events, and broadcasting conventions.

In fact, I heard Erroll go on in this vein for 20 minutes in front of the microphone at the 7th Annual Grassroots Radio Convention in upstate New York, a few years ago, where, unfortunately, no one present made a peep of protest. For it is an old story that it is "OK" when a Black person utters the kind of crude racist remarks that would get a White person tarred and feathered anywhere in Pacifica.
Even more recently =96 just a few days ago

=96 Erroll appeared on a Saturday morning program over WBAI and discussed the Clearwater Music Festival, then going on. He characterized it as
"just a bunch of White men playing Black Man's music, and that's no good." [From memory. The sound clip will soon be posted online.]

But Erroll is not just words. He is a "major power" at WBAI who abuses this power to cut off or cut into the programs of other producers he does not like.

Or to deny them the airwaves, on his own whim, whenever he feels like it, as he did when Robert Knight came into the station to do a scheduled broadcast and Erroll decided, on his own, that he would not let Robert on the air.

As far as I know, Erroll was never admonished, let alone disciplined, for this egregiously improper and (with reference to the title of this piece) definitely "impermissible behavior."

Another example of Erroll's documented impermissible behavior (still studiously ignored by management, with whom Erroll is tightly connected) concerns the physical harassment and abuse of a woman.
Not long ago he assaulted (there is no other word for it) a female Pacifica volunteer, a white woman in her 50's, whose opinions he did not like.

Erroll, who is an imposing 6-2 inches tall and weighs (my guess) nearly 250 pounds, pushed his entire bulk right into this woman's face (she is approximately 5-1 and weights perhaps 110 lbs).

He then strode forward as fast as he could, so that she was forced to stumble quickly backwards in order not to be trampled. And all the while, as he drove her backwards across a distance of perhaps 25 or 30 feet, Maitland had a huge gleeful smile on his face, as he repeatedly set off the electronic flashbulb of his camera into this poor woman's eyes -- again and again, from a distance of approximately 6 inches. The woman, who had a serious occular nerve condition, has been having headaches and mini-seizures ever since.

You may wonder how I know this, and why I accept it as true. The reason is that I personally witnessed this incident, and photographed some of it as it happened.

Where did it happen? It happened in sight of several hundred other Pacifica supporters who were attending a Pacifica National Board meeting at the Cathedral of St John the Divine, 112 Street and Amsterdam Avenue, in Manhattan, approximately a year and a half ago.

There is even an audio clip (since the convention had been recorded) in which one can hear the voice of Leslie Cagan, Pacifica National Board Chair, shouting out from her seat on the dais =96 "Stop, Erroll, Stop!"

The woman protested to the station manager, to the Pacifica Executive Director, Dan Coughlin, and to the Pacifica Board Chair, Leslie Cagan (who was a witness). The woman felt that the incident warranted an apology, at least, and possibly some disciplinary action against Erroll. You would think that with so many witnesses, this would have been accomplished quickly (and fairly).

But neither Cagan, nor Coughlin, nor the WBAI station manager could be persuaded to take action, or even request an apology from Maitland. That is because our "leaders" are fearful to be perceived as "taking the side" of a white woman who was challenging a Black man =96 let alone a Black man with so many friends in high places at WBAI.

This situation continues today.

Of course, sometimes a Black man will be disciplined for the "inconsequential" act of assaulting a woman. But he has to be a Black man who has lost his friends in high places. For example, let us examine the case of Clayton Riley.

Mr Riley is a Black man, a long-time WBAI producer "famous" for assaulting woman. Yet he kept his air-time on WBAI for many years, in spite of physical abuse, profane language, and anti-White racist remarks. Yet he was fired by WBAI for launching a violent physical attack on a woman, in full view of the public, at an earlier PNB meeting =96 just as Erroll Maitland did.

So why was Riley fired for his public assault on a woman, when Erroll was not even slapped on the wrist for his?

Because Riley had committed the foolish mistake of assaulting =96 not just any woman, or "just" a White woman =96 but a Black woman. And one who also happened to be even more highly placed than he, since she was a director of the Pacifica National Board. So in this case, it wasn't justice that triumphed, but simply power politics.

All things being equal, therefore, and absent any special considerations of power or cronyism, an injustice committed against a White person at WBAI, does not seem to generate much concern either among the Black leadership of WBAI, or among their White supporters who pander to them because they need their support to keep their jobs at the station.

Sadly, the comments and behavior of Erroll Maitland are not much different in tone from offensive comments and behavior by others at WBAI, both on and off the air.

For example, Program Director Bernard White allows anti-White remarks and other personal attacks to go out over the air without any comment or explanation or context. In effect, this is tantamount to encouraging and abetting such comments and behavior.

Here is my own personal experience with Bernard White and Erroll Maitland. Shortly after the LSB election in February 2004,

Mr White went on the air with Erroll Maitland and began to disparage, by name, some of the elected members whom he did not like or who had criticized some of his programming decisions in committee meetings or on the list-servs.

Abusing his access to and control of the airwaves, he proceeded to talk about me as one of the "rich people who had bought the elections" [this from memory; the actual sound clip is posted online]. Then he referred to me as "Steve 'mailing list' Brown," falsely implying to his listeners that I had improperly used the station's mailing list to get myself elected.

White then ridiculed others who were elected, as in "Paul=96are you crazy [i.e., for electing him] =96 DeRienzo" and as in "Carolyn 'Bird'" =96 whose name he deliberately mangled, and which he well knew was not "Bird" but "Birden."

And then he pretended he could not pronounce the name "Miguel Maldonado," former LAB chair, and current LSB member, whose name Bernard White had pronounced several thousand times in the past, on and off the air, with no apparent difficulty.

White also spoke about how some people "want to change the complexion of Pacifica, physically as well as politically" =96
a coded bit of race-baiting of the kind that he frequently makes to inflame and confuse his audience, as if to suggest that Pacifica and

WBAI are in imminent danger of a coup led by White supremacists, when in fact WBAI and Pacifica are among the most diverse and least racist entities in America.

Then there is the incident in which Bernard White fired Robert Knight as the host of Wakeup Call at the end of last year (in order to take the job himself, usurping over 15 hours of air-time each week =96 more than three times that of any producer =96 in direct and flagrant violation of WBAI's union contract with AFTRA and its agreement with USCOC).

As Knight related it to an audience of 100 WBAI listeners, whom I had invited him to address on the subject, and as he repeated in a widely circulated public letter, Bernard White had warned Robert Knight that "You're playing too much White-man's music on your show" -- and promptly fired him the next day. Forget the cause and effect, and simply look at the words.

But Program Director Bernard White does not limit himself to words or innuendo. He too, like his friend Erroll Maitland, resorts to physical intimidation, as described below.

Many of you know that Mike Feder was a broadcaster on WBAI for over 25 years.

He is not an admirer of Bernard White, and they differ in how the station should be run. Feder often made his views known in private, and Bernard White did not approve. Recently, White began harassing Feder consistently around the station.

Then, abruptly, about 2 months ago, Feder left the station without explanation after 25 years of uninterrupted broadcasting.

When Feder was finally prevailed upon to explain, he did so on the air.

I found what he said to be shocking, but evidently, in spite of the many complaints about
Feder's departure, management did not.

Here is what Feder had to say about his reasons for leaving WBAI. This is just one of numerous incidents he recounts.

Please bear in mind, when you read the following, that Bernard White stands 6-4 inches tall, and probably weighs more than 300 pounds. And that Mike Feder is about 5-4 inches tall, and weighs less than 140 pounds.
<BEGIN QUOTE>
"The last two times I came into WBAI to do my show, Bernard, who really had no business there on Sunday mornings, followed me into the bathroom, cornered me and stood about two inches from my face, looming over me and glaring at me, even blocking my way out of the bathroom. After a minute or so , he stepped aside, but when I went to leave he followed me, banged into my heels and followed right back into the station. He used to, even before these two Sundays, come in and just stand there glaring

at me through the glass of the studio... Bernard has a habit of putting his bulk too close to people he doesn't approve of--looming over them. Its just physical intimidation."
<END QUOTE>

Another example, which many will remember hearing about, is Grandpa Al Lewis' on-air account of how Djabel Faye, after becoming Program Director, ran up to Grandpa outside WBAI's control room, shoved his fist in this 85- year-old man's face, and screamed at the top of his lungs, "I have the power over you now, White man!" Faye was not disciplined or even reprimanded for this outburst.

Returning to Clayton Riley: For years this Black program host would openly and loudly taunt White programmer Bob Fass, by calling him "my bitch" in front of other staffers =96 with no response from management or anyone else at the station.

Riley also physically attacked Robert Knight in WBAI's studios, yelling and shouting at him that, "Amy Goodman is a White bitch and you kiss her ass" Again, without consequences.

Clayton Riley, as I alluded to above, had a long history of abusing women, especially White women at the station. (I believe that one woman specifically left the station for this reason.) Although complaints were filed, they were never acted on. For WBAI's management team evidently did not care, or felt it was not politically expedient (or not to their liking), to investigate assault charges by a White woman against a Black man.

Although Clayton Riley's career of verbal and physical abuse spanned Valerie Van Isler's tenure as General Manager, and also the tenures of Samori Marksman, Bernard White and Djabel Faye as Program Directors, no action was ever taken against him by any of them, either for his racist commentaries or his physical violence.

He was supported and protected for years =96 regardless of how many complaints about his anti-White racist remarks and physical abuse were made by staff and listeners =96 until he committed the unfortunate "tactical" error of attempting (as described earlier) to punch out a Black(!) Pacifica National Board member (a female national board member, of course) at a public meeting, on a national radio hookup, in front of an audience of 500 horrified onlookers, during the New York meeting of the Pacifica National Board.

Another example. Just recently, a virulent public race-baiter was promoted to reporter on WBAI's news staff. His name is Fred Nguyen. Of all the anti- White racists at WBAI, Nguyen is among the crudest and most straightforward (as you will see from the quotes that follow, three paragraphs below).

Program Director Bernard White was well aware of Nguyen's 4-year history of virulent =96 and very public =96 anti-White outbursts on the list-servs, and at public venues throughout our signal area.

(Especially after he received a copy of my expos=E9, "When is a racist not a racist at WBAI?" that cited those remarks in detail.)

I suppose we should regard Nguyen's promotion to on-air reporter as =96 what? =96 a reward by the Program Director for good behavior? A recognition of his exemplary service as "attack dog" for the tiny clique of partisans that maintains control of WBAI's management and internal administrative processes by labeling all opponents as "White supremacists"?

Does no one feel that it shreds the credibility of our news department to have an on-air reporter like Nguyen, who is on public record as hurling thuggish racial epithets, like the following:

=96"self-selected white navel gazers,"1

=96 "white know-it-all lefties," 2

=96 "white suburbanite,"3

=96 "White supremacist,"4

=96 "WBAI is ... a...COLORED community,"5

=96 " [white] bigot,"6

=96 "[this is] a white people's list"7

=96 "angry white man,"8

=96 "white boys,"9

=96 "the white man's problem that you and the members of your pack demonstrate,"10

=96 "white men like you,"11

=96 "white ageing guys,"12

=96 "ageing white leftists,"13

=96 "Your theory of democracy is ... all about white power,"14

=96 "[you are] a self empowered white man who judges other cultures through the lens of a historical predisposition to daily lynching,"15

=96 "No wonder people of color don't trust the white man,"16

=96 "[You support the] lynching mood that is being unleashed against ... [someone] supporting black radicals and people of color"17

=96 "Hitler, himself, used such methods [as yours] ... You're going to have to do better than proposing insipid visions of a color-blind world,"18

=96 "people who oppose affirmative action and call it "quotas" ...[are] racists,"19

=96 "[he] believe[s] that Pacifica should be controlled by white people since Lew Hill happened to be white,"20

=96 "[You] want [to]...reestablish white supremacy in the network, with some colored tokens, just to save the appearances,"21

=96 "[He] and his friends [are] ... trying to disenfranchise the mission constituencies, by denying them a seat at the Pacifica table. White people are always better at 'winning' elections because they have become masters at the art of trickery,"22

=96 "You and your friends are trying to perpetuate white power over Pacifica, and my role is to stop you,"23

=96 "I have a serious problem with the ...warped view ... you and your colorless friends have of diversity,"24

=96 "With all that color blindness and guilt surrounding these smart people ...there is an identity crisis in some so-called white leftist quarters,"25

=96 "the climate of 'whites know best' in this movement is responsible for keeping many constituencies away,"26

=96 " Stating that self-respecting people of color would stand for the racial antics of some of the leaders of the EC takes dream as reality,"27

=96 "she makes a lot of demands for someone who represents perhaps a handful but a vocal group of white folks,"28

Who were the above remarks by Fred Nguyen directed against? Every single one of those anti-White smears quoted above was specifically directed, by name, against Carol Spooner and Leslie Cagan (both at the time directors of the Pacifica National Board), Larry Romsted, Dave Fertig (another PNB member), myself, and many others during the struggle to create a new set of bylaws for the Pacifica Foundation.

He has not stopped making these remarks. And he is still a reporter on WBAI's airwaves.

Then there is Janice K Bryant. This WBAI producer was a member of the search committee assigned to find a new general manager for WBAI about 2 years ago.

One day, while on the air, this prominent, influential, and respected WBAI producer

=96 a frequent on-air co-host, personal friend of Bernard White, member of the WBAI LAB and also a national director of the Pacifica Foundation (!) =96 nonchalantly informed her listening audience (actually boasted) that

"... the only way there'll be a white station manager at WBAI is over my dead body."

She was forced to resign from the search committee =96 not because WBAI's management felt she had done anything improper =96 but because management was informed by WBAI's legal counsel that if she remained on the committee the station would be liable to lawsuits from

White candidates who did not get the job, and that the station would probably lose those suits and be subject to huge financial damages.

Here is another stupid (but not less dangerous) recent example of "white- trashing"on WBAI's airwaves.
I refer to Kamau Kalfani's program,

Under the Learning Tree (or Under the Bigotry, as many call it) on which a supposedly serious discussion was predicated on the notion that the sexual inadequacy of European White males is why Whites are predisposed to kill Blacks.

And that Black women shouldn't seek out White men as sexual partners, because they smell bad as a result of not having any "smelanin."

The audio clips are up on the net, uploaded by talkingsticktv@yahoo.com [ca. 30 minutes into segment wbai-200030731-0259.mp3].

On another Kalfani show of only a few months ago [see

http://www.radio4all.net/proginfo.php?id=3D6093 ] WBAI listeners were treated to a learned presentation in which it was pointed out that the word "Jew" was derived from the word "jewelry." )

Or perhaps vice-versa, I never quite understood which.) And that "the Jewish community is the spoiled brat of America."
And not more than a week ago, a WBAI producer attacked me, at an LSB Membership subcommittee, for placing ads =96 that I had created to obtain new WBAI members =96 in publications such as

The Nation magazine and The New York Review of Books. (The ads offered CDs of a WBAI broadcast of Gore Vidal as a membership premium.)

What was her reason for attacking the ads (the first of which, incidentally, has already netted the station approximately $18,000 in profit and 500-600 new members in just 6 weeks)? She explained (in front of the other 10 or 12 committee members) that "we don't need any more rich liberal White men in WBAI's membership."

She also suggested that perhaps I ran those ads, right before the upcoming LSB elections, in order to "pack" our membership rolls with "rich white liberals who won't be expected to vote for people of color."
Is this supposed to be a "respected" WBAI producer, role model, on-air personality from whom listeners are supposed to learn about tolerance, diversity, harmony between the races and fulfillment of the Pacifica mission?

As you see from the above, there is simply no shortage of offensive behavior and language in and around WBAI, most of it supplied by a tiny segment WBAI management, producers and staff =96 who, unfortunately, completely control what goes on the station's airwaves, what appears on the station's website, what appears in the station's e-Newsletter to listeners, and what appears in the station's Folio that is mailed to the listeners.

So I could go on and on with examples. .
But why bother? So many listeners know about these and similar examples of race-baiting, "White-trashing," anti-Semitic remarks, and physical assault that I do not need to belabor the claim.

I can only deplore the fact that even good people at the station have become so desensitized =96 or are in such denial =96 that they cannot even hear the ever-increasing onslaught of racist garbage that is being dumped on WBAI =96 dumped with what, I must assume, is the permission, if not outright approval, of our program director and the rest of our management team.

I don't know if everyone has seen it, but there is a Code of Ethics on the Pacifica Foundation website. It proclaims that
"the organization [Pacifica] shall avoid the following: Messages which fuel prejudice, hatred, or intolerance."

Clearly the best way to "avoid" such messages, is to avoid tolerating or associating with those who preach such messages.

That means taking a principled stand. It means not allowing ourselves to become moral cowards =96 whether out of "White liberal guilt" or out of fear of becoming the target of vicious and manipulative name-calling and race- baiting.

One way to confront the problem is to stop describing it in "abstract" terms and being naming those who are responsible. How many are willing to do that?

Not many. Some of our leaders keep retreating behind convenient, evasive (and risk-free) requests for ever more extensive "factual substantiation" of race-baiting, "White-trashing," anti-Semitic remarks, and physical abuse before they will act =96 which means, of course, that however many verified instances of such racism are brought forth, they will never be accepted as "enough" or "sufficient."

Or they will be characterized as the "only" instances =96 the rare exceptions rather than the common rule. Or they will simply be brushed aside, with assurances that, if such "transgressions" ever did occur at WBAI in the past =96 they are no longer occurring now.

So we arrive at this very practical question. How do we gather enough "factual substantiation" of race-baiting, "White-trashing," anti-Semitic remarks, and physical abuse to justify action by management, by the LSB, or by the Pacifica National Board? And by action =96 let me make it absolutely clear =96 I mean immediate and outright dismissal (for "cause") of those who have violated their responsibility not to "fuel racial prejudice, hatred, or intolerance" at WBAI.

Unfortunately, most listeners do not have the foresight, or the resources, to sit before their radios day after day, with tape recorders and memo pads in hand, in order to memorialize offensive anti-White statements as they occur =96 complete with references to the program, the time, the date, and the track =96 so that such statements can be instantly located and publicized, as was able to be done with the "lily white/nigger" statement, quoted above, of Erroll Maitland (who even his friends ruefully admit is a stone cold racist, although only behind his back).

The inability to pull racially offensive air-checks out of a hat, on a moment's notice, does not mean that such remarks have not been made in profusion, by many WBAI personalities, on numerous occasions.

It is sad that a member of the LSB, when shown Maitland's remark about "lily White liberals" and "niggers," said that

"... if Erroll [Maitland]'s [racially offensive] statement had been broadcast over WBAI, there would have been a major protest from [our] listeners, black and white."
Does anyone believe this now?

The fact is, WBAI listeners have indeed been protesting this abusive language and behavior for years? They have complained -- by the hundreds and perhaps thousands -- via postal mail, email, telephone, at LAB meetings, at LSB meetings, at bylaws meetings, at Concerned Friends meetings, and even (when possible) on call-in shows to Samori Marksman, to Valerie van Isler, to Djabel Faye, to Bernard White.

But they were simply ignored =96 or worse, told in stinging on-air rebukes that they were talking like white supremacists who can't stand to see a strong Black man (or strong Black woman, as the case might be) in a position of power or authority.

What complicates this issue even further is that anti-White material is not usually broadcast in as crude and as stupid a manner as Erroll has done (although sometimes it is).

Usually it is a matter of suggestion, or inuendo, or double meanings =96 in a context that gives the perpetrator a cloak of "deniability," such as will allow him or her to look one straight in the eye and say, "You must be mistaken; that's not what I meant at all."

I would now like to add a "pre-emptive" footnote:

I am sure that there will be some who will not attempt to answer the above arguments with counter-arguments. They will, in fact, ignore my arguments and simply claim that I am a racist. Their proof will be =96 simply =96 the fact that I, a White person, have dared to criticize a Black person.

This kind of thing is happening more and more at WBAI.

I see it at LSB meetings -- where, two sessions ago, you may remember, a woman in the audience was asked by a board member, in a rather neutral way, merely if she had jotted down a particular point, only to have that woman jump up and launch into a 13-minute tirade, at the top of her voice, about how dare that board member talk to a Black woman like that, and how she would never have spoken to a White woman this way, etc.

And I see it at committee meetings -- where, as was reported just a few weeks ago, racially inflamed acrimony over a matter that had nothing to do with race resulted in screaming fits, walkouts, and, if I heard correctly, some chair flinging.

I attribute this increasing incivility and race-baiting, in and around the station, to a corrosive atmosphere that has been encouraged and enabled by crude and inflammatory racist statements (there is no other word for them) of people like Erroll Maitland, and the much subtler but no less destructive utterances of people like Bernard White, who use the airwaves to hint at some vast conspiracy to suppress people of color and turn WBAI into a White fiefdom.

That is the gist of three years of innuendoes, sly digs, and unflattering remarks by the program director on air about certain people in the WBAI community, and more recently and more frequently about members of the Local Station Board, often by name, in unflattering contexts.

Mr. White has consistently used the airwaves to undermine the Pacifica bylaws, the credibility of the new LSBs, and -- most insistently -- the authority, appropriateness, and validity of listener participation in WBAI governance. And race-baiting has been his "argument" of choice. (As when he speaks on-air about sinister people among us who seek to "change the physical complexion" of Pacifica.

Virtually all of the racially offensive quotes I used as examples above seek to instill in listeners' minds the false belief that Blacks are a tiny and beleaguered minority at WBAI, under constant threat of being submerged by an onrushing tidal wave of White racist listeners who are frantically attempting to "take over the station" and "push people of color out the door."

That this scenario is not only untrue, but so far removed from reality as to be ludicrous on its face, has not seemed to deter Bernard or Erroll or some of their acolytes at the station from behaving as if the anticipated White assault was not only a reasonable prospect, but was in imminent danger of become an actuality in the very moment.

The fact is that for the last 15 years the station has been almost totally run by African Americans and people of color. That includes all of its top paid and unpaid positions, as well as management itself.

And the myth of a White Conspiracy to take it over is just that =96 a myth.
No one cared that WBAI was almost totally run and staffed in its top echelon management and departmental positions by Blacks. Because WBAI wasn't a "Black station." It was simply a good station.

Now it is a station with a narrow and strident agenda whose management is attempting to sow racial disharmony where is did not exist before. Mostly this appears to be a tactic for gaining personal power.

Just for the record, people of color now hold virtually all of the top paid positions at WBAI. To wit:

ADMINSTRATIVE: General Manager, Don Rojas; Business Manager & Fiscal Officer, Indra Hardat; Accounts Payable & Assistant to the General Manager, Yvonne Singh; Subscriptions Director, Evelyn Andino; Premiums Director, Paul Ashby; Premiums Assistant, Lambert Marksman [deceased

6/5/04]; Outreach Coordinator, Bok-keem Nyerere

PROGRAMMING: Program Director, Bernard White; Assistant to Program Director, Shirley Irons; Public Affairs Director, Kathy Davis; Producer of Wakeup Call, Sharan Harper; Host-Producer of Wakeup Call, Deepa Fernandes; Host-Producer of Wakeup Call (Fridays), Mario Murillo; Host-Producer of TalkBack, Hugh Hamilton; Co-Host-Producer of TalkBack (Fridays), Earl Caldwell

NEWS STAFF: News Director, Jose Santiago; Producer-Host of Election Coverage, Robert Knight; Reporters, Eric Williams, Ian Forest, Barbara Day, Gail Walker, Fred Nguyen

OPERATIONS STAFF: Chief Announcer/Engineer, Michael G. Haskins; Maintenance Engineer, Graceon Challenger; Production Engineer, Dred Scott Keyes; Engineers, Errol Maitland, Shawn Rhodes, Sidney Smith, t-dub.

But the myth of the threatened Black "minority" at WBAI has been a useful myth for those who seek to sow hatred and divisiveness as a means of maintaining their personal power and privilege.

Unfortunately, just because something is not true does not mean that a large number of people cannot be made to think it is true.

And although the alleged spectre of White Racism at WBAI is no more real than the alleged spectre of Weapons of Mass Destruction in Iraq, people like Erroll Maitland and Bernard White are trying very hard to make it appear true..

Sadly, this has simply encouraged people to shout "White racist!" when they have a disagreement =96 instead of debating the actual issues involved.

And eventually, even those being falsely accused may start to feel vaguely guilty =96 and begin to wonder if perhaps they actually had been doing what they damn well know they were NOT doing.

That is analogous to right wing "demonizing" techniques =96 as when people like Rush Limbaugh and his Fox network cronies bemoan the supposedly overwhelming preponderance of "liberal media" in this country, until this total fabrication (and could anything be further from the truth?) is almost totally believed by most of the electorate.

It is sad to see at WBAI. And I look forward to the day when it this is no longer the case.

Regards,

Steve Brown

x-posted as a community service. ixpho:sounds like the guys who destroyed wlib are now setting out to destroy wbai.

possibly the fred newmanite cult who fronts for extreme right-wing interests yet represents as a black-run revolutionary party with a bit of anti-semitism thrown in but which is actually run by an all-white, all-male all_self-hating-male Jewish cabal whose sole interest is their control of their harem, their personal privilege and enlarging the group for money prestige and control over more people by infiltrating grassroots organizations to take over or to destabilize depending on who or what is the highest bidder/prospect.

time to maybe buy amy goodmans book and make checks out to infividual programmers (dj's) you support on wbai and definitely for the lady who caught seizures, for the lady to sue.

i too have heard some dj after bob fass's show  play gangsta rap with all the 7 words kept in and with the phrase clearly repeated many times "kill the P" where it was unmistakenly meant to mean "kill the police" which if any listener who is demented claims as a defense they were goaded by the music and comments of a particular dj on wbai would spell the end of wbai,

yet when i complaineof a similar instance to keyes and pointed out on-air that it was a licensure and litigation and liability issue, I was told "well you can always turn the dial" and was cut off.

so much for anyone in charge of wbai caring what happens to wbai other than what they can loot from it in the short run till their fuhrer's contract runs out.

racism is always dumb.
and those who espouse it always stupid...and usually do so to cover up their own psychic or personal integrity deficits.

but when people are allowed to use force to enforce their barbarity, well, and lies to justify such bullying, maybe it is time not to  pay them to do so. ix_pho.

CCS,

The NRA has had both Radio and TV Programming for several years.

They are now consolidating their efforts into a Network and then will provide 'content' for distribution to Radio and TV Stations; including Cable and Satellite Systems.

The NRA "Network" will be around for many years to get out the NRA's Message to the American People.

Naw, they'd just shoot their mouths off.

Come on, someone had to say it. ;-)

I always thought, shouldn't there be a place at NPR for Air America?  I
know, wherever I've lived, there being at least half a dozen Public FMs
(88.1-91.9) that could take some of AA's broadcast day.

Perhaps because Air America has every intent to remain in
business--they just happened to come on the air during an election
campaign.

Perhaps you can tell us what your problem with the First Amendment is.

This kind of theory is interesting but pretty far-fetched. It's much simpler than that. Awesomely bad management with a truly faulty business model. It's that simple.

I think it was a bunch of cocky TV "radio can't be very hard" people who came to realize that lying about their bank account and ridiculing the head of the two major markets they needed the most wasn't the best approach.

If Rush Limbaugh, with 600+ stations, can't influence an election, Air America with 6 isn't going to have much better luck.

Rich

The purpose of these posts is to expose most of the whole lot as a bunch of pathological liars. Those few who don't lie are reluctant to publically point fingers at the liars and expose those hosts do. I'm talking about those who continually commit FCC broadcast law violations. (Like lying about consumer products for personal profit and dispensing false medical "information" , thus making people sick or even die!) These guys (and a few women) are members of a "good-ole boys talk show host club" who adhere to an unwritten code- to not step on each others toes. Frankly, those few who don't use their broadcast pulput to expose the lies of their fellow broadcasters-have no spine or credibility in my view!

I'll post about 50 of them here in the next few weeks.

O.K. here we go:

1. "Styrofoam is bio-degradable" (Said by a national talk show host in "rebuttal" to those who call for a ban on the use of styrofoam packaging because the stuff ends up along the roadside and in peoples' yards- mainly because the industry refuses to take meaningful steps to promote recycling.) The host may have been paid for promoting the use of styrofoam by lying about its properties.

2. "Dioxin is NOT a health hazzard!" (Yeh, sure! Neither is breathing asbestos!)

3. In defense of S.U.Vs: "Detroit is now making fuel-efficient S.U.V.s" (Yeh, sure! )

4. Just after the Rhode Island night club fire that killed all those people-in reply to a caller: "Sir, that night club HAD MET ALL LOCAL FIRE SAFETY CODES!"

5. "There is nothing that you or I eat that is on the endangered species list!" (Yeh, sure- except Cutthroat trout, sturgeon, sockeye salmon, key deer, oyster mussel and a few hundred others!)

6. "50% of our oil comes from Saudi Arabia." (The correct answer is

17%)

7. "Half the price you pay for a new car from Detroit goes to pay for
the health care plan of auto workers!" (yeh, sure!)

LOTS MORE TO COME. Talk radio is saturated with lies!

Or, he simply may be stupid or just uninformed. I have not seen much
of a
styrofoam lobby out there.
>
> 2. "Dioxin is NOT a health hazzard!" (Yeh, sure! Neither is

Stupid. Talk hosts are hired for entertainment value, not knowledge
(witness
Dr. Laura, a physiotherapist).
>
> 3. In defense of S.U.Vs: "Detroit is now making fuel-efficient
> S.U.V.s" (Yeh, sure! )

They are. There are several hybrid SUVs in pre-production stages.
>
> 4. Just after the Rhode Island night club fire that killed all those

As to the building, apparently they had. The issue was with the
pyrotecnics
of the band.
>
> 5. "There is nothing that you or I eat that is on the endangered

None of which have I eaten, now or ever. "You and I" could easily mean
that
very few of us dine on sturtgeoun, venison, etc.
>
>  6. "50% of our oil comes from Saudi Arabia." (The correct answer is
> 17%)

Stupidity, not necessarily a lie. Most of the US' oil comes form
domestic
sources, Canada, and Latin America.

>  7. "Half the price you pay for a new car from Detroit goes to pay for
> the health care plan of auto workers!" (yeh, sure!)

Wrong, but not that far off. A huge percentage goes to fund pensions
and
health care for present and past workers.
>
>  LOTS MORE TO COME. Talk radio is saturated with lies!

Or, simply, stupid hosts engaged in discussions on subjects they are
not
fully informed on.

You are making too much out of small issues.

Actually, there were fire code violations. The most important of these
was that the stage walls had been lined with flammable packing foam as a cheap form of sound insulation. Definitely against fire code; problem
is, the local fire inspector didn't notice it on the last inspection he
did there.

To bring this marginally back on topic... Among the many parties being sued is a radio station which gave away tickets to the show. (Never underestimate the ability of lawyers to go fishing after the deepest pockets they can find...)

Despite your cuteness, in case you haven't read, some independent
interpretations of trends show that Franken is *beating* Limbaugh in
New York and in the Chicago market before AA was pulled by
Multi-Cultural, the audience doubled to a 2.0, which may not be much
compared to WLS but is still better than *either* sports talk station
in town and in the neighborhood of the mid-rank numbers NPR station
WBEZ gets.

It's too early to tell, but Air America may just succeed despite all
of their bumbling.

The only "independent interpretation of trends" that matter are those that are accepted by ad agencies, especially in the network business.

To my knowledge, there are none, especially ones that break out hour-by-hour figures.

Rich

This is not an endorsement of Rush, but I'm not sure I agree with your premise there.   While the Limbaughs of the world perpetually are preaching to the choir, IMO they are responsible for getting a fair amount of people to the polls who might otherwise sit home on their a**.  To me, that's at least potentially influencing an election, particularly a close one.

I have no problem with the First Amendment.  I have just stated that
I believe that the people behind AA have no intention of "making it
a success".  Of course, you can't admit that, and will deny it
whenever it comes up.

>I'm talking about those who continually commit FCC broadcast law violations.
(Like lying about consumer products for personal profit and dispensing false
medical "information" , thus making people sick or even die!)<

Since you're so cock-sure this stuff is against the law, please give an exact
citation of the laws you think these people are breaking.

I'm setting up an Optimod am 9100 B.
I want to set it up to have a lot of punch (compression) and get the
loudest possible audio out of it, while maintaining a clean sound. I
have heard stations with them with aggressive processing that sound
great and I want to mirror that sound.

Does anyone have experience setting one up.  If so, what settings do
you recommend.
Thanks!

Amateur Radio Newsline™ Report 1402  June 25,  2004

The following is an advisory and not necessarily for air.  Ladies and gentlemen, Amateur Radio Newslines' Support Fund Administrator, Andy Jarema, N6TCQ:

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters. In the month of September of last year we heard from Benton Bonney, W4PE of Orlando; monthly contributor Joseph Bartzi, Jr., KC8DKF of Columbus, OH; the St. Charles, MO ARC, WB0HSI; monthly contributor William Walters, WA2IBM, of San Jose; monthly contributor Scott Hensley of the Area Communications Team, also in San Jose and the Anchorage ARC.

Of special mention was support received in memory of the late Roy Neal, K6DUE, by the Brackett family of Cerritos, CA. Our thanks to Sharyn, Jim, KE6FVN, David, KE6OPK, and Lynn, WA6HBS.

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a 501c 3 California non-profit corporation. FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org. That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1402 with a release date of Friday, June 25 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Changes coming to ham radio in New Zealand and maybe to the 40 meter band here in the United States. Find out the details on Amateur Radio Newsline report number 1402 coming your way right now.

(Billboard Cart Here)

**

RESTRUCTURING: A NEW HAM RADIO IN ZED-L

Big changes appear to be in store for ham radio in New Zealand. This, as the current licensing system is replaced by one test and one class of ham radio operator. ,Jim Meachen, ZL2BHF, is in Auckland where its all taking place:

--

Here's the bottom line. Our current New Zealand Amateur Radio licensing system is being renovated. We now have only one class of ham radio license in Zed-L called the General Amateur Radio License. This is just one of many changes coming to ham radio down-under as New Zealand radio amateurs discover the full outcome of their regulatory authority's review of the Amateur Radio service. It's all good!

The changes started on June 17th when a new revised Schedule attached to the Zed-L license came into effect. A Schedule here in New Zealand is kind of like a new set of rules. That's the first step. Other changes will take effect over the next 18 months or more. Many long standing problems are being eliminated and some of the changes are believed to be world firsts. Under the new structure there will be only one grade of Amateur operator license in New Zealand. That's the General Radio License that I mentioned earlier. One license means only one test needs to be administered.

A newly-licensed amateur will have immediate access to all amateur bands below 5 MHz and to all amateur bands above 25 MHz. After getting experience over 3 months and with at least 50 contacts logged, access is then permitted to all amateur radio bands.

All existing Limited Amateur licensees automatically became General Amateur licensees on June 17th irrespective of what is written on their existing licenses. There being only one license grade, callsigns will no longer indicate a class. There is already an established procedure to request a change of callsign if a licensee so wishes.

All amateur bands remain the same but a newly-extended Low Frequency band 130 to 190 kHz is being listed for the first time as an amateur allocation.

The permitted maximum transmitter power output for an amateur station on all bands is 500 watts P-E-P. With only one figure, the maximum power level in New Zealand is now mode-independent.

How about visitors to New Zealand? Touring hams holding a current amateur certificate of competency, authorization, or license issued by another administration, may operate an amateur station in New Zealand under a General User Radio License for visitors. A licensed visitor will be granted similar privileges to a New Zealand resident station for a period not exceeding 90 days. The present country-to-country reciprocal license agreements will disappear in time as more countries directly recognize the licenses issued by other administrations. This will make cross-border travel by radio amateurs a lot easier than it is today.

There are now minimum rules and restrictions for Amateur Radio in New Zealand and the future is positive.

For the Amateur Radio Newsline, I'm Jim Meachen, ZL2BHF, reporting from Auckland.

--

With one license exam, one license grade, and with new and simplified procedures, New Zealand telecommunications regulators say that they have positioned that nations Amateur Radio Service for an exciting future. (ARNewsline(tm), ZL2BHF, Q-News)

**

RESTRUCTURING: FCC RELEASES NPRM ON 40-METER CHANGES

The FCC says pending changes in the 40-meter amateur band as a result of the 2003 World Radiocommunication Conference will improve spectrum efficiency. It said so in a rule making notice dealing with the 40 meter band. Norm Seeley, KI7UP, has the latest:

--

The ARRL Letter reports that this remark came in an FCC Notice of Proposed Rule Making in ET Docket 04-139. This is an inquiry that seeks public comments on proposed rule changes to complete domestic implementation of various World Radiocommunication Conference allocation decisions made in 2003. Among them the future of the Amateur Service 40 meter allocation.

The regulatory agency says that it anticipates that administrations in I-T-U Regions 1 and 3 will, in the near future, authorize phone emissions in the 7 point 150 to 7 point 200 MHz band segment. The FCC notes that the ARRL has requested that the United States frequency segment for phone emissions be expanded to 7 point 125 to 7 point 300 MHz. The FCC says that authorizing voice operations in this band segment would permit same-frequency US-to-DX contacts, resulting in increased spectrum efficiency.

The N-P-R-M also addresses the deployment of Earth Exploration Satellite Service-Active spacecraft in the 70-cm band. The Commission says that this operation should not cause harmful interference to, nor claim protection from, any other services allocated in the band in the United States. This includes the Amateur Satellite service as well as any others.

For the Amateur Radio Newsline, Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Comments in the proceeding are due July 16, with reply by August 2. Interested parties may view the entire NPRM, file comments and view comments filed in ET Docket 04-139 via the FCC's Electronic Comment Filing System at www.fcc.gov/cgb/ecfs/  (ARRL)

**

## RESTRUCTURING:  NO VANITY CALLS IN THE UK RIGHT NOW

Vanity callsigns 'are unlikely to be introduced in the United Kingdom before March of 2006.  This, according to the Radio Society of Great Britain which says that for the last three years it has been in discussion with licensing authorities over the introduction of such a program for U-K amateurs.

The latest word is that telecommunications regulators have informed the RSGB that due to software issues it is unlikely that vanity callsigns can be introduced before March 2006.  In other words, the waiting goes on.  (RSGB)

**

More news in a moment, but right now its time for you to identify your station.  Linda Reader, N-7-H-V-F, if you please:  "From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the W7FP repeater serving Salt Lake City, Utah."

(5 sec pause here)

**

## THE BPL FIGHT:  ARRL JOINS IOWA HAM IN BPL INTERFERENCE STRUGGLE

The ARRL has joined in the fight on behalf of Iowa amateur and ARRL member. This, following complaints from Jim Spencer, W0SR, of Cedar Rapids, that he has suffered severe Broadband Over Powerline interference for more than two months.

According to the ARRL Letter, a formal complaint to FCC Enforcement Bureau Chief David H. Solomon calls on the Commission to order Alliant Energy's B-P-L field trial system to shut down. It also demands that the agency fine the utility $10,000 for violating the Communications Act of 1934 and FCC's Part 15 rules.

Alleging that the ongoing interference is both harmful and willful to one or more licensed radio station the ARRL asked Solomon to intervene on an emergency basis. ARRL Chief Executive Officer David Sumner, K1ZZ, who signed the letter of complaint, said Alliant Energy has been aware since March 30th. Thats the date it installed Amperion BPL equipment in Spencer's neighborhood and the interference began. (ARRL)

**

ENFORCEMENT: EX-KG6IRO FINED $10000 FOR UNLICENSED OPERATION

A man who challenged the FCC and the southern California ham radio community has been fined $10,000. Amateur Radio Newsline's Bruce Tennant, K6PZW, has the latest on a person who the F-C-C has told to stay off the air:

--

The FCC has issued a $10,000 Notice of Apparent Liability to Monetary Forfeiture -- that's a fancy way of saying a fine -- to Jack Gerritsen, the at least temporarily former KG6IRO. This, for operating a radio station in the Amateur Radio Service without the authorization from the FCC to do so.

In a June 15th letter to the Bell, California, former licensee, the regulatory agency notes his past record of non compliance with, among other things, its orders to keep off the air. It also notes his previous conviction for interfering with police radio communications in 2000 and the November 14, 2001 decision by the FCC to set aside his ham radio ticket based on complaints about the operation of his stations. Kit also raises questions regarding his qualifications to be a Commission licensee in light of his 1999 arrest and 2000 conviction on the police radio jamming charges.

At the time of the license set aside Gerritsen was warned that he has no authority to operate radio transmitting equipment. That doing so would be considered to be a violation of Section 301 of the Communications Act and could subject him to monetary penalties or imprisonment.

But on December 9th 2001, the Bell, California Police Department notified the FCC that it had received complaints against Gerritsen for making radio transmissions. On December 28th of 2001 the FCC's Los Angeles Office issued a warning letter to Gerritsen for unlicensed operation, and basically told him to get off the air. On January 2, 2002 Gerritsen replied and asserted that the set aide of his license was improper. On January 29th, the Bell Police and the California Highway Patrol arrested Gerritsen on a probation violation charge. On May 7th of 2002 he was found guilty of the parole violation and sentenced.

Soon after his release on July 28th of 2003 the FCC began getting complaints of unauthorized transmissions over local Los Angeles area amateur, business band and public safety repeaters. The complaints alleged that the person making the transmissions identified using the call letters KG6IRO. An investigation was launched. This lead to an agent positively identifying Gerritsen on November 6, 2003 as a person holding a transceiver while the investigator recorded the radio transmissions he was making. The investigation continued with the FCC identifying Gerritsen as the interference source on November 7th 2003 and on February 9th of this year.

Now, based on what the FCC cites as conclusive evidence it has levied the $10,000 fine against Gerritsen for willful and repeated violations of Section 301. As usual, Gerritsen was given the customary 30 days to pay up or to file an appeal.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

Word is that Gerritsen has responded to the FCC with a demand that the agency rescind the fine. He reportedly claims that his license granted on November 14th 2001 has not been terminated, revoked or in any way modified to prevent him from being on the air. (FCC)

**

ENFORCEMENT: THE FCC ENFORCEMENT LOG

Gerritsen is not the only ham radio enforcement story making news this week. With more, heres the FCC's Daryl Duckworth, NN0W:

--

DO NOT READ: Audio report only. Hear it in the newscast at www.arnewsline.org

--

More ham radio enforcement news in upcoming Amateur Radio Newsline reports.

--

ENFORCEMENT VICTORVILLE CA PIRATE STILL ON THE AIR

A pirate broadcaster in Victorville, California, is still operating full time on AM 660 and FM 91.3. This, in defiance of FCC actions to shut it down.

Back on March 31st, the FCC issued a $20,000 fine to alleged station owner Stanley Mark Mayo. This, for willful and repeated violation of Section 301 of the Act for operating radio transmitting equipment without the required Commission authorization.

None the less, the stations remain on the air leading to speculation that another level of enforcement action might be taken. One that could lead to seizure of the broadcast equipment and jailing of those who put the stations on the air.

For a look at the Commission's action on these stations, see www.fcc.gov/eb/FieldNotices/2003/DOC-246123A1.html (CGC, others)

**

RESCUE RADIO: A 100 WATT TRAVELERS INFORMATION STATION AT LAX

The FCC has granted a request by the managers of Los Angeles International Airport for a ten fold power increase to their Travelers Radio Information Radio service.   On December 4, 2002, managers filed the application that asked to increase power from 10 to 100 watts.  The reason for the increase was to facilitate the airport's efforts to provide emergency communications to the traveling public in the event of a terrorist attack. The FCC has now granted the 100 watt request, due, it says, to the circumstances involved.  More on this story is on-line
http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-03-3843A1.doc
(CGC)

**

THE SOCIAL SCENE:  NEBRASKA IN JULY

Turning to the ham radio social scene, Nerbraska's Pioneer Amateur Radio Club will hold its flea market on Sunday, June 11th.  The venue is the St. Charles Parish Center in North Bend.  For more information e-mail mehaffey@dtnsped.net  (E-mail)

**

THE SOCIAL SCENE:  MARYLAND IN JULY

And the BRATS Hamfest and Computer Fest will take place July 25th at the Timonium Fairgrounds in Timonium, Maryland.  This is one of the biggies  that features more than 500 outdoor flea market spaces, hundreds of indoor vendors, free ham radio exams and much more. There is lots of information on this one on-line.  You will find it in cyberspace at www.bratsatv.org  (Press release)

**

HAM RADIO AND THE 2004 OLYMPICS:  THE ATHENS 2004 AWARD

Athens 2004 Olympic Games Awards will available for all radio amateurs and short-wave listeners who make or log a requisite number of contacts with stations in Greece.  This, during the period of the 15th of May until the 30th of September.

Special prefixes J4, SX and SY count 10 points each, normal SV stations count 5 points each and the Radio Amateur Association of Greece's HQ station SZ1SV counts 50 points. A total of 250 points is required for the Bronze Award, 350 for the Silver and 500 points for the Gold Award.

The address for applications is RAAG Award Manager, PO Box 3564, 102 10 Athens, Greece, or see the RAAG web site: www.araag.org/award2004.html (RSGB)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

AN ARNEWSLINE FOLLOW-UP: MILITARY APPRECIATION DAY

A follow-up to a story we ran several weeks ago. Thanks to the efforts of several amateur radio operators in Ft. Wayne, Indiana a message of hope and appreciation was sent via the airwaves to our military personnel around the world. Newsline's Jack Parker W8ISH has the details:

---

It's official. By proclamation, May 29th, is officially Amateur Radio Military Appreciation Day in Fort Wayne, Indiana. The event was organized to honor and show appreciation to those that serve and have served in the military and related auxiliary groups. Planning for the event started last spring and quickly grew into a nationwide effort as organizer Emery McClendon KB9IBW spread the word to amateurs and MARS operators in the US and around the world.

The key to success centered on what Amateur Radio could do to let our Military members know that people supported them. Unlike written letters, amateur radio allowed Americans, in their own voice and words, tell the troops how much they care.

To get lots of public input, event organizers searched for a special event location. The Fort Wayne Wizards baseball team got into the game by offering up a spot at their stadium and a home game crowd. The effort grew momentum when radio volunteers from three Allen county amateur radio groups joined the ranks to spread the good word.

The amateurs ran three Echolink stations, IRLP, and two HF stations along with PSK31. The event scored local media coverage from newspapers, radio and network TV stations. Indiana Governor Joe Kernan, a former Vietnam POW and Indiana's senior Senator Dick Lugar both sent proclamations. They were just two of several proclamations read in a special ceremony before the first pitch of the baseball game. Many of the 65-hundred fans on hand, took advantage of the amateur radio connection to express their support to the military stationed around the world.

Reporting for Amateur Radio Newsline, this is Jack Parker W8ISH

--

The Fort Wayne hams say their mission was a success. They now plan to make Amateur Radio Military Appreciation Day an annual event. (ARNewsline(tm), KB9IBW)

**

HAM RADIO ON THE INTERNET:  THE AOL RADIO COMMUNICATIONS FORUM

If you use America Online to get your e-mail and have never explored the Radio Communications forum pages, then you are missing half the fun.  Almost since the day AoL took to Internet, the Radio Communications Forum has been a part of the service, and its not just limited to ham radio operators either.  No matter what you radio hobby interest, there is probably a board for you.  C-B.  Scanners. You name it.  There's a place for you.

So the next time you sign on and hear the famous words -- "you've got mail" -- type in the keywords radio communications and join the other radio hobbyists around the world who make this area of AoL their cyberspace home."  (ARNewsline(tm))

**

## HAM RADIO IN SPACE:  AN ORBITAL FIELD DAY

Ham radio space travelers Mike Fincke, KE5AIT, and Gennady Padalka, RN3DT, may participate in Field Day from the International Space Station if time permits.  ISS Ham Radio Project Engineer Ken Ransom, N5VHO, sent Field Day operating instructions and pass times to the ISS support team at Johnson Space Center.  If they were on, Fincke should have been operating as NA1SS. Padalka would likely have signed RS0ISS.  Both stations would be classified as 1 Alpha operations. (ARISS)

**

## HAM RADIO IN SPACE:  ITS A GIRL

And less we forget, a word of congratulations to Astronaut Mike Fincke and his wife Renita on the birth of their second child. Tarali Fincke was born on Friday June 18th with KE5AIT himself making the announcement from the orbiting I-S-S.  (N1ORC)

**

## THE EDUCATION FILE:  THE 2004 TAPR - ARRL DCC

On the educational agenda, the 2004 TAPR and ARRL Digital Communications Conference will be held September 10th to the 12.  The venue is the Airport Holiday Inn in Des Moines, Iowa and the planners say that are now accepting papers for the conference proceedings. You do not have to be present at the conference to have your paper included in the proceedings.

Submissions are due before August 10th.  Send them to Maty Weinberg at ARRL Headquarters, 225 Main Street, Newington, Connercticut.  The zipcode is  06111 and you will find more conference information on the web at www.tapr.org/dcc  (TAPR)

**

## WORLDBEAT - INDIA:  A NEW HAM RADIO INITIATIVE

In world news. India's national Amateur Radio society says that it plans to conduct various programs to promote Amateur Radio as part of a disaster mitigation program in many venues across that country. Many local radio amateurs and clubs across India plan to back this National Institute of Amateur Radio initiative and also take part in this program.  (NIAR via Q-NEWS)

**

## WORLDBEAT - SCOTLAND:  RSGB DISTRICT NAME CHANGES

And some major changes to the two Radio Society of Great Britain Scottish Regions have been announced.  Region 1, previously known as Scotland West and the Western Isles, becomes Scotland South and the Western Isles  Region 2, previously known as Scotland East and the Highlands becomes Scotland North and the Northern Isles.

As a result of these changes, two new RSGB districts will be added to Region 1.  These are District 15 to be called Lothians and District 16, the Borders.  The Deputy Regional Manager for District 15 is Dave Stockton, GM4ZNX.  (GB2RS)

**

## DX

In D-X, word that IZ3EFL is currently active as S79DF from the Seychelles. Look for him during his evening hours on 20 meters SSB. He expects to remain there for quite some time so QSL as directed on the air.  (GB2RS)

And PA5M is now in Sudan and will be active in his spare time as ST2DX.  He will be there for about one month.  QSL is via PA7FM. (GB2RS)

**

## THAT FINAL ITEM:  D-DAY AND HAM RADIO - NEW ORLEANS STYLE

And finally this week, the story of ham radio helping to celebrate a national holiday, southern style. It took place in New Orleans and Don Wilbanks, AE5DW, is there with the rest of the story:

--

The weekend of June 5th and 6th the Jefferson Amateur Radio Club, based in Metairie, Louisiana operated W5D, a special event station to commemorate the 60th anniversary of the D-Day invasion at the National D-Day Museum located in downtown New Orleans.

Event co-chairman Keith Barnes, W5KB reports that by all measures it was a rousing success. Just over 600 contacts were made and the station display was very well received by visitors and Veterans alike. The hams manning the booth didn't miss many opportunities to talk up amateur radio.

The display, prominently located in the main entrance hall just past the front door, featured a large collection of World War II vintage military radio gear. Among the visitors to the station were former New Orleans Archbishop Philip Hannan, himself a World War II vet and member of the 82nd Airborne. The Archbishop actually jumped with the 82nd on D-Day.

Also stopping by was Louisiana governor Kathleen Babineaux Blanco. She even sat at the radio and made a contact.

Both Archbishop Hannan and Governor Blanco signed the commemorative poster along with World War II veteran radio operators and World War II veteran hams. The poster will be made into the commemorative certificate for those stations making contact with W5D.

For more information on the special event, along with pictures of the station and vintage radio display, take your web browser to the Jefferson Amateur Radio Club's website at www.w5gad.org. To find out more about the National D-Day Museum visit www.ddaymuseum.org.

>From New Orleans, I'm Don Wilbanks, AE5DW for the Amateur Radio Newsline.

-- credit: JARC --

--

A job well done by the Jefferson Amateur Radio Club in New Orleans. (AE5DW)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A final reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award closes at midnight Eastern time this Wednesday, June 30th. If you have not yet nominated a youngster this is your last chance to do so for this years judging.

This Amateur Radio Newsline Young Ham of the Year Award is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. Again, the cutoff for nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jeff Clark, K8JAC, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

AA is too far right for NPR.

> Thanks!
>

the limiting factor on loudness may well be your transmitter.

make sure the polarity is wired so that postitve produces positive
modulation.

if it is an older unit replacing the electrolytics may be the best idea.

monitor the modulation with an ocilloscope (forget the mod meter) set for no
flatlining at 100% negitive

gain reduction -10 to -15 dB

crank up multiband drive until you cant stand the sound then back it off.

if transmitter blows up: fix transmitter the readjust from "insane" to "less
insane"

Want to buy:

AM radio station "Dog". Need not be profitble. Need
not even be on the air. Any market considered.

Prefer stations with real estate and seller financing.

No "pure" daytimers. Must have at least 50 watts night
power. Prefer to stay away from directionals.

Top of the list: Class "C" (formerly Class IV) AM with
real estate and seller financing.

FCC license must be intact and if the tower and/or
studio site is leased, there must be no issues with
respect to taking over said lease.

Finder'fee paid! Finder's fee paid. What I am trying
to say is that a Finder's fee will be paid!

Finder's fee paid, you fruitloop. PAY attention!!!

Tel: (478)741-1710 in Macon, GA

73,

Meyer Gottesman, W6GIV

want.

No, seriously....AM plants, being that there are so many more variables (antenna
Q,
transmitter variability (iron?  switchmod?  Doherty?), there really isn't one
setting
that can be recommended.

What I can say is this....don't go adding a lot of high-end, in the hopes of
brightening-up the sound.  It'll turn to mush.  Use a lot of gating.  And the
center
for the midrange boost should be fairly high, as what you're looking for is the
highest degree of amplitude control in the upper-midrange, so that the low end is
less squashed and thus, removed of dynamic range.

It's not the FCC, but the Federal Trade Commission, which has jurisdiction.  15
USC
Sec. 52.  http://www.ftc.gov/temp/chapter_2.htm#Sec.%2052

The entire section is http://www.ftc.gov/temp/chapter_2.htm, as you might expect.

Nonetheless, if claims made in radio advertising are deceptive or false, they are
illegal, so to that that degree the writer is correct..

I heard Art Bell is or was building a massive new antenna system for his
ameteur radio station.Anyone know what it is?Being that he has all that real
estate over there in Nevada I'll bet it's a Beverage or something like that.

If I may, forget about Steve's. They're ok for picks and patch cords,
but my experience is that the staff doesn't know anything about what
they sell. If you know exactly what you want and don't expect too much
service, maybe.
A friend of mine, who is TD in a local student radio told me that he
bought his broadcast console at Groupe Berger.
(http://groupeberger.com) They're a bit outside of the city, but he
only works with them now...
I had contacts a few times on the phone with them, and they seem to be
ok.
Otherwise, there's Omnison, APL...

I would be interested to hear from your friend's experience when he's
done...

Kurt

O.K. here we go:

1. "Styrofoam is bio-degradable" (Said by a national talk show host in "rebuttal" to those who call for a ban on the use of styrofoam packaging because the stuff ends up along the roadside and in peoples' yards- mainly because the industry refuses to take meaningful steps to promote recycling.) The host may have been paid for promoting the use of styrofoam by lying about its properties.

2. "Dioxin is NOT a health hazzard!" (Yeh, sure! Neither is

breathing asbestos!)

3. In defense of S.U.Vs: "Detroit is now making fuel-efficient S.U.V.s" (Yeh, sure! )

4. Just after the Rhode Island night club fire that killed all those people-in reply to a caller: "Sir, that night club HAD MET ALL LOCAL FIRE SAFETY CODES!"

5. "There is nothing that you or I eat that is on the endangered species list!" (Yeh, sure- except Cutthroat trout, sturgeon, sockeye salmon, key deer, oyster mussel and a few hundred others!)

6. "50% of our oil comes from Saudi Arabia." (The correct answer is 17%)

7. "Half the price you pay for a new car from Detroit goes to pay for the health care plan of auto workers!" (yeh, sure!)

LOTS MORE TO COME. Talk radio is saturated with lies!

Despite your cuteness, in case you haven't read, some independent
interpretations of trends show that Franken is *beating* Limbaugh in
New York and in the Chicago market before AA was pulled by
Multi-Cultural, the audience doubled to a 2.0, which may not be much
compared to WLS but is still better than *either* sports talk station
in town and in the neighborhood of the mid-rank numbers NPR station
WBEZ gets.

It's too early to tell, but Air America may just succeed despite all
of their bumbling.

Or, he simply may be stupid or just uninformed. I have not seen much of a
styrofoam lobby out there.
>
>   2. "Dioxin is NOT a health hazzard!"  (Yeh, sure! Neither is

> breathing asbestos!)

Stupid. Talk hosts are hired for entertainment value, not knowledge (witness Dr. Laura, a physiotherapist).

>
>   3. In defense of S.U.Vs: "Detroit is now making fuel-efficient
> S.U.V.s" (Yeh, sure! )

They are. There are several hybrid SUVs in pre-production stages.

>
>   4. Just after the Rhode Island night club fire that killed all those
> people-in reply to a caller: "Sir, that night club HAD MET ALL LOCAL
> FIRE SAFETY CODES!"

As to the building, apparently they had. The issue was with the pyrotecnics of the band.

>
>   5. "There is nothing that you or I eat that is on the endangered
> species list!" (Yeh, sure- except Cutthroat trout, sturgeon, sockeye

None of which have I eaten, now or ever. "You and I" could easily mean that very few of us dine on sturtgeoun, venison, etc.

>
>  6. "50% of our oil comes from Saudi Arabia." (The correct answer is
> 17%)

Stupidity, not necessarily a lie. Most of the US' oil comes form domestic sources, Canada, and Latin America.

>  7. "Half the price you pay for a new car from Detroit goes to pay for
> the health care plan of auto workers!" (yeh, sure!)

Wrong, but not that far off. A huge percentage goes to fund pensions and health care for present and past workers.

>
>  LOTS MORE TO COME. Talk radio is saturated with lies!

Or, simply, stupid hosts engaged in discussions on subjects they are not fully informed on.

You are making too much out of small issues.

There were some great answers to my last question about ads on radio, so I figured I would throw out another question and hope for the same :)

I'd like to create an audio talk show on the internet.  Can I use any audio from other talk shows, from news shows, and so on?  Can I read directly from web pages since they are publicly available?  Not that I would only rip stuff off, but say I wanted to play a clip of something on someone else's show, or from the news, and then comment on it. Does everything basically need permission?  And would that mean paying royalties, which I'm not going to do?  Just a basic FAQ on this sort of thing would be great.  I've searched for a while and all I seem to find is "fair use" on downloading mp3s (don't care) and on using published works in university classrooms (which isn't a public thing like a talk show).  Any information you could give would be appreciated.  Thanks!

Whether you listen to it normally as an FM or AM station, or over the
internet because it's in a foreign country, what are currently your 3
favorite radio stations and please say why, for each one named.

Actually, there were fire code violations.  The most important of these
was that the stage walls had been lined with flammable packing foam as
a cheap form of sound insulation.  Definitely against fire code; problem
is, the local fire inspector didn't notice it on the last inspection he
did there.

To bring this marginally back on topic...  Among the many parties
being sued is a radio station which gave away tickets to the show.
(Never underestimate the ability of lawyers to go fishing after the
deepest pockets they can find...)

OIE (beek@bbbbbb.com) writes:

> There were some great answers to my last question about ads on radio, so I figured I would throw out another question and hope for the same :)
>
> I'd like to create an audio talk show on the internet.  Can I use any audio from other talk shows, from news shows, and so on?  Can I read directly from web pages since they are publicly available?  Not that I would only rip stuff off, but say I wanted to play a clip of something on someone else's show, or from the news, and then comment on it. Does everything basically need permission?  And would that mean paying royalties, which I'm not going to do?  Just a basic FAQ on this sort of thing would be great.  I've searched for a while and all I seem to find is "fair use" on downloading mp3s (don't care) and on using published works in university classrooms (which isn't a public thing like a talk show).  Any information you could give would be appreciated.  Thanks!
>
> OIE
>

Playing actualities from someone else's copyrighted show is not a good idea legally.  You can discuss what was said, quote it in context even, but I certainly wouldn't be playing a tape of it.  On one hand, the chance of someone other than your close circle of friends ever hearing an Internet talk show is slim, so the chance of some representative of the show you want to use hearing it are equally slim.  But slim is not none, and weasels and lawyers are constantly looking for someone to sue so they can continue to get their BMW's detailed weekly.

BTW, the best commentary comes from passionate personal beliefs, not critisim of what someone else said or did elsewhere.  That's just critisism and that's pretty boring to listen to.

G'day from Downunder

IBOC has been going in the US for some time now.

Is it as good as the people at iBiquity said it was?

Does it sound any better than FM stereo or AM stereo?

Are receivers easy to buy?

How is AM stereo doing in the US?

The only "independent interpretation of trends" that matter are those that are accepted by ad agencies, especially in the network business.

To my knowledge, there are none, especially ones that break out hour-by-hour figures.

There are no clear channel stations, anymore. However, your
explanation of skywaves vs. ground is a good one.

IBOC FM is a mixed bag.  It doesn't sound all that wonderful, but again I think most of the FM sound quality issues have to do with overprocessing more than anything else, and digital transmission doesn't do anything about that.

IBOC AM sounds pretty awful to my ears.  Much worse than good wideband AM transmission with a good receiver (which is something hardly anyone here will ever get a chance to hear, I am sorry to say).

>Are receivers easy to buy?

No.  Typical consumers don't even know they exist.

Slightly worse than analog FM, depending on how the analog is
processed.  It can be better than a badly processed analog signal.
The AM is very artifacty, significantly degrades the fidelity of the
analog signal,  and creates significant adjacent channel interference
problems.   For the latter reason, its use is forbidden at night.

>Are receivers easy to buy?

No.  AFAIK none are widely available.

>How is AM stereo doing in the US?

Just about dead.  Few receivers available except for some OEM car
radios, fewer and fewer stations broadcasting it.

Mark Howell

I enjoy AM dxing, and I've noticed that the radios with larger ferrite rods seem to be better for dxing than those with small ones.

I did some research on the subject, and I kept running into terms such q-factor and flux. My 45-year-old mind only has room for so much, and I'm afraid that anything I try to learn about electronic theory will just push out some of the more important stuff already stored in there such as anniversary dates and current wife's name.

So maybe somebody can answer a couple of questions for me in simple English, and maybe help me save what few brain cells I still have left.

1) Is there an optimal length for an internal ferrite antenna?

2) If so, then why don't all radios have one that size?

3) Is ferrite expensive or something?

4) How can my little Degen 1102 (tiny ferrite antenna) do so well on MW while my ATS505 does so poorly?

Thank you in advance for all who reply.

I am "in the building" with one of these, and on the available receivers, FM
IBOC has definite advantages, one you realize you are hearing audio without
the preemphasis curve we are used to hearing on FM. That done, it sounds
better to everyone who has heard real-world music programming on it.
>
> IBOC AM sounds pretty awful to my ears.  Much worse than good wideband AM

> will ever get a chance to hear, I am sorry to say).

While it will take time to enter the market, the sound of AM IBOC now is
very, very good. When running music on the one of these that is also in the
building, it sounds better than some local FMs.

I got one of the new Sangean U1 utility radios. First impression: BIG, yellow, black, solid. Did I mention "BIG?"

The radio is built well. It is shock resistant (they claim it survives a six-foot drop without injury) and water resistant up to JIS 4 standard (whatever that means). It weighs several hundred pounds and it causes my floor to sag when I set it down (well, maybe a little hyperbole there). Despite its heft, the radio is really easy to carry around, thanks to a soft rubber grip inside its hard plastic handle. The radio has a six-foot heavy duty power cord inside the back, or it can be operated on 9-14 Volt DC, or with 6 D-cell batteries.

The radio has very nice sound. Bass is very solid and substantial (much like the radio itself). Comparing its sound to that of my SRIII and BCL2000 (all on batteries), the U1 has by far the most bass, the SRIII distant second, and the BCL2000 distant last. On treble, though, the SRIII has the most, the BCL2000 second, and the U1 the least. When I turned up the radios, the BCL2000 and the SRIII started distorting pretty soon, but the U1 just kept getting louder and richer as I cranked it up. The radio truly fills up a room without working up a sweat. I love the sound of the U1, but some people might like more treble. Sound quality is arbitrary. This one happens to suit me best.

AM Sensitivity: Since my home is so full of RF, I took my new radio out into the country to test its AM sensitivity away from power lines. (I wish I had taken some other portables for comparison, but I forgot to). Wow, I was totally impressed! I have an excellent car radio, and the U1 picked up nearly every AM station that my car did! To the best of my knowledge, none of my other radios could have gotten some of the stations I was getting. One example, the radio was easily able to separate 840 WHAS (Louisville) and 850 WUTK (Knoxville). Both stations came in clear and strong and there was even some space between them. The U1 was very quiet. I turned it up very loud on AM, and there was no noticeable internal noise between stations (thanks in part to its analog tuning). One thing I did notice, though... the U1's AGC is not strong. Weak stations were lower in volume than stronger ones. My car radio has strong AGC, and it pulls the sound of weaker stations up to that of the stronger ones. This isn't a criticism of the U1. It's just an observation. The weaker stations were there, and it was very easy to turn up the radio to hear them, especially since the U1 has so little internally-generated noise, and so much available volume to spare.

FM Sensitivity: I came home and tried the U1 against the SRIII and BCL2000 on FM, extending the whips on each (the U1 doesn't have a whip, just a 5-inch flexible "duckie" antenna that looks like it might sit atop a police scanner). The U1 kept up with the BCL2000, both picking up distant stations equally well. The SRIII was much lower in FM sensitivity. The U1 slightly beat the BCL2000 in rejecting noise on FM. The SRIII was very noisy. Overall, the U1 seemed to be the best of the three on FM sensitivity, but the SRIII and BCL2000 both have external FM antenna inputs and the U1 does not. This isn't a factor for me, because I never use an external antenna, but I offer it as an aside for anyone who does.

So I am very satisfied with my U1. I won't be taking it for long walks, nor will it be my nightstand radio. But the U1 will now be my personal workhorse radio that I will be using at the pool, on the patio, and while working in my shop. And maybe I'll sneak and do a little AM dxing on the side with it as well.

I'm not sure that this is exactly what you mean, but you did mention foreign stations... I'm assuming these are my favorites because I listen to them most. I should add that I am not much of a fan of domestic US commercial radio, which I find boring and narrow-minded. US public radio is ok--some programs are excellent--but it does have a tendency to sound rather homogenized at times.

1. Radio Australia (on shortwave & the internet) - because it gets most of its content from the domestic public network ABC Radio National, which to me is the finest "ideas" oriented network on the planet.

2.  BBC Radio (Radio 4, available on the internet; and World Service,
on sw, internet, satellite and local FM in some US cities) - because
it's the BBC (need I say more?)

3.  Radio Netherlands (on sw, satellite and the internet) - because it
produces some of the finest radio documentaries in the world and
usually presents a unique perspective on things unavailable elsewhere.

Hi,
I wonder if anyone can help.
In the UK prior to the arrival of Ofcom it was possible to go onto the
RA site ( I think )
and download a spreadsheet with the above title which gave details of
permanent
licensed broadcast stations on Medium Wave (MF), Band 2 FM (VHF) and
DAB (Digital) in the UK.
I is it possible to find and download an up-to-date version somewhere as
mine is
over a year old now ?
Thanks in anticipation,

Mike

BBC 2 - Music and entertainment

BBC 3 - Jazz, Arts and Dramas

BBC 4 - Talk radio, books, etc.

Why is easy......NO COMMERCIALS, NO DRUG COMPANIES, NO CAR COMPANIES, NO
DITECH.COM, GEICO, STUPIDITY or 800 toll-free numbers for me to dial.

I emailed them offering to pay my share of the Radio Tax.  They politely refused, thanking me and telling me it was the pleasure of the British people.

I also love the ON DEMAND of all the radio channels, allowing me to listen to WHAT I want, WHEN I want it.

Radio in America died years ago.  Clear Channel can go to hell!

Larry

Actually, I meant more along the lines of news.  Is it even illegal to replay short clips?  Probably so, just making sure.

KFI is my favorite station, and I live in Tennessee :)  I simply enjoy
almost all the talk shows on that station.

WSB out of Atlanta because I love Neal Boortz.

WABC when I'm bored.

And likewise, it should be forbidden for daytime use also since important componants of the signal are outside of the defined bandwidth. If all stations go IBOC then the mutual interferance will severely reduce the coverage areas of all stations, even the 50KWs.

IBOC = I.nterfering  B.adly  O.ff  C.hannel

Okay, I'm usually pretty quick to take the opportunity to introduce others to my favorite radio operation...as my email handle suggests, I'm a huge fan of CBC Radio One, Canada's public broadcasting network, with a number of stations all over Canada and an impressively content-rich web presence with a number of those stations available on their website, at www.cbc.ca/audio.html.

As an American quite displeased with American radio (which even applies to non-commercial broadcasting, since the lack of government support has resulted in a loss of some of the more eccentric and esoteric programming on even the better-funded stations) CBC's take on current affairs, news, philosophy, entertainment and even sports has made it my primary source of information, although that's confined to home since there's no way except through the internet to get it.   While I've listened to the BBC and NPR, CBC's programs manage to strike a balance between information and entertainment...the evening news program, As It Happens, being a prime example of how one can cover the news that matters, yet still have a wry sense of humor about it.

Entertainment programs, as well, don't take themselves very seriously...there's usually a self-deprecating quality about them that may well be part of the Canadian persona.  And (a true blessing) these programs rarely engage in celebrity worship, and most of the trash news that makes up so much of American programming (Jacko goes Wacko, OJ's still looking for his wife's killer, Just What was that Stain on the Blue Dress?, Paris does...well, everyone) is just ignored...which leaves time to cover more important stuff (like, how much of rest of the world likes the United States' behavior these days....here's a hint....the Brits love us, but they're not sure) doesn't it?

And, with the exception of election periods (which amount to only a month every two years or so, when they have to run two or three minutes of political spots a day) they're absolutely commercial-free...not even "underwriting" announcements!  There are also rumors that CBC programming may show up on the satellite radio provider, Sirius, as they've entered into an agreement with CBC to bring satellite radio to Canada.  As I already have Sirius in the car (another reaction to my displeasure with what's available locally) this addition would be very much welcomed (As It Happens, by the way, is also on PRI World at 7pm ET weekdays, on Sirius channel 108).

When I'm away from my computer, I'll drop to the local NPR affiliate, WDUQ in Pittsburgh.  They run This American Life (probably the best example on American radio of what CBC sounds like) as well as the other NPR news programs, Morning Edition, All in a Day and All Things Considered (a program which Susan Stamberg proposed to NPR after becoming a fan of As It Happens, but which ends up much drier and more earnest in comparison to As It Happens).  When WDUQ isn't airing NPR programming, they do jazz, which is not my favorite genre, but it usually is a lot less frantic than what else is on the radio.  Again, News and Entertainment.  And few commercials.

Finally, there's local, independent non-commercial WYEP in Pittsburgh.  They're a bit uneven, as they have a number of volunteers for air talent, and they have a tendency, again, to do what everyone else is doing (can't afford to offend potential donors, after all), but every once in a while they'll play something really novel. They're quite connected to the community, as well.

So, summing up...the reason I listen to any of these is 1) to hear about the world around me, beyond my local awareness, and to be introduced to new ideas while getting some enjoyment from listening;  2) to hear about the people and places around me, to know what's going on that has a direct effect on my life; and 3) No (or few) commercials!  Broadcasting has become far too greedy, now that the FCC has lifted the limit on (once 18 minutes/hour, which is still too much) commercial matter.  The only

```
unexpected result of my listening to Canadian radio is that I probably know more
about what's going on in Toronto than I do in Pittsburgh.  I'll probably move.

Wanted to buy: Dead or alive. Not Jesse James, you
friggin fruitloop! The "Radio Crazy" wants to buy a
"dog" AM radio station. Finder's fee paid to anyone
who tells me about one if I ACTUALLY buy the station.

Ideal AM would be a class IV (FCC calls it class "C",
you fruitloop!) with real estate. Station need not be
profitable. Prefer with seller financing with little
or no money down. I don't want "pure" daytimers and
would prefer to stay away from directional stations.
Fulltime is preferred but I will consider stations
with at least 50 watts at night as "fulltime".
```

Don't even waste your time or mine if they are asking
more than $150,000 (150 grand).

Tel: (478)741-1710 in Macon, GA.

73,

Meyer Gottesman, W6GIV
aka The "Radio Crazy"
aka Moron Gottesman
aka Maven Gottesman (ahhhhh....that is more like it!)

>
> 1) Is there an optimal length for an internal ferrite antenna?
Yes, based upon mechanical considerations. Ferrite is fragile, like ceramic,
and very long rods would easily break. Second consideration is the size of
the radio. There aren't too many large portable radios (other than boom
boxes).
>
> 2) If so, then why don't all radios have one that size?
Size of the radio, and whatever else is included inside it
>
> 3) Is ferrite expensive or something?
No, but it is fragile.

Most stations don't care today about anything except their home metro
groundwave coverage. Any damage in the secondary or skywave coverage areas
is irrelevant.

Favorite station is WGN, Chicago, IL.  The reason for this selection is that the air personnel are very conversational.  The programs are diversified.  The morning show reaches out to ABC (they are an affiliate not an O & O) network staffers like Ann Compton at the White House and Sam Donaldson for personal one on one updates.  You may find them talking to a governor or senator when needed to explain the importance of something.  They are LOCAL and LIVE.  They continually interact with the listeners via phones.  And they still stream except when MLB makes them delete the Cubs broadcasts

Second would be WAKV, Otsego-Plainwell, MI.  Somewhat local to me. Basically VT'd except the morning show.  Almost everyone on the air there was an air personality in the nearby Kalamazoo, MI market.  The station refers to itself as Vintage Radio as the music mix runs from the 40's to the 70's or so.

Sorry but the third is the CD collection in the car and at home.  When I want to hear Beethoven, I want to hear Beethoven.

Not necessarily in order:

CBC Radio 1-990 Winnipeg, Manitoba.  Relevant information, wry humo(u)r, not hitting listeners over the head with their opinions.  Unfortunately they keep shutting down their AM transmitters in favo(u)r of FM; my Internet reception isn't very reliable so I have to settle for travel near (or north of) the border in the summer.  In the winter the 990 transmitter in Winnipeg still puts a decent signal down here.

Incidentally, the CBC (text) website is an excellent example of what a news site should be..

WPLN-1430 Madison/Nashville, TN.  NPR information programs.  A station that provides information without slandering my values.

WORT-89.9 Madison, WI.  You never know what you're going to hear next. They're as likely to slander my values from the left side as WLAC is to slander them from the right, but they'll make you think in the process, and toss some decent music in to the mix...

================================================

The stations I actually *listen to* most are, in order:

- WPLN 1430
- WPLN-FM 90.3 (classical music to lull myself to sleep)
- WBUZ 102.9 (modern rock)

================================================

If this question had been asked two months ago, I'd have added WOXY-97.7 Oxford, Ohio.  "97-X" with a fantastic local modern rock format, including plenty of local Cincinnati/Dayton bands and more interesting out-of-town outfits.  Unfortunately their Class A signal 30 miles from both Dayton and Cincinnati made them pretty hard to hear on many radios.

The Thursday before Dayton Hamvention was WOXY's last night on the air. There's still a modern rock station on 97.7 out of Oxford, but it's now satellite-fed and a cookie-cutter copy of WXEG.

I blame my failure in the Dayton CW Contest on WOXY's demise.  <grin>, kinda.

Radio stations pay networks with commercial inventory to use those actualities.Lots of inventory. I don't believe you'll find there's any "fair use" application in a one minute news clip that's been edited by the network and paid for by the stations.

Under no circumstances, short of getting permission, can you use the voice of any network personality unless you want to pay them a hefty fee. You're in very dangerous water.

Rich

As an employee of one of several AM station owners, including CCU and
Disney, involved in a battle over interference from stations in
Northern Mexico, I beg to differ.  We care a lot, and have joined in
legal action to protect our signal.

There is also some evidence  that IBOC interference can affect home
metro groundwave coverage of adjacent channel stations.

Between the cubans and the mexicans, I can't get WLS reliably here in
Charlotte at night. I also have trouble with a lot of the locals. (I don't
know if they are flea power at night or what, but there is almost nothing on
the band (other than WBT) that seems to come in clearly at night.

<sigh>

I dread seeing what IBOC will do to the local scene.. will get even worse.

But not much. I can listen to the 1050 in the Riverside market within 10
miles of the KTNQ 50 kw IBOC site.

Maybe not to the listeners who live in such areas?

There are areas where all nighttime AM service is secondary - where no AM station provides primary service.  My location is nearly one of them; the only station providing primary nighttime AM service is WSM.  It is not difficult to find a place in Tennessee beyond WSM's primary coverage where there is *no* nighttime primary service - my guess is several hundred thousand people in Tennessee alone live in such areas.

Certainly these people aren't a majority, but there are a *bunch* of them out there - and they have Congressmen.  Will these people complain to their representatives when their AM service disappears?  Or is AM so irrelevant to most listeners that they won't care - or even notice?

Yeah, but Riverside is in KTNQ's null - where their day pattern has the
equivalent of about 6kW, NOT 50kW.  The KTNQ day pattern runs 6kW or less
over most of the ESE quadrant. They have far less toward Riverside at night.
And Riverside is in the max of 1050's day pattern.

Presumably the 1020 IBOC pattern is proportional to the main signal's
pattern.

30 kHz spacing and 6 kW doesn't sound like a severe test to me.

```

Hello. Without going into exhaustive detail, I find myself saddled with a really old "telephone equalizer," no manual and a group of people that want me to make it work for them. So I'm hoping someone here would be willing to venture an opinion/offer some guidance.

The unit is a Russco Electronics Model T212 Telephone Equalizer. As far as I can gather, Russco is long gone, and I can find no documentation on line. The group hopes to use the unit as a phone hybrid.

The back of the unit just has a terminal strip. Here's the layout (X indicates a screw):

```
---1----      ----2----                HOLD   LINE  ---A---  ---B---
X  X  X   X   X   X  X   X    X    X   X  X   X  X  X  X  X  X  X  X
NO C  NC  G   NO  C  NC  Coil +18  G                -  G  +  -  G  +
```

The front panel has a "line" switch with "in" and "out" positions, an "in/out" switch for three equalizer pots (LO MID HI) and an "in/out" switch for "HI BOOST."

Now I have no idea if the unit can even be used as a hybrid, but am hoping that someone here might have some insight. The date for using this thing is June 19. If you can offer any help, I'd really appreciate it!

Also, in case the ASCII art above doesn't translate, I've put some pics at www.84dragons.com

Thanks,

Bill Fredette

With 5kw we're not expecting a usable signal hundreds of miles away
from the COL. But we are concerned about more than our metro coverage
area.

I certainly hope so, since they are 30 kHz apart. But there is a real
problem with first-adjacent channel interference. I reference a
statement submitted by Clear Channel SVP/Engineering Jeff Littlejohn
to the National Radio Systems Committee regarding a test involving
WTOP, Washington (1500) and WARK, Hagerstown, MD (1490). Daytime
interference from WTOP's digital signal was found to be "significant"
at WARK's protected 0.50 mV/M contour, and "noticeable" at its 0.75
mV/M contour.
The full report can be found at
http://www.am-dx.com/clearchannelrprt.pdf

Run that by me again?  You shouldn't hear any pre-emphasis curve on normal
FM.  That's what de-emphasis is for.

And anyway, typical station EQ is far more radical than the emphasis curve,
```

I am sorry to say.  The processing at typical stations is much more of a
sonic limitation than the transmission process.

I decided to test some radios today to see which of them I would recommend
for simple AM dxing to anyone who asked. The six radios I tested are Degen
DE1102, GE SRIII, Radio Shack DX-398, Radio Shack DX-402, Sangean U1, and
Tecsun BCL2000.

I went to a local park at 1:00 pm and found an area with no nearby power
lines. I started each radio at 530 KHz and I tuned up through the entire
dial, noting the signal strength and clarity of what I heard (if anything)

on each frequency. I also rotated each radio on each frequency to see if it could pick up a signal in any position.

Sensitivity: Despite being the least expensive out of the group, my trusty SRIII picked up at least a whisper of a station on nearly every single frequency (A+). Second was the BCL2000 (A-), third was the DE1102 (B+), fourth was my DX-398 (C-) and DX-402 (C-), and in last place was my U1 (F), which picked up stations on the least number of frequencies.

Selectivity: There are other factors in AM listenability, though. One of which is handling adjacent channel spatter. Of all the radios, the SRIII seemed to be best at pulling 700WLW (175 miles away) out of the spatter of two local stations on 680 and 710. The DE1102 was second, and the BCL2000 third. One oddity about the BCL2000, even though it allowed me to hear WLW between the two other stations, for some reason, WLW was being covered by an image of a local low power travel station on 1610 that overmodulates horribly. None of the other radios picked up any images.

Internal noise: No surprise here. The three analog radios, the SRIII (A+), BCL2000 (A+) and U1(A+), all had lower internal noise than the three with digital tuning, DX-402 (C) DX-398 (C-), and DE1102 (D).

Dial readability: All of those with digital displays were obviously easier to read. The DX-402 (A+) and the BCL2000 (A+) have accurate and large high-contrast displays, the DX-398 (B) and the DE1102 (C) were smaller but still accurate, the UI isn't very accurate but it's easy to see (C-), and the SRIII has the least accurate and least seeable display of the pack (F).

Portability: All six are portables and can be operated by batteries. The three large analog radios can be heavy, but all three have good carrying handles. The three smaller radios do not have handles. The DE1102 stands out here for being the smallest by far (A+). The U1, however, is really too big to carry for very long, despite having the best handle of the bunch, and it should get the F in this category.

Sound quality: Though highly subjective, I like the sound of the three bigger radios best. You can turn up the U1 until your ears hurt and it still doesn't distort. The U1 has by far the most bass and volume but little treble (A), the SRIII has good bass and treble and medium volume (B), the BCL2000 has slightly less bass and treble, and comparable volume (B-), the DX-398 (D) and DX-402 (D) are virtually identical with some bass some treble and even less volume (D), and the DE1102 (D-) has some treble, no bass, and very little volume until it starts distorting. Of course, all of these radios sound better with headphones, but that wasn't what I was seeking.

Conclusion: I couldn't imagine getting rid of any of these radios. It would be so tough to try to pick just one for me to own. Each one of these has at least one feature that makes it a favorite in some category. And my little comparison doesn't even take into account two of the most important categories to some people: memory operation and external antenna performance. But of my six radios tested, three were clearly losers (DX-398, DX-402, and U1) and three were clearly winners (SRIII, BCL2000, and DE1102).

Of the three winners, the SRIII is the most sensitive, has very good sound, is noise-free, and is the least expensive, but the radio's display is so bad that serious dxing is virtually impossible for me without another radio nearby to tell me what frequency I'm listening to. The DE1102 and the BCL2000 aren't too far behind the SRIII in sensitivity and both offer a digital frequency display that's easy to see. And though the DE1102 is a fine little radio (in fact, it is an incredible performer for its size), the BCL2000 beats it in nearly every category for me (sensitivity, sound quality, internal noise), so I would have to pick the BCL2000 as my unscientifically-preferred choice for AM dxing.

```

I've used a Sompletech 128MB MMC card in my RADIOYourWay recorder for a couple of months. It just quit working.

The recorder shows CARD time remaining of 17+ hours, but will not record, either from program or from the record button. Internal memory works fine.

Have I zapped the card or the player? If I've zapped the card, is there a way to salvage it?

Thanks,

Dick

Remember that WARK is off the back of WTOP's pattern.  WTOP has something like 1.5V/m @ 1 km toward WARK, not the 4+V/m like the front of their pattern, or the 2.8V/m RMS of the pattern.  The stations are about 54 miles apart.

Yet today, with noise and all, anything beyond the 5 mv/m contour is pretty
useless.

I have to laugh at that (nothing personal, DE). More of this
selective "acceptable interference" while NAB Eddie and his thugs

continue their audacious lies about third adjacent LPFM.

LPFM is to Eddie what Weapons Of Mass Destruction are to George W.

Carry on.

My maps show Monterey Park to be off to the north of the KTNQ peak. I'd guess down to the half-power point on the pattern, or lower. Pattern peak direction abt 245 deg, direction to Monterey Park abt 290 deg. In any case, 30kHz spacing shouldn't be a severe test.

Am looking for a reasonable cost BCB superhet tuner or receiver (valve or solid state) which has a known sensitivity of 0.1 microvolts or less for 10 dB s+n/n ratio. May be a manufactured or kitset radio. All advice and references appreciated. TIA.
Graeme

Is this even possible with an antenna connected considering atmospheric
noise, or is atmospheric noise very low in the Southern Hemisphere and
Australia?

Answering my own post - found the 'reset' instructions on the POGO site
and so far so good.

Monterrey Park is right in the major lobe on the KTNQ pattern, about 8 miles W by NW of the Industry site; the ERP there is in the vicinity of 100 to 125 kw, depending on where in Monterrey Park you are. It may be less than towards Huntington Park, but far more than a non-DA 50 kw operation.

With the IE station about 45 miles away, I'd say it is a decent test. In fact, 1050 in that area is usually a mix of XED and the IE station.

But what if you're in Nowheresville, Wyoming, and a few < 5 mV/m AM signals are all you've got?  Tough luck, I guess?

The AM IBOC scheme is chronically myopic.  Each station using it shall only be concerned with their own primary local coverage area.  But what about when the skywaves kick in, and somebody else's "useless" secondary coverage area suddenly lands smack-dab in the middle of your primary coverage area?  The middle of the band is a prime example. Here in NJ at night, there's 1000 from Chicago, 1010 from NYC, 1020 from Pittsburgh, 1030 from Boston, 1040 from Des Moines, 1050 from NYC, 1060 from Philly, 1080 from Hartford, 1090 from Baltimore, 1100 from Cleveland, 1110 from Charlotte, 1130 from NYC, 1140 from Richmond, 1170 from Wheeling, 1180 from Rochester, 1190 from NYC and/or Ft. Wayne, 1210 from Philly, and 1220 from Cleveland.  Put IBOC on all of these stations at night, and the mutual destruction would be horrendous!

Some have suggested that allowance of nighttime IBOC, if any, should be considered on the basis of whether two new AM broadcast signals, on either side of the IBOC station's carrier and with the same power level and signal pattern as the IBOC sidebands would have, would be allowed according to the current FCC allocation scheme.  In other words, if WXYZ at 1000 kHz wanted to broadcast IBOC at night, it would be judged on the basis of whether it would be legal to create two new stations, 990 WXYZ-Lower and 1010 WXYZ-Upper, with the same power level and signal pattern as the IBOC sidebands of WXYZ would have.  In most cases, the answer would be an emphatic NO.

For a 50,000 watt station, the total power used by the IBOC sidebands is about 1500 watts.  Split that in half, and that's about 750 watts on each sideband.  So, could 710 WOR fire up a new 750-watt station on 700 kHz and another new 750-watt station on 720 kHz at night? Obviously, no -- the new 700 kHz "station" would violate the protection that is afforded to 700 WLW, and likewise the new 720 kHz "station" would walk all over 720 WGN.  So, given the same parameters of operation, how could WOR's IBOC sidebands (which can hardly be called "In-Band, On-Channel") ever be allowed at night?  iBiquity and the NRSC think they should be... but what's going to happen in the real world?

Mark my words -- if there's one thing that's going to finally kill off AM radio entirely in North America, it's definitely going to be IBOC.

You have a point.  As far as I'm concerned the NAB is correct about
LPFM, and dead wrong about IBOC, especially AM IBOC.   But whichever
side of the debate you take, they're being inconsistent.

But there are still more than 10 times as many AM Stereo stations as there are AM stations using IBOC. And as for "fewer and fewer stations broadcasting it", you could say that about IBOC -- within my listening range here in NJ, there are at least half a dozen stations which tested IBOC for a few weeks or months and then gave up on it.

For example, iBiquity's web site lists 860 WWDB in Philly and 930 WPAT and 1480 WZRC in the NYC area as current IBOC signals, but all of these stations haven't transmitted IBOC in almost a year now. This kind of track record does not inspire much confidence in the future of IBOC, at least on the AM band.

There is the occasional exception to the rule too. I know of one station that was IDed at 101.9, then became K102, then went back to 101.9 (same basic format with a re-tweaking each time.) There were also 102.3 and 102.7 stations in the same market. Go figure.

The sensitivity figure was intended to be 1.0 microvolt.

I've corrected the message and included it again below.

Thanks for catching it John.

Graeme

Corrected message:

Am looking for a reasonable cost BCB (MW) superhet tuner or receiver (valve or solid state) which has a known sensitivity of 1.0 microvolt or less for 10 dB s+n/n ratio. May be a manufactured or kitset radio, or a magazine project. All advice and references appreciated. TIA.
Graeme

You're preaching to the choir (or at least the priest sitting in the back of the
sanctuary).  Your analysis is dead-on, excepting that the Canadians determined
long
ago that AM was dying, and more recently, that FM should follow it into the grave
as
soon as it's reasonably possible.  The U-S's actions will only expedite the
patient's
demise.

Living in Pittsburgh, and as you mention KDKA (I used to work for them, at that),
I
can tell you that there were some winter mornings where WBZ's sidebands would blow
the doors off of even the metro-grade signal....I hate to think what's going to
happen when/if WBZ turns IBOC on at night.  Then again, I don't really care.  I
gave
up AM pretty much when the noise floor went to -10 on most channels.

"WBRW" <wbrw@radiomailbox.com> wrote in message news:capoao$d7s$1@xuxa.iecc.com...

> > >How is AM stereo doing in the US?
> >
> > Just about dead. Few receivers available except for some OEM car radios, fewer and fewer stations broadcasting it.
>
> But there are still more than 10 times as many AM Stereo stations as there are AM stations using IBOC.

Let's say there are turly 200 AM stereo stations left... you are saying there are fewer than 20 AM IBOC staitons.

Just the company I am with has 5, and there are already about 50 on the air and another roughly 200 ordered and in construction.

Since IBOC does not coexist with AM stereo, it's over. The IBOC stations are in major markets, and the AM stereos are generally X-band or oddball stations with a penchant for suffering.

> And as for "fewer and fewer stations broadcasting it", you could say that about IBOC -- within my listening range here in NJ, there are at least half a dozen stations which tested IBOC for a few weeks or months and then gave up on it.

And which would they be? I don't know of that many in the whole country, and the few that there are had problems with thier antenna system, not with IBOC per se.

>
> For example, iBiquity's web site lists 860 WWDB in Philly and 930 WPAT and 1480 WZRC in the NYC area as current IBOC signals, but all of these stations haven't transmitted IBOC in almost a year now. This kind of track record does not inspire much confidence in the future of IBOC, at least on the AM band.

The two NY stations have horrible DA systems, neither being optimized for low-Q and bandwidth. And both are ethnic, not candidates for effective use of IBOC when brokers bring thier programs on home made cassettes or CDs.

Yep. Skywave AM is essentially dead. I have driven at night across Wyoming, from the NW down to the SE. There are FM signals everywhere. In the daytime, many areas have no AM signals, while you can get a minimum of several FMs.

FM, especially after 80-90, has given nearly every part of the country multiple FM signals, including areas where there was no day AM coverage.

Radio is essentially a local, single market medium. It is definitely treated that way by advertisers.

Amateur Radio Newsline™ Report 1400  June 11,  2004

The following is an advisory and not necessarily for air.  Ladies and gentlemen, Amateur Radio Newslines' Support Fund Administrator, Andy Jarema, N6TCQ:

--

This is Andy Jarema, N6TCQ, Newsline Support Fund Administrator, getting caught up with our supporters.  In the month of August of last year we heard from The Reading, PA Radio Club, W3BN; Joseph Bartzi, Jr., KC8DKF of Columbus, OH; The North Hills Radio Club in Sacramento, CA; monthly contributor William Walters, WA2IBM, of San Jose and monthly contributor Scott Hensley of the Area Communications Team, also in San Jose

Thank you to everyone, and we promise to do our best to continue to earn your care and support. A reminder that Newsline is a federally chartered 501c 3 California non-profit corporation.  FCC regulations prohibit us from telling you exactly how to support us, but that information is on our website at www.arnewsline.org.  That address will be repeated at the end of the newscast.

I'm Andy Jarema, N6TCQ.

--

Thank you Andy. Now, Amateur Radio Newsline report number 1400 with a release date of Friday, June 11 2004 follows in 5-4-3-2-1.

The following is a Q-S-T.

Australia to make big changes in its Amateur Radio service, Greece will welcome hams at the 2004 Summer Olympics and Amateur Radio Newsline celebrates 1400 weeks of service to the world-wide ham radio community. It all comes your way, right now!

(Billboard Cart Here)

**

RESTRUCTURING: BIG CHANGES DOWN-UNDER

Big changes are coming to ham radio down-under. This, as Australia announces some sweeping changes that are about to take place in that nations Amateur Radio service. Owen Duffy reports:

--

The ACA has released their report entitled "Outcomes of the Review of Amateur Service Regulation". The report contains the ACA's intended changes to the Amateur service following stakeholder response to the recent discussion paper entitled "A Review of Amateur Service Regulation."

The key changes are removal of the Morse qualification requirements for all grades of amateur radio license; introduction of a new entry level license (the Foundation License) along the lines of the UK Foundation License, although it will be adapted to suit Australian preferences.

A three tier licensing structure: Advanced, Standard, and Foundation; translation of Unrestricted, Limited and Intermediate licenses to

Advanced; translation of Novice and Novice Limited licenses to Standard; a privileges package for the Standard License that is much greater than enjoyed by Novice Licenses today.

A generous privileges package for the Foundation License allows voice or Morse code at low power (10W PEP) using only unmodified commercial transmitting equipment on all of 80m, 40m, 15m, 10m, 2m, and most of 70cm.

Australian participation in CEPT Recommendation T/R 61-01 (reciprocal licensing) is in progress. The status-quo is essentially preserved in respect to higher operating power; interference and interference management built on current arrangements.

Apparatus Licensing as the vehicle for licensing Australian amateur stations (though stations licensed under CEPT Recommendation T/R 61-01 would be class licensed). State significance of callsigns remains.

This has been Owen Duffy for the CQVK project on Q-News Australia.

--

As we go to air, no effective date for these changes to take place has been announced by the Australian Communications Agency. (Q-News)

**

INTERNATIONAL: THE BIG DISPUTE

Two Asian Pacific nations are embroiled in a territorial dispute and Amateur Radio appears to be caught right in the middle. Q-News Graham Kemp, VK4BB, is in Brisbane with the details:

--

A centuries-old territorial dispute between Japan and South Korea is again escalating with the South Koreans placing a group of amateur radio operators on the rocky islets known in Korea as the Lonely Islands. To the Japanese they are the Bamboo Islands.

The radio station, licensed by South Korea, was seen as a provocation by the Japanese. Some amateur radio operators in JA are said to have interfered with the South Korean stations transmissions.

I'm Graham Kemp, VK4BB, of Q-News for the Amateur Radio Newsline.
--

Kemp says that hams around the world were surprised to hear about the dispute. This is because our hobby stresses development of technologic skill along with friendly international communications. (Q-News)

**

RESCUE RADIO: THE NEBRASKA TORNADO AFTERMATH

Back on this side of the Pacific Amateur Radio operators were on duty aiding tornado-stricken communities in Nebraska and elsewhere in the Midwest. Norm Seeley, KI7UP, picks up the story from here:

--

As we reported last week, a May 22nd tornado virtually destroyed most structures in the small town of Hallam, Nebraska. Hallam is located some 20 miles south of Lincoln and one death there was attributed to the storm.

During and after the tornado ham radio was an important part of the overall emergency service effort. The ARRL Letter quotes Nebraska Section Emergency Coordinator Reynolds Davis, K-zero-G-N-D, as saying that Lancaster County ARES and SKYWARN spotters were activated that evening in response to a report of an approaching front. Within a half-hour, W0NWS at the National Weather Service office was receiving tornado damage reports via the Lincoln Amateur Radio Club K0KKV repeater.

The storm severely damaged a high school in Norris, Nebraska, and plucked the tower supporting the K0RPT repeater's south region receiver from the ground. The tornado went on to demolish additional homes to the northeast. Its path of destruction finally ended south of the town of Bennet.

Once the SKYWARN Nets closed, the remainder of the K0RPT system was put into service to support Red Cross communications between the tornado scene, the chapter house and a shelter set up in a Lincoln high school for residents displaced by the storm. Two ARES nets were activated May 23rd to coordinate damage survey and assessment. They logged reports via K0EOC at the Lancaster County Emergency Operations Center.

For the Amateur Radio Newsline, Norm Seeley, KI7UP

--

Amateur Radio communications support continued for several days. (ARRL)

**

Break 1

More news after a break for you to identify your station. Cue the announcer, please:

"From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the K2SBD repeater serving Long Island. New York."

(5 sec pause here)

**

WITH NEWSLINE: SEND US YOUR ID - PLEASE

The station I-D you just heard was recorded a few weeks ago at the Dayton Hamvention. And it has lead us to an idea.

Would you like to I-D your own repeater or bulletin station here on Amateur Radio Newsline? Well here is how you can do it.

Simply record on a cassette tape the following sentence and include the call sign and location you want to honor.

>From the United States of America, we are the Amateur Radio Newsline, heard on bulletin stations around the world including the "xxx" repeater serving "yyy zzz." The "xxx" is the call sign. The "yyy" and "zzz" are the city and state.

Then, take the tape and mail it to Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. As time permits, we will select an audio I-D and include it in the newscast.

All tapes submitted become the property of the Amateur Radio Newsline and cannot be returned.

Again, the address to make yourself a part of this bulletin service is Amateur Radio Newsline, Editorial Office, 28197 Robin Avenue, Santa Clarita, California, 91350. (ARNewsline(tm))

**

HAM RADIO IN SPACE: FIRST EXPEDITION 9 QSO A BIG SUCCESS

AMSAT reports that the first ARISS contact with the Expedition 9 crew on the ISS took place on Tuesday, May 25th. During his first-ever amateur radio contact, Astronaut Mike Fincke, KE5AIT, answered 18 questions asked by the students who gathered at the Erie Planetarium in Pennsylvania.

The contact used the facilities of telebridge station, VK5ZAI, in Australia to assure high quality space to ground communications. It was deemed very successful as the children applauded and thanked KE5AIT for taking the time to join them from space. We will have more ham radio space related news later on in this weeks newscast. (AMSAT, ARISS)

**

WORLDBEAT: HAM RADIO AND THE 2004 SUMMER OLYMPICS

If you are planning to attend the 2004 Summer Olympics in Greece, we have some good news for you. Foreign radio amateurs from CEPT countries or from countries with reciprocity can use the special prefix J42004 from August 1st to November 15th without any special license from Greek Authorities.

Not only that. Demetre Valaris, SV1UY, says all hams visiting Athens for the Olympics is more than welcome to give a shout on 145.425 MHz with a 88.5HZ access tone. Demetre says that this is so visitors can hook up with Greek hams and share hospitality.

What about visiting hams from non CEPT nations? They will have to contact Greek telecommunications regulators for special permission to operate. (Via E-Mail)

**

RADIO RESEARCH: MCRN TO TEST RADIATION ANGLES

The Marconi Radio Club of Newfoundland station VO1MRC will be conducting an antenna comparison experiment on the 19th and 20th of June and you are invited to take part. Amateur Radio Newsline's Bruce Tennant, K6PW, has more:

--

Each day during the experiment from 0000 to 2400 UTC station VO1MRC will operate a CW beacon on 5269.5 kilohertz. Its purpose will be to determine the relative performance of high and low radiation angles. The antenna in use will be identified by a code in each transmission.

VO1MRC will also be open briefly for 2 way contacts with stations authorized to transmit on 60 meters starting 0000 UTC each of these days and will operate simplex on 5260.5 kilohertz CW. Following this it will transmit on 5327.5 kilohertz upper sideband and receive 5346.5 kilohertz upper sideband and 3807.5 kilohertz on lower sideband.

The experiment was proposed by Marconi Radio Club of Newfoundland and is endorsed by Radio Amateurs of Canada. Its operated under an authorization issued by Industry Canada which is that nations telecommunicastions regulatory body.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los

Angeles.

--

For further information, please check the Marconi Radio Club of Newfoundland web site. That U-R-L is http://www.ucs.mun.ca/~jcraig/5megex.html (RAC)

**

ENFORCEMENT: TO MUCH RF

The licensee of FM station KWNZ, located in Carson City, Nevada, has been fined $10,000 by the FCC. This, for creating ground-level radiation in excess of the permissible public exposure level at KWNZ's McClellan Peak transmitter site.

The CGC Communicator says that the various excuses offered by the licensee were not impressive. For example, KWNZ contended that there was no evidence whatsoever of public use of the particularized ten square foot area where the station exceeded the RFR permitted radiation limits.

According to the FCC, it is not necessary to establish actual public use of the particular unfenced and unmarked]area where excessive power density occurs. The regulatory agency says that public use of an area nearby is sufficient.

(DO NOT READ: More is on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1533A1.doc (CGC)

**

ENFORCEMENT: AMATEUR RADIO ACTIONS

Now with more enforcement news here's the FCC's Daryl Duckworth, NN0W:

--

Audio report only. Hear it on this weeks newscast at
http://www.arnewsline.org
--

More on these issues as the FCC releases follow-up information. (FCC, RAIN)

**

BEST PRACTICES: EMERGENCY READINESS GUIDE FOR LOCAL MEDIA

The FCC's Media Security and Reliability Council has published a new booklet titled the "Readiness Guide for Local Media on How to Prepare for Emergencies." This colorful pamphlet is good for a quick overview of what the media should do in times of emergencies. Its available on the web in both Mocrosoft Word and PDF format. The PDF version is at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-244522A1.pdf. Download the following doc version at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-244391A1.doc. Finally, the generic website for the Media Security and Reliability Council is http://www.fcc.gov/MSRC/. (CGC)

ON THE AIR: THE COLLINS COLLECTORS NETS

And if you own vintage ham gear, you might want to become a member of the Collins Collectors Association and join one of their monthly nets. The nets are held the first Wednesday of the month on 3.888 MHz beginning at 7:30 PM in the Eastern time zone and 8 PM in the Central, Mountain and Pacific time zones.

These nets draw hundreds of vintage stations from across the country and are anchored by a "tall ship" AM station in each time zone and you do not need to operate Collins gear to take part. For more information. just tune in. Comments go by e-mail to wa9vrh@mtco.com (Via e-mail)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

CHANGING OF THE GUARD: LLOYD "SIG" SIGMON W6LQ - S.K.

A ham radio operator who developed a public warning scheme that eventually carried his name, has died. This, with word that 95 year old Lloyd Sigmon, W6LQ, became a silent key on Wednesday, June 2nd, following a long illness.

Known to his ham radio buddies as Sig, in 1955 W6LQ perfected a method that allowed the Los Angeles Police Department to issue emergency warnings over local radio stations. At the time Sigmon was an executive with radio station KMPC and wanted to boost station ratings by providing traffic information.

Then Los Angeles Police Chief William H. Parker permitted use of Sigmon's device but only on the condition that it be made available to any radio station that wanted to use it. He also is dubbed the bulletins as SigAlerts in honor of W6LQ.

The first SigAlert was broadcast on Sept. 5, 1955. It was carried by six radio stations and urged medical personnel to respond to a train derailment outside Los Angeles Union Station. The California Highway Patrol later took over freeway traffic warnings from the Los Angeles Police Department and handles SigAlerts, which now are computerized.

Lloyd Sigmon, W6LQ, was born in 1909 in Stigler, Oklahoma. He was fascinated by electronics and received his first Amateur Radio license at age 14. He died at Green County Assisted Living Center in Bartlesville, Oklahoma, where he had been residing the past four years. (Published news stories)

## RADIOS LEGACY: THE HISTORIC KGFJ 1230 KHZ TRANSMITTER SITE HAS BEEN SHUT DOWN

The CGC Communicator reports the passing of a different sort. This with the announcement that on May 24th a historic AM broadcast transmitting site was turned off after 80 years of service.

In 1924, radio station KGFJ started broadcasting from the Odd Fellows Lodge Building on Oak Street near downtown Los Angeles. In more recent years, the station call sign was changed its call letters to KYPA.

Shortly after 4 PM on May 24th, Marvin Collins, W6OQI, turned on the new 1230 kHz transmitter. Its signal is diplexed into a tower at the KBLA 1580 kHz transmitter site.

Collins says that the old KGFJ "flat top" antenna had been in continuous use by since 1924. He adds that the old antenna may well have been the last full-time use of a flat top antenna anywhere in the country.

Marv took photos of the old KGFJ site and the new diplexed setup at KBLA, visit Marvin's web page at http://earthsignals.com/Collins/ and scroll to "KGFJ 1230." You can write to Marv at KFIam640@aol.com

## HAM RADIO IN SPACE: BIG LAUNCH DOLLARS RAISED AT DAYTON

AMSAT says that its Launch Fund campaign now has $93,0000 in it. This, thanks to donations received at the recent Dayton Hamvention including one anonymous donor who matched every dollar collected with another one.

AMSAT North America President Robin Haighton, VE3FRH, says that now is the time to make a final push to reach $110,000 goal. He adds four words that seem to come right out of the Mel Brooks musical the Producers. The four words are - "we can do it." And Haighton is confident that they will.

More about the fund and ham radio space exploration is on-line at www.amsat.org.  (AMSAT-NA)

**

HAM RADIO IN SPACE:  ECHO NEAR COMPLETION

And some more good news from on the ham radio satellite scene.  It comes from Jim White, WD0E, who has been testing and performing final integration of the ECHO ham-sat.

White says that as far as he can tell the ECHO team is on track and the new satellite is looking good.  He says that there are a few minor items have to  be completed before the bird is sent to the Kazakhstan launch site.  White says that he is confident that it will be 100% by the time it gets there for the launch.  (AMSAT-NA)

**

WORLDBEAT:  HFRADIO.NET TAKES LIGHTNING HIT

Due to a system failure caused by a recent lightning strike, the H-F-RADIO dot NET Canadian Amateur Radio Bulletin service has lost its database of subscribers.  In order to rebuild it and for subscribers to continue receiving those weekly bulletins, hams across Canada  are asked to send an e-mail to webmaster@hfradio.net with the word "subscribe" in the subject line.  (RAC)

DX

IN DX, K8AQM, reports that his trip to Samoa will take place between July 7th to the 21st.  While there he will operate as 5W0TR on 160 through 10 meters using CW, SSB, RTTY and PSK.  Also, look for him as KH6BB from Hawaii July 5th and 6th and 22nd through he 24th. QSLs go via K-8-A-A as his Callbook address.

And members of the United Kingdoms Wrexham and District Amateur Radio Society will be on from the Isle of Man from September 1st to the

8th.  Station location will be at the discontinued Coast Guard lookout tower at Scarlett Point.  Activity will be on all High Frequency bands plus 50 MHz, 70MHz, 144MHz and 432 MHz, at full UK power on CW, SSB, RTTY, PSK and SSTV.  More information is on-line at www.gb4iom.co.uk  (Various DX sources)

THAT FINAL ITEM:  CELEBRATING NEWSCAST 1400

And finally this week its time for a bit of a celebration here at Amateur Radio Newsline.  That's because this newscast marks 1,400 consecutive weeks that we have been bringing you news from the worlds of Amateur Radio and personal communications.  With some thoughts on this milestone, here's our producer Bill Pasternak, WA6ITF:

--

If you get out your calculator and do the math, you will find that 1400 weeks comes out to be 26 point 923 years.  Close enough in our book to say 27. And in ham radio news, I guess we can say that's a
pretty long time.

Back when we still edited on tape I used to wonder how many splices that we made in a year.  One day I sat down and figured out that there were about 30 in an average newscast.  That was 120 a month or 1440 a year and an awful lot of Scotch splicing tape.  Had we stayed on tape it would mean that we would have cut into a piece of audio tape 38,880 times as of today.

But we stopped putting the newscast together using tape almost 4 years ago.  Now its done in the digital world using computers and programs like Goldwave and Cool Edit pro.  Becoming part of the digital age early on is something we are kind of proud of.  Being on your favorite repeater for the past 27 years and never missing a deadline is another.

As we enter year 27 and begin rolling on toward year 28, we pause and renew our simple pledge to you.  The promise we made many years ago and which continues to guide our very being. Amateur Radio Newsline will be here as long as you want us and as long as you support us. We exist to serve you and we all consider it an honor to do so.

Speaking for all of the volunteers who make up the world-wide Amateur Radio Newsline team, I say � "thank you."  Thank you for sharing your lives with us through the magic of Amateur Radio.  Thank you for caring about us through your ongoing support.  Most of all, we thank you for being a part of what we like to call the Amateur Radio Newsline family.

To paraphrase a line from the show Chicago.  "We simply could not do it alone."

Again, we thank you.

I'm Bill Pasternak, WA6ITF.

Jim.

--

As one of the anchors who has been here almost from the start, I add my thank-you's as well.

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).  Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.  You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on.  This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our
website. That's in cyberspace at www.arnewsline.org.  The cutoff
for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Jim
Davis, W2JKD, saying 73 and we thank you for listening."  Amateur
Radio Newsline(tm) is Copyright 2004.  All rights reserved.

> Just the company I am with has 5, and there are already about 50 on the air and another roughly 200 ordered and in construction.

Don't make the mistake of equating the number of stations which have ordered or installed IBOC equipment with the number of stations which are actually _using_ IBOC.  AM stations which have abandoned use of IBOC (even if they may still have the equipment installed) include WLW, WKDL, WSB, WWDB, KIXI, WPAT, WWJ, KABL, WZRC, and WTOP.  As of March, the grand total number of AM stations actually transmitting an IBOC signal was around 20.  Perhaps there are a few more today, but I haven't heard of AM IBOC use growing by leaps and bounds in the past few months.

Also, KNX, WMTR, WWTR, and WCTC may have filed a Digital Notification with the FCC, but as of yet, none of these are actually transmitting IBOC -- in fact, WCTC is still proudly broadcasting in AM Stereo, and in a recent conversation with their Program Director in which I discussed AM Stereo, he did not mention IBOC at all.  I think Greater Media has notified ALL of their stations (AM and FM) as IBOC with the FCC, regardless if each station has any plans to actually install and use it or not.

> The two NY stations have horrible DA systems, neither being optimized for low-Q and bandwidth.

Excuses, excuses.  MOST stations in the country are "sub-optimal" and are likely to have many of these same flaws which will seriously inhibit their success with IBOC, or even make it impossible.  (Even WOR says "our upper sideband does not exist north of Paramus, NJ" -- how's that for a lousy DA?)  So if/when IBOC is mandated, what will happen to these stations?  Rather than spend $100,000+ on a complete overhaul, I bet many would just go off the air -- which is both good and bad.  Good, because it would finally "clean up" the AM band and restore useable nighttime coverage area on Class B and C signals. Bad, because just as many "good" stations (in terms of programming, ratings, and listenership) will be forced off the air as "bad" stations, and those that are left will be forced to use IBOC -- even though the "de-cluttering" of the band would once again make hi-fi analog AM a reality.

Collins R-390A can do that with the unbalanced input with a CW signal,
and exceed it handily.

Drop that thought.

No, you don't have to literally record the words yourself.  You can have
somebody do that for you, but as has been made pretty clear here already,
you cannot record the "words" from someone else's radio station and then
```

play them on yours. Sure, the politician was no doubt speaking in a public forum, but the radio station from which _you_ got the audio was the party that some way, some how and for sure paid for that audio. And that station owns that particular rendering of that audio. They paid for it. They sent a reporter to the scene to record it. Or they paid a network in spot inventory to get it. You didn't. There isn't such a thing as free audio for use on the air (unless, of course, you negotiate a price of $0.00 with the party that owns it. You can't just take it from the owner (well, you _can_ but you shouldn't). I think your search for free stuff is going to be futile.

Don

The ICOM R-71A is excellent but pricey. However I've found success with automobile radios. You can buy or build a 12 volt 1.5 amp power supply inexpensively.

Wanted to buy:

Cheap "Dog" AM radio station. Seller financing with
little or no money down a must. Real estate preferred
but NOT a must.

Need not be profitable. If you tell me about it and I
buy it, you get a finder's fee.

Tel: (478)741-1710 in Macon, GA or email.

Assume 50 ohms input impedance, and 6 KHz receiver bandwidth (3 KHz received
audio).

BlueCat suggested a car radio.

Car radios have had bandwidths not far different from 6 kHz for some years now.

Let's guess that the input impedance of an automobile AM radio is 5000 ohms. That means that 10 uV at 5000 ohms is the same signal power as your 1 uV at 50 ohms.  I'd guess that a good car radio would do that ... you might have to raid a junk yard to find a radio old enough to be "good".  Especially avoid the recent cars with an amplified AM antenna on the roof.

Bob

Old 1970s car radios are in general extremely sensitive.  Selectivity is
sort of doubtful on a lot of them, but because they are normally used with
a small whip antenna, high sensitivity is essential.  A Delco AM radio
should be available for free at your local junkyard.

|
| You have a point.  As far as I'm concerned the NAB is correct about
| LPFM, and dead wrong about IBOC, especially AM IBOC.   But whichever
| side of the debate you take, they're being inconsistent.
|
They're being inconsistent from a technical and engineering point of
view. From a protectionist point of view, they're being quite
consistent. It's an "I got mine and I'm going to keep it" stance,
pure and simple.

Yes, but they weren't exactly good.  Okay, they weren't any good.  I built
a really neat 10M converter using a compactron from a QST project and found
the selectivity issue was pretty serious even though most folks were running
AM and the bands weren't as crowded.

On FRIDAY JUNE 18, 2004 the RAY CHARLES Memorial Service at the First AME Church will be broadcast Live on KKJZ-FM (88.1) from 10 a.m. until Noon.

[ Moderator's Note: K-JAZZ simulcasts on KUOR-FM 89.1 Redlands. KUOR is available throughout the Inland Empire and up here in the Victor Valley. For those inland that can't reach 88.1 in Long Beach: Try KUOR. I will be listening today. ]

L.A. TIMES June 15, 2004

QUICK TAKES by Geoff Boucher

Memorial set for Ray Charles

A public memorial service for the late Ray Charles has been scheduled for noon Thursday. The 73-year-old singer, who died last Thursday, will lie in repose until 8 p.m. at the South Hall of the Los Angeles Convention Center, which is adjacent to Staples Center downtown.

A private funeral is scheduled for Friday at the First AME Church with Stevie Wonder, Willie Nelson and B.B. King among the expected program participants.

More difficult to answer since many political things are done through a pool. CNN, for instance, is the Republican Convention originator.

The practical issue is whether or not the feed can be traced to its source and that source objects to it being used by anyone other than those licensed to do so.

Where will you get your feed? From a radio station? They also have a say in how their material can be used.

Whenever you use material you're not licensed to use you risk heavy duty litigation.

Rich

Going way back to the 60's, a network of stations in Puerto Rico (WKYN, WPRP and WORA) was fined and nearly lost its licenses when the manager had AFRTS broadcasts taped in New Orleans and sent to PR for broadcast without consent. And AFRTS is not even a commercial broadcaster!

Join the GAGLIARCHIVES Saturday Night, 6/19/04, at 10pm EST, as we feature a 4 hour spotlight on progressive rock from the Far East. Ken Golden of the progressive rock label Laser's Edge is our co host for this special program. We will spotlight music from Japan, and projects and artists such as Cosmos Factory, Flower Travellin' Band, Gestalt, Geino Yamashirogumi, Far East Family Band,
Kitaro, Yuki Nakajima, Goro Ohmi & Big Mouth, Rinneysa, Ryo Kawasaki, Paradox, Tetsuo Sakurai, Yonin Bayashi and Hiro Yanagida. We also spotlight the only known progressive rock recording to ever emerge out of Mainland China In San Bao. We will feature an extended 40 minute set of this wonderful rarity! We also focus on Korea, and music from the band N.E.X.T...music from Indonesia, and the project Godbless, and music from the Phillipines project, The Juan De La Cruz Band. Ken Golden, CEO of the progressive rock label Laser's Edge, Sensory and Free Electric Sound has joined the gagliarchives radio program in recent years, such as Progmetal Nights I and II, and the classic from 2001, Ken Golden's Fusion Night. Please join us for this special program, another future classic!

<< Yes, but they weren't exactly good.  Okay, they weren't any good. >>

<G> I'd never owned any of them, which ranged from 75M to 10M. Gonset made a

tri-bander, too, for, I believe, 75, 20, and 10.

I had a separate transmitter and receiver for 100W 75M mobile (with three dynamotors in the trunk!). Then I bought a Gonset Communicator II for 2M. I had great fun with that.

CLUBBITY.COM - the safe clubculture site

nu jazz, broken beats, downbeat, break'n'bossa, , jazzy & nu house
-----------------------------------------------------------------
news, interviews, dates, reviews, charts, giveaways, radioshows

IRMA RECORDS Radioshow
SCHEMA RECORDS Radioshow (soon)
exclusively on http://www.clubbity.com

Straight No Chaser Issue 29 - Vol. 2 - Pag. 20

www.clubbity.com - Quality new music resource and radioshow, based in Italy but relevant to all.

MICHAEL R�TTEN (Soulpatrol / Compost Radio, Frankfurt)
"Very informative, fresh and keepin the freestyle idea alive. Recommended."

TYLER ASKEW (Straight No Chaser, Rude Movements, New York)
"Nuff respect goin out to Clubbity.com site for keepin' worldwide headz tuned in...Check it!"

KARL INJEX (Straight No Chaser, Rude Movements, Atlanta)
"From gigs to new releases to the hottest features, Clubbity is your mainline to all things underground..."

ENRICO 'VOLCOV' CRIVELLARO (Neroli, Verona)
"Italia: pizza, spaghetti, mandolino...and Clubbity!"

NIK WESTON (Mukatsuku PR, London)
"Colourful website full of cutting edge music information from labels all over the world that tune chasers such as myself feed off....check it out !!"

ALAN 'CUKIPAPA' BROWN (Soul Seduction, Vienna)
"I increased my length from a 6" to a 8" with just one visit to Clubbity.com. I going for more and my girlfriend loves me long time! No pills, no patches, no embarrassment, just one click of you plastic rodent will help you gain extra inches in length and girth too. I recommend you bookmark this site immediately"

MARK ROBERTSON (Spiritual South, London)
"Flying the flag for the loud minority"

GERD (4lux Recordings, Rotterdam)
"Clubbity.com is one of my favourite sites on contemporary dance. Cool, Calm & Collective!"

TITONTON DUVANT� (Residual, Columbus)
"Nice! Really got a chance to check it. Easy to navigate, informative."

STOCKHOLM CYCLO (Irma Records / Raw Fusion, Sweden)
"Thank you Clubbity for transgressing top news about the jazz beyond and the boogie of the future. Word!"

SHUR-I-KAN (Freerange Records, London)
"Quality site, great music taste, nice design - straight into the bookmarks!"

AARON MICHELSON (Ubiquity Records, California)
"Choice musical taste."

LARS BEHRENROTH (BOC Productions / Talk, Los Angeles)

"Dope site - ever growing database of reviews, interviews and DJ-Charts ... bookmarked!"

PABLO VALENTINO (Faces Records, Strasbourg)
"Big Up to the Italian connection for Clubbity.com...Good to see a website full of infos & good stuff..."

STEFANO GHITTONI (The Dining Rooms, Schema Records, Milan)
"I like a lot Clubbity attitude. I feel it very deep and melodious."

CAY TAYLAN (Couch Records, Vienna)
"You love to club? So you'd love to Club-bity"

NEEDS (Frankfurt)
"Nice website.. Big up to clubbity.com for keeping it real!"

PAIN� (Temposphere Records, Milan)
"Essential and very up-to-date resource for the jazz & beat music lovers.

I read the anniversary site on the CBC, and I'm jonesin' for some old school.  I remember when I was in junior high, and despite my mom's efforts, I stayed up WAY past my bedtime to listen to Brent and his ingenious mix of music.  Anyway, after going to the anniversary site, and searching the groups here, I've noticed there's a lot of people here who are looking for some old BNW stuff. Well, you can add me to the list.

I used to hear the show on WXPN here in Philly, and well, it was a godsend. Of course after that was over(at least here), I pretty much moved on, more or less. I have recently listened to Patti online, and I think she's doing a hell of a job. But Brent left a HUGE impact not just on my radio listening, but also my musical tastes. He was just so damn brilliant. I'm sure, most of you agree with me. Anyway, if anyone can help me out with some copies of the show on tape, I'd appreciate it.

If you want to set up some kind of deal or whatever, fine. I'm not doing this for money, though. It's all about the throwback, BABY!
Thanks.

I was going to post a URL to this, but it's no longer online. So please forgive the long post:

Godfather of Gangsta

In the red-light district of St Louis in 1895, a pimp shot a man dead in an argument over a hat. The ballad telling the story has been recorded by hundreds of bluesmen and jazzers - and even the Clash. It also helped create modern-day rap. Cecil Brown tells the remarkable tale of Stagolee

Friday May 9, 2003
The Guardian

I was standin' on the corner
When I heard my bulldog bark;
He was barkin' at the two mens
Who gamblin' in the dark.
It was Stagolee and Billy,
Two men who gamble' late,
Stagolee throw seven,
Billy swore that he throwed eight.

Stagolee told Billy,
"I can't let you go with that;
You have won my money
And my brand new Stetson hat."
Stagolee went home,
And got his forty-four,
Says, "I'm goin' to the bar room,
To pay the debt I owe."
Stagolee went to the bar room,
Stood four feet from the door
Didn't nobody know when he
Pulled his forty-four.
Stagolee found Billy,
"Oh please don't take my life!
I got three little children,
And a very sick little wife."
Stagolee shot Billy,
Oh he shot that boy so fas'
That the bullet came through him,
And broke my window glass.
Some folks don't believe,
Oh Lord that Billy dead
You don't believe he gone,
Jus' look what a hole in his head.

These are the words sung by the black prisoner Hogman Maxey to the song collector Dr Harry Oster at Angola state penitentiary in Louisiana in 1959.

I first heard the ballad of Stagolee around the same time, sitting under the shade of a tree at the end of the tobacco road in North Carolina. The way my Uncle Lindsey recited the legend, Stagolee was a young god of virility, as impulsive, as vulgar, as daring and as adventurous as the young black field hands wanted him to be. My uncles and their friends recited their rhyming, obscene praise of Stagolee's badness and, at the day's end, gathered in JC Himes's jook joint to dance with girls, drink whiskey and fight. Their nocturnal activities seemed to me to be merely an extension of Stagolee's.

The origins of Stagolee coincide with those of the blues, which sprang up in the 1890s. The first expression of it was as a field holler of former plantation slaves, who carried it with them as they migrated to the work camps along the Mississippi.

Since then, it has taken musical shape as ballad, as blues, as jazz, as epic and as folk song. Its influence can be found in every 20th-century American cultural form, from rock'n'roll to literature to politics to cinema to hip-hop. There are at least 20 jazz recordings, by musicians ranging from Cab Calloway, Jimmy Dorsey and Peggy Lee to Duke Ellington. More than 100 bluesmen, from Champion Jack Dupree and Sonny Terry to Mississippi John Hurt, have recorded it.

During the 1930s and 1940s, the widely respected folklorist John Lomax and his son collected it from prisoners across the south, in the form of a strictly folk protest music; at least a dozen recordings survive in the Library of Congress.

Stagolee - or Stack Lee, or Stagger Lee - has thrived as a soul tune rendered by James Brown, Neil Diamond, Fats Domino and Wilson Pickett. Performers of Stagolee have ranged from levee camp workers to white female "coon-shouters" (white performers who sang as black-face minstrels); from whorehouse pianists to black female blues shouters; from black convicts to Huey Lewis and the News, Bob Dylan and the Grateful Dead; and from 1920s Hawaiian guitarists to 1970s English punks like the Clash, who recorded it in 1979. The earliest recordings, in 1923, were made by two white dance bands, Fred Waring's Pennsylvanians and Frank Westphal and His Orchestra. Australian rocker Nick Cave recorded it in 1996, in Murder Ballads.

Then there are the songs in which Stagolee appears disguised. As Greil Marcus observed, Stagolee was "Muddy Waters's cool and elemental Rollin' Stone; Chuck Berry's Brown-Eyed Handsome Man; Bo Diddley with a tombstone hand and a graveyard mind; Wilson Pickett's Midnight Mover, Mick Jagger's Midnight Rambler... When the civil rights movement got tough, [Staggerlee] took over. And Staggerlee would come roaring back to the screen in the 1970s, as Slaughter, Sweet Sweetback, Superfly."

Though my interest in the legend began in my childhood, it was many decades later, researching a book on the phenomenon, that I discovered the myth's origins, in a murder in 1895 in St Louis, then one of the largest cities in the US. The killer was a man named Lee Shelton.

Shelton was born on March 16 1865, in Texas. Like New York, San Francisco and New Orleans, during the 1890s St Louis had a large red-light district. Most of the ballads say Stagolee was a gambler, but as I dug deeper it appeared that he was also a "maquereau", a French term for pimp often abbreviated to "mack". St Louis, which was founded by the French, still used the term to describe men who were kept by women.

In folk poetry, we find songs praising him:

Stackolee was a good man
Everybody he did love
The pimps and whores all swore by Stack -
By the everlasting stars above
They all loved Stackolee!

As a pimp and leader of a group called the Stags, Shelton was a slum hero, reigning in an area called Deep Morgan, one of the few places in the city where blacks and whites could commingle, and where blues, ragtime and "coon songs" had their origins. It was in a bar in this area that Shelton shot and killed Billy Lyons.

According to eyewitness George McFaro, on Christmas night, 1895, around 10 o'clock, Shelton walked into the Curtis saloon, in the heart of Deep Morgan, and asked the bartender: "Who's treating?" In reply, someone pointed out William Lyons. Apparently, the two men drank and laughed together for some time until the conversation turned to politics.

Soon, they began to exchange blows by striking each other's hats. Shelton grabbed Lyons's derby and knocked it out of shape. Lyons said he wanted payment of "six bits" from Stagolee for damaging his derby. Then Lyons grabbed Shelton's hat. At this point, everything changed. The argument turned on Shelton's Stetson, and whether Billy would give it back to him. In an attempt to make him give it back, Shelton pulled his .44 Smith & Wesson revolver from his coat, and hit Lyons on the head with it. Still Lyons would not relinquish the hat. Shelton demanded it again, saying that if Lyons didn't give him his hat immediately, he was going to kill him.

Then Lyons reached into his pocket for a knife and approached Shelton, saying: "You cock-eyed son-of-a-bitch, I'm going to make you kill me." Stagolee backed off and took aim. The 25 people in the saloon flew for the door. Only bartenders and a few others drinking at the bar stayed. Witnesses later testified to the coroner that they then saw Shelton shoot Lyons.

Leslie Stevenson, one of the witnesses, claimed that after he was shot, Billy "staggered against the side of the bar, leaned against the railing, holding the hat in his fingers like that, and it seemed he was getting weak, and he let the hat drop out of his hands. About that time, Stagolee says, 'Give me my hat, nigger' . . . and he picks it up and walks out into the brisk air."

A newspaper account also described Stagolee as walking over to the dying man still holding on to the bar and snatched his hat from Lyons's hand, put it on his head, and walked out "coolly" into the night air.

The murder had serious political consequences. Lyons, it turned out, was a staunch Republican, as were nearly all of St Louis's 25,000 black people. Lyons's stepmother, Marie Brown, owned the famous Bridgewater saloon. Her son-in-law, Henry Bridgewater, was reputed to be the richest black man in St Louis. Lyons belonged to this powerful clan loyal to the Republican party, which had freed the slaves. A new generation, represented by Stagolee, was anxious to vote for the Democrats. Stagolee had gained the support of the Democrats and so was hated by most of the black bourgeoisie, who were represented by Billy Lyons.

In the 1890s in St Louis, black people sought political protection with their right to vote. Both the Republican and the Democratic parties thought they could win if they got the black vote. The majority of black St Louisans voted Republican, but during the Republican convention, in the summer of 1896, many - unhappy that the national Republican party ignored their interest - broke with the party.

This break owed much to the black pimps in St Louis. Under the guise of "sporting" clubs, frequently called the 400 Clubs, pimps, saloon-keepers, and gamblers exerted voting power for the Democratic party. Some saloon-keepers represented the "unofficial" Democratic party.

They took him to the courthouse
Judge Murphy sat on the bench
An' the first one to put her can in a chair
Was Stack-o-Lee's lovin' wench
Down at the trial, down at the trial of Stack-o-Lee.

Many of the figures in the ballad - Judge Murphy, Stagolee's defence lawyer Nat Dryden, Stagolee's wife - were well known figures in the area. Other versions of the ballad make references to historical places and people, like St Louis Chestnut Valley, Lillie Shelton, and bartenders Tom Scott and Frank Boyd. We can assume, therefore, that the hero Stagolee who is the centre of the poem is a reference to the real man Lee Shelton.

Shelton's white lawyer, Dryden, may have been brilliant, but he also was a bohemian with an opium addiction. In the first trial, Dryden got Stagolee off with a hung jury. After two years in the courts, at the retrial in 1897, with a new judge and in the absence of Dryden, Stagolee was sentenced to 25 years in the Jefferson penitentiary. After being released by the Democratic powers that be, he was out for a few years and then returned for pistol-whipping another man. He died in the state prison in 1912, aged 46.

After the murder, the ballad telling of Stagolee's exploits began to spread across the American south and west. A circus performer heard it in the Indian territory in 1913. Early folklorists took an interest in the ballad as early as 1911, when Guy B Johnson published the first version in the prestigious Journal of American Folklore. John Lomax went around the southern states collecting the songs for the Library of Congress during the 1930s. During this time, most black men were either in prison or exploited on farms as sharecroppers. They sang about Stagolee and the Devil. The Devil was the white man.

In 1959, the song Stagger Lee became a number one for the rock'n'roller Lloyd Price, selling a million copies and topping the charts. In the 1960s, the civil rights movement took to Stagolee. At the height of the Black is Beautiful era, James Brown and Wilson Pickett recorded the Stagolee song. Bobby Seale, the leader of the Black Panthers, used it to recruit young black men to the party. I once got the opportunity to ask him why. He replied that Stagolee represented a template for black resistance to whites that just needed to be organised. "Stagolee was a bad nigger off the block and didn't take shit from nobody," he said. "Malcolm X at one time was an illegitimate hustler. Later in life Malcolm X grows to have the most profound political counsciousness... So symbolically, at one time he was Stagolee... To me, Stagolee was the true grassroots."

During this period, Stagolee also took the evolutionary leap that would go on to produce rap music and hip-hop. The connection between the bad man ballads and hip-hop was the form known as the "toast" - a recited story in verse. In telling the Stagolee legend as a toast, the speaker takes on the role of Stagolee. He begins to take on the character of the hero he is singing about. Asserting themselves as bullies and bad men, young black men "perform" Stagolee. The toast became an instrument that allowed them to be powerful and charismatic.

Shedding itself of the musical accompaniment that came with the ballad, Stagolee took his first step to being the basic form that the oral poets, the first hip-hoppers, utilised. During the 1980s, the first rhymers of rap took Stagolee to heightened levels. They used the Stagolee narrative structure as their own personal narratives.

In the development of rap music and hip-hop culture, Stagolee's influence is very clear. It persists in rap in the use of the first-person narrator, the performers' adoption of nicknames, the social drama, the humour, and participation in the commodity culture. >From the 1930s to the 1950s, most reciters of Stagolee told the story in the third person. After the rise of the toast tradition in the 1960s, most reciters told the story in the first person. The audience sees through the eyes of the character the rapper creates. The "I" is the bridge between the "I" of the rapper and the "I" of the character.

A reciter of Stagolee associates himself with the hero, but he also makes clear that he is not Stagolee. He can effectively change himself in the eyes of his spectators and listeners. In gangsta rap, the performers are acting out the lives of the criminals in an effort to dispel the criminal from their midst, as a way to get rid of the negative energy.

Stagolee is also present in rap music in the use of cliche: Stagolee is composed of cliche lines that are easy to remember. In rap music, performers found it necessary to use such cliches to keep the rap going.

The final influence that Stagolee has on rap was participation in commodity culture. In the 1890s, the Stetson became a symbol of black male status; in the late 1990s, baggy pants became a signifier of status. As in ear lier generations, ghetto blacks fight against a white appropriation through weird dress. To be able to purchase these commodities, young people in the ghettos resort to hustling, as their parents and grandparents did. They can't afford to believe that a nine-to-five job would solve their problems, because they could never get those jobs.

So gangsta rappers use the lifestyle commodities - cars, clothes, girls - as signifiers of success and wealth. They scrap the old cliche of the ghetto hustler with a slick suit and a truckload of hot goods for the new archetype of the rapper. The term and the concept of the modern-day "mack" are a retrieval of the old cliche of the St Louis mack that Lee Shelton once embodied. And it is not just the mack who is revived, but the women who will do anything for him, including sell their bodies. The girls rappers talk about are whores, or "ho's", just as they were back in the pre-industrial ballads of Stagolee.

Except as appearing in nearly every gangster rap, how does the ballad survive today? What made Stagolee survive for over 100 years? One of the reasons is that performers keep reinventing the song in their own image. Apart from such interpretation from black singers, like Mississippi John Hurt, whites keep reinventing it too.

While he was waiting to record an album, Nick Cave was reading a book on urban black folklore and came across a version of the Stagolee toast. Cave decided to record it for two reasons. He was fascinated, in the first place, by the homosexuality of this particular version. In the toast, Stagolee makes Billy "drop down and slobber on his head". "The final act of brutality, where the great Stagger Lee blows the head off Billy . . . while he is committing fellatio [was] especially attractive," said Cave.

Cave went further, adding lines from another blues ballad. "There's a verse to our version that goes, 'I'm the kind of cocksucker that would crawl over 50 good pussies to get to one fat boy's asshole,' which I heard on an amazing talking blues song by a guy who, in the song, introduces himself as Two-time Slim. I've always thought that was a groovy line so I just threw it in for good measure."

William L Benzon wrote that European-American racism has used African-Americans as a screen on which to project repressed emotions, particularly sex and aggression. We can see this when we look at how white people have used Stagolee. The key to this insight is the concept of projection. "One aspect of this projection," Benzon says, "is that whites are attracted to black music as a means of expressing aspects of themselves they cannot adequately express though music from European roots."

The screen Cave adds to Stagolee tradition tells us more about the culture of the singer than it does of the culture of the song. Stagolee as African-American tradition is the screen that allows the projection to take place. "The reason why we [recorded it] was that there is already a tradition," said Cave. "I like the way the simple, almost naive traditional murder ballad has gradually become a vehicle that can happily accommodate the most twisted acts of deranged machismo. Just like Stag Lee himself, there seems to be no limits to how evil this song can become."

How long will Stagolee get passed on? On a Sunday afternoon late last year, Taj Mahal appeared on stage at Yoshi's, a nightclub in Oakland, California. At 60, he is as energetic and solid as he was when I last saw him perform, 20 or so years ago. That afternoon, he had asked that parents come and bring their children. As Taj sang and strummed his big guitar, kids as young as five and as old as 17 were bobbing their heads to the rhythms of the blues.

"Now how many of you kids have heard of bandits," he asked as he stood on the edge of the stage, staring out at the young, white faces. Bandits? Sure. They had heard of bandits. "Okay," Taj said. "And you've heard about gambling? Well, this ballad is about a bandit who gambles! This song is about Stagolee!"

Backstage, sitting in a folding chair, Taj told me how he came across the legend. "The first I heard of Stagolee was from Lloyd Price," he said. "I was a Lloyd Price fan. I was always dancing to him. Then by the 1960s, I kept hearing it on blues anthologies - Mississippi John Hurt, and Furry Lewis's versions. As a child, I'd heard these stories about the bad man - bad man Stagolee - from my mother, who was from the low country in South Carolina. Then there was the other side of my family, my father is from the Caribbean, and from him I heard about 'bad John'. They would say, 'Bad John, stay out he way, man!' "

Taj laughed. This was great fun for him. He was Stagolee. As long as there are living historians like him, Stagolee will never die.

Cecil Brown's book Stagolee Shot Billy is published on May 29 by Harvard University Press.

A currently increasing practice in radio advertisements includes longer and longer "disclaimers" of one sort or another read in a rapid-fire voice.  I may be imagining it, but some of these disclaimers account for a third or more of the ad time.

I doubt I'm the only one who finds them excessively annoying.  In fact, they are so annoying that I can't tell you what products are being sold (autos?  financial products?) and when I tune away to another station to get away from these ads (which is inevitable), its likely that I won't return for a while. So not only are they ineffective, they've got serious unintended consequences.

The "disclaimers" themselves are probably of dubious legal effect, given the fact that they're nearly incomprehensible and probably not complete in any event.  If some legal department thinks its really necessary, it would be far better to make a brief reference to another source for more information and sell the product and not try to cut loopholes.

You're right, I was able to get it in on a tiny sangean portable, though not with the quality I would have had at home...I'm not complaining though, just wishing there were a Tivo for radio....

<<A currently increasing practice in radio advertisements includes longer and longer "disclaimers" of one sort or another read in a rapid-fire voice.  I may be imagining it, but some of these disclaimers account for a third or more of the ad time.

I doubt I'm the only one who finds them excessively annoying.  In fact, they are so annoying that I can't tell you what products are being sold (autos?  financial products?) and when I tune away to another station to get away from these ads (which is inevitable), its likely that I won't return for a while. So not only are they ineffective, they've got serious unintended consequences.>>

What is even more sleazy is that the disclaimers are often mumbled at the BEGINNING of the commercial so that they can be mistaken for "fine print" associated with the previous message. They seem to be mostly for car dealers. Every time I hear one of those ads it makes me wonder why anybody would do business with someone who is so obviously bullshitting them in the effort to just get them into the showroom; it can only get worse once you start dealing with them in person. (Sort of like spam with totally bogus subject lines. If they had to trick you into opening the e-mail, what makes you think they aren't going to cheat you if you order the V1c0D1n or whatever crap they are selling.)

Lee

If personality doesn't count, she was quite an attractive young woman.
The issue here is not whether or not you find her appealing, it's that
a serious betrayal of trust took place.

No matter how much she and I dislike each other I have to side with
her, in spite of her lying about the pictures being of her.

It was a cruel thing to do.

For sale:

(The "Radio Crazy".....he is baaaaakkkkk!!!) Finally with a really good deal!

Joint venture. Partial interest in 5 KW fulltime AM in Alabama for sale. A steal! Total asking price about $75,000. On air since the 50s.

Active or inactive investors with $10,000 min. each are welcome. All investors would be on the board with full voting rights if desired. Note: No individual can own over 49 percent. This means me too!

Disclaimer: There is an element of risk and you could lose all or part of your investment.

Those fully identifying themselves will be furnished callsign and city of license.

Tel: (478)741-1710 in Macon, GA. I am a semi-retired
radio engineer.

Nevertheless, Rich, I was always told when I was growing up (and have continued to pass on to my kids) that you should never do anything that you might regret later in life, or if you did, be prepared to accept the consequences of those actions.  The fact that Laura whats-er-name was put into a position of shame (at least as it relates to her current "moral standards") is a fitting result in counterpoint to her excessive hypocracy.  "Don't do as I did, just do what I say" is exactly the reason why so many kids end up regretting the consequences of their actions, since it's natural for them to do precisely what they're told not to do.

There's better ways to raise kids (not that this applies here....I can't imagine any self-respecting teen would listen to Schlessinger) but the idea that she can sit in judgement of those who may not share her newly-acquired morality is why, in this case, humiliation can be good.

Amateur Radio Newsline™ Report 1399 June 4, 2004

Amateur Radio Nerwsline Report number 1399 will follow in a few moments. First, this important announcement from our Support Fund Administrator Andy Jarema, N6TCQ:

--

The following is not necessarilly for retransmission. I guess you already know that if you are hearing my voice on a closed-circuit advisory it means that Newsline is again facing a financial crisis.

Well, you're right. The funds are so low that we may not be able to pay the bills from May. Worse, for the first time in our history, we even do not have the money to send a representative to Huntsville this
summer to present the 2004 Young Ham of the Year Award. And in two

words --- "that's bad." "Real bad."

The solution to both of these problems really lies with you. Our world-wide all volunteer staff produces these newscasts for you. The all volunteer Young Ham of the Year Committee labors tirelessly each year to select a youngster to receive the Award. Joe Eisenberg, K0NEB, oversees the Newsline sponsored Roy Neal, K6DUE, Amateur Radio Mentoring Project database, doing so at no cost. The list goes on and on.

I too am a volunteer, but I have to be the realist. I'm the accountant
who has to look at the bottom line and when it turns red, I have to say -- hold on -- there is no more money to continue. And that's about where we are right now.

So, here's the bottom line. If you want the newscasts to continue. If you want the mentoring program to continue and the Young Ham of the Year Award to continue, we need you to show it now -- right now -- through your financial support of Amateur Radio Newsline.

Remember that Amateur Radio Newsline is a federally chartered 501(C)(3) and California state not-for-profit corporation. This makes your donations tax deductible, whether you're an individual or a club.
The address to send them to is the Amateur Radio Newsline Support Fund, Post Office Box 660937, Arcadia California 91066. If you missed the address don't worry. It will be repeated at the end of this week's report.

For now I thank you for listening, for responding and offer you this weeks newscast which follows immediately.

--

Amateur Radio Newsline report number 1399 with a release date of Friday, June 4, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Ham radio on alert on a stormy Memorial Day
weekend, a BPL deadline is extended, another country says goodbye to Morse code and June is Amateur Radio month. We'll tell you where on
Amateur Radio Newsline report number 1399 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO: HAMS AID AS TORNADOES CONTINUE

Strong storms with funnel clouds raced across Indiana during the Memorial Day holiday forcing thousands of Indianapolis residents and race fans alike to take shelter from tornadoes. Jack Parker W8ISH was tracking the storm that left behind a train of devastation while putting radio amateurs on alert.

--

For the city of Indianapolis, the Race Day storms could not have happened at a worse time. Hundreds of thousands of people were in town for the 88th running of the Indianapolis 500 mile race and for the NBA Playoff game between the Indiana Pacers and the Detroit Pistons. The rain delayed race was nearing the end when race officials threw out the checkered flag and warned nearly 400 thousand race fans to immediately take shelter.

Accordling to early reports an F3 tornado passed just south of the Indianapolis Motor Speedway and began its destructive path across the south and east side of Marion county. Hundreds of central Indiana amateur radio operators were kept busy from Sunday morning until late Sunday evening tracking the funnel clouds and reporting ground truth observations back to the National Weather Service office in Indlianapolis.

While the Pacers took on the Detroit Pistons, tornado sirens blared outside, motorists got stuck in traffic jams, and tree limbs and debris were tossed into roadways. A funnel cloud described as two blocks wide, tore the roof off a nursing home leaving nearly fifty bed-ridden patients without shelter. They spent over an hour out in the pouring rain as rescue personel attended to their injuries. Downed power lines, flooded streets and massive amounts of debris from damaged homes made it difficult for Indianapolis police and fire personnel to reach those in need.

According to the National Weather Service more than a dozen tornadoes had touched down in 10 Indiana counties. This was the third time in three years that powerful tornadoes have ripped across central and southern Indiana.

Reporting from Indianapolis, for Amateur Radio Newsline, this is Jack Parker W8ISH

--

Marengo in southern Indiana was hard hit, with at least one fatality, four injuries and numerous homes damaged or destroyed. But Indiana was not alone in dealing with weather related problems. According to news reports several people in Kansas and Nebraska were injured by the weekend's tornadoes which also ripped through parts of those states. Ham radio was on alert there as well. More on this ongoing story in future Amateur Radio Newsline reports. (ARNewsline(tm), W8ISH)

THE BPL FIGHT: REPLY COMMENT DEADLINE EXTENDED TO JUNE 22

The FCC has extended the deadline to file reply comments on already filed responses in its broadband over power line Notice of Proposed Rule Making ET Docket 04-37. The FCC granted the extension based on requests from the National Antenna Consortium and the Amherst Alliance.

The two organizations had sought to have the FCC postpone the filing comment deadline until either September 1 or two months after the public release of the NTIA's Phase 2 study -- whichever was later. The Commission responded that in its view an additional three weeks should be ample time to respond to any NTIA submission.

The FCC does not routinely grant such time extensions, and it denied earlier petitions, including filings from the ARRL. Now it has relented and has set a new Reply Comment deadline of Tuesday, June 22nd. (ARRL)

**

RESTRUCTURING: MORE COUNTRIES DROP CW

More restructuring has taken place in Europe.  The GB2RS News Service reports that Finland has now officially dropped the Morse code requirement for that nations hams to have access to the High Frequency bands.  GB2RS says that Finland actually deleted the Morse requirement on the 1st of November of 2003.  Now, with the latest rules revisions there are now there are only two classes of amateur license in that European nation.

Also from GB2RS word that former French Class 2 licensees with F1 and F4 callsign prefixes are now being heard on the High Frequency bands. According to the French national amateur radio society, this change was implemented on May 16th.

But C-W is far from dying or dead on the other side of the Atlantic. In fact the fourth European High Speed Telegraphy Championships take place the 15th through the 19th of September in Montenegro and Serbia. (GB2RS)

**

## RESTRUCTURING:  NEW ZEALAND SAYS GOODBYE TO MORSE

Finland and France are not alone in saying goodbye to Morse code testing.  So has a nation down-under.

On June 4th New Zealand's Telecommunications regulators issued a decree that says Morse proficiency testing has ended and thatNew Zealand Limited Class operators will soom have access to the high frequency bands.  In fact, regulators have decided to upgrade Limited Class operators to the New Zealand General Class.

According to the notice, operators will not be required change their callsigns or take any other action..  The new rules go into effect on June 17th.  (ZL2BHF)

## ENFORCEMENT:  POLICE JAMMER GETS 8 YEARS IN PRISON

A man convicted of jamming a Wisconsin emergency service radio system will spend the next 8 years behind Federal prison bars.  Amateur Radio Newsline's David Black, KB4KCH, is at the south-east bureau with the details:

--

University of Wisconsin graduate student Rajib Mitra faces eight years in prison after being convicted of intentionally jamming public safety radio communications.  The 25-year-old Mitra was sentenced by a federal judge as a domestic terrorist under the Patriot Act which punishes substantial disruption of a critical public infrastructure.

The computer science student converted a radio receiver to transmit tones that interfered with the 800 MHz emergency radio system used by Madison police, fire and paramedics.  In all, Mitra was accused of interfering with public safety communications 37 times last year.  He told a federal judge the incidents were accidental--the result of a loose wire.  But the judge likened that to a fairy tale, and increased Mitra's sentence for perjury.  The disruptions happened between January and October, 2003.

Assistant U-S Attorney Tim O'Shea says Mitra's crime stems more from immaturity than ideology.  O'Shea says the case was about domestic terrorism, not like what happened in New York City September 11th 2001, but by the immaturity of the defendant.

Testimony included reports about disruptions that prevented police officers from communicating with each other while making arrests, keeping paramedics from getting patient information to hospital staffs and decreased safety for firefighters while on calls.

In one incident, Mitra was accused of interfering with communications for three hours on Halloween night.  He was also convicted of downloading pornographic sounds from the Internet and broadcasting them over police channels.

Mitra could have been sentenced to two years in prison.  He also faces three years probation and has been ordered to pay more than 6-thousand dollars to the Madison Police Department.

>From the South-East bureau in Birmingham, Alabama, I'm David Black, KB4KCH, for the Amateur Radio Newsline.

--

Its not known if the government will use Mitra's conviction under the Patriot Act as the basis of prosecution of others acused of the same type of crime.  (ARNewsline(tm) from Capital Times, others)

**

## ENFORCEMENT:  RESTERAUNT FINED $10,000 FOR USING 2 METERS

Remember the case of Best Wok?  The New Jersey resteraunt that was warned by the FCC to stop using an illegal high power 2 meter cordless telephone to coordinate deliveries but which continued to do so anyhow?

Well, that decision by the store manager is going to cost the company $10,000.  Thats the amount of the fine that the FCC has levvied against Best Work for transmitting on 145.8376 MHz without Commission authorization.  The resteraunt was given the customary 30 days rto pay up or to file an appeal.  (FCC)

**

ENFORCEMENT:  RIGHT APPLICATION - WRONG BURTON

The FCC admits that it made a mistake when it announced that it had sent a warning letter to a former California ham and designated his GMRS radio service application for a hearing.  What happened? Amateur Radio Newsline's Bruce Tennant, K6PZW, tries to sort it all out:

--

The FCC recently announced that it had sent another warning letter to Richard A. Burton, the ex-WB6JAC.  This, warning him about operating without a license and designating his GMRS application for review.

Only one problem.  The regulatory agency had the wrong Richard A. Burton.

It turns out that it was a Richard A. Burton in another state who, this time,  applied for a GMRS license.  It was not the Richard A. Burton who lives in California.

Complicating thins further the California Richard A. Burton had filed for a GMRS license over a year ago.  He voluntarily rescinded his application after the FCC set it aside for review.

So what happened?  According to a note in the ARRL Letter, the FCC was acting on the belief that the latest GMRS application had come from the California Richard A. Burton.  And mistakenly, the regulatory agency designated it for hearing.

For the Amateur Radio Newsline, I'm Bruce Tennnant, K6PZW, in Los Angeles.

--

By the way, we did a search on the QRZ.com callsign supersite.  We found that there are 12 hams that have the name Richard Burton living in North America.  Of these one is a Richard A. Burton but he does not live anyplace near the Richard Burton who was seeking the GMRS license.  (ARRL, others)

**

ENFORCEMENT:  TO MANY CALL SIGN CHANGES

The FCC is asking a New York, ham why he has filed over a dozen call sign change requests with the agency in the past four years.  Since August 29, 2000, Kiyoshi L. Nakamura of Buffalo has held the call signs K3DJ,  KJ6UZ,  AD1L, K3DJ again, KH6DJ, AD1L again, K3DJ for a third time, AD2R, AD1L for a third time , AD2R, WH7S, AD1L for a forth time and  AD2R for a second time.  And on May 4th, he again filed a call sign change request.  This time he wants to give up AD2R and get back to K3DJ for the fourh time.

In its letter to Nakamura, the FCC says that his numerous call sign change applications raise questions  about apparent abuse of the licensing  system.  This says the FCC that with limited exceptions, each call sign would be blocked by Commission rules from being reassigned to another licensee for two years.

So, the FCC gave Nakamura 20 days from the date of its inquiry letter to respond.  He was told to state his  intentions regarding the filing of these applications.  He was also told to coose one and only one call sign that he actually wants to keep.   (FCC)

**

RADIO HONORS:  AMATEUR RADIO MONTH IN NH

June is now Amateur Radio Month in New Hampshire.  This, as Governor Craig Benson issues a proclamation honoring the states radio amateurs for their dedication and the service for its almost 100 year history of contributions to the advancement of communications technology.

First issued by the New Hampshire State Legislature in 1985, each succeeding Governor has recognized the role of the states Amateur Radio operators during the month of June.  2004 marks the 19th consecutive year that these proclamations have been issued.  (Via e-mail)

**

## TECHNOLOGY: IS IT BYE-BYE TO VHS?

Home recording using tape as a medium seems to be on its way out. According to the Consumer Electronics Association, in 2003, movie watchers rented more DVDs than VHS tapes. Also, DVD sales increased by 30% while the sale of VHS VCR's dropped by an unexpected 50% in 2003.

Whats replacing the venerable VHS system? Hard disk recorders like TIVO which have been dropping in price over the last twelve months. When combined with satellite or cable TV, these devices make delaying a program to watch later as easy as 1-2-3. (Science OnLine)

**

## THE SOCIAL CIRCUIT: HAM-COM IN DALLAS TEXAS IN JUNE

Turning to the ham radio social calander, if you will be in the Dallas., Texas area the weekend of June 18th and 19th, make it a point to attend Ham-Com 2004. This is the ARRL West Gulf Convention held at the Arlington Convention Center in the Dallas suburb of Arlington. This years features include indoor and outdoor flea markets, numerous commercial exhibits, a D-X luncheon, an APRS workshop and much more.

Information on this one is on line at www.hamcom.org or by writing to Ham-Com 2004. P.O. Box 12774, Dallas, Texas, 75225. The phone and fax number is area code 214-361-7574 (Ham-Com)

**

## THE SOCIAL CIRCUIT: KNOXVIOLLE TN. IN JUNE

And the 38th annual Knoxville Hamfest and Electronics Exposition is slated for June 11th and 12th. The venue is the Knoxville Exhibition, World's Fair Park in Knoxville, Tennessee. The theme this year for the event is "Promoting Youth in Amateur Radio." More information is on-line at www.w4bbb.org  (K4PZT)

**

THE SOCIAL CIRCUIT:  A TALE OF HAM RADIO AT NAB

Also, if you want to read more about ham radio at the recent National Association of Broadcasters Convention in Las Vegas, take your web browser over to www.haleisner.com.  Then click on the column titled "The Other Side of the Control Room Glass" by our own Bill Pasternak, WA6ITF.  This month Bill not only takes reads to the N-A-B show but also tells of his recent exploits at the Dayton Hamvention.  Again, its all on-line at www.haleisner.com  (ARNewsline(tm))

RADIO LAW:  FREQUENCY COORDINATION FOR THE 2004 NATIONAL  POLITICAL CONVENTIONS

Remember a few years ago when the ARRL became the FCC's "single Point of Contact" or spoc on repeater related matters?  Well how about one for this years  political conventions?  Well that honor has gone to a New York based consulting engineer.  Bill Pasternak, WA6ITF, has more:

--

At the request of the Frequency Coordinating Committee for the 2004 Political Conventions the FCC has designated Louis Libin, as the single point of contact -- or spoc -- for coordinating broadcast R-F operations.  This, under Section 74.24 of the agency's Rules.

Libin will oversee all RF operations for broadcasters in Boston from July 26th through July 29th and in New York City from August 30th through September 2nd.  Nor is this the first time for him to do so either.  Louis Libin is considered one of the worlds foremost authorities in the area of RF compatibility and has worked on numerous televised events over the years.

For the Amateur Rafio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

More on this story is at the cyberspace at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1494A1.doc (FCC, CGC)

**

## RADIO LAW:  811 PROPOSED AS A NATIONWIDE CALL-BEFORE-DIGGING NUMBER

The FCC is asking for comments on a proposal to adopt "811" as a nationwide call-before-digging number.  The regulatory agency believes that this will give excavators one simple number to call to avoid cutting buried cables, gas lines and other important infrastructure.

Currently there are 70 nationwide "One Call" centers that serve different geographic areas.  They are generally accessed by dialing toll-free or local telephone numbers.  The FCC however believes that having one simple number to call like 811 should promote safety and lead to fewer utility outages.

Want to know more?  It's all on-line at http://hraunfoss.fcc.gov/edocs_public/attachmatch/DOC-247171A1.doc (CGC)

**

## RADIO LAW:  COURT UPHOLDS CABLE RULING

Meantime, the FCC is considering a Supreme Court appeal in cable Internet access dispute.  This, after a federal appeals court says that it is standing by its October ruling that cable TV operators should open their lines to rivals who also want to use them to sell high-speed Internet service.

The Federal Communications Commission asked the 9th U.S. Circuit Court of Appeals to revisit the decision, but the court declined to do.  If upheld, the circuit's decision would likely subject cable operators to the same rules as local phone companies, who are forced to lease their lines to rival providers of phone service and D-S-L Internet access. (Published reports)

**

## WORLDBEAT-UK:  2004 AMSAT COLLOQUIUM IN THE UK

Turning to news from around the world, the 2004 AMSAT-UK Colloquium will be held on Friday, July 30th through  Sunday, August 1.  This, at the University of Surrey, Guildford, United Kingdom.

A feature of this year's meeting will be a talk and Question and Answer session with Professor Colin Pilinger of the Beagle 2 project. More information is on-line at www.uk.amsat.org.  (AMSAT-UK)

**

## WORLDBEAT-ALBANIA:  TIRANA ALBANIA FOR DX'ERS IN JUNE

And Albania's first ever DX Convention, is scheduled for 19th to the 20th of June in the city Tirana.  Attendees will get to meet many figures from the DX community who donated equipment to put Albania on the air.  This includes G3LQP, W6UM, OH2BH and T93Y.  United States

Amateurs should contact K2WR, at k2wr@njdxa.org for advice how to travel to this gathering. (Via e-mail)

**

ON THE AIR: FRENCH RULES CHANGE SPAWNS DX OPERATION

FT1ZL is on Amsterdam Island and is expected to become active soon. This, after the French have change their licensing structure to grant holders of that nations VHF only license operating privileges on the High Frequency bands.

French stations with the numeral 1 or 4 in their prefix can now operate the low bands using all modes except A1A, A2A, F1A and F2A. FT1ZL will use his new found privileges on 20, 17, 15, 12 and 10 meters SSB during his Amsterdam Island stay. (Internet)

**

DX

In D-X, IK4RUX says that he plans to operate portable IF1 from Favignana. He will be found on SSB and C-W from the June 19 to the 26
th. QSL this operation direct or via the ARI Bureau. (GB2RS)

And K8AQM reports that his upcoming trip to Samoa will take place July
7th to the 21st. He will operate as 5WZ0TR from the Samoan Village Resort on 160 though 10 meters. Modes will be CW, SSB, RTTY and PSK. All QSLs are via K8AA at his callbook address. (OPDX)

**

THAT FINAL ITEM: BANNED BY ONE WORD

And finally this week, the tale of why hams in Thailand were not allowed to talk to hams in other parts of the world for a number of years. The truth be known, it was all because of a three letter word. Here's Q-News Graham Kemp. VK4BB, with the rest of the story:

--

Audio report only.  No text available.  Lisen on-line at
www.arnewsline.org/

--

And for those of you who do not speak French, the word oui --
sometimes pronounced as the English word "we" -- means
"yes."

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ
Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands,
Rain,
the RSGB and Australia's Q-News, that's all from the Amateur Radio
Newsline(tm).  Our e-mail address is newsline @arnewsline.org.  More
information is available at Amateur Radio Newsline's(tm) only
official
website located at www.arnewsline.org.  You can also write to us or
support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia,
California 91066.

A reminder that the nominating period for the 2004 Amateur Radio
Newsline Young Ham of the Year Award is now on.  This program is open
to any FCC licensed young radio amateur age 18 or younger residing in
the contiguous 48 states and who has made a significant contribution
to the community, the nation or ham radio though the United States
Amateur Radio Service.

More information and a downloadable on-line nominating form is at our
website. That's in cyberspace at www.arnewsline.org.  The cutoff
for
nominations this year is midnight on June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm
Don
Wilbasnks, AE5DW,  saying 73 and we thank you for listening."

I'm trying to get 1110 AM in Manhattan, and have terrible reception due to all the surrounding concrete. I've just ordered the Super Radio by GE, and would like to know if the Terk ADVANTAGE AM Advantage Antenna would help. The radio has 2 screws on the back for an antenna, but this one I think doesn't need to be attached. I can get some channels with my regular radio by placing it near the window. I would sure appreciate any help. Thanks much!

I'm trying to pull in 1110 AM in NYC, the Coast To Coast show, and just ordered the GE super radio. I'm in Manhattan, and surrounded by a lot of concrete. Bedides the radio, I was looking at the Terk antennas.
Would the Advantage model work?

http://www.buy.com/retail/product.asp?sku=90120327&loc=111&sp=1

I'm able to pull in some stronger stations if I place my current radio next to the window, but the AM reception is mosty static. The Super Radio has 2 screws I think for an antenna, but the one above doesn't have to be attached. Anything for less money out there? Thanks!

Quoth sheellah@aol.com (Sheellah) in news:c9tfp0$gcr$1@xuxa.iecc.com:

> I was looking at the Terk antennas.
> Would the Advantage model work?

Any good tunable loop should help significantly, but in a EM-noisy environment, nothing can eliminate all the static.

FWIW, the Terk Advantage is the only antenna Tivoli Audio recommends specifically <http://tivoliaudio.com/faq.htm#q12> for improving AM reception on their Model One radios. I find the now-discontinued Radio Shack loop antenna to be very helpful in the noisy Faraday cage (an apartment in a stucco building covered with aluminum siding with mercury vapor lights mounted on the front of the building) I live in.

I'm sure most of us have done something in our pasts that would be
humiliating to us today, at least in some circumstances. While I said
I felt it was a tremendous betrayal of trust, that doesn't mean I
didn't enjoy seeing her lie and try and squirm out of it . I love
seeing hypocrisy get sideswiped by Karma.

As I've said many times before, anyone who makes life changing
decisions based on what a Talk Show host tells them deserves
everything they get. Talk Radio is entertainment, not therapy.

Rich

>I'm trying to pull in 1110 AM in NYC...<

Since there's no 1110 AM in NYC, I'm presuming that you mean WTBQ in Warwick NY, which is the closest station to NYC on 1110.  They're licensed for 250 watts...daytime only.  Coast to Coast (a syndicated overnight show) would likely not be running on a daytime-only station.

If I were he, I'd be trying to get WTAM in Cleveland -- 1100 AM.

I have pulled it in from time to time in Westchester.

Try a long wire hung out the window.  It'll probably buy you more than most
of the cheap active antennas.  Unfortunately if your problems are interference
related, they'll be worse too.  But a quarter's worth of magnet wire and you
can find out without spending a lot of cash.

I am looking for either a PC card radio receiver or an external FM receiver which can be connected to the computer in order to process the RDS data, specially the station ID.

I am involved in a project for automatic detection of propagation conditions on the VHF bands and what I need is a receiver that can be fully controlled by the computer, scanning continuosly, identifying the stations received, and logging them in a database for later analysis.

I'm a software developer, so I'll make any required programming in the PC, but the problem is I can't find any reference to a receiver which fits my needs (interface with PC and RDS compatible). Can someone help me?

Thanks.  Gabriel.

I'm selling my entire archive of Stern shows. MP3's will be burned onto DVD-ROM's (around 6).
Email me for a complete show list or with any questions. I am a "Premier" Paypal member with over 400 successful transactions logged.
Free shipping in the states, and I'll accept various payment methods.
The MP3 quality is good overall, but great since March '04 since these may be the final open-air shows. (Archive will be up-to-date at the time of shipping.) Asking $60. Drop me a line!

Frank

Well, I quit my job based on a what a talk show host told me, and it was the best thing I ever did. I'll never have to listen to him shouting about that crappy Sparta console ever again.

Back in the, um, good old days of analog tuners, many stations 'rounded' their frequencies. On an analog tuner you could hardly tell the difference between 1500 and 1510. An FM station where I live went by the phrase 'Great 98', although the frequency was 97.9.

When digital tuners showed up all the stations changed their strategy and started referring to the precise frequency where they were located.

I believe WMC FM still has prisms as the main source of processing... and even with all the mpeg compression the station still sounds better than more... pre music on disk it sounded wonderful...

It wont matter what processing you use if you are feeding garbage into your control board.

>
> I doubt I'm the only one who finds them excessively annoying. In fact, they are so annoying that I can't tell you what products are being sold (autos? financial products?) and when I tune away to another station to get away from these ads (which is inevitable), its likely that I won't return for a while. So not only are they ineffective, they've got serious unintended consequences.>>
>
> What is even more sleazy is that the disclaimers are often mumbled at the BEGINNING of the commercial so that they can be mistaken for "fine print" associated with the previous message. They seem to be mostly for car dealers. Every time I hear one of those ads it makes me wonder why anybody would do business with someone who is so obviously bullshitting them in the effort to just get them into the showroom; it can only get worse once you start dealing with them in person. (Sort of like spam with totally bogus subject lines. If they had to trick you into opening the e-mail, what makes you think they aren't going to cheat you if you order the V1c0D1n or whatever crap they are selling.)
>
> Lee
>

Lee, got an MP3 player in your car?

Pick your favorite genre station from http://www.bbc.co.uk/radio and use Total Recorder from http://www.highcriteria.com/ to record BBC's great programming while you're at work or sleep. The new version of Total Recorder will even split continuous recording up into X minute MP3 files, on the fly, into smaller files. Copy them to your MP3 player, like my 20GB Archos Studio 20 hard drive MP3 player and play them in the car, at the beach or at the office.

Screw commercial radio and its incessant grinding you into the ground with little programming.....

No connections to hook up the player where you want to play? Go to Radio Shack and get an Irock FM transmitter, made for Apple's Ipod player. It will play any headphone audio over your FM stereo on 88.1, 88.3, 88.5 or 88.7 Mhz in a local dead channel. My Irock will transmit to the entire house LIVE plugged into the soundcard audio output of the computer on any stream like BBC.

You don't need to be a slave to the noise on AM and FM......

Larry

If you owned WINS, you would also own WCBS, and WFAN, and Stern's station, and a number of other very powerful stations around the country.

Also the CBS and UPN TV networks, and Paramount studios, and a huge billboard company, etc., etc.

In short, you'd be Sumner Redstone, biggest shareholder in Viacom, one of the richest people in the world.  And you probably wouldn't care much about anything posted in a newsgroup.

Of course, anyone can be a (very small minority) owner of all this. Just buy some Viacom stock.

> --scott

Clear channel stations have a 'gap' in coverage at night.  I was in Atlantic City, NJ a few weeks ago and noticed NYC stations come in lousy at night.  The same stations come in much better in, say, Baltimore, which is further away.

Here's why:  An AM station at night has a 'ground wave' signal.  This is the strong local signal you get near the antenna source.  There is also the distant-reception 'skywave' signal.  This is from the signal bouncing off the upper atmosphere and coming back down to the ground.

There is a doughnut-shaped gap in between these 2. The skywave signal has to go into the upper atmosphere and bounce down. Even at the most severe angle possible, the skywave signal doesn't come into play until you are a certain distance from the antenna source (not enough of an expert to know what this distance is, but you get the idea).

So, from where the ground-wave local signal fades out, to where the skywave signal first shows up, is the gap, with poor reception of the station's signal. Clearly Atlantic City, NJ, is in the gap for NYC clear channels.

I live in Columbia, SC, and can barely get WBT (Charlotte, 70 miles away) at night. Go around 100 miles or so further south and it comes in pretty well (when I lived in south Florida I used to get it regularly). Same principle in action.

Of course other posters have pointed out that this show was broadcast during the day, so this is irrelevant (but interesting info, IMHO).

Actually, the reason stations changed to precise dial position imaging is
because, as digital dials increased in availability, stations saw that
precise postions were what was being written down by Arbitron diarykeepers.
In addtion, exact postion is a 100% foolproof credit; a rounded postion can
throw diary entries into ascription. Thus, exact frequency on-air mentions.

> clear channels.

Not exactly true. The "gap" is actually the cancellation zone where the
skywave and the groundwave come in, but at enough of a time difference to
cause effects commonly thought of as fading, fluttering, etc.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown.  We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

Absolutely - but Howard has said openly on the air that he will never
prosecute anyone for trading / selling copies of his radio show, nor
will he ever be able to offer the same type of service to his fans.

And, of course, the gap shifts in position and shape during the night
as the D and F layers rise and fall.

Want to buy:

(The "Radio Crazy" is in "reverse" now)!!! HI!

I want to buy a cheap "dog" AM radio station. Any location considered. Ideally seller financed with little or no money down. Prefer fulltime and non-directional with favorite being good old class IV (now called "C" by FCC)AM.

Need not be profitable. Prefer with real estate but that is not a must.

Again I am not looking to buy WLS, I am looking for a sick "Dog"!!!

Finders fee will be paid to anyone telling me about a station if that station is actually purchased. The fee can be in cash at closing or a percentage of the station, your choice.

Tel: (478)741-1710 in Macon, GA

I am a semi-retired radio engineer. Last job in radio was Chief Engineer for a 5 KW fulltime directional AM in New York City.

73,

Meyer Gottesman, W6GIV

aka The "Radio Crazy"

hey there-

i am seeking recommendations for an rds generator.

we hope to use data from our website's playlist to feed the generator information.  (such as "scheduled at 6:30pm: __beethoven's symphony #5___)

if that makes sense, can anyone offer suggestions?  i'm totally ignorant about this, and could really use some help.

thank you!

christa

There is an upcoming WNBC/WYNY reunion, and the organizer is attempting to locate Juicy Brucey.  Last I heard he was in Arizona, after his tour in St. Louis.

We're a lot less well off w/o Bruce's wit.

Can anyone help?

regards

J Ballard

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown. We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform
involves all different kinds of music, including jazz, reggae, blues,
hip-hop, country, rock, and just about everything else under the sun.
Instead of telling our DJs what to play, we allow them to select their
own recordings from our vast and unique library. It is their
responsibility to mix together many different kinds of music in an
intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!
http://wcbn.org/listen.html

>but Howard has said openly on the air that he will never prosecute anyone for trading / selling copies of his radio show, nor will he ever be able to offer the same type of service to his fans.<

Unless he owns the show outright, including all broadcast and reproduction rights, it's not his call to make, and Infinity certainly can prosecute those who distribute copies.

Sounds like you need to be listening to a better class of radio station.
(LOL)

This is accurate.

Clark Reid at KABL told me that he would turn off stereo too if it would increase the range of the transmitter.

Too bad.

On a good receiver it is a nice sound.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!
=20
WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown.  We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.
=20

KUZZ (AM) and KWAC in Bakersfield still run stereo.  KABC in Los
Angeles was lighting the beacon last time I was down there.  So was
their Radio Disney outlet, KDIS (the old KRLA, 1110).

You've heard about France Bleu?
Its a 300,000W AM Stereo station which can be heard throughout Europe,
southern England and Ireland!!
And typical licenses are 5,000W!

Richard.

As a former radio GM, I am convinced that radio is the best buy for the advertising dollar. It is very low cost and is very effective and I think 95% of businesses should spend at least part of their advertising budget on local and/or national radio.

Many advertisers, though, feel like radio is not as glamorous as television, not as serious as newspaper, and not as timely as outdoor. Of course, I beg to differ on all accounts.

And as someone who has dealt extensively with ad agencies, both as a seller and as a buyer, I know that agencies make their money as a percentage of both the media buy and production costs. I suspect, therefore, that most agencies tend to steer their customers toward the more expensive media outlets with the higher production costs.

That leaves more inventory available on radio for folks who are savvy enough to take advantage of radio's enormous reach and effectiveness. Those weight-loss and gold-coin promoters are smart enough do so, and the radio owners are smart enough to accept their money.

WCBN WILL DESTROY YOUR FEEBLE FORMATS

WCBN - 30 Years of Freeing Your Mind - Listen to us online!

WCBN is the University of Michigan student-run community freeform radio station in Ann Arbor, Michigan. We broadcast at 200 watts to the University and its surrounding communities from the basement of the Student Activities Building in downtown treetown.  We have been broadcasting a genre-less overview of music, news, and public affairs for 30 years.

WCBN's musical format is freeform, with some specialty shows. Freeform involves all different kinds of music, including jazz, reggae, blues, hip-hop, country, rock, and just about everything else under the sun. Instead of telling our DJs what to play, we allow them to select their own recordings from our vast and unique library. It is their responsibility to mix together many different kinds of music in an intelligent fashion, and show links between musical genres.

Click here to listen to our live WCBN-FM Ann Arbor broadcast!

> > Why are all the ads that I hear for trash crap products?  Weight loss junk, gold coin crap, how to be a millionaire foolishness, and on and on and on.  There are very few radio ads that I hear advertising a quality product at a fair price, simply to gain marketshare.  I would honestly be interested to hear about new products, or to hear specials from companies, to hear the latest deal or sale, or anything that's a real product, quality, no rip off, no placebo pill with a takeoff on the viagra name, no hair growth system with a guarantee to get "up to 100% of your money back" (whatever that means).  The few decent ads are local.  Does radio just not make the decent businessperson money anymore, so radio stations have to settle for the lowest common denominator?  I'm honestly curious.  You'd think there would be ads for the latest Nissan truck, or Wal-Mart national radio specials, something of that sort.  Perhaps they exist, but I'm a radio junkie and all I hear is crap.  Please respond.  Thanks!

Maybe get off of the sports station?

Can anyone tell me if the "old" Sunshine Radio in Luxembourg is still

on the air? Broadcasting from the district of Limpertsberg on 102.2
FM, it was the only English speaking radio station in the City of
Luxembourg for some time, as far as I know.

The German service of Radio Luxembourg (or RTL, as it is called now)
has recently re-activated the mediumwave frequency (on 1440 khz)for
its programme in German language. I doubt that this frequency will be
utilised for any other programme, for example one in English language,
in the near future.

I purposely didn't mention the kind of radio, just because it seems to
be on all of it, but just curious, what kind of decent ads do you
hear?  Maybe they're just slipping past me.

I'm not in the US, so I wasn't sure how general the problem is.  The
type of ads described, I keep hearing on syndicated overnight shows,
like "Coast to Coast".  I can't listen to much US programming in the daytime,
and obviously much of the night is now syndicated.  So I just assumed
those junk ads had more to do with the type of programming than an ongoing
trend.

<<As a former radio GM, I am convinced that radio is the best buy for the advertising dollar. It is very low cost and is very effective and I think 95% of businesses should spend at least part of their advertising budget on local and/or national radio.

Many advertisers, though, feel like radio is not as glamorous as television, not as serious as newspaper, and not as timely as outdoor. Of course, I beg to differ on all accounts.>>

I'm guessing that when you were a GM the station(s) was/were owned by a company smaller than one of the mega-groups. Or maybe it was taken over by one of them. I think one of the reasons that so many advertisers are by-passing local radio stations is that there's a good chance they are not being called on by account execs who have any clue as to what they are doing. It seems to be the policy of both Clear Channel and Infinity (and possibly others) to fill their sales staffs with quantity rather than quality. Both chains hire herds of sales people, irrespective of experience or qualification. They field such large sales staffs that account lists get thinned out too much for many of them to earn a decent living. So most stations end up with a few successful sales people who call on their old reliable clients, and a revolving door of beginners and other lesser sales people who have neither the sales skill, understanding of radio, nor the ingenuity to convert the vast numbers of potential advertisers into paying customers.

Lee

Try WBAP 820 from Ft. Worth, TX. 50KW Non-DA. Last check within a month or
so, still stereo. Other problem: talk format.

All you need to do is just not believe them. Yeah, lose 54 lbs in 6 days, by eating some pill, and sitting in a chair. "I did it, so can you" is the rant.

Y'know, if someone is stupid enough to believe that crap, why should anyone care? It's called natural selection.

I hear "decent" ads all the time. Whether it's national ads for places like Sears or Radio Shack, or local ads for restaurants, stores, etc., radio is full of them! Now I do spend a couple hours a day on the local sports station, and there one will hear the type of spots you mentioned, plus ads for local adult stores, plus of course "male enhancement."

Some of these ads are tasteless in my opinion, but they may not be in somebody else's opinion. This is a free country and the right to discuss male enhancement goes along with the right to critisize the government. Now as for anyone stupid enough to think any of this crap would actually work, maybe they deserve to be seperated from their money. If anyone is perpatrating a fraud, then they should be prosecuted, but until such time as that happens, they have just as much right to the airwaves as Sears does.

Its amazing how people who claim to be open minded can really be so closed
minded, and unaccepting of another's position.

It's not limited to radio.  Some night, you should check out the ads on the
networks' nightly newscasts... you'll see a disproportional number of ads
for patent medicines covering all kinds of gross conditions.

Lee, you were right about my radio group not being one of the big ones. It
was owned by a local businessman who had other business interests but no
other stations.

The owner's philosophy was similar to that of Clear Channel, To him, it was all about the bottom line, no matter what.

When I went to work for him, he owned the top station in the area. Then he bought the competitor. And then he started dismantling both. He let all the high-paid jocks go, automated the stations and hired minimum-wage baby sitters to watch the computer and throw in occasional weather and liners.

Obviously sales dropped, but since expenses dropped even more, then he remains happy. I got out on the way down, and I'm so thankful to be gone!

Oh, the stations are a joke now. There's dead air on any at any given time. His son is the chief engineer, so no one is pressuring anyone for the sorry sound and performance.

Which version of Stagger Lee? If my memory is correct, Stagger Lee by Lloyd Price in January 1959 was the Number One Single in Billboard Magazine and there were two versions (KFWB in L.A. played the one with the word GAMBLING in it; on American Bandstand, Dick Clark played a version without the word GAMBLING in it for the National Audience.)

Can anyone verify that there were two versions of Stagger Lee by Lloyd Price?

thanks. peace, ted alvy

Actually, the blame doesn't rest with WLIB. It was only the executioner. The real blame lies with the FCC, who in thinking that the marketplace is the only arbiter of a station's worth, allowed the new owners of WOWO (WLIB, of course) to make changes to the DA, reducing service area in the process, in order to allow WLIB, which had a larger potential audience and thus a greater profit potential, to increase their nighttime coverage.

But the days when a station had an obligation to serve the city of license and, in the case of the clear and regional channels, the area around the COL, are long gone.
And that's what killed WOWO (with WWVA not far behind).

Lee, you were right about my radio group not being one of the big ones. It was owned by a local businessman who had other business interests but no other stations.

The owner's philosophy was similar to that of Clear Channel, To him, it was all about the bottom line, no matter what.

When I went to work for him, he owned the top station in the area. Then he bought the competitor. And then he started dismantling both. He let all the high-paid jocks go, automated the stations and hired minimum-wage baby sitters to watch the computer and throw in occasional weather and liners.

Obviously sales dropped, but since expenses dropped even more, then he remains happy. I got out on the way down, and I'm so thankful to be gone!

Oh, the stations are a joke now. There's dead air on any at any given time. His son is the chief engineer, so no one is pressuring anyone for the sorry sound and performance.

Which version of Stagger Lee? If my memory is correct, Stagger Lee by Lloyd Price in January 1958 was the Number One Single in Billboard Magazine and there were two versions (KFWB in L.A. played the one with the word GAMBLING in it; on American Bandstand, Dick Clark played a version without the word GAMBLING in it for the National Audience.)

Can anyone verify that there were two versions of Stagger Lee by Lloyd Price?

thanks. peace, ted alvy

Actually, the blame doesn't rest with WLIB.  It was only the executioner.  The
real
blame lies with the FCC, who in thinking that the marketplace is the only arbiter
of
a station's worth, allowed the new owners of WOWO (WLIB, of course) to make
changes
to the DA, reducing service area in the process, in order to allow WLIB, which had
a
larger potential audience and thus a greater profit potential, to increase their
nighttime coverage.

But the days when a station had an obligation to serve the city of license and, in
the case of the clear and regional channels, the area around the COL, are long
gone.
And that's what killed WOWO (with WWVA not far behind).

>>

As a jock I played it a million times...never heard different versions or discussion of different versions. As I recall his release was huge but on a unknown label...they probably wouldn't have gone to the trouble.

-----------------

on another note...the Capitol disc from the early 50's of Johnny Mercer doing Accentuate The Positive contained background by the Pied Pipers and the story goes they didn't know what to sing the fill the spaces between Mercer's lyrics. He told em to sing "hen shit" which if you listen to the song...is rather obvious. True story or false rumor?

"I'm an ordinary person
...with an extraordinary job."

Here are the lyrics to the Bandstand version, from a web site:

The night was clear and the moon was yellow
And the leaves came tumbling down....

I was standing on the corner when I heard my bulldog bark
He was barking at the two men who was arguing in the dark
It was Stagger Lee and Billy, Billy took poor Stagger's date
He said you did me wrong Billy and that's one thing that I hate

Stagger Lee told Billy
I can't let you go with that
Because I loaned you my money
and my girl I want her back
Look out Stag

Stagger Lee went home and he fell down on the floor
He said Billy did me wrong and I don't wanna see him no more
Oh Billy felt bad because he hurt his poor friend Stag
I'm gonna give him his girlfriend and everything that I have

Stagger Lee and Billy never fuss or fight no more
Because he got back his girlfriend and Stagger Lee was no more sore

------------------

I'm sure the world became a better and safer place because some kids were protected from the corrupting influence of the original.

The biggest controversy over Lloyd Price's original version of "Stagger Lee" is that Billy gets shot. In the remake, he doesn't.

The remake is often referred to as "the 'American Bandstand' version," which partly answers your other question. Can't tell you about which version KFWB played.

Could well have been a local cut job.  I know very well that when Brown-Eyed
Girl came out, our station PD spent an hour or so carefully removing "Making
love in the green grass behind the stadium" and replacing it with another
line, with razor blade on 1/4".  This is the version we aired.

Jerry Lawson of The Persuasions acapella group has gone solo and recorded two
songs with a band: He

Don't Love You (he is harmonizing with himself) and Stagger Lee. The
Persuasions did IDs and Promos

for KPPC-FM Pasadena, California (the group is acapella) in 1970 and 1971.

Artist: Neil Diamond
Album: September Morn'
Title: Stagger Lee

The night was clear and the moon was yellow

And the leaves came tumbling down

I was standing on the corner
When i heard my bulldog bark
He was barking up at the two men
Who were gambling in the dark

It was stagger lee and billy
Two men who gambled late
Stagger lee threw a seven
Billy swore, he threw an eight
Stagger lee told "billy,
I can't let you get away with that
Well, you've won all my money
And my brand new stetson hat"

Stagger lee ran home
Went and got him his 44
Said, "i'm going to the bar room
Just to pay that debt that i owe"

Go stagger lee, go stagger lee
Go stagger lee, go stagger lee
Said, "i' m going to the bar room
Just to pay that debt that i owe"

Stagger lee went to the bar room
Boy, he stood across the bar room doors

Said, "now, nobody move"
And he pulled out his 44

"stagger lee", cried billy
"oh, please don't you take my life
I got me three little children
And a very sickly wife"

Go stagger lee, go stagger lee
Go stagger lee, go stagger lee
"got me three little children
And a very, very sickly wife"

Stagger lee shot billy
Boy, he shot that poor boy so bad
That the bullet came thru billy
And went right thru the bartender's glass

While i was standing on the corner
When i heard my bulldog bark
He was barking up at the two men
Who were gambling in the dark

Go stagger lee, go stagger lee

Go stagger lee, go stagger lee
Well, he was barking up at the two men
Who were gambling in the dark

<<Lee, you were right about my radio group not being one of the big ones. It was owned by a local businessman who had other business interests but no other stations.

The owner's philosophy was similar to that of Clear Channel, To him, it was all about the bottom line, no matter what.

When I went to work for him, he owned the top station in the area. Then he bought the competitor. And then he started dismantling both. He let all the high-paid jocks go, automated the stations and hired minimum-wage baby sitters to watch the computer and throw in occasional weather and liners.

Obviously sales dropped, but since expenses dropped even more, then he remains happy. I got out on the way down, and I'm so thankful to be gone!>>

I'm guessing that one of the first things this guy got rid of was the copywriter, if there was one.  Why not let the sales people write the copy. Here's why.  Even the relatively few competent sales people are not necessarily competent copywriters.  And the culess ones are, well, culess. One reason that advertising sales evaporate is lack of results.  And pointless, boring, clumsy ad copy does not produce results for the adverser.

If you are listening to a radio station and you hear "for all your (advertiser's product) needs," "(holiday or event) is upon us," "save, save, save," or just a mindless husband/wife or boss/secretary conversation crammed with stilted (client's business) jargon, you can be pretty sure that the commercial was written by the account exec or, worse, the client. Besides being generally ineffective advertising, the hours a salesperson spends agonizing over crappy copy add up to time not spent doing his/her real job:  selling advertising.

Lee

Lee... I am impressed! You are right. The first thing our owner did WAS fire the copywriter.

At that time, the station's commercials were so far ahead of any station within 100 miles. At first, I couldn't put my finger on the reason. Then I got to know our copywriter and found out that all those good ideas were coming out of that one young lady. Give her the facts, and she could whip out a commercial in a couple of minutes. And it worked! Those spots were dynamite!

But it appeared to the owner that our copywriter was merely a drain on the bottom line. She didn't sell anything, didn't produce anything (that he could see), and only seemed to look busy maybe an hour or so each day. So he fired her.

That's when it became real obvious just how important that copywriter had been to our station.

After that, all the spots were at best, mediocre. Our sales people were stuck writing spots when they could be selling. And the ones they wrote were often worse than that of a grade school student. I tried writing spots myself, and I was so slow and terrible at it that I quickly abandoned that idea.

Hats off to anyone who can write good radio.

Michael Salmons <salmonsm@missouri.edu> had written:
| Does ANY station in the US broadcast in stereo anymore?
| More specifically, any 50kw stations or at least something I can pick
| up in the US midwest at night? I purchased an AM stereo campatible
| tuner about three months ago and have never even seen a hint of stereo
| on the AM band.

I should have looked more closely at the domain name. If you are indeed in central Missouri, you're probably out of luck. It's never been great AM territory anyway, with all but one local station (KWOS) having no more than a kilowatt of power. Ten years ago, WDAF (610) and KFEZ (1190) in Kansas City were broadcasting in stereo, as was KMOX from St. Louis. However, Entercom has since thrown WDAF's heritage in the trash and went to FM; KFEZ went through several permutations and is now a Disney station; I don't know KMOX's present state and it doesn't have such a great signal in Columbia anyway. The Crawford stations in St. Louis, KJSL (ex-KXOK) and KSTL (630 and 690 respectively) may be running stereo. Entercom is running KXTR in Kansas City on the expanded band at 1660. At one time KTTN in Trenton (1600) claimed to be running stereo. I've never verified that, however. It was still running a music format when I was in north Missouri last autumn.

At night, WLS from Chicago is probably your best bet. However, adjacent-channel KFAL from Fulton puts a surprisingly good signal into Columbia even with just 100 watts or so, so you may expect some interference.

AM stereo can sound very good, but program directors, fearful of anything new, have employed all sorts of old wives' tales (despite contrary empirical evidence) to try to kill it and, now, IBOC will be delivering the decisive blow.

Back in the late Fifties, when I was the CE for an Arkansas AM kilowatter, the station had a big book of ad copy. All one had to do was to fill in the blanks.

In return for my on call engineering service, I got a stipend and all the free ads for my TV service shop they could fit in.

The DJs were students at the adjacent college. My favorite DJ, who had the best voice, loved to cut commercials for me. They were great. And their results were great, too! <G>

In recent years, I heard an ad on a mom and pop station that came out of that book. It begins, "There's Spring in the air." So the book is still around.

They lost there licence last year, there are still a court case
running, so there are a little chance they will be back on air but
only a little chance.
They still stream on the net but it's nonstop music.

Graham Oldman is on another English owned station in the weekend,
can't remember which one.
But go to ukradio.com in the forums and look up Tango Sunshine.

All the best

It was awesome!  Wish I could have heard it over the air but since I'm in Houston I have to settle for Internet reception.  What I heard was great....It's the type of format that got me interested in radio to begin with.

I remember listening to Harry Harrison on the rare occasion my family traveled to New York.  I couldn't name the other jocks, but I could occasionally pull in WABC on my transistor radio...It was usually overpowered by 760 WJR.

Thanks to Johnny Donovan and crew for putting it together and thanks to WABC for putting it on the air.

I wish WLS and CKLW would do something similar.

These were the two big-time signals I listened to growing up in Dayton Ohio (along with local favorites WONE (before it switched to MOR then Country now MYOL-type clone), WING (before switch to sports) and WTUE (in its top 40-days before AOR).

As I recall WTUE was automated during the day and simulcast with the WONE-am top-40 at night.  Dave Michaels then did nights before it switched to live top 40 and WONE-am switched to MOR for a very short period of time..then Country.

WONE Jocks I remember:  Tom Campbell (nights) (My all-time favorite), and Dave Dayton (mid-days?)  Johnny Midnight (you guess the time slot).

WING Jock: Steve Kirk (am drive)  (couldn't stand him but he was around forever)

WTUE Jocks: Gregg Mason (am-drive with Phil Easily doing news) (Mason is my second-favorite "local" jock -- now doing country in Dallas), Dave Michaels (nights).  Corny promo---"50-thousand watts of stereo music power-power-power" -- with power alternating between right and left channels)

thanks for all your help. peace, ted alvy

STAGGER LEE was a #1 Billboard Hit by LLOYD PRICE in January-February 1959

Two Versions with The American Bandstand version having been sanitized:

-start-

THE OFFENSIVE LYRICS: Here are the words that made Dick Clark nervous:

The night was clear and the moon was yellow
And the leaves came tumbling down

I was standing on the corner when I heard my bulldog bark
He was barkin' at the two men who were gamblin' in the dark
It was Stagger Lee and Billy, two men who gambled late
Stagger Lee threw seven, Billy swore that he threw eight

Stagger Lee told Billy, "I can't let you go with that"
"You have won all my money and my brand new stetson hat"
Stagger Lee started off goin' down that railroad track
He said "I can't get you Billy but don't be here when I come back"

Stagger Lee went home and he got his fourty-four
Said "I'm goin' to the barroom just to pay that debt I owe"
Stagger Lee went to the barroom and he stood across the barroom door
He said "Nobody move" and he pulled his fourty-four

Stagger Lee shot Billy, oh he shot that poor boy so bad
Till the bullet came through Billy and it broke the bartender's glass

-end-

-start-

Here are the lyrics to the Bandstand version:

The night was clear and the moon was yellow
And the leaves came tumbling down....

I was standing on the corner when I heard my bulldog bark
He was barking at the two men who was arguing in the dark
It was Stagger Lee and Billy, Billy took poor Stagger's date
He said you did me wrong Billy and that's one thing that I hate

Stagger Lee told Billy
I can't let you go with that
Because I loaned you my money
and my girl I want her back
Look out Stag

Stagger Lee went home and he fell down on the floor
He said Billy did me wrong and I don't wanna see him no more
Oh Billy felt bad because he hurt his poor friend Stag
I'm gonna give him his girlfriend and everything that I have

Stagger Lee and Billy never fuss or fight no more
Because he got back his girlfriend and Stagger Lee was no more sore

-end-

I wrote: << In recent years, I heard an ad on a mom and pop station that came out of that [ad copy] book. It begins, "There's Spring in the air." >>

Oops! I meant, "There's MUSIC in the air!"

I had a special deal to repair a radio with each TV I repaired. Immediately following the above pronouncement, the DJ put in a bar or two of lilting music before continuing speaking out the ad.

I'm selling my entire archive of Stern shows.  Price is negotiable and will be very fair.  MP3's will be burned onto DVD-ROM's (around 6). Email me for a complete show list or with any questions.  I am a "Premier" Paypal member with over 400 successful transactions logged. Free shipping in the states, and I'll accept various payment methods. The MP3 quality is good overall, but great since March '04 since these may be the final open-air shows.  (Archive will be up-to-date at the time of shipping.)  Drop me a line!

Frank

WLS tried their own Rewound a couple of years ago--if chi.media was
any gauge (and I hope to God it's not), the current audience didn't
appreciate it, so they haven't done it since.

June 02 2004

Addis Ababa - Ethiopia will issue a long-delayed radio broadcast licence to private operators beginning in August, the information minister said on Wednesday, opening slightly the country's tightly-controlled media.

Many Ethiopians and rights groups have asked for private radio and television stations to be allowed to operate independently.

"Technical works in frequency allocations that would allow private broadcasters to operate have been prepared and the licence will be issued starting next August," Minister of Information Bereket Simon told parliament.

Bereket said the licence will be only for FM broadcasts, and medium- and short-wave as well as private television stations will be considered later.

Bereket said his ministry had begun to discuss a draft press law with members of the media before presenting it to the cabinet.

The controversial draft has been described as restrictive and discriminatory by journalist groups, who say it aims to stop reporters operating freely.

For sale:

Partial interest in fulltime AM station in Savannah, GA. If I have to explain Savannah to you, you don't belong there!

Joint venture. Active or inactive investors with $25,000 or more each are welcome. Total asking price will be about $500,000. NO real estate is included.

For the "unwashed", Savannah has a population of about 200,000 and about 300,000 in the metro area. It is one of the most beautiful cities in the South.

All investors would be on the board with full voting rights if desired.

Disclaimer: (Big Brother made me do it!!)There is an element of risk and you could lose all or part of your investment.

Tel: (478)741-1710 in Macon, GA. I am a semi-retired broadcast engineer.

References:

a)My parole officer. Mr. Larson E. Rapp, c/o Zing-Zing prison, Ossingstinker, NY 12345. Tel: 1-800-IMA-THUG.

b)Trade reference...Brazilian Bandit Airways, Oshkosh, WI. (Those in the aviation "know" we see the connection to Oshkosh)... Purchased a one-way ticket to Rio using all small and unmarked bills. Do not worry, will not leave until the investment funds are in!

Only those fully identifying themselves will be furnished callsign.

The references are in fun, the deal is VERY REAL!!

No, it's OK for them because they don't brand themselves with the doctorate, thereby claiming professional expertise that only a tiny fraction of the audience would know was in an unrelated field.

Agree to puff n stuff - but - in some cases High School stations are it in a given geographic area. When KLME 88.1 Battle Mountain Nevada at 10 watts first came on line in about 1976, that was it for FM Stereo radio, actually FM anything.

The high school kids loved being DJ's and playing their music. True - I forced elevator music from 8 AM till 3 PM, but then the kids were it till 11 PM when I went underground for me and a few others :-)

Took  "student DJ's" to SF to take their 3rd class license exams - most of them passed :-)

The idea here I think is an alternative to commercial or even non-commercial and a way for "students" to be involved as broadcasters.

Wish more high schools could or would do same, but that was long ago and far away

And by the way as best as I can tell today, KLME 88.1 FM Battle Mountain is now defunct - oh well

It's the Sony ST-JX520A, which is listed as being an AM Stereo tuner
on at least one of the AM Stereo web sites.

Michael

Rich Wood <richbwood@earthlink.net> wrote in news:c8vmpe$18c$1
@xuxa.iecc.com:

> I can believe it might be true due to all the external publicity. It's
> not the book. It's the first 3 month average.

Actually, after discussion with others elsewhere who DO have access to Maximizer, it looks as though the numbers Franken saw (and happily admitted he doesn't really understand) were the raw share numbers just for April.

This three-month rolling trend comparison for the midday daypart (the last two hours of Unfiltered and all of O'Franken Factor vs. the last two hours of John Gambling and all of Rush Limbaugh) is very interesting.

10AM-3PM MON-FRI, PERSONS 25-54

| | F | M | A |
|---|---|---|---|
| WABC | 2.5 | 2.2 | 2.6 |
| WLIB | 1.0 | 1.5 | 2.2 |

These are "trend" numbers, meaning that the April raw share number would actually be higher for both stations -- as I understand it, the previous two months' listenership is factored into the April number as presented.

Given the huge leap that the April number represents for WLIB, it's possible that the raw listener share for WLIB in April actually WAS slightly higher than for WABC -- in other words, out of the box, Franken may have beaten (or at least tied) Rush in the #1 U.S. radio market!  I'm still digging to sort it out, as I don't have direct access to the raw information, either.

> Frankenly, I hope he's right.

Frankenly (did you mean to type that?), so do I.  If it turns out he's wrong, I'm sure he'll feature that fact in an upcoming "Boring Corrections" segment.

Only time will tell whether Air America can sustain such remarkable performance on WLIB -- but even to move for one month into the ratings neighborhood of the WABC powerhouse is quite an accomplishment.

>>>>> On 24 May 2004 22:43:09 GMT, Tom Betz ("Tom") writes:

Tom> [ superseding my earlier erroneous post... ]

Tom> I just heard Franken talking about the latest Arbitrends a little while
Tom> ago. If I heard him right, he said that WLIB got a bigger share than WABC
Tom> in both the 18-24 and 25-54 demos during the midday daypart.

Tom> This would mean that Franken, on the puny WLIB, beat Rush, on the
Tom> powerhouse WABC, in two desirable demographics.

Al Franken said: WABC 3.2, WLIB 3.4 for his show in that group. (That part includes the two hours preceeding Rush/Franken.)

Someone else has claimed that the latest "three-month rolling trend" numbers for the mid-day 25-54 was: WABC 2.5-2.2-2.6 WLIB 1.0-1.5-2.2. (Can anyone confirm those?)

In the New York Metro daypart, the Arbitron Winter 04 quarter has WABC with a 3.7 and WLIB with a 1,3 share.  WLIB ranked 24th in the 38 stations while WABC was tied for 7th place.  The Spring 04 "P1" numbers released on May 21 are similar: WABC 3.9, WOR 2.1, and WLIB 1.4.

In other news...On her show last Friday, Randi Rhodes announced that she was quitting Air America, but apparently she was joking (or, at least, not yet).  Meanwhile, Real Networks wants to partner with the Drobnys to acquire or invest in the network: they want to raise $8M to pay off debts (eg. payrolls of terminated employees) and fund ongoing operations.  Air America (David Goodfriend) says that the network will be announcing new affiliates in Los Angeles and Chicago.

You can get a loud 120Hz hum from WFAN 660 NYC in forced stereo.
They're modulating the difference channel with it somehow.

I did the extraps using actuals from the Programmers Package in Maximiser and X-trends to get the 25-54 April only for 10-3. WABC: 3.1 and WLIB: 3.4.

>From <http://www.insideradio.com/>:

Al Franken has some New York numbers to crow about.

And he did crow about beating Rush with 25-54s -- as Air America flagship
WLIB did an extrapolated 3.4 for the month of April compared to WABC's 3.1 in
middays. Caution: Extrapolations are far from official. But the Phase I
Arbitrends suggest there's both an audience out there, and possibly a younger
audience for libtalk.

[ end excerpt ]

First off, just want to say thanks... I've received a number of emails from collectors who have amateur recordings of one or even both of the two Kennedy assassinations, and I'm deeply grateful for all these responses!  There are some great people out there, thank you!

An update.  I am still looking for new audio concerning both assassinations...

So if you personally tape-recorded -- or know of anyone else who tape-recorded -- any television or radio broadcasts concerning one or both of the two Kennedy assassinations, please contact me!

I'm interested in any such recordings made during the JFK assassination in November 1963 and/or the RFK assassination in June 1968.  Whether it's a network or local broadcast, whether the sound recording of that broadcast is of good quality or poor quality, whether the audio is distorted, whether it was recorded in a major market or in a minor market, I want to know about it!

It could be audio tape your dad rolled on using his old reel-to-reel tape recorder on Friday, November 22, 1963 (or perhaps later that same weekend).  It could be a friend or acquaintance who mentioned to you that he recorded live coverage on June 5, 1968.  It could be someone you know who acquired a recorded broadcast that someone else made.

I'm a collector, so if you have anything like this or know of someone else who does... please email me or have them email me at:

brad.johnson@turner.com
or bkj333@aol.com

Thank you so much!

New York's WABC-AM (770 kHz) will sound different next Monday, Memorial Day, between 6am and 6pm local time (1000-2200 UTC). The station will present its annual "Rewound" special, 12 complete hours of original programming from the 60's and 70's when WABC was America's, and the world's, number one Top 40 station. Everything will be played back just as it was, including the news and commercials.

Special guest for the day is Dan Ingram, one of the DJ's who helped create the special sound of "77". Between 6 and 8pm local time (2200-2400 UTC) he will join current WABC program director Phil Boyce to talk about the station's heritage and take phone calls.

The special programming has been put together by WABC personality Johnny Donovan, who stayed with the station after it switched to a talk format in 1982. The good news is that Donovan says he has enough material to present these specials for the next ten years, thanks to the help of aircheck collectors.

The first hour (1000-1100 UTC) will be a real treat for those who remember WNYW, Radio New York Worldwide. It's a show by Les Marshak from 1970. Marshak was the presenter of WNYW's Worldwide Hit Parade.

The WABC tribute site http://musicradio.computer.net/

A Phase I extrap is based on two exact months and one simple math
calculation. With the exception of book-to-book weighting differences, P1
extraps are very close to the 'real" numbers seen when he full book comes
out.

WWKB in Buffalo lights the stereo indicator on my Delco radio, but the programming seems to be in mono. They're pretty directional, so it's not likely you're gonna get them in the midwest. Only other one I know of is WILD, a daytimer in Boston. Supposedly, all the X-band (1610-1700) stations broadcast in stereo. My stereo radio doesn't tune that high.

So are you equally opposed to Dr. Demento?  Does he have a doctorate in Dementia?

She has the degree, she's entitled to use the title.

That matches what Inside Radio reported today.

It will be interesting to see whether or not WLIB can hold on to this share through June.

It will also be interesting to see how soon Clear Channel (whose Air America affiliate KPOJ is reported to have quadrupled its share of the Portland OR market in April) fires up its own liberal talk network on its underperforming AM stations around the country;  and whether this happens fast enough to put Air America out of business before it can sign up more affiliates for itself.

It has to be the Canadian version (which specifically says "FM Stereo/AM Stereo" on the front panel), though; the U.S. version is not equipped with AM Stereo.

Hi all,

I'm looking for actors to participate in a free study geared to increasing the number of acting/voice-over jobs you recieve through the use of my specialized goal and networking techniques.

There is absolute no cost to you and I will never ask for any fees of any kind.

I need some people to go through the program I have developed and give some critique and feedback.  If you want to increase the number of call-backs you recieve and have 10 or 15 minutes a day to spend networking online with my study group, please send an email to focustec@pacbell.net for all the details.

Thanks
Dan Thomson

I don't suppose this means you can get this show over the web...I'm going to have trouble pulling this in from 120 miles away, as I'll be away....

but I'm happy for Dan Ingram, I would love to hear him again on a regular basis

You're right.  I checked back and it was humming on 5/14 and fixed on
5/17.  It had been humming since at least December.

I have a couple of weeks of Imus on the HD.

Only the Australian & Canadian models had the AM stereo. The US
version did not. This also applies to the ST-JX220A.

> So are you equally opposed to Dr. Demento?  Does he have a doctorate in Dementia?

Dr. Demento is as fictional a character as Captain Kangaroo.   Radio does indeed entertain us with imaginary characters brandishing imaginary credentials. Invoking this fact is a rather weak defense of a radio performer who proclaims a real credential and addresses the issues of real callers.  I trust that the production company for Marcus Welby, M.D., for example, had an orderly procedure for dealing with the medical questions they no doubt occasionally received. Perhaps a form letter advising professional medical attention, rather than Laura's approach of ridiculing the questioner on air.

In fact, I'm perfectly comfortable leaving the question of Laura's use of her degree to those who enforce the fraud statutes.  I'm disputing your suggestion that a lower standard has been applied to Ann and Abby because they appear in print.

Portland, OR, and Minneapolis, the next biggest markets, are not out yet.
The daytimer in Riverside did not show in the ratings, nor did Santa Cruz.
Several of the stations are in non-continuous measured markets and will not
see ratings till July if they are rated.

>>

While Quacktor Laura was on KFI, before the Jacor buyout, that is, she used the degree (a real PhD in Psychology, not a PhD in an unrelated field as is hers) of another KFI host against her.

The Quacktor claimed to the relevant state licensure board that this other host should be sanctioned for practicing psychotherapy on the air.

(The fraud statues are not relevant here. The state's business and professions code is).

Ann Landers and Dear Abby never claimed to be psychologists. Laura did in the early days. She doesn't need to, anymore, because she's now turned into a theologian.

Her Ph.D in physiology has absolutely no relevance to anything she does on the radio She's a proctologist in the company of brain surgeons.

Since I like Franken more than Limbaugh, I hope the trend continues. I can believe it's possible in New York because Limbaugh never had the same relative success he's had in other markets. I always found that to be strange because he never really had competition there. WOR was sales driven with Arthur Schwartz (food) and The Dolans (finance) against him.

In the middle of the April survey WOR changed the times of their 12-3pm shows. I think Dr. Joy Browne is likely to beat him up with women and Franken, even if he doesn't keep his momentum, offers a second threat to Limbaugh's exclusive grip on 12-3.

It looks as though an unusual number of diaries might have gone to NY vs NJ counties.

This report is supposedly based on CC's own internal surveys in Portland.

Time will tell whether the next Arbitrends book bears this out.

Why?  WABC is clear channel.  Comes in very well here in Virginia, also
comes in well up in Boston.  Occasionally subject to interference from
one of the Cuban stations but generally an easy catch on your car radio
on most of the east coast at night.

That would be nice for a nighttime program, but Rewound is running 6 AM to 8 PM...mostly under daytime conditions in the eastern US.

WABC comes in clear as a bell in the Montreal area. I used to listen to
it often back in the Seventies when music still ruled AM. Today it's
just another news/talk station littering the band.

Clear channel is great, though. Living in the Vancouver area back in the
mid to late Sixties I used to pick up several eastern and east coast
stations at night. Doesn't seem to work in reverse though :-(, I can't
get anything past Minneapolis, Texas and Winnipeg. The good old days!

The more I listen to Franken, the more his style reminds me of the best
parts of Godfrey's style, but with better writing.

He may not have radio background, but Franken is quickly developing radio
chops.

Why are all the ads that I hear for trash crap products?  Weight loss junk, gold coin crap, how to be a millionaire foolishness, and on and on and on.  There are very few radio ads that I hear advertising a quality product at a fair price, simply to gain marketshare.  I would honestly be interested to hear about new products, or to hear specials from companies, to hear the latest deal or sale, or anything that's a real product, quality, no rip off, no placebo pill with a takeoff on the viagra name, no hair growth system with a guarantee to get "up to 100% of your money back" (whatever that means).  The few decent ads are local.  Does radio just not make the decent businessperson money anymore, so radio stations have to settle for the lowest common denominator?  I'm honestly curious.  You'd think there would be ads for the latest Nissan truck, or Wal-Mart national radio specials, something of that sort.  Perhaps they exist, but I'm a radio junkie and all I hear is crap.  Please respond.  Thanks!

OIE

PS Sorry if this is a repost...after a day sent from my other news server, it still didn't propagate, so I sent it from another server.

Amateur Radio Newsline™ Report 1398  May 28,  2004

Amateur Radio Newsline report number 1398 with a release date of Friday, May 28, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Ham radio helps in the wake of an outbreak of tornadoes and a proposed California law could make operating a mobile station a driving distraction.  Find out the details on Amateur Radio Newsline report number 1398 coming your way right now.

(Billboard Cart Here)

**

RESCUE RADIO:  TORNADOES ACROSS THE MID-WEST BRING OUT HAM RADIO COMMUNICATORS

Dozens of tornadoes and severe storms hammered the northern Plains and Midwest in the past week.  As phone lines went out and cellular systems got overloaded it was ham radio that was again called on to provide storm spotting and other communications.  Amateur Radio Newsline's Don Wilbanks, AE5DW, is here with more:

--

More than a dozen tornadoes swept across southern Nebraska the weekend of May 22nd.  According to news reports the tornadoes were part of three days of severe weather that knocked out telephone service and power to hundreds of thousands of people from Nebraska to

Michigan to West Virginia.

Hardest hit was Hallam, Nebraska.  Hallam is located 25 miles north to Lincoln and is where a 73 year old woman was killed from flying debris.   Every building in Hallam was damaged or destroyed and all normal communications was cut off.  This prompted the activation of local A-R-E-S units under the leadership of Section Emergency Coordinator Reynolds Davis, K-Zero-G-N-D.

In Lincoln, Joe Eisenberg, K-Zero-N-E-B, was active with the local ham radio Stormwatch.  He described this as a terrible weather front and said that ham radio played a key role in the emergency:

--

Eisenberg:  "We went out on Stormewatch early in the evening and had
spotters throughout the whole county and our spotters in the South part of the county began observing the extremely heavy rain, wind and hale, especially near the Hallem area.  One of our spotters saw a semi that had been blown off the road."

--

Downed power lines and leaking propane tanks littered the Hallam, prompting the Nebraska National Guard to surround the community Sunday to keep people from entering.  Newsline spoke to Sandy Ramsey of the Office of Emergency Management in Lincoln who had a lot of praise for the role that Amateur Radio is playing:

--

Ramsy: "The hams out there as storm spotters.  They are just invaluable to us.  They're our eyes and ears.  We are in the
E-O-C
and they're our eyes in the field and we just couldn't do
this
without them.  They are really an invaluable part of what we do."

--

But Nebraska was not the only place where hams were put on alert or activated. Iowa and central Michigan were also hard hit and the front also caused power and phone outages in southern Michigan, Wisconsin, northern Illinois and Iowa and northwest Ohio. On Monday night the 24th, Iowa was drenched by yet another wave of powerful thunderstorms, even as residents of the town of Independence waited for a flooded local stream to recede.

The wave of storms swept eastward early Tuesday. Illinois had high wind that damaged several structures near Jacksonville. State Police said a twister damaged a home south of Springfield.

And all across the region ham radio operators remained on alert. As we go to air their work is still ongoing and we will have more in future reports.

For the Amateur Radio Newsline, I'm Don Wilbanks, AE5DW in New Orleans.

--

A total of 81 tornadoes were confirmed to have touched down in the region on Saturday as a weather front stalled over the area. As we go to air, ham radio is still involved in the aftermath of the storms. (ARNewsline, K0NEB)

**

THE BPL FIGHT: MR. HAYNIE GOES TO WASHINGTON REDUX

ARRL President Jim Haynie, W5JBP, says his meeting with White House telecommunications advisors on B-P-L issues was both revealing and encouraging. Amateur Radio Newsline's Mark Abramowicz, NT3V, has the latest:

--

Haynie says he and ARRL representatives met with Richard Russell, the White House associate director of technology in the Office of Science and Technology Policy in Washington D.C.

Haynie knew going in that the Bush administration's policy was clear: B-P-L is something that's good for America. But Haynie says Russell did offer assurances, especially in light of the interference findings about B-P-L contained in the National Telecommunications and Information Administration report.

"He did emphasize the fact that they would address the interference issues aggressively," Haynie says. "And I'm going to take him at his word at that. That they will do that.

"And I'm sure the FCC has taken note of the interference issues that NTIA has raised and as the representative for the amateur radio community, I intend to stay on top of it.

"We're not going to let this thing slide from that standpoint. They have the rules and they're printed and they're there. And we're going to make sure that they abide by those rules."

Haynie says it was clear from the start that Russell is beholden to the political agenda of the Bush administration.

"Mr. Russell heard what we had to say all right, but I think he was already predisposed to the fact that to anybody on the street - and I'm talking about the uninformed person that doesn't know about technology, broadband over powerline, where you can just plug your computer into the wall ,any wall outlet -does sound like a good thing," Haynie says. "And, I understand that.

"But on the other hand, there are issues that have to be dealt with and one of the examples I gave Mr. Russell was the fact that we could all lower our electric bills if we could burn high-sulfur coal.

"And he said, 'Well the EPA wouldn't let you do that.' I said, 'That's my point exactly. The FCC should be standing there, overseeing the rules about spectrum pollution.' I think I made my point."

Haynie says, upon reflection, one reality in the whole B-P-L debate is becoming crystal clear.

"I honestly do believe there's a disconnect between the engineers in the field, the engineers at the commission who actually understand the physics of the issue versus the politicians who are driving it," Haynie says. " I'm convinced now that's what it is. This is no longer a science issue, an issue of facts, it's an issue of politics and that disappoints me."

However, Haynie says in recent weeks certain admissions by utilities trying to work with the amateur community are significant.

"In the beginning, everybody said from the industry side that there was no interference," Haynie says. "Now they're actually saying, 'Yes, there is and we'll try to mitigate it, we'll try to work with you.' That in itself is a big step."

Haynie says there also are admissions that one major interference solution touted by B-P-L proponents - notching - just doesn't do the job across the board.

"Finally some of the people are admitting, 'OK we don't have a point-source radiator anymore, we have a continuous-source radiator such as a power line.' And they're saying that the notching techniques will work and we've actually found out that they don't work that well," Haynie says.

"The notches are not that exact. And, when it says that they notch something about 3db or 6db, that's still not enough. It has to be notched by at least 30 in order to get back down to where the amateurs can function. And that's going to be a big challenge for the industry."

Haynie says anybody studying the issue of broadband technology sees the B-P-L investment is not a good one because of the growing emphasis on creating a wireless network.

"Quite frankly, in my personal opinion, the broadband over powerlines is going to be a real flash-in-the-pan because other technologies are going to overtake it very quickly," Haynie says.

"Whenever people say they want to plug their computer into any outlet in the wall, then my question is: 'Then, why do you have a cordless phone?' And WiFi and WiMax enter that challenge by being able to go anywhere in your house and let your laptop down whether it be on your couch or in your easychair and operate broadband.

"And I think that technology is going to be the real answer to people that need that type of high-speed internet access."

Haynie says the B-P-L battle is far from over. He says the strategy now is to press regulators - especially the FCC - to enforce the interference rules.

"Hold everybody's feet to the fire on the rules," Haynie says. "And the encouraging sign I've seen in the last week or so is the fact that more and more utilities have said that they didn't think it was a viable option for them and have opted out.

"Interestingly enough, the city of Manassas now is advertising for another provider. I found that extremely curious and very interesting."

Finally, Haynie concedes the ARRL has spent hundreds of thousands of dollars on the B-P-L issue and it's looking to the amateur community to get behind the league and its work.

"People are working overtime," Haynie says. "We are burning the candle at both ends and all I would ask is the amateurs support the organization and what we're trying to do in this effort."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

More on the fight to stop B-P-L in future Amateur Radio Newsline reports. (ARNewsline(tm), ARRL)

RADIO LAWS:  CALIFORNIA TO FINE DISTRACTED DRIVERS

California drivers who are distracted for any reason and whose actions attract law enforcement may soon face fines by eating, combing their hair or talking on a cellular telephone.  This if a bill passed on May 18th by the state senate and bend to the Assembly is eventually made law.  Bill Pasternak, WA6ITF, has more in this report:

--

It was called S B 1800 when Senator Kevin Murray introduced it to the California State Senate back in February.  It went unnoticed by the Amateur Radio community until about a week ago when the Senate passed it and delivered to the State Assembly for further action.
That's
when news outlets state wide ran banner headlines saying that the state legislature might make it a crime to be distracted in any way -- while operating a motor vehicle in the Golden state.  And that is exactly what the measure would do.

As written, the Murray bill would make it an crime for a person to operate a vehicle in an unsafe manner that results from engaging in a distracting activity while driving.  What is a distracting activity? Well according to the Senator it is just about anything.  Eating or drinking, smoking, reading or writing, interacting with children, animals, passengers, or objects in the vehicle, adjusting the controls of an audio or other entertainment device, or even talking on a hands free cellular telephone.  And it is the last two items that could easily impact on ham radio operators or any other two way radio user that a police officer might regard as distracted just because he or she has a microphone in hand or is changing frequencies on a radio.

The bill does say that a law enforcement officer may not stop a vehicle when a driver is engaging in a distracting activity unless the officer observes that the vehicle is being operated in an unsafe manner.  But it is left to the officer to decide what unsafe really is under other areas of California state law.

The proposed law does not single out or target Amateur Radio operators for enforcement, but it does not exempt hams either.  In fact, the only exemptions are police, fire and emergency services but even this is limited.  The measure states that an emergency service professional would be exempt from these restrictions when using a wireless telephone or other electronic device, but only as part of the course and scope of his or her duties.

What about penalties? The bill would require a first offense to be punished by a fine of $35, and a second or subsequent offense that occurs within 2 years of a prior conviction for the infraction to be punished by a fine of $150.

Also, being permitted to continue driving in California and get insurance means that you have to keep your violation points count low. Any person whose driving record shows a violation count of 4 or more points in 12 months, 6 or more points in 24 months, or 8 or more points in 36 months be presumed to be a negligent operator of a motor vehicle. This bill would prohibit a first-time violation from being given a point value, but would mandate that a 2nd or subsequent violation within 2 years to be given a value of one point. And even 2 points can cost a lot of dollars when you go to renew an auto insurance policy.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Supporters of the proposed law cite studies blaming distractions for 25 to 30 percent of all vehicle crashes. Opponents say that the bill goes too far in meddling with the civil rights of individuals. This group vows a court fight if the measure gets signed into law. (ARNewsline(tm) from published news reports)

**

RESTRUCTURING: FCC CHAIRMAN SAYS RESTRUCTURING CONTINUING

FCC Chairman Michael Powell has told U-S representatives Greg Walden, W7EQI, and Mike Ross, WD5DVR, that the Commission will act 'as expeditiously as possible' on Amateur Radio restructuring. This, in response to a letter from Walden and Ross a month ago that urged the FCC to adopt the ARRL's restructuring Petition for Rule Making in its entirety along with rules changes needed to put it into place.

But in his response, Powell said the League's petition was one of many. There are 18 in all. An ARRL bulletin says that judging from the FCC Chairman's letter to Walden and Ross, it would appear as if the regulatory agency plans to address all 18 petitions within the framework of a single rule making proceeding. (ARRL)

**

ENFORCEMENT: 75 METER IN INTERFERENCE BRINGS FAA REFERRAL

A California ham is under FCC scrutiny for alleged interference to ongoing Amateur Radio communications. The FCC's Daryl Duckworth, NN0W, is here with more:

--

Duckworth: "AE6QD, Steve L. Wingate, of Corte Madera, California, has been sent a warning letter regarding malicious interference on 75 meters. This consists of jamming, making threats to other operators and to law enforcement officers, and broadcasts in which he appears incoherent."

--

The FCC warned Wingate that continued incidents of such interference will subject him to license suspension and revocation proceedings, as well as a possible fine of $7,500 to $10,000. And in an unusual twist, the FCC says that since Wingate also holds a pilot's license, this matter is also being referred to the Federal Aviation Administration as well. (FCC, RAIN)

**

ENFORCEMENT: FINES AFFIRMED AGAINST TWO ALLEGED PIRATES

Fines of $10,000 each have been affirmed by the FCC against Jason Green and Gary Feldman. The regulatory agency alleges that the two are pirate broadcasters in Florida who reportedly operated on 91.9 Mhz. The FCC says that neither filed a responses to the Commission's initial findings in the case. (FCC)

**

## ENFORCEMENT:  A "RADIO SUMMER CAMP" TO TRAIN MORE PIRATES

Now here's one that we know will interest the FCC enforcement folks.
Writers to the CGC Communicator report that budding radio pirates can learn how to buy or build FM transmitters and get on the air this summer.  This at four-day "workshop" sessions, at least one of which will be bilingual.

Not only that.  CGC readers also report that the event promoters will have transmitter and antenna kits available to attendees.  For more on these strange educational check out www.freeradio.org.  (CGC)

**

## RADIO LAW:  AIR FORCE JAMS GARAGE DOOR OPENERS

A new military radio system is jamming remote-control garage doors in communities near this Florida Panhandle base.  During testing of the $5.5 million two-way radio system at Eglin Air Force Base, homeowners in Niceville, Valparaiso and the Crestview area reported that their garage door openers failed to work or went wild by themselves.

According to Air Force officials the contractor, Motorola Inc., will try to minimize the problem. Technicians will run the system on slightly different frequencies from those used by garage door openers when another test is conducted.

But an FCC spokesperson had some bas news for local homeowners. Lauren Van Wazer, said that if the Air Force has been running the system within its licensed frequencies then the users of garage door openers may have to change the operating frequencies of theirs.

By the way, the Navy says that a similar radio system has been requested for Pensacola Naval Air Station and other nearby installations.  (Published reports)

**

## NEW PRODUCTS:  THE TNC WIZARD

Creative Services Software has announced the release of version 1.0 of the Kantronics and Timewave TNC Wizard.  This program searches for your TNC and sound card on both serial ports and TCP/IP networks.

Creative's Rick Ruhl, W4PC, says that the TNC wizard works with built
in serial ports in the TNC, USB to serial adapters and TCP/IP to serial interfaces. It also has an option to detect the soundcard in the computer and add that information to the PacTerm or PkTerm startup files without any additional setup needed at install time.

The TNC Wizard requires Windows 98 or later, with TCP/IP installed. There is no cost for the TNC wizard and it can be downloaded from the CSS website at http://www.cssincorp.com (CSS)

**

NAMES IN THE NEWS: INDUCTEES NAMED TO THE CQ HALLS OF FAME

CQ Amateur Radio magazine has inducted fifteen people into its Amateur Radio Hall of Fame and two into the CQ Contest Hall of Fame.

Those elected to the CQ Amateur Radio Hall of Fame include Ned Carman, Ned, W0ZSW, and Sister Alverna O'Laughlin, WA0SGJ, who co founded the Handi-Ham System to aid the handicapped. Also inducted was Ten-Tec co-founder Jack Burchfield, Jack, K4JU. His partner Al Kahn, K4FW was made a member in 2002.

Others named include Bob Heil, K9EID, whose inventions revolutionized audio in rock music live performances and amateur radio and writer Tom Kneitel, K2AES and Amateur Radio Newsline's own Bill Pasternak,
WA6ITF. Bill as honored for his quarter of a century of producing these newscasts and for creating the "Amateur Radio Newsline Young Ham of the Year Award.

The new members of the CQ Contest Hall of Fame include Steve Bolia, N8BJQ. Steve is the longtime Director of the CQ World Wide W-P-X Contests and a pioneer in computer log-checking. Also inducted was Trey Garlough, N5KO. Garlough, who also holds the call sign HC8N is a world-class contester and the creator of two major contesting e-mail reflectors.

The CQ Amateur Radio Hall of Fame was established in January, 2001, to recognize those individuals, whether licensed radio amateurs or not, who significantly affected the course of amateur radio. The CQ

Contest Hall of Fame was established in 1986 to recognize those amateurs who have made major contributions to contesting. The complete list of names is on line at www dot c q dash amateur radio dot com. (CQ)

CHANGING OF THE GUARD: ARNOLD O. BECKMAN � S.K.

Arnold Beckman, whose invention of a simple method to measure the acidity of California lemons spawned a scientific instrument empire has died at the age of 104. Beckman passed away on May 18th at Scripps Green Hospital in La Jolla, California, after a long illness.

Arnold O. Beckman was born in Cullom, Illinois, on April 10, 1900. In 1934 he invented the pH meter that is sill used use in citrus processing plants worldwide. The following year he founded National Technical Laboratories, and later renamed he company Beckman Instruments. Over the years, Beckman and his electronic test gear became synonymous with high quality and extreme accuracy. In 1997 the company was acquired Coulter Corporation of Miami, Florida which renamed it renamed Beckman Coulter later that same year.

Arnold Beckman, is survived by his son, Arnold Stone Beckman, daughter Patricia Beckman, two grandchildren and three great-grandchildren. His wife Mabel Meinzer Beckman died in 1989.

A complete biography of this inventor, businessman and philanthropist can be found on-line at http://www.beckman.com/hr/memorial/mem_news.asp (Beckman-Coulter)

**

HAM RADIO IN SPACE: ASTRONAUT TRAINING TO BECOME HAM

The AMSAT News Service reports that Astronaut Leroy Chiao is scheduled to train at the Johnson Space Center in early June. This, to prepare for his Amateur Radio license exam. Once he passes the test and receives his call sign, he will be able to participate in the ARISS program during his stay as Expedition 10 commander on board the International Space Station. He is scheduled to fly this October. (ARISS)

**

WORLDBEAT - IRAN: IARU TRAINING PRESENTED

Turning to international news, word that the I-A-R-U recently presented an Amateur Radio Administration Course in Iran. Amateur Radio Newsline's Jim Meachen Zed-L-2-B-H-F in Auckland New Zealand
brings the details:

--

PKG HERE: In response to an invitation from the administration of the Islamic Republic of Iran, Fred Johnson ZL2AMJ representing the IARU Region 3 and Daniel Lamoureux VE2KA representing the IARU International Secretariat visited Iran to present a three-day Amateur Radio Administration Course, 26 to 28 April 2004. Fred Johnson ZL2AMJ takes up his story:

ZL2AMJ:

Since the early 1980s this course has been conducted by IARU in various forms in countries all over the world and in response to invitations from administrations to train regulators and prospective regulators in the administering of the amateur service and amateur satellite service. Related objectives include managing disaster relief communications and organizing an amateur radio society.

Our recent course in Tehran was arranged by Mr T. Shafiee and Mr M. Zomorodi of the Directorate General of Telecommunications. An excellent training room was provided for us with full support facilities including a data projector and access to a photocopier. Daniel and myself presented our course using PowerPoint displays prepared by IARU and each of the 16 participants received printed copies of the displays and many other documents and two CD-ROMs with documentation about amateur radio.

We had discussions with many radio amateurs in Tehran, some of whom attended the course. The course participants visited EP3PTT, a station established in the Ministry's office premises in Tehran. The equipment in this station was provided for Iran amateurs by from the IARU Region 3 Stars*** program and may be operated by licensed Iranian operators by arrangement.

There have been amateur radio societies in Iran in earlier years but there has not been an IARU member society. An amateur radio "club", a social meeting group, presently meets in Tehran.

ZL2BHF:  ZL2AMJ reported the course as a most memorable experience. He said that Daniel and himself were warmly received.

>From Auckland New Zealand I'm Jim Meachen ZL2BHF for Newsline.

--

Contact between the IARU and the amateurs and the administration of Iran is to continue with further Amateur Radio information to be provided.  (ARNewsline(tm))

**

WORLDBEAT - ALBANIA:  PROJECT GOODWILL AT DAYTON 2004

Len Geraldi, K6ANP, who is the President of the Northern California DX Foundation has announced that his organization is teaming up with Vertex Standard .  The two will combine forces to donate ten complete Yaesu FT 840 stations to Project Goodwill Albania.  The gear will be set up at the University of Tirana to boost the successful completion of the project.

The announcement was made at the recent Dayton D-X dinner in Ohio.

At the same time Bob Ferrero, W6RJ, stepped forward on behalf of Ham Radio Outlet. He offered up a matching number of antennas. Bob Heil, K9EID, of Heil Sound said that he would supply the needed p sound gear. Other equipment was pledged by AA4XR, N3BNA, K3LP, K7JA, VE1JF, W3BTX, W4MYA, W6EUF, W6OSP, W6UM and W9JUV in addition to those already reported earlier. (Various)

**

ON THE AIR: NEW MID-AMERICA 6 METER BEACON

The Legion of Indianapolis DXers has activated a 24-hour a day 6 meter beacon. Operating as W9VW slash B on 50.069 MHz, the automated 12 watt station is located in the heart of Indianapolis in grid square E M 69 WT. The antenna is an omnidirectional horizontally polarized turnstile at 70 feet. Q-S-N reports go to W9VW, P.O. Box 18495, Indianapolis, Indiana, 46218. (W9IND, QRZ.COM)

**

DX

In D-X, word that IN3ASW and IN3DYG will be active as TU2WL. This, from Cote d'Ivoire or the Ivory Coast through the 1st of June. They plan to operate SSB and possibly PSK31 and RTTY. (GB2RS)

And SM0CMH will be active as SM8C portable SV5 from the island of Kalymnos in the Dodecanese group to the 5th of June. He will operate CW on 10 to 80 meters and perhaps even 160 meters. For both operations, please Q-S-L as directed on the air. (GB2RS)

**

THAT FINAL ITEM: BAY TO BREAKERS

And finally this week, the story of ham radio assisting in a truly fun public service event. It called the Bay to Breakers race and its held every year in the San Francisco. David Hirtz, KG6CEL, reports from the City by the Bay:

--

Audio Only:  Hear it at www.anewsline.org
--

By the way,  it's called the Bay to Breakers Race because it starts in the financial district not far from San Francisco Bay and ends at the western most edge of Golden Gate Park overlooking the mighty blue Pacific.  More information on this event is on line at www.baytobreakers.com.  (ARNewsline(tm))

**

## NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).  Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.  You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on.  This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org.  The cutoff for nominations this year is midnight on Tuesday, June 30th.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW,  saying 73 and we thank you for listening."  Amateur Radio Newsline(tm) is Copyright 2004.  All rights reserved.

>going to have trouble pulling this in from 120 miles away, as I'll be
>away....

The entire Rewound will be streamed live on the WABC site..It will have hiccups due to the glitchy software they use to remove copyrighted material and AFTRA voiced spots.  Maybe they've improved it...haven't listened to the regular programming lately because of the wacko wingnut talkers.

Michael Salmons <salmonsm@missouri.edu> had written:
| Does ANY station in the US broadcast in stereo anymore?

KABL (960) in the San Francisco Bay Area. It appears to be the last one.
KFRC (610) dropped it four years ago. When I called up to ask about it,
they said it would be back. It wasn't. In other words, KFRC lied to me.

Hello,

If you rolled tape -- or know of anyone else who rolled tape -- on any TV broadcast that aired during live coverage of the assassination of Senator Robert F. Kennedy between June 3rd and the 10th, 1968, please contact me!

I'm interested in any reel-to-reel audio tape that recorded sound from any television broadcast during early June 1968!

Whether it's a network or local television broadcast, whether the sound recording of that broadcast is of good quality or poor quality, whether the audio is distorted, whether it was recorded in a major market or in a minor market, I want to know about it!

It could be audio tape that your parent might have rolled using their old reel-to-reel tape recorder or brand new cassette recorder. Perhaps you vaguely remember a friend or acquaintance mentioning that they rolled tape on TV broadcasts that week.  Or you think you know of someone who acquired such a recording.

I'm a collector, so if you have anything like this or know of someone else who does... please email me or have them email me at:

brad.johnson@turner.com
or bkj333@aol.com

P.S.  But we don't have to limit this to just TV.  I don't rule out radio broadcasts from early June 1968, and am interested in those too!

Thank you!

You can try and explain it away but when someone suggests a father or
brother take someone out fishing, particularly a President, and makes
a noise imitating a gunshot I take it to mean there's a victim.

I wouldn't be a bit surprised to find the Secret Service would find a
gunshot in a boat where the President is present to be a problem. I'd
see lots of very wet black suits.

I don't care where the reference comes from. The actual audio names members of the Bush family and clearly implies one is to be a gunshot victim. It's not a terrible stretch to believe the victim would be the President.

Not something mainstream advertisers would like.

I'm crushed that I've lost your respect, but many, many people didn't see the reference as a lie. I listened to the archive (the shows are archived) and there was no doubt the death of the President was the focus.

Rich

>admitting it.

I've been in the network business for a long time. The explanation is legitimate. However, GM would not place advertising on Air America even if the numbers were astounding. They don't do controversy.

The real bottom line is that GM didn't buy Air America yet their spots ran there without their permission. The agency should have cancelled the order because of a format change. Perfectly legitimate.

Many agencies are buying minority stations in New York because the stations have made it clear it's discriminatory not to buy them when their numbers exceed white targeted stations. Even though they still don't get the rates they're due, things are improving because of legitimate pressure from highly rated minority stations.

I don't know why you're tapdancing around a comment that clearly suggested the assassination of a member of the Bush family. I'm not a fan of the family but I don't wish death on any of them. To suggest it is damned irresponsible radio.

Make a list of Limbaugh's advertisers. How many mainstream advertisers
are there? Conservative Digest? Limbaugh has been on the don't buy
list for years.

If Laura Schlessinger lost advertisers because of a gay bashing
comment I suspect those same advertisers would drop Limbaugh if they
hadn't already rejected running spots in his show.

Wiggle FM 95.1 is now back and broadcasting from South Leicestershire College in wigston, Leicester UK. We also are broadcasting over the internet. Last year we had over 100 e-mails from our listeners from all over the world and we would like to increase the numbers this year.

www.slcollege.ac.uk/wiggle/listenandsee.htm

Please send us an e-mail from your part of the world giving us an idea of the reception. We'll even play you a record.(No databases and we are not collecting e-mail addresses).

Many thanks

## Student celebrate 50 years of Rock

Students and staff at South Leicestershire College are celebrating 50 years of Rock and Pop, with their community radio station which returned on Monday May 17th.

The college's own WiggLe FM is back on air again for the fourth year, as a community based radio station with a global audience via the Internet.

As well a wide range of music programmes around the clock, the two-week broadcast features several exclusives, including an interview with happening New York band, Scissor Sisters, and a chance to win a signed copy of their album. Student and presenter Jamie Percival says " We worked hard to secure an interview with them when they played the Charlotte a few weeks ago and now they're on national TV and on the Glastonbury bill."

Media tutor and station manager, Les Eastham, has been busy at the other end of the musical timeline and has tracked down Leicester's first rock and roll band and will be chatting to ex "Dallas Boy", Stan Jones. Says Les;  " The Dallas boys were from Leicester and were there at the beginning; probably the first British boy band; and it's great to hear first hand about the early days of rock and roll".

The varied approach of WiggLe FM has gained them a growing audience during their first three May broadcasts and, last year, the students were approached by an Australian station who had picked them up on the world-wide web and who asked if they could borrow some of their specialist shows.

The students on the vocational 'A' level Media course helped plan the station and will be hosting Wiggle FM from Monday 17th May until Saturday 29th May on the 95.1 FM waveband and online.

Amateur Radio Newsline™ Report 1396  May 14,  2004

Amateur Radio Newsline report number 1396 with a release date of
Friday, May 14, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  Hamvention 2004 is opening and B-P-L is
still in the
news.  Find out the details on Amateur Radio Newsline report number
1396
coming your way right now.

**

## HAMVENTION COVERAGE

The 2004 Dayton Hamvention is about to open its doors. One of this year's Hamvention themes is going back to the future. Our producer Bill Pasternak, WA6ITF, flew in a few days early to find out what it really means for those who will be attending the show.

--
Audio report only:  Hear it at www.arnewsline.org
--

Bill, Mark Abramowicz NT3V and yours truly will all be at Hamvention to bring you all the highlights on next week's Amateur Radio Newsline report. (ARNewsline(tm))

**

## THE BPL FIGHT:  B-P-L EXPECTED TO DRAW ATTENTION AT DAYTON

While the latest in ham gear is certain to be grab the interest of most of those attending this year's Dayton Hamvention, the topic of Broadband Over Power Lines internet access is likely to be on the lips of many. Amateur Radio Newsline's Mark Abramowicz, NT3V has more...

--
While not much has happened in the past week on the B-P-L issue, look for lots of discussion on the Dayton Hamvention floor. You can expect to see American Radio Relay League President Jim Haynie W-5-J-B-P in the middle of it.

We told you here on Amateur Radio Newsline two weeks ago of Haynie's call to arms and his direct appeal to President Bush to abandon support for B-P-L technology.

Haynie is convinced Bush has been misled by his advisors. He and A-R-R-L's Washington corps have asked for a meeting with the president. There's nothing new to report on that front.

But Haynie says it's important for the ham community to continue to make its voice heard by writing to the White House, your congressman and your senator about B-P-L. Even though the Federal Communications Commission turned down the A-R-R-L's request to extend the May 3 deadline for comments on B-P-L, Haynie says there are still ways to be heard.

The A-R-R-L's website (www.arrl.org) has helpful tips on writing that letter or e-mail or picking up the phone and calling your representative in Washington.

Meanwhile, the FCC is now studying the National Telecommunications and Information Agency report on B-P-L. And while the glowing press release put out by N-T-I-A touted the possibilities of B-P-L, the technical data in the report presents another picture.

And that picture is anything but fuzzy. N-T-I-A cites major interference concerns and suggests the methods used to measure B-P-L interference are inadequate.

It also cites worries B-P-L signals could affect aircraft operations and suggests more stringent measurement standards and interference mitigation techniques need to be explored.

Could that B-P-L fast-track train be slowing? No one is willing to speculate on that, especially since President Bush and F-C-C Chairman Michael Powell appear to be on the same page in their push for deployment of B-P-L.

Could the F-C-C be convinced to wait for the next N-T-I-A report and table the issue for a few months? No one knows how to read the tea leaves in Washington.

Tune in weekly to Amateur Radio Newsline and we'll keep you on top of the issue with the very latest news and views of those close to the B-P-L issue.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.
--

And look for Mark's report on the B-P-L buzz and other topics from the Hamvention floor during our special program next week produced in Dayton.
(ARNewsline(tm))

**

Ham radio did all it could to help save the life of a stricken runner at a recent foot race in Indianapolis. Jack Parker, W-8-I-S-H, has the details:

--
Audio report only: Hear it at www.arnewsline.org
--

Thanks Jack. (W8ISH, ARNewsline(tm))

**

RADIO RULES: FCC MKES "MINOR AMMENDMENTS" TO PART 97

The FCC says that it has minor amendments to various Amateur Radio rules. A bulletin from the ARRL highlights some of them including the most significant one. It involved revising the wording of Section 97.307(d), which defines spurious emissions. The updated language imposes a slightly higher standard on newer transmitters or amplifiers of any power level.

The FCC also has redefined what constitutes an Amateur Radio operator to reflect the advent of the Universal Licensing System electronic licensee database. The current rule defines an amateur operator as "a person holding a written authorization to be the control operator of an amateur station." Under the revised Section 97.3(a)(1) an amateur operator is "a person named in an amateur operator/primary license station grant on the U-L-S consolidated licensee database to be the control operator of an amateur station."

The FCC made these and several other regulatory changes on its own motion rather than in reaction to any petitions. The decision appeared May 5 in the Federal Register. The changes become effective June 1st.  (ARRL)

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the WB3ERZ repeater serving South Central Pennsylvania.

**

## ENFORCEMENT:  CONVICTED MURDERER LOOSES HAM TICKET

A ham serving a prison sentence for the murder of his wife has had his Amateur license revoked.  Roger Thomas Scaggs, the now ex-W5EBC, had his ticket pulled after the FCC determined that he no longer holds the requisite requirements to remain a Commission licensee.

On March 6, 1996 Scaggs was convicted of murder in the death of Penny Scaggs, his wife of thirty-five years. The court record in that case showed that Scaggs beat his wife to death with a galvanized lead pipe and then stabbed her several times. He was sentenced to a prison term of thirty-two years and fined ten thousand dollars.

The Commission says that its character policies provide that any felony conviction is a matter predictive of licensee behavior and is directly relevant to the functioning of the Commission's regulatory mission. It says that Scaggs conviction mandates the conclusion that he does not possess the requisite qualifications to be or remain a Commission licensee and that his license should be revoked. (FCC)

**

## ENFORCMENT: NO FISHING COMS HERE

The owners of four trucking companies, two seafood companies and one fishing boat have all been cited by the FCC for operating without a license on amateur frequencies. According to the C-Q magazine website, three of the trucking companies are in North and South Carolina and the fourth is in Idaho. They were allegedly operating on 10 meters. The fishing boats are in the Pacific Northwest, purportedly using the 2 meter band. (CQ)

**

## ENFORCEMENT: FCC AGAIN WRITES TO K1MAN

The FCC has again written to Glenn Baxter, K1MAN, and the commissions note has both good and bad news for the Belgrade Lakes, Maine radio amateur. On the positive side, the April 14th letter informs K1MAN that a review of his transmissions indicates that he is complying with the Amateur Service regulations regarding broadcasting and bulletins and station control.

The negative? The FCC alleges that K1MAN is in violation of rules regarding use of his Amateur station for pecuniary interest and those regarding deliberate interference to ongoing communications.

Also, the letter again told Baxter that his "felony affidavit complaints" will not be accepted by the regulatory agency. He was also reminded that all frequencies in the Amateur Radio Service are shared. No frequency is assigned for the exclusive use of any station, and that Baxter's station has no greater rights to a frequency at any particular time than does any other Amateur station. (FCC)

**

## ENFORCEMENT: CONSERVATIVE GROUP CALLS ON CONGRESS TO REPRIMAND FCC

A faith based group is chiding the FCC for not acting more decisively in getting dirty words off the public airwaves. Amateur Radio Newsline's Jim Davis, W-2-J-K-D, has more:

--

AUDIO

--

Focus on the Family was founded by Dr. James Dobson, whose commentaries are heard on radio stations world-wide. (Published reports)

**

## ENFORCEMENT: FCC CHAIRMAN DOES NOT SUPPORT REVOKING BROADCAST LICENSES

F-C-C chairman Michael Powell says he doesn't support legislation that would pull a broadcast station license after a third indecency violation. He is not opposed to high fines to get the attention of broadcasters who step across the indecency line.

Speaking at the recent National Association of Broadcasters convention in Las Vegas, Powell suggested that he would support extending indecency regulations beyond over-the-air broadcasting to other media, such as cable and satellite broadcasts, but only if the FCC is given approval by Congress.

Powell labels as a "red herring" a proposal by Viacom president Mel Karmazin for more specific decency guidelines. Viacom owns C-B-S. That's the network which aired the controversial Super Bowl half-time show with rock star Janet Jackson. (Published reports)

**

## RESCUE RADIO: EMERGENCY TRAINING IN KANSAS

A day-long program on Amateur Radio emergency communications will take place Saturday, July 24, 9 AM in Kansas. This, at The Salvation Army, 420 E Santa Fe, Olathe which is 15 miles southwest of Kansas City.

According to the ARRL Letter, the day begins with "New Ham Orientation," sponsored by Johnson County Amateur Radio Emergency Service. This session will provide an overview of ARES and explain how amateurs can get involved. Following a lunch break the Kansas Salvation Army Team Emergency Radio Network will sponsor an ARRL Emergency Communications seminar.

Seats are limited. For additional information contact June Jeffers, KB0WEQ, by e-mail to kssatern@att.net or call area code 913-856-8674 during normal business hours, Central time.  (ARRL)

* *

## HAM RADIO CONFERENCES: CSVHFS IN CANADA IN JULY

More information is now available on the upcoming Central States V-H-F Conference that has been mailed out and also posted to the conference website. Included are the latest highlights of conference plans, border crossing tips and Canadian currency tips.  Also posted is the 2004 President's Message along with last years Noise Figure Measurement Test results and the Antenna Test Range results.

The conference is scheduled for July 22nd to the 25th at the Delta Meadowvale Resort & Conference Center in Mississauga, Ontario, Canada.  All the latest is in cyberspace at www.csvhfs.org and the Ontario VHF Association's page at www.ovhfa.com.  We hope that you have a great time.  (Peter Shilton VE3AX)

**

## BREAK 2

This is ham radio news for today's radio amateur.  From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

**

## RADIO LAW:  SAN DIEGO TV SHOP OWNER CONVICTED

Here's the kind of a story you probably have not heard of in years.  How about a T-V repair shop owner convicted of duping his customers.  Jim Meachen, Zed-L-2-B-H-F, has the rest of the story:

--
AUDIO
--

The store owner pleaded guilty to ten criminal counts, including grand theft, forgery, fraud and false advertising.  (listeners reports)

**

## EMERGING TECHNOLOGY:  DTV AT A SNAILS PACE

The General Accounting Office has issued a report saying that more than 80 percent of Americans are either unaware or only "somewhat aware" of the transition to digital television signals.  They are also unaware that Congress plans to sell the analog spectrum that will become available when TV stations convert from analog to digital.

Lawmakers are counting on the money to help balance the budget. However, the digital transition may be years away unless more consumers start buying digital TVs to receive the new signals.  Current sales of those expensive digital sets appear to be fairly flat at best.  (Science OnLine)

**

## WORLDBEAT - ALBANIA:  NEWS FROM ALBANIA

Turning to news from around the world, many noticed the signals from OH2BH and OH2PM bouncing in from Albania not long ago.  In fact, the pair made some 6000 QSOs while visiting that nation.  They were also there to remind the world of Amateur Radio about it's  shared responsibility to help those in need.  You are welcome to join this effort by making your old gear active from Albania.  For U.S. tax payers, your donations can be processed by the Northern California DX Foundation.  Contact W6OSP by e-mail to w6osp@aol.com for details. (N4GN)

**

## WORLDBEAT - CANADA:  SOME RAC APPOINTMENTS ANNOUNCED

Radio Amateurs of Canada's Board of Directors has approved Eric Ferguson, V-E-3-C-R, as the organizations new Treasurer.  This, for the term ending Dec 31st, 2005.  Feguson comes to Radio Amateurs of Canada with extensive banking experience at the Executive level at a major Canadian bank.

The Board of Directors has approved Dave Goodwin, V-Oh-1-A-U, as the Director for Radio Amateurs of Canada's Atlantic Region.  Goodwin will complete the term of David Nimmo, VE1NN, who resigned in early March.  (RAC)

**

## WORLDBEAT - UK:  NEW 6 METER BEACON ON THE AIR

And members of the United Kingdom's Blacksheep Contest Group have activated a new 6 meter propagation beacon located near the city of Hertfordshire, in grid square IO91. This, as a replacement for the GB3NHQ beacon which closed down some years ago.

The new GB3BAA beacon became operational on 50.016 MHz at 15:10 UTC on April 20th, and ground-wave reception reports from Normandy and northern England have already been received. Further reports would be most welcome, and should be sent to Mr. I. Phillips, G0RDI, by e-mail to gb3baa@77hz.com (RSGB)

**

## DX

In DX, 3-B-9-F-R has been heard operating from Rodrigues Island on 10 meter FM. He was heard on the worldwide calling frequency of 29.600 MHz between 1200 and 1400 U-T-C, working Europe. (GB2RS)

Also heard on is A-P-2-J-Z-B in Pakistan. He was monitored on 12 and 17 meters SSB. Watch 24.955 MHz after 0930 U-T-C and also around 18.110 MHz after 1445 UTC. QSL direct to the operators call directory address. (GB2RS)

**

## THAT FINAL ITEM: WHO INVENTED THE SCANNER RADIO - REDUX

And finally this week, an update on our recent story of who really invented the first scanner radio. We previously reported that a group of broadcast engineers working at Cape Canaveral during the early days of the space race developed the first scanner radio. This, so that the late NBC newsman Roy Neal, K-6-D-U-E, could know when a launch was going to take place.

Well, that is quite true but Harvey Cronen, a S-W-L who is one of our listeners in New Jersey has some further information. He says that musician and inventor Raymond Scott is the person who holds a patent on at least one form of automatic scanning radio.

Harvey sent us a web link to a site that chronicles the life of Scott. While he is best known as the orchestra leader on the early NBC television show "Your Hit Parade" and as the husband of the late songstress Dorothy Collins, there was another side to Raymond Scott that few in the public knew about. It is all on the website and it is there where it says that Scott actually patented a broadcast band radio receiver which tunes in on stations around the country and changes frequency by itself at any given interval. This, says the website, permitted Scott to catch most of the nations disc-jockey shows in a brief span and find out what tunes are being played.

There is lots of truly fascinating information at this very informative website about Raymond Scott, his life, his inventions that impacted on the worlds of recording and communications as well as his music. It is well worth visiting at www.raymondscott.com. (H. Cronen)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).
Our e-mail address is newsline @arnewsline.org. More information is available at

Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st.

Next week, a full wrap-up on Hamvention 2004 which is opening as this newscast goes to air. Our Editor Bill Pasternak, WA6ITF, is in Dayton this week, sor for now I am Don Wilbanks, AE5DW editing, anchoring saying 73 and we thank you for listening."

Rich Wood <richbwood@earthlink.net> wrote in news:c8fteq$uh$1
@xuxa.iecc.com:

> many, many people didn't see the reference as a lie.

The lie was the claim of advocacy.

>From <http://www.newsmax.com/archives/ic/2004/5/12/153908.shtml>,
where the whole flap started:

Comparing Bush and his family to the Corleones of "Godfather" fame, Air America host Randi Rhodes reportedly unleashed this zinger during her Monday night broadcast: "Like Fredo, somebody ought to take him out fishing and phuw."

[ end excerpt ]

This is both a misquote ("somebody ought") and a lie.

Funny how the lie made its way into the trades so quickly, to be repeated over and over again before the truth could get its boots on.

This is a little 5-pot radio console. I bought it intending to strip out the Shallco attenuators and other parts; but it's in nice shape overall, so now I'm thinking of keeping it together. Problem is, the little plug-in boards (preamps, transformers, line amp, etc.) were removed before I bought it, and it's not obvious just from looking at the thing where they should plug in. I don't have enough free time to attempt repair or even testing of this thing without a schematic. Anybody got documentation for the Model 5? Thanks in advance.

I've been following this thread with interest.

Was wondering how Imus manages to retain so many mainstream national
advertisers given the tone & content of his show ?  Rich (or anyone else),
can you please comment on this ?  Seems to be an exception to the rule, or
perhaps I'm misinterpreting something.

The text has been posted and a link to the audio as well. It is very clear that what happened was an attempt at humor that went to far by anyone's standards.

There is no lie. Only your denial.

>
> C: Absolutely, thank you--
>
> R: Thank you... I don't think you can say that anymore. I really don't. You
> will see. No Godfather references when it comes to the Bush family. Nope!

Now, please tell me, where in that transcripet are the words Newsmax
"quoted"?

>From <http://www.newsmax.com/archives/ic/2004/5/12/153908.shtml>,
where the whole flap started:

Comparing Bush and his family to the Corleones of "Godfather" fame, Air
America host Randi Rhodes reportedly unleashed this zinger during her
Monday night broadcast: "Like Fredo, somebody ought to take him out
fishing and phuw."

[ end quote ]

Newsmax lied, made up a "quote" that was much worse than the innocent
reference Rhodes made to her favorite movie, and that phony "quote" was what
the press repeated.

Please do not pretend otherwise;  the facts are not on your side.

--
"I am afeard there are few die well that die in a battle; for how can they
 charitably dispose of anything when blood is their argument? Now, if these
 men do not die well, it will be a black matter for the King that led them
 to it; who to disobey were against all proportion of subjection." - W.S.

Firesign Theatre reference on The West Wing season finale Wednesday May 19, 2004

Josh Lyman (Bradley Whitford) on the telephone:

This is a diplomatic meeting?

[Yes.]

'Cause it's feeling a little Nick Danger.

[1] http://website.lineone.net/~giles.booth/keynsham/

-----------------

Keynsham's widest claim to fame was Horace Batchelor who advertised his
football pools system on Radio Luxembourg. Because Keynsham isn't
pronounced as it's written (what self-respecting English place name is?),
he had to spell out his postal address K - E - Y..

-----------------

Does any one know if the "Great American Song Book" tag belongs to a syndicated program source...
thanks

This is a direct appeal!

If you rolled tape -- or know of anyone else who rolled tape -- on any TV broadcast that aired during live coverage of the assassination of President John F. Kennedy between November 22nd and the 25th, 1963, please contact me!

I'm interested in any reel-to-reel audio tape that recorded sound from any television broadcast during that weekend in November 1963!

Whether it's a network or local television broadcast, whether the sound recording of that broadcast is of good quality or poor quality, whether the audio is distorted, whether it was recorded in a major market or in a minor market, I want to know about it!

It could be audio tape that your parent or grandparent might have rolled using their old reel-to-reel tape recorder on Friday, November 22, 1963 (or later that weekend).  Perhaps you vaguely remember a friend or acquaintance mentioning that they rolled tape on TV broadcasts that weekend.  Or you think you know of someone who acquired such a recording.

I'm a collector, so if you have anything like this or know of someone else who does... please email me or have them email me at:

brad.johnson@turner.com
or bkj333@aol.com

P.S.  Hey, we don't have to limit this to just TV... I don't rule out radio broadcasts but am interested in those too!

Thank you!

I was trying to reach FCC regarding next filing window, but was not reach anyone in the appropriate department. I got an automated reply on my email saying that someone will get back to me within 20 days. Alas, it's been couple of months already and I do not keep my hopes high.

All searches on the web return posts pointing to the previous filing windows, which was nearly two years ago. Since all the windows are less then a week each and are announced about a month in advance (with couple of years pauses), does it mean the Government just want it to die quietly?

Any light shed on the issue will be highly appreciated.

Thanks.

Does ANY station in the US broadcast in stereo anymore?
More specifically, any 50kw stations or at least something I can pick
up in the US midwest at night? I purchased an AM stereo campatible
tuner about three months ago and have never even seen a hint of stereo
on the AM band.

Michael Salmons

A couple they didn't mention: When I was in grade school, I remember
someone from WHAS in Louisville (Jeff Douglas?) who was found murdered
on New Years in the mid 70's; and a DJ from Jamaica was killed along
with reggae star Peter Tosh by burglars around 1987

The FCC is still haggling with the MX applications (where competing apps have been filed in the same city for the same frequency) and is taking their sweet-assed time with those.

We were supposed to get five windows of 100 watt stations, followed by five windows for 10 watt stations.  It's been several years and we're not through the first five yet, even though the last filing period was months and months ago.

A friend said you'll never see LPFM fully implemented under Powell's watch -- he has too many big radio corporate interests and is in bed with the NAB.  Notice how IBOC got shoved down everyone's throats with lightning speed, yet LPFM just drags on and on and on ...

IMHO, get the current Bozos out of the White House, then push for an LPFM friendly FCC appointment from John Kerry.

Quoth "Paul Jensen" <pjensennospam@gnt.net> in news:c8o2g6$8sk$1@xuxa.iecc.com:

> Uh, the mustard gas that was found in Iraq 10 days ago.
>

Oh, you mean the ancient stuff that Fox News reported was stored improperly, so it was useless?

<http://www.foxnews.com/story/0,2933,120137,00.html>

I would hardly call that "mustard gas".

Just like that "sarin" shell the Republicans were making such a big deal over this week has turned out to be an old shell from which the sarin had long since been removed during the inspection regime, and which had only the smallest trace amounts left clinging to the insides of the container.

--
"I am afeard there are few die well that die in a battle; for how can they
 charitably dispose of anything when blood is their argument? Now, if these
 men do not die well, it will be a black matter for the King that led them
 to it; who to disobey were against all proportion of subjection." - W.S.

For a comphrehensive worldwide list of AM Stereo stations, visit The Official AM Stereo Web Site:

http://AMStereo.s5.com

In the Midwest at night, try 760 WJR from Detroit and 890 WLS from Chicago -- both 50,000-watt AM Stereo stations with nighttime coverage that extends for hundreds of miles.  (Yes, despite the ill-named thread here, WJR continues to broadcast in full AM Stereo to this day, as do hundreds of other stations around the world.)

p.s. If your receiver has never triggered into Stereo mode on the AM band, are you sure it truly has AM Stereo capability? More than a few people have been fooled by ambiguously-labeled "FM/AM Stereo" receivers which are actually only Stereo on the FM band. Check the receiver list on the aforementioned web site to make sure yours is listed.

By David Porter, Associated Press Writer
May 21, 2004

FLEMINGTON, N.J. -- Even with CD players and iPods, America's teens still listen to the radio. And they tune in even more when the DJs are their own age.

Their unwavering devotion has meant that high school radio has managed to survive -- even thrive at the margins at the low end of the FM dial.

In New Jersey, high school radio epitomizes what is characteristic nationwide. WCVH, out of Hunterdon Central High School, celebrated its 30th anniversary last month. WJSV, based at Morristown High, has been broadcasting since 1971, and West Windsor-Plainsboro High's WWPH has been on the air 28 years. Other stations operate out of Atlantic City, Piscataway and Brick high schools.

At 78 watts, WCVH can be heard as far as 20 miles from the school. The student-run shows are done in two-hour shifts, with three DJs on each shift. The banter can get silly but stays safely within the boundaries of good taste.

"They have to keep it clean," said David Kelber, WCVH's faculty adviser since 1975. "They have limited free rein."

David Connolly, who does an afternoon show with classmates Jacob Lewandowski and China Ejim called Random Nation, gets to play his favorite music while learning about the radio business.
"We have an order to the show, but as far as the music goes, it's kind of skewed," Connolly said.

There are about 300 high school stations nationwide, said Fritz Kass, chief operating officer of the New Windsor, N.Y.-based Intercollegiate Broadcasting System, an organization that serves mainly college stations. There are about 2,400 stations classified as educational by the Federal Communications Commission.

There is no national organization specifically for high school stations, and the FCC does not maintain statistics on them. But Kass said high school stations have made up most of the growth in his organization's membership in the last few years.

Kelber has overseen the growth of WCVH from a one-room operation manned by six or seven students to one that features radio and television studios with state-of-the-art equipment used by about 100 students. He and engineer John Anastasio designed and built most of the furnishings themselves.

In the early days, students broadcast live from 6 a.m. to 11 p.m. weekdays, with some taped programs in the afternoon. Today, students broadcast from 3 p.m. to 9 p.m. Monday through Thursday and 3 p.m. to 5 p.m. Friday. The rest of the time, the station offers computer-programmed music and taped public-interest programming.

Wayne Cabot, an afternoon newscaster on New York's WCBS AM, cut his teeth in radio at WCVH while a student at nearby Voorhees High in the early 1980s and remembers "spending every spare minute" at the station.

"We had a lot of fun, but it was a great place to learn," he said. "You learned everything about programming formats, engineering, what rules you had to follow to keep your license."

Federal legislation passed in the 1960s set aside the frequencies between 88.1 and 91.9 for non-commercial stations of 100 watts or less. Those airwaves have become increasingly crowded in New Jersey, which has more than 130 AM and FM stations, according to FCC statistics. The Hunterdon Central and Morristown stations use the same 90.5 FM frequency, as do WBJB in Lincroft and WXGN in Egg Harbor Township.

Even well established high school stations operate largely at the mercy of the larger outlets. FCC rules require smaller stations, categorized as Class

A, to make way on the FM band for larger stations in Classes B, C and D if conflicts arise.

For example, when Radio One, the country's seventh-largest radio conglomerate, bought 107.7 WSNJ in the Philadelphia area, it moved the location of its tower and also moved the station's frequency to 107.9 to fit into the Philadelphia market.

That amounts to a death sentence for WWHS, which has broadcast on 107.9 from Haverford High School since 1949 and is considered the longest-running high school station in the country. The station is expected to go off the air before the end of the year, a Radio One spokeswoman said.

One solution would be to stream audio over the Internet, an experiment WCVH tried two years ago but later abandoned. Kelber and Anastasio cited the cost involved, on top of what the station already pays to music licensing agencies ASCAP and BMI.

"We don't compete with the commercial stations," Kelber said. "We're not in the business of making money or for ratings. But we do care about service to the community."

There's one on 1660 in the NYC area but that won't do you a bit of good;
they don't speak English!

Amateur Radio Newsline™ Report 1397 – May 21,  2004

Amateur Radio Newsline report number 1397 with a release date of Friday, May
21, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

Mr. Haynie goes to Washington D C and Dayton, Ohio comes alive with the sound of ham radio. These stories and more on Amateur Radio Newsline report number 1397 coming your way right now.

(Billboard Cart Here)

**

THE BPL FIGHT: MR. HAYNIE TO MEET WITH WHITE HOUSE TELECOM ADVISORS

This weeks top story starts in Dayton Ohio and ends in Washington D-C. It was at the Dayton Hamvention that ARRL President Jim Haynie, W5JBP, announced that he would be meeting with presidential advisors art the White House Telecommunications Office to discuss the Broadband Over Powerline situation. Amateur Radio Newsline was there when a horse but upbeat W5JBP thanked the ham radio community for making the meeting come about:

--

Haynie: “When we ran the story about my FAX’ing the President of the United States a powerful letter, what you helped me do with your letters and your e-mails was to get me an appointment Thursday morning, 10 a.m. in Washington. So you helped me to do that. (applause).

--

The meeting between President Haynie and those advising Peresident Bush on telecommunicastions matters was scheduled for Thursday, May 20th. We will have a full report on it, next week. (ARNewsline(tm))

**

THE BPL FIGHT: HAM TURNS THE TABLE ON BPL PROPVIDER

Still with BPL news, word that a ham attending an industry sponsored demonstration of the technology in Australia came prepared to do battle. From Brisbane, Q-News reports:

--

A presentation was given by Piero Peroni, who is the Business Manager for the BPL trial within Aurora Energy and Adrian Wild who is the Corporate Affairs Manager within Aurora Energy.

Martin, VK7GN gave an audible demonstration of the interference on his portable HF receiver and I think it would be fair to say by all accounts the Corporate Affairs Manager was quietly horrified at the noise!

--

Whether or not the ham radio counter demonstration to Aurora Energy will slow down or stop the rollout of BPL down-under is, at this time unknown. (Q-News)

**

## DAYTON HAMVENTION NEWS: A BIG SUCCESS

Back here in the U-S-A, Jim Haynie's White House meeting announcement was just another layer of frosting on the very sweet ham radio cake known as the Dayton Hamvention. By all accounts, Hamvention 2004 was as good as any of those in the past and maybe better than some. Amateur Radio Newsline's Mark Abramovich, NT3V, takes us on an audio tour of this years show:

--

The big buzz at Dayton was the introduction of two new, top-of-the-line HF radios.

Yaesu introduced thousands of visitors to its booth here to the FT DX 9000 - a radio the company has been developing four years. Here's Chip Margelli K7JA of Yaesu - Vertex Standard.

Over at the competition, Icom introduced showgoers to its sleek, new IC7800. It's already been out for more than a month and Icom representatives concede they underestimated the market demand for this high-end radio.

Here's Ron Rotino, W9WL, represting Icom.

In other Dayton news, Alinco announced a new distributor relationship. Evelyn Garrison WS7A tells Amateur Radio Newsline about the new partnership.

Now Amateur Radio Newsline Editor Bill Pasternak WA6ITF also took in the show besides running his annual Town Hall forum. Bill couldn't help himself when he stopped a the U.S. Towers booth where two lovely sales, eh, models were posing for pictures. Here's the exchange between our own California guy and some young ladies who came to the Dayton Hamvention for the first time..

Behind any Dayton Hamvention is the general chairman. This year Gary De Combes N8EMO took on that enormous responsibility. At the close of the show, he summed it all up for Amateur Radio Newsline.
And how did one of the big radio manufacturers we didn't mention yet think things went. Kenwood's Leo Famie was pleased with this year's event…

And, of course, Chip Margelli, summed up what Yaesu Vertex Standard thought.

Finally, there were lots of new friends and acquaintances made during the Dayton Hamvention 2004. And, despite the rain, spirits of those scouring the flea market for goodies weren't dampened.

It was one for the record books, too, in terms of participation.

Hope to see you here, next year.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, from the convention floor at the Hara Arena - home of the Dayton Hamvention.

--

As of the time this report is being prepared the Hamvention Committee has not announced a final attendance figure, but several vendors told Amateur Radio Newsline that their sales were way up over the past few years. And thats good news for both the United States economic recovery as well as for Amateur Radio. (ARNewsline(tm))

**

DAYTON HAMVENTION NEWS: N8EMO AND WX8F ASKED TO RUN HAMVENTION 2005

In a related development, on Monday night, May 17th the Dayton Amateur Radio Association's Planning Council unanimously recommended the clubs Board of Directors reappoint Gary De Combes, N8EMO and Jim Nies, WX8F as General Chairman and Assistant General Chairman respectively, for Hamvention 2005. The two were affirmed to lead the 2005 show on Tuesday night the 18th. That's only two days after the close of this years show. Normally , no action is taken to fill these positions until the June Board of Directors meeting.

More on the 2004 Dayton Hamvention in future Amateur Radio Newsline reports. (ARNewsline(tm))

**

Break 1

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the K9OQO repeater serving Appleton Wisconsin.

(5 sec pause here)

**

RESCUE RADIO: HAMS TAKE PART IN SIMULATED AIRPORT DISASTER

Over a hundred ham radio operators from seven counties in two Eastern states, provided emergency communications support for the Saturday, May 8th disaster drill at Dulles International Airport. The exercise consisted of a simulated plane crash and fire. The aim of the session was to provide treatment and transport of 200 volunteer "victims" to area hospitals by helicopter, ambulance and bus. Bill Pasternak, WA6ITF, picks up the story from here:

--

Larry Hughs, K3HE, is the Public Information Officer for for the ARRL's Virginia Section. He tells Newsline that the job of Amateur Radio was to provide communications between agencies at the simulated crash site, those providing patient transportation, and the participating hospitals. To accomplish this, hams from a number of the regions Amateur Radio Emergency Service groups set up several portable repeaters in and around the airport grounds. They also provided a live Amateur Television link between the site and the airport Operations Center. This allowed airport management to monitor the progress of the drill.

Hams also accompanied some of the officials at the simulated crash site to provide instant communications to other temporary operational areas. Others rode the buses that transported ambulatory victims to local hospitals. This gave planners voice communications and real-time position data via Automatic Position Reporting System. Meantime, other radio amateurs were stationed at ten area hospitals. They helped to coordinate the arrival and departure of those simulating the victims of the crash.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, reporting.

--

Dulles International Airport is in Northern Virginia, near Washington, DC.. Its also not that far from where Al Quida terrorists crashed a jumbo jet into the Pentagon building on September 11th of 2001. Back then ham radio was among the first of the “First Responders” on scene and is credited in helping to save numerous lives. (K3HE, ARNewsline(tm))

**

RESCUE RADIO: SUIT BLAMES MOTOROLA HT’S IN 911 DEATHS

The families of twelve firefighters killed when the World Trade Center in New York City collapsed on 9-11 have sued the manufacturer of the hand held radios the men were carrying. According to Popular Communications magazine, the five billion dollar action against Motorola and the City of New York claims that Motorola failed to warn the Fire Department that its hand-helds could not transmit or receive in a high rise building. Because of this, the plaintiffs contend that firefighters could not hear an order to evacuate. (Popular Communications)

**

ENFORCEMENT: NC HAM MAY FACE LICENSE RENEWAL HEARING

A North Carolina ham who allegedly interfered with repeater operation in that area may not get his license renewed. This, as FCC chief rules enforcer Riley Hollingsworth writes to Daniel Barrett, KE4NOK of Kings Mountain to tell him that his application to renew his ticket has been referred to the enforcement arm of the agency by the Wireless Telecommunications Bureau.

According to Hollingsworth’s letter, the action was based on information coming to the Commission's attention that Barrett is alleged to have used his station to interfere with various repeater operations on 145.350, 145.450 and 147.120 MHz and that he ignored requests of repeater control operators to refrain from using their repeaters. Hollingsworth’s note also says that Barrett ignored the Commission Warning letter dated December 24th of 2003 regarding use of and interference to the repeaters and that apparently Barrett’s use of, and interference to, these repeaters continues.

Hollingsworth’s letter tells Barrett that his renewal application will not be routinely granted. Rather, that the Commission may need additional information from KE4NOK in order to determine his qualifications to remain a Commission license. The letter also tells Barrett that it may be necessary to designate his application for an evidentiary hearing before an Administrative Law Judge. In such a proceeding Barrett would be required to appear at a hearing in Washington, DC. (FCC)

ENFORCEMENT: UNLICENSED BROADCASTER CHALLENGES FCC’s AUTHORITY

An unlicensed radio station taken off the air by the FCC last fall has challenged the regulatory agency in federal court. Attorney Mark Vermeulen, representing San Francisco Liberation Radio, says that the seizure of the station's equipment in an October 2003 raid came without proper notice and violated Constitutional protections of due process and the First Amendment.

In an appearance before U.S. District Judge Susan Illston, Vermeulen argued that -- quote -- "It's a bedrock principle that parties have a right to pre-seizure notice and a right to be heard.

But government attorney Sarah Winslow disagreed with Vermeulen's free speech arguments. She told Judge Illston that there is no First Amendment right to broadcast without a license from the FCC.

The FCC had monitored San Francisco Liberation Radio for years. They eventually tracked the station to a laundry room basement in the San Francisco home of James and Charlotte Hatch. The Hatches never made a secret of their operations. They also claim that they had unsuccessfully sought an FCC license to operate legally. (Published reports)

**

FOR THE BIRDS: FCC RETAINS BIOLOGICAL CONSULTANT

Remember all those stories about thousands of migratory birds getting killed by running into radio towers? Well the FCC has now retained the services of Avatar Environmental Services of West Chester, Pennsylvania as a biological consultant. This, to assist in fulfilling the FCC's role under the National Environmental Policy Act and other federal environmental statutes.

The CGC Communicator reports that Avatar will give the Commission access to the services of experts with training and experience in evaluating the impact of construction projects on animal and plant species.

According to CGC, Avatar has performed similar services for other agencies. The possible impact of communications towers on migratory birds is one of the immediate pressing issues. (CGC)

**

## RADIO CELEBRATIONS:  W6RO AT AGE 25

A big celebration out West in the world of Amateur Radio.  This as the Queen Mary Ocean liner ham radio station W6RO turned 25 on April 29th.

W6RO is actually the club call sign of the Associated Radio Amateurs of Long Beach, California.  Long Beach is where the retired ocean voyager is permanently birthed and open to the public as a tourist attraction.  The club operates the W6RO station which is located in the Wireless Room adjoining the ships historic radio museum.

In its two and a half decades of operation, visiting hams from around the world have called C-Q and made numerous contacts using its gear, and its well known call sign phonetics of W-6-Rolling Ocean.  (W6RO)

**

## HAM RADIO BOOKS: NEW VHF PROPAGATION BOOK FROM CQ

CQ Communications has announced the publication of a new resource book for hams active on VHF and UHF bands.  Its a book for those who want to learn more about long-distance propagation possibilities available to them.

Titled "VHF Propagation - A Practical Guide for Radio Amateurs" the book examine each of the most common long-distance propagation "modes" found on these bands. Topics covered include tropospheric scatter and ducting, Sporadic-E, Aurora, 6-meters and the F-layer, transequatorial and more.  The book then explains how each mode occurs and offer tips on making the most of these band openings.

"VHF Propagation - A Practical Guide for Radio Amateurs" was written by Ken Neubeck, WB2AMU, and Gordon West, WB6NOA.  It  is available from many ham radio dealers or direct from CQ anytime through the CQ online bookstore.  To find it take your web browser to www.cq-amateur-radio.com and then click on “Visit the CQ Store."  (CQ)

## THE SOCIAL CIRCUIT:  ROCHESTER HAMFEST IN JUNE

With the 2004 Dayton Hamvention now a part of history, we turn to the ham radio social circuit for the rest of 2004.  Next up is the giant Rochester Hamfest the weekend of June 4th through the 6th.  As usual, it takes place at the Monroe County Fairgrounds and is combined with the ARRL Atlantic Division Convention.

Chairman Harold Smith, K2HC, tells Newsline that this years outing features over 100 inside exhibitors, 1200 flea market spaces and that very much coveted on site free parking.  He also says that area hotels can be found for $69 a nmight or less.

Interested in finding out more? You can do it right on-line at www.rochesterhamfest.org or by calling the hamfest office at 584-424-7184 during business hours Eastern Daylight Time. (Rochester Hamfest)

RADIO HONORS: HAM HONORED FOR SERVICE IN IRAQ

The United States Department of Commerce has honored Fredrick Matos, W3ICM, of Annapolis, Maryland. This by presenting him with its Gold Medal Award for Distinguished Achievement.

The ARRL Letter says that Matos is an employee of the National Telecommunications and Information Administration. He was given the honor for his work to help establish telecommunications in Iraq, where he was deployed for nine months.

While in Iraq, Matos who also holds the Iraqi call YI3DX helped establish a central telecommunications authority along with assigning frequencies to local law enforcement groups. He was also responsible for issuing YI Amateur Radio licenses to both nationals and visitors.

In presenting the award April 13, Commerce Secretary Donald L. Evans welcomed Matos home and thanked him for his role in "expanding freedom around the world." (ARRL, Daily DX)

EMERGING TECHNOLOGY: BEWARE OF FOREIGN PET CHIPS

Heres a communications story of a different sort, but one that affects anyone with a four legged friend around the house. The United States Humane Society and other animal care organizations are cautioning pet owners that the nation's animal shelters may not have the proper scanning devices to detect and read some foreign manufactured pet identification microchip.

The warning comes as a European company has entered the microchip market and is selling its microchips in approximately 440 veterinary clinics housed in one of the nation's largest pet product retailers. But the company has not yet provided many of the nation's shelters, humane societies and veterinary hospitals with compatible scanners needed to read all the microchips currently in pets. As a result, the animal protection groups recommend that pet owners thinking about getting their pets micro-chipped contact both the chip manufacturer and their local shelter. This, to make certain that compatible 125 kHz scanners are present in their community. (Science OnLine)

## WORLDBEAT - INDIA: FREE FOR ALL

On the international scene, Amateur Radio training classes have just started at the National Institute of Amateur Radio in India and there is a very pleasant twist. According to Administration Manager Jose Jacob, VU2JOS, the course is available free of charge to anyone in that nation who is age 12 or older. (Q-News)

**

## WORLDBEAT - UK: NEW BARTG AWARDS MANAGER NAMED

Over in the U-K the British Amateur Radio Teledata Group has a new Awards Manager. This, as the group announces that Phil Cooper, GU0SUP, has taken over from Nigel Roberets, G4KZZ, in that post. Cooper will handle all awards, including the well-known Quarter-Century Award. For more information e-mail awards@bartg.demon.co.uk (RSGB)

**

## WORLDBEAT - SPAIN: A WEDDING OPERATION

Spanish special event station A00FL will be on the air between the 21st and 30th of May. This, to celebrate the wedding of Prince Felipe and Do�a Letizia Ortiz. If you work this one, QSL as directed on the air. (Q-News)

**

## ON THE AIR OPERATIONS: THE MORRIS CANAL SPECIAL

Closer to home, July 10th and 11th are the dates when New Jersey’s Nutley Amateur Radio Society activates station W2GLQ. This, for the first ever Historic Morris Canal Special Event.

Stations will operate from various locations along the 109 miles route of he canal from 1300 to 2200 U-T-C. Operations will continue thru 2005.

More information is on the Nutley Amateur Radio Society website. Its in cyberspace at at www.hometown.aol.com/kc2aup (Press release)

**

## DX

In D-X, kook for K9OT and KB9LIE to be active portable F P from Miquelon from the evening of July 2nd until noon local July 11th. This is a 100 watt operation on 160 through 6 meters from the ham radio friendly Maxotel Hotel. They will also have a 6 meter breakable beacon on 50.120 Mhz. Emphasis will be on 6, 12 and 17 meters SSB for Peg and 160 through 30 meters CW for Paul. QSL via K9OT direct with SASE or bureau. Sorry, no electronic Q-S-L are available for this one. (Various DX sources)

**

THAT FINAL ITEM: UP - UP - AND AWAY

And finally this week, we go back to the Dayton Hamvention where Amateur Radio Newsline ran into one of the nations best known experts in Amateur Radio balloon launches. And does Bill Brown, WB8ELK have a story about recruiting new young hams using high altitude ham radio carrying balloons. Amateur Radio Newsline's David Black, KB4KCH, has the details:

--

Bill Brown's class is all about going up up and away--and getting college credit at the same time. Brown teaches a course on building balloon payloads at the University of Alabama in Huntsville--and he makes amateur radio a big part of the curriculum.

--

Audio only: Hear it at www.arnewsline.org

--

The ham bands get used not just by the students--but by what goes up. Amateur radio experiments are aboard the payloads students assemble.

--

Audio only: Hear it at www.arnewsline.org

--

Brown's class is also creating a positive effect on amateur radio—by helping bring new people into the service:

--

Audio only: Hear it at www.arnewsline.org

--

About five students become licensed each semester. From the South - East bureau in Birmingham Alabama, I'm David Black , KB4KCH, for the Amateur Radio Newsline.

--

Again that website for more information on this very interesting project is www.WB8ELK.com  (ARNewsline)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).  Our e-mail address is newsline @arnewsline.org.  More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.  You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on.  This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That’s in cyberspace at www.arnewsline.org.  The cutoff for nominations this year is midnight on Tuesday, June 31st.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Don Wilbanks, AE5DW, saying 73 and we thank you for listening."

This weeks newscast was recorded in part at the 2004 Dayton Hamvention and at our studios in New Orleans, Louisiana.  Amateur Radio Newsline(tm) is Copyright 2004.  All rights reserved.

Actually, the arrangement I saw most often was what is/was called "draw". You get a salary...not exactly riches beyond the world, but enough to keep you out of poverty, against which the commission on your sales are "drawn". Obviously, if you don't earn your keep, this arrangement won't last, but on the other hand if you do well your salary plus commission is, in fact, straight commission.  Also, once you do prove yourself, you can take a bad week or two and not go completely broke....although I don't know what mechanism is used to make sure that the result after a run of bad weeks doesn't have an incentive to slack off regularly.

This arrangment also conforms with the US Department of Labor's minimum wage and overtime regulations.  You can't make an employee adhere to a schedule, fix hours, require presence at a work location, etc, without paying him/her at least minimum wage and overtime, if it applies.  But an A/E who gets two $10,000 signatures a week is making about $100K/yr, enough that he/she is making well above minimum wage all day and night, with overtime to boot.

The Boston Globe picked up this story last week.  Quite interesting, with unfortunately one glaring error:

>FCC rules require smaller stations, categorized as Class A, to make way on the
FM band for larger stations in Classes B, C and D if conflicts arise.<

It's Class D stations that are the secondary service in the commercial
(non-reserved) portion of the FM band.

What about company benefits such as a health care plan? Do new
salespeople at a station automatically get health care coverage? And
if they do, would this apply to all salespeople or just full-time
ones?

Wow....good questions.  I should think that, for those operations with a salary/
draw
arrangement, health benefits would kick in in accordance with established policies
for the station (for example, newly-hired secretarial has a 90 day wait, so so
does
the new A/E).  But on this I'm sure there's wide variation, including where the
eligible A/E has to pay into the group plan.

I just heard Franken talking about the latest Arbitrends a little while ago. If I heard him right, he said that WLIB got a bigger share than WABC in both the 18-24 and 25-34 demos during the midday daypart.

This would mean that Franken, on the puny WLIB, beat Rush, on the powerhouse WABC, in two desirable demographics.

Does anyone have the details? I can't find any press confirmation or refutation anywhere I have looked.

Thanks.

It seems that only some of the murders here had anything to do with the fact that the victim was a dj.  A spousal murder/suicice, a couple that seem to be random violence, a shoot-out with the law...none of those have anything to do with the profession of the victim.

When you're a public figure, you attract nutcases.

Since Mr. Porter appears to be a staff writer and not a broadcaster I
wonder where he got his information. I've been in the business a very
long time and have never seen a high school station considered
competition even by other non-commercial stations.

It sounds like a puff piece.

If you dislike her so much, don't listen.

>From what I've heard of her, most of her advice seems to be along the lines of "get a spine, take responsibility for your life and do the right thing".  I that this is out of step in these politically correct times where nothing bad that happens to you is your fault, you're a victim and someone else should be made to pay.

So she's not a psychologist, neither are "Ann Landers" or Dear Abby and they dish out all sorts of dubious advice too.  Or is it OK for them because they're in the paper and not on the air?

Dude, you really need to lighten up.

On 24 May 2004 17:38:00 GMT, Tom Betz <spammers_lie@pobox.com> wrote:

>I just heard Franken talking about the latest Arbitrends a little while
>ago. If I heard him right, he said that WLIB got a bigger share than WABC
>in both the 18-24 and 25-34 demos during the midday daypart.

Franken was the keynote speaker at this weekend's Talkers New Media Seminar in New York. He made that claim there but clearly didn't understand what the numbers meant.

I can believe it might be true due to all the external publicity. It's not the book. It's the first 3 month average.

Frankenly, I hope he's right. He was very open about the troubles the network is having and made some very funny remarks about the quality of its series of managers.

>This would mean that Franken, on the puny WLIB, beat Rush, on the
>powerhouse WABC, in two desirable demographics.

The differences he quoted were well within statistical error. We need to find someone on the list with access to Maximiser with the New York figures.

Join the GAGLIARCHIVES this Saturday night, 5/15/04, at 10pm EST, as we feature a classic from the vaults of our playlists. As Cuneiform Records celebrates their 20th anniversary this month, we will feature an exclusive interview with Cuneiform Records President, Steve Feigenbaum. Steve joined us for a 4 hour spotlight on the history of the 20 year old label, while sharing stories, performances, and an analytical look at Cuneiform's releases over the past two decades. We'll be featuring music from Arkham, Soft Machine, Matching Mole, National Health, as well as music from Happy The Man, Djam Karet, Boud Deun, Thinking Plague, Curlew, and many, many more including 2002's #1 disc through Misterpoll.com, Deus Ex Machina's Cinque. Don't miss this special program.

Quoth Rich Wood <richbwood@earthlink.net> in news:c83etd$sfb$1@xuxa.iecc.com:

> As it is, spots scheduled to air on WLIB, New York,  were,
> apparrently,  run on the network in a show that suggested the
> President be assassinated.

No Air America show ever suggested the President be assassinated.

But keep passing around the lies, Rich.  The buzz is bringing in advertising
bucks, and as a startup, they can use all the help they can get.

I posed the same question at rec.radio.flamefest, I mean shortwave, and someone there recommended that I post the link to the Radio World email signup. So here it is:

http://www.rwonline.com/dailynews/signup.shtml

Anyone who wants the digest directly in their inbox can sign up for it at that link. That way, you'll have it even if I forget to post it here. My memory is pretty weak sometimes.

The "lies" have been all over the trade press. Randi Rhodes allegely suggested George Bush be taken out in a boat and shot. That's what prompted the advertisers to request their spots not air on the network.

I'm sure she wasn't serious but mainstream advertisers shun controversy.

I'm curious how you know the "buzz" is bringing in advertisers. Unless you're an employee of the network or ad agencies who are placing buys, how would you know? Many spots on a new network are there to avoid using PSAs in every break.

With only one major market I doubt they're getting network buys. Even WLIB, New York, doesn't have the tonnage in the right demos to get bought. My guess is those were spots being run off from a buy aimed at the station's previous audience or as a combo buy with WBLS.

I think the archive their shows on the net. It allegedly happened last week.

Rich

OtsDJ is great, but BEWARE!  Its dynamics processing is not as good as they
make it sound.

According to Michael Goodwin in the New York Daily News, Randi Rhodes did exactly that. He wrote:

"Rock bottom came when she compared Bush and his family to the Corleones in the "Godfather" saga. "Like Fredo, somebody ought to take him out fishing and phuw," she said, imitating the sound of gunfire."

FUD, spread by those with an interest in AA's failure.

> Randi Rhodes allegely suggested George Bush be taken out in a boat
> and shot.

Did you hear that program, Rich?  I heard it.  Rhodes was comparing W to Fredo Corleone.  You may recall that, in the Godfather, it was Fredo's brother who killed him.

She never advocated anything.

> That's what prompted the advertisers to request their spots not air on the
> network.

Funny how GM (for the most widely-cited example) says otherwise, if one asks them.  They say they were prompted to pull their ads by the fact of the change in format (they had bought WLIB to reach the Caribbean market), not by the content of the new format.

Funny how Ford immediately started advertising THEIR certified used cars on WLIB as soon as GM stopped advertising theirs...

> I think the archive their shows on the net.

Rich, I used to think you were so well-informed. Now, I begin to see otherwise.

AA maintains no archives.

However, a fan of Randi Rhodes maintains a rolling two-week archive at <http://www.randirhodesarchives.com/>.

It's funny how some people, many of whom probably never listened, like to say people like Rush and Sean are full of "hate". Now the shoe is on the other foot. How does it feel?

Some companies will keep you on partial salary for the first 3-6-12 months so that you can develop a client base.  Eventually though it will be 100% commission.

Here is the transcript... it sure sounds like Rich was right. And you are not.

Caller: One more question: Why don't the American people see that the entire Bush Family are crooks?

Randi: Well that would--

C: Neil, Jeb, George Senior Iran Contra, and and and now Dopey

R: And what was involved.. what do they have in common? All of these things?

C: It's all money.

R: They all stole. They stole from banks. They stole from Pakistani banks; they stole from American banks; they stole from small banks, big banks, neighborhood banks. They stole from MY bank. My bank was uh this Savings and Loan of Broward--

C: Yup

R: --and Jeb took care of that bank. Jeb actually bought a building that was uh you know took a mortgage on the building of four million dollars and then just you know said he couldnt pay the.. the the the uh the note you know the mortgage and the bank totally went belly up and the tax payers had to bail out that bank too. I mean--

C: They're theives; they're the Corleones and as you said--

R: They ARE the Corelones!

C: --and now we're down to Fredo.

R: Well I gotta find... Well right, we've got the Fredo of the family is the President of the United States! So uh why doesnt his father take him, or his brother, one of em, take him out for a little uh.. fishing

C: Yeah--

R: You know

C: --on a row boat

R: Yeah and let him say some Hail Marys

C: I'll bet Bush does have a little dingy

R: Yeah.. take him out and you know "Hail Mary, full of grace, God is with you-" [Randi makes the sound of a blast] ... Works for me.

C: Absolutely, thank you--

R: Thank you... I don't think you can say that anymore. I really don't. You will see. No Godfather references when it comes to the Bush family. Nope!

Ok. Rant time.

I was listening to the Dr. Laura Schlessinger radio talk show the other day. Have you heard this? I freakin' love it. Gets me all riled up. People from all over North America call in (over 60,000 callers a day!) and ask her advice on their daily quandaries. The "Doctor" then hauls her ass up on top of her ivory tower of moral superiority, and proceeds to berate her devoted flock like they're 7 year old retards with shit filled diapers. Anyway, today she was fervently babbling about how "shacking up" and "having sex out of wedlock" is "the most disturbing thing there is". Uh.. even more disturbing than running over toddlers with a tractor? Even more disturbing than slowing slicing your genitals with a rusty razor? Even more dis...

Well, needless to say, Dr. Laura is a moronic hag. Have you seen this hypocrites un-doctored nude pictures on the net? It's 100% fun listening to her angrily rail against the people who make/use/sell porn while you jack off to a dozen pictures of her pale but perky tits and hairy pussy. It's really one of the most simple but pure pleasures a listener of her show will ever have in life. Especially that one with her legs spread wide open.

Perhaps Sacramento CA. journalist Anita Creamer put it best:
"She posed in pigtails, hands on hips. She smiled brightly for the camera, flirting and saucy and delighted, naked as the day she was born. We wouldn't bother to care if she weren't such a sanctimonious, mean spirited, god awful witch."

Man, when that shit hit the fan, I thought for sure Schlessinger was gonna finally disappear under some far off religious rock. Her first rather pathetic defense was to dishonestly claim they were "fakes". Then, after she lost her court case to have them suppressed, she got a big, fat, juicy painful lesson in humility after she went on the air to state that she found them "embarrassing". Eventually the source was revealed to be veteran Los Angeles radio broadcaster Bill Ballance, a man who was pivotal in getting Schlessinger her start in radio, and took the photos in 1978, while the pair of them were having an AFFAIR during Schlessinger's first marriage! Oh sweet irony, how I adore ye.

She's really no different than Rush Limbaugh, that fat hateful dope fiend. What the hell is with these right wing religious nuts? They judge, condemn, and preach, and then take part in sins just as bad or worse than those that they were pissing and moaning about in the first place. How about the 237 Pedophile priests in Boston up on 45 million dollars worth of rape and molestation charges? Christ, I rest my case.

Wait.... I don't wanna rest my case. I'm having waaaay too much fun ranting about Dr. Laura. I remember one of her callers asking if she should let her 9 year old kid attend a coed sleepover party. Now, this prudish, ignorant radio host could have said something like "that would not be practical or appropriate" or some concerned parental bullshit, but instead the insane harpy flew off the handle and accused the parents who were throwing the party of "living out their sexual fantasies through their children". -snort-

Another classy moment from a show I heard last year was when she claimed that society can't allow gay people - or as she horrifically calls them: "biological errors" - to get legally married, because "a legal precedent would be set" and we'd then have to "allow people who have sex with their parents to get married to one another" (?!?) That shit is just crazy enough to be hilarious. Mind you, her homophobic comments were determined to be in violation of the human rights provision of the Canadian Broadcasting Code of Ethics, and she lost the majority of her stations in Canada. Ha ha. Luckily, C-Fun 1410 am here in Vancouver continues the weekday afternoon "family values" insanity.

The important thing to remember kids, is that Laura Schlessinger is neither a medical doctor nor accredited in a discipline one would traditionally look to for the generation of expertise in moral, societal, or spiritual matters. She's just a lying hypocritical fuckface with a radio show.

Perverts: The Doctor Laura porn is here. Have fun!

>

Here in the UK it's common for someone in sales to at least start on commission for say 3 months to prove themselves then, once established can negotiate basic plus commission.

Here you'd get a car after a probationary period and our health care, as you may know is free.

I don't think sales would get a company car in the US but hopefully you'd get medical cover!

Oh, I don't doubt that Randi Rhodes hates Bush and his neocon buddies, and with good reason.  They've done a really good job of turning the world against the US, in a very short time, and have needlessly turned Iraq into a playground for the same terrorists they chased out of Afghanistan, and they are preparing to scapegoat a bunch of enlisted kids for the result of interrogation policies made by people at the top in the Pentagon.

But to see obvious lies about ANYONE spread by someone for whom I used to have a modicum of respect, and who has obviously not made the slightest effort to check out the facts for himself... that's really annoying.

Why do radio stations advertise for sales representatives on a fairly
regular basis? How hard would a time salesman work if he had a decent income
outside of commissions?

The commission rate varies by market and station. There -may- be a draw available, but most sales folk work strictly on commissions, at least at the stations I've worked at.

One of the stations paid somewhere around a 20% commission on a sale. If you sold $15,000 worth in one week, that made for a nice check. If you sold $500, it made for a really skimpy way to live. If you sold nothing, you got either a few hundred as a draw against future commissions, or nothing. Many of the people getting into that business have a real small income for quite a while until they got established.

Forwarded with Alan's permission. I actually think this is an excellent idea. I did last time, too. :)

Technically, this is a No - the Yes votes are still leading 2-1.

Good morning, Steve.

I missed the original post on this topic... it looks like the issue is the posting to Airwaves of the lengthy RW weekly email.

If this is correct, it's a replay of the issue I brought up in January.

I vote to allow a brief post with a link to where the info is (or a subscribe link in this case, since it's receivable as an opt-in); those who are interested can click along to the details or subscribe. A few headlines or the like to provide an idea of the content us cool. But not the whole thing like the recurring Ham show script and WCBN playlists. Those posters should do the same courteous thing.

(If this isn't the issue, never mind.)

/A

That doesn't make sense. Why would a trade magazine have any interest in seeing Air America fail? With all the consolidation they welcome as many new advertisers as they can find. I know the publishers of nearly ever trade magazine. None I've talked to want to see them fail. What you seem to be mistaking for hope for failure is accurate reporting on the actions of the network.

I have no interest in seeing them fail. I'm simply commenting on what I see as incompetence.

>> Randi Rhodes allegely suggested George Bush be taken out in a boat

>
>She never advocated anything.

Whatever. It still was seen by advertisers as controversial, according to my ad industry sources. It appears the spots were not supposed to air on the network, anyway. Not being network people they didn't consider the fact that all spots aren't intended for all markets. If a New York area dealers are having a promotion it puts dealers in other no-promotion markets in a tight spot to hear abou6t great deals that aren't mean for them.

It doesn't matter if she actually advocated anything. It's the perception of advocacy. Most of my NYC friends who heard it considered it to be a call for an assassination.

>Funny how GM (for the most widely-cited example) says otherwise, if one asks
>them.  They say they were prompted to pull their ads by the fact of the
>change in format (they had bought WLIB to reach the Caribbean market), not by
>the content of the new format.

Have you spoken to GM or their agency? At least in New York it's always been understood that controversial programming was off limits for these advertisers.

>Funny how Ford immediately started advertising THEIR certified used cars on
>WLIB as soon as GM stopped advertising theirs...

I was under the impression that advertising is placed by the Tri-State Ford Dealers Association. Each company has different policies. Remember when Snapple was pulled from Limbaugh when it was bought by Quaker? Limbaugh practically made the product what it is.

>> I think the archive their shows on the net.

>Rich, I used to think you were so well-informed. Now, I begin to see
>otherwise.

>AA maintains no archives.

Hmm. The publicity I saw indicated that their site was getting a lot of hits and shows were archived. Perhaps they meant  the fan site. It still means the shows are available to the general public, in archived form, for a period of time.

My link is directly to the stream and doesn't access the site.

My basic complaint is the inaccurate hype that inplies stations are carrying the entire Air America lineup. WJNO, West Palm, is on that list. They don't specify that WJNO is carrying only one show. They lead the reader to believe it's all there. It isn't.

After the loss of Los Angeles and Chicago, I believe WLIB is the only station carrying the fulltime 6a-11p schedule.

Rich

On my way to the Dayton Hamvention last Thursday, I happened to hear the last few seconds of an ad on WNRQ-105.9 (Nashville).  Listeners were invited to "Go Stealth"; to call 800-695-7703 to buy "The Phazer", which would make their car invisible to police radar and guaranteed to reimburse buyers who get speeding tickets.

I've found this device on the Internet:
http://www.jammersstore.com/p_phazer.htm

And, I've found this decision:
http://www.fcc.gov/ogc/documents/opinions/1998/rockymtn.html

in which the Court of Appeals finds the FCC was justified in prohibiting Rocky Mountain Radar from marketing a similar device.

The FCC found this device was not certified under Part 15, and *could not* be certified, as its *intended purpose* was to interfere with the licensed police radar service.

================================================================

As a motorist who's sick and tired of being harassed & tailgated every time I dare pass while going less than 20 over the limit...  and a law-abiding broadcaster & ham...  I find this ad simply amazing.

We have a product that is ILLEGAL to market and ILLEGAL to use. Its purpose is to intentionally interfere with a licensed radio service. And, more fundamentally, to allow motorists to intentionally violate the law without risk of prosecution.

I wonder what WNRQ would say if the Nashville TV stations started airing ads for 500-watt FM transmitters for use by pirate broadcasters?

(and I don't mean to pick only on WNRQ. I've also heard this ad on WFAW-AM in Wisconsin, and at least one other station.)

Here is a link to the audio recording of the show:

"you can hear it at http://www.whiterosesociety.org,

Randi Rhodes May 10, 2004, 60 minutes into the show"

The facts check out, and, whether it was intended to be humorous, it was a suggestion of considerable gravity.

On 17 May 2004 15:10:12 GMT, mindseye100@hotmail.com (The Bougieman) wrote:

>I was listening to the Dr. Laura Schlessinger radio talk show the
>other day. Have you heard this? I freakin' love it. Gets me all riled
>up. People from all over North America call in (over 60,000 callers a
>day!) and ask her advice on their daily quandaries.

Let's put this into perspective. There may be 60,000 callers who attempt to reach the show. Telco can give you a report on the number of attempted calls. Only a few of those actually make it to the guillotine. I'm surprised there aren't more masochists within some radio signal.

To be fair I have to reveal that Laura Schlessinger and I intensely dislike each other. She once tried to get me fired because I consistently pointed out that my host, Dr. Joy Browne, was a real psychologist and Schlessinger was s Physiologist. Howard Stern called her a "gym teacher."

>Well, needless to say, Dr. Laura is a moronic hag. Have you seen this
>hypocrites un-doctored nude pictures on the net?

This is very old stuff. As much as I dislike and disrespect her I think the release of those pictures was a terrible betrayal of trust. How many of us took such pictures when we discovered Polaroid cameras? Supposing you had a companion and you took pictures of each other. It would have been done with the full expectation of privacy between you both.

The pictures were taken before she became perfect. So she lied a little in denying thery were her. She was finally pressured into admitting to a little imperfection as a young woman. Certainly nothing she'd do as an old woman who has seen the light, accepted God and a huge paycheck.

>Eventually the source was
>revealed to be veteran Los Angeles radio broadcaster Bill Ballance, a
>man who was pivotal in getting Schlessinger her start in radio, and
>took the photos in 1978, while the pair of them were having an AFFAIR
>during Schlessinger's first marriage! Oh sweet irony, how I adore ye.

Again, this was pre-perfection. I had no respect for Schlessinger, so there was none to lose. However, I did respect Ballance. His betrayal of her caused me to lose respect for him.

>Another classy moment from a show I heard last year was when she
>claimed that society can't allow gay people - or as she horrifically
>calls them: "biological errors" - to get legally married, because "a
>legal precedent would be set" and we'd then have to "allow people who
>have sex with their parents to get married to one another" (?!?) That
>shit is just crazy enough to be hilarious.

It's shtick. Unfortunately for her it cost her network the loss of $30 million in billing. The Gay community was extremely effective in targeting her advertisers. When there's no legitimate argument for something they grab at straws and suggest it'll result in people marrying animals. The Radical Religious Right is very creative and seem to turn their sexual fantasies into predictions of the future.

>Mind you, her homophobic
>comments were determined to be in violation of the human rights
>provision of the Canadian Broadcasting Code of Ethics, and she lost
>the majority of her stations in Canada.

The US has no such code of ethis. In fact, with our FCC we never know what the rules are until we've broken them and have a whopping fine staring us in the face.

>The important thing to remember kids, is that Laura Schlessinger is
>neither a medical doctor nor accredited in a discipline one would
>traditionally look to for the generation of expertise in moral,
>societal, or spiritual matters. She's just a lying hypocritical
>fuckface with a radio show.

Listen to her show with the same rubbernecking approach you'd take at seeing a serious traffic accident. The only difference is the accident was an accident. Calling the show is simple masochism.

She is a Doctor of Physiology. She's not a Theologian (her book was written by a Rabbi). Taking her advice is like hiring a Proctologist to perform brain surgery.

Rich

Here's a link to an article about murdered DJs and radio hosts.
http://radio.about.com/library/weekly/aa080303a.htm

I don't know about anyone else, but I was assaulted at gunpoint one day at our local radio station by a crazy ex-employee. Plus, I've been stalked several different times. All of those events happened back in the late 70s and early 80s. To me, it was a shock when it first happened to me, but now I have come to recognize this phenomenon as a typical job hazard of the radio industry. Radio draws nutcakes. That's what drew me to the industry to start with!

Has anyone here had any such experience in their background?

> brother, one of em, take him out for a little uh.. fishing

No, I'M correct.

She never advocated anyone kill W.  Her words were, "why doesnt his father take him, or his brother, one of em, take him out for a little uh.. fishing"

As I said, she referenced Michael Corleone killing Fredo in "The Godfather".

Unless you are prepared to assert that Rand Rhodes commanded Jeb to kill W...

Doug,

>in which the Court of Appeals finds the FCC was justified in prohibiting
>Rocky Mountain Radar from marketing a similar device.

None of the Rocky Mountain products work.

There's plenty of info via Google including video footage of actual
testing of these products.

There are working units out there,  but not from this company.

Quoth Rich Wood <richbwood@earthlink.net> in news:c8avej$hsc$1@xuxa.iecc.com:

> Have you spoken to GM or their agency?

Here's the boilerplate with which GM is responding to queries:

Thank you for contacting the General Motors Customer Assistance Center. We appreciate your comments and opinions regarding advertising for General Motors on WLIB 1190-AM.

General Motors learned the week of May 10th, 2004 that radio advertising time that GM bought on WLIB 1190-AM, previously an affiliate of American Urban Radio Networks, continued to run without GM's knowledge or authorization after WLIB changed its affiliation to Air America. GM originally bought this advertising time when WLIB's format was Caribbean-based music, targeted to an African-American audience, which was part of GM's ongoing effort to reach this important group of consumers. With the change to a new, untested format, our advertising on WLIB would no longer reach the same consumers we were originally targeting, and we have opted not to continue advertising on WLIB at this time. We are sorry if this decision has offended you in any way and we hope you understand our position.

If you should need to contact us in the future, simply reply to this message or call our General Motors Customer Assistance Center at 1-800-222-1020. Customer Relationship Managers are available Monday through Friday from 8:00

a.m. to 11:00 p.m., Eastern Time. Please reference service request number 1-217075972.

Again, thank you for contacting General Motors.

Carol Talley
Customer Relationship Manager
General Motors Customer Assistance Center

[ end boilerplate ]

If there's any content reason for the termination of the ads, GM isn't admitting it.

>The FCC found this device was not certified under Part 15, and *could not* be certified, as its *intended purpose* was to interfere with the licensed police radar service.<

Yes indeed. RMR obeyed the ruling, too. They took that particular model off the market.

Then, they redesigned the case, changed a few electronic parts, gave it a new model name and number...and went right on selling it. AFAIK, the FCC hasn't caught up with them yet.

>Its purpose is to intentionally interfere with a licensed radio service. And, more fundamentally, to allow motorists to intentionally violate the law without risk of prosecution.<

Only problem is, the @#$%^&*ing things don't work. They assume that the cop can't tell that a vehicle which spits "23 mph" or "360 mph" on their radar, while passing everyone else on the Interstate, is using a jammer. There may be some dumb cops out there, but they're generally not THAT dumb. Most people who plug these toys also don't realize that a cop does not have to write down a specific speed on your ticket. He or she can legally write "in excess of <insert speed limit here>," assuming that is an accurate account of what happened...rendering any false reading because of a jammer irrelevant.

According to the car magazines which regularly test such so-called jammers, they only work at such close range (if they work at all) that by the time they emit their interfering signal, the cop has already measured your speed. The only radar and laser jammers which really work, you can't afford, and you would be jailed immediately and forever if you had one...they belong to the military.

Many jurisdictions have invoked "interference with a police officer" statutes to arrest and jail motorists attempting to use jammers.

> Are radio sales jobs all commission?

Back in the '60's. when I worked for McClatchy (Newspapers, tv, radio in the Central Valley of CA) as a newsman, I happened to learn one day that their salesmen were all salaried.

I'd never heard of that, and asked the sales manager, Well, then what's their incentive to sell?

And he said, if you sell enough you get to keep your job.

That's still the only place I know where they were not pretty close to 100% commission.

And then, McClatchy was different in a lot of ways.

ASSOCIATE DIRECTOR FOR TECHNOLOGY
(Chief Engineer)

Division of Broadcasting, WILL AM-FM-TV
University of Illinois at Urbana-Champaign

THE STATIONS: WILL-AM, WILL-FM, and WILL-TV are public broadcasting stations licensed to the Board of Trustees of the University of Illinois and affiliated with NPR, PRI, and PBS. WILL-AM/580, on the air since 1922, operates 24 hours per day and is primarily a news and information station serving more than half of Illinois and half of Indiana with a directional antenna system. WILL-FM/90.9, established in 1941, is the most powerful FM station in Illinois at 105,000 watts on a 1,000-foot tower and is a 24-hour primarily classical music station. WILL-TV, founded in 1955, provides public television programming to east central Illinois. The stations are housed in Campbell Hall for Public Telecommunication, a new broadcasting facility on the university campus.

THE LOCATION: The University of Illinois is located in the adjacent cities of Urbana and Champaign, Illinois that offer the advantages of medium-sized city living (110,000 population), with easy proximity to Chicago (135 miles), St. Louis (175 miles), and Indianapolis (120 miles). The university setting (38,000 students) provides a rich cultural environment, many sports and entertainment events, and a variety of recreation facilities. Local schools, libraries, and park systems are excellent.

THE POSITION: This is a full-time academic-professional position. The employee reports to the radio and television station managers on all technical matters related to the individual stations and to the director of broadcasting on major technical initiatives affecting the Division of Broadcasting. The employee will:

Be responsible for maintenance and operations of the technical infrastructure of the WILL stations, including satellite, subcarrier, remote broadcasting, all transmitters, and AM directional antenna arrays.

Supervise engineers and engineering operations staff, acting as a mentor to encourage personal and professional growth.

Utilize emerging technologies including radio/television digital production, automation and transmission, computer-based audio and video platforms, and the latest on-line program delivery systems.

Participate in goal setting and planning, establish priorities and meet deadlines for all technical projects.

Prepare budgets and supervise the acquisition and installation of all broadcast equipment.

Assure compliance with all FCC and University of Illinois rules and regulations.

QUALIFICATIONS: A baccalaureate degree in electrical engineering or similar field, SBE certification, at least 5 years' work experience in broadcast engineering, preferably in both radio and television, and extensive broadcast engineering management experience with well-developed interpersonal and management skills are required.  Additional requirements:

A thorough understanding of digital theory and emerging computer technologies used in broadcasting, including experience with the ENCO DAD or similar audio technology.

Substantial experience in radio and television studio and transmitter operation and maintenance, including experience in the measurement and adjustment of the performance of AM directional antenna arrays.

Thorough knowledge of FCC broadcast rules, regulations and licensing requirements.

Strong leadership skills and the ability to maintain personal relationships in accordance with the Character and Aspirations Statement of the Division of Broadcasting.

SALARY AND BENEFITS:  Starting salary is dependent on qualifications and experience.  The University of Illinois offers a very generous benefits package-including 24 vacation days annually, health insurance, life insurance, disability insurance, choice of three retirement options with an employer contribution, sick leave, opportunity for advanced education, and opportunities for professional growth.

TO APPLY:  Send a complete resume with the names of three professional references to the address below.  Receipt of applications will be acknowledged, and should be received by July 1, 2004, for full consideration.  The position will be available as soon as possible following a decision by the search committee.  Applicants are strongly encouraged to request a packet containing further information before applying.  The information packet is available from and applications should be sent to:

Elizabeth Weathers, Secretary to the Director
Campbell Hall for Public Telecommunication
300 North Goodwin Avenue
Urbana, IL  61801-2316
Telephone:  217/333-0850
E-mail:  eweather@uiuc.edu

The University of Illinois is an affirmative action/equal opportunity employer.

Denise Perry

NOTICE OF AVAILABLE POSITION
DIVISION OF BROADCASTING
BROADCAST RESEARCH/OPERATIONS SPECIALIST
(Traffic Manager)
University of Illinois at Urbana-Champaign

THE POSITION: Full-time academic professional position; 12-month appointment. The Traffic Manager is a member of the WILL-TV Programming Department, and reports to the Program Director.

THE EMPLOYER: The Division of Broadcasting of the University of Illinois operates public television and radio stations serving much of Illinois and half of Indiana. WILL-TV/Channel 12 has been on the air since 1955, and is the primary public TV station serving the Champaign-Springfield-Decatur, Illinois television market. WILL-AM, on the air since 1922, is an all-news and information service. WILL-FM, which began in 1941, offers classical music and jazz. The Division of Broadcasting has approximately 150 people on staff, and is committed to a policy of encouraging the growth and development of its employees. Results are important, and the working environment is friendly, collegial and mutually supportive.

THE LOCATION: The University of Illinois is located in Urbana-Champaign, 135 miles south of Chicago, 130 miles northeast of St. Louis, and 90 miles west of Indianapolis. The University setting (34,000 students) provides a rich cultural environment, many sports and entertainment events, and a variety of recreational facilities. The quality of life is excellent with fine local schools, libraries and shopping areas.

DUTIES: The Traffic Manager performs duties related to traffic, scheduling, operations and shipping in the WILL-TV Programming Department. The employee prepares broadcast logs which direct the activities of other operational personnel, and which meet Federal Communications Commission, University of Illinois and WILL-TV policies and regulations. The Traffic Manager maintains a library of information concerning television programs and station break materials, and researches their content, timing and mode of delivery; implements WILL marketing and development strategies through appropriate scheduling of promotional announcements; maintains quality of playback materials by viewing air product and responding to discrepancy reports; acts as local administrator of WILL-TV's program scheduling software and related server; aids in the facilitation of WILL-TV's digital broadcast plans and seeks out information regarding related issues; communicates with program distributors about the shipping of videotaped programming; ships and receives packages; keeps a record of the department's shipping activities; responds appropriately to emergencies affecting the WILL-TV broadcast schedule; prepares reports as required; performs related duties as required.

DESIRED QUALIFICATIONS: Baccalaureate degree is required. Candidate must have computer operations skills, experience or special aptitude in dealing with detailed information in an exacting and reliable way, and the ability to work well with others under tight time constraints. Two years' broadcasting experience with demonstrated familiarity in programming-related areas is preferred. Familiarity with ProTrack television scheduling software preferred, but not necessary.

SALARY AND BENEFITS: $30,000 (negotiable) with future merit increases on an annual basis. In addition, there are 24 days of paid vacation annually, paid health insurance, paid life insurance, ample sick leave, disability leave, a pension system and numerous other benefits.

TO APPLY: Send a cover letter, written resume, and the names and phone numbers of three professional references to the address below. To ensure full consideration, resumes should be received by June 4, 2004. Proposed starting date is July 6, 2004. Applicants are encouraged to request a packet containing further information before applying. The information packet is available from (and applications should be sent to):

Elizabeth Weathers
WILL-TV
300 N. Goodwin Ave.
Urbana, IL 61801
(217) 333-1070

AFFIRMATIVE ACTION/EQUAL OPPORTUNITY: The University of Illinois is an Affirmative Action/Equal Opportunity Employer.

Denise Perry

The message is clear. It is not particularly funny, and would be no more
funny coming from Michael Savage in regards to Kerry than it is coming from
a host on the other side of the spectrum speaking about Bush.

Actually I read your original post and the replies. Although I have some
experience with both copywriting and radio broadcasting (I used to be a DJ -
still am one when you count my Internet station) its still a cloudy topic that
you raise.  Referring to your mp3 site will it be artists only?  What's to stop
someone else from downloading the music - then you're Napster all over again!

Hi,

I'm going to be getting a (/\/\) 1300 CQuAM Exciter around the first of
june. I'm looking for copies of a manual and a schematic.

Thanks,

Most of those advertisers have "no controversy" or "no talk" dictates when they want to be assured of a more neutral context for their campaigns. It applies to rush or Savage as well as Franken and Rhodes.

I dunno, I just tuned into the local college station to hear an annoucement
about an invasion in Normandy this afternoon.  I found it interesting, but
I did not find it topical.

>Remember, radio stations are no longer obligated to broadcast _any_ news.

PRESS RELEASE - 29 April 2004

NEW YOUTH RADIO SHOW ON FM 102

OS TOS MHONG! ("COOL!" in English) is the name of the exciting, new weekly call-in show for young people on Phnom Penh radio station "FM 102".

OS TOS MHONG! is broadcast live every Sunday from 0800 to 0900 on FM 102, starting Sunday 2 May 2004.

OS TOS MHONG! is a space where young people can voice their opinions and ask questions about the things that are important in their lives.

OS TOS MHONG! provides advice and information to young people on personal, health and education issues that interest them.

OS TOS MHONG! is presented by 24-year old Try Vannak and 22-year old Phorn

Phasoka who share their own experiences as young people with their listeners.

OS TOS MHONG! has been created by the Women's Media Centre of Cambodia and is produced by their team of experienced radio staff.

OS TOS MHONG!'s production team explains: "The idea behind the show is to get young people talking about the things that matter most to them, including love, relationships and, of course, sex."

OS TOS MHONG! features an innovative mix of callers, information, advice, music and competitions. Each week, the show will focus on a particular topic.

OS TOS MHONG! encourages young people all over Cambodia to make contact, not only by phone during Sunday morning, but also by e-mail and letter.

OS TOS MHONG!
FM 102
SUNDAY
0800 � 0900

CAMBODIA

Background:

Women's Media Centre of Cambodia is a Phnom Penh-based independent non-profit organisation that uses the media to promote social change in Cambodian society. It was founded on International Women's Day in 1993 by five Cambodian women following the UN-sponsored national elections held that year. Over the last ten years, its impact on the general Cambodian population has been immense, despite existing in a part of Asia where freedom of the media is not guaranteed, and women's position in society is still far from equal. The stated goals of the Women's Media Centre are: 1) to raise awareness of social issues from the unique perspective of Cambodian women; 2) to improve the status of women by promoting socially conscious TV, radio and video programmes; 3) to increase women's participation in mainstream media. To this end, the Women's Media Centre: 1) produces weekly TV programmes from its own studio that are broadcast at peak times on Cambodia's three largest TV channels; 2) launched its own radio station "FM 102" in 1999 whose 10,000 watt FM signal reaches 60% of Cambodia's population with 16 hours per day of educational and socially informative programming; 3) employs a staff of more than 40 women at its purpose-built studio complex in Phnom Penh. Audience research commissioned by the Danish Institute for Human Rights in 2003 found "FM 102" to be the most listened to radio station in Cambodia, a testimony to the Women's Media Centre's success in producing programmes that touch the lives of ordinary people. The Centre has just been nominated for this year's One World Broadcasting Trust Special Award for Development Media.

Why can't we have just the pointers, without the cookies and spammers?

Your site says:

Note - You have not configured RadioShowLinks for your machine. If this stream has problems playing please use the "Configure" command on the menu above.

After clicking on 'Listen' your player should launch within seconds - please wait. It can take up to 30 seconds sometimes for the sound to play - please wait.

Why do I have to run your spammer to listen to radio shows you have nothing to do with. Who gets PAID?

"Free" my ass......

sorry you didn't like it ...

the cookies are used simply to save your bandwidth and installed players ... that way we can give you the highest bandwidth stream for a player you have installed ... and for the banner ad tracking.

most people use the site to listen to shows, not stations.  we've chosen to make the station directory also available. many shows are on many times during the day/week ... so a static url won't work ... so we dynamically create them since they are not durable.

and what's the spammer? google ads and banners ... no spyware, no pop up/unders, and no software installed on your machine. just google ads and cj banners. the streams play on wmp, real, and mp3 players users have chosen to install on their machines.  i believe we are far less intrusive than other stream directories out there.  the message to wait was put in when many reported stream failures, but it seemed that they just didn't wait for the stream to load into the player they have chosen to use.  also, many stations stream silence during commercial breaks.

we collect, encode, and publish the schedules for the shows, and serve ads to pay for the server and bandwidth ... yes, we serve ads ... but there is no charge or registration ... we think that's free ...

as for Radio Berner Oberland ... i don't believe we've claimed to stream that station ... we simply give you a link to it.

again, sorry you did not find this site useful.

John

Wednesday, May 05, 2004

Confirming rumours circulating in the UK over the past few months, Luxembourg-based commercial broadcaster RTL Group has released a promotional DVD which sets out its strategy for using Digital Radio Mondiale (DRM). One of the options under consideration is reviving the English service, which ran until the early 90's on mediumwave 1440 kHz. A chart showing requested usage of longwave, mediumwave and shortwave for DRM indicates that RTL has requested a shortwave frequency covering the UK, while mediumwave and longwave are under consideration.

Other DRM expansion plans include a shortwave service for transcontinental/eastern Europe, a mediumwave service for Belgium and the Netherlands, and a fourth RTL network for France. RTL says it expects DRM consumer receivers to be shipping in quantity by the second half of 2005.

http://medianetwork.blogspot.com/ (see website for chart)

Al Kaada is invading normandy?  the French are surrendering again?

sorry, i've never even heard of anyone rerunning net news over a day old before this.  i was involved in taping net news following 9-11  so top of the hour news played at bottom of the hour (or thereabouts) on FM stations that didn't normally air net news.

we reciently had a starguide malfunction which resulted in a tape delayed program airing the some of same elements repeatedly.  the contact closure "stuck" so automation never got the cue to start recording a new segment.

suppose some station records a cart called "news01" then their automation is set to play news01 once an hour during dayparts. then no one updates the cart for a few days. AND the cart is set to never expire. this would result in the kind of problem that's being discussed.

I'm not sure if this test is running tonight or not - this is probably about the end of this DX "season", but as long as there's a chance, and RI can be a difficult state to hear...
---
For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EDT - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

Amateur Radio Newsline(tm) Report 1394 - April 30,  2004

---------------------------------------------------------------------------

A Very Important Note:  We urge all readers of this report to also download the audio version of this report at http://www.arnewsline.org/quincy and listen to it.  Please pat special attention to the words of ARRL President Jim Haynie, W5JBP, and the urgency in his voice as he discusses the latest developments in the fight to keep Broadband Over Powerline technology from encroaching into the Amateur Service bands.  There is no way to express in print the very grave nature of this situation.  Only by listening for yourself can you truly understand the extreme gravity of the circumstances that our service faces if BPL is introduced nationwide.

The ARNewsline Production Team

---

Amateur Radio Newsline report number 1394 with a release date of Friday, April 30th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.

The ARRL takes on the White House over BPL, a power provider says BPL interference to mobile operations has to be tolerated and a ham radio name change.  Its called the Dayton Hamvention once again.  Find out the details on Amateur Radio Newsline report number 1394 coming your way right now.

**

THE BPL FIGHT:  PRES BUSH VS. PRES HAYNIE AND THE ARRL

The  ARRL and its president has expressed what they call deep concerns about a speach by United States President George Bush.  One where where the leader of the free world says that standards need to be changed to encourage the delivery of Internet access using Broadband Over Poweline technology.  Amateur Radio Newsline's Mark Abramowicz, NT3V, is here with more:

--

In the boldest and most dramatic move yet in the BPL debate, the ARRL's president Jim Haynie W5JBP, directly appealed to President Bush to abandon his support for BPL technology.

Haynie says Bush's speech last week during the American Association of Community Colleges convention in Minneapolis prompted him to action. In that speech, President Bush stated directly:

"...power lines can be used for broadband technology. So the technical standards need to be changed to encourage that."

"I faxed a letter to the White House cause I wanted to make sure they got it and we followed it up again with the regular U.S. Mail," Haynie says. "And, it'll be curious to see what kind of reaction that we get. I think, like I said, it's ill-advised.

"It's so much hype that the broadband industry has been putting out and I'm sorry to say it looks like the president has been suckered into it a little bit."

Haynie says amateur radio has reached a defining moment in its history and he is issuing a call to arms.

"This is the time that amateur radio is going to have to pull together and speak with one big voice," Haynie says. "And, on our website, we put the contact information and I want everybody to go there and look at it (www.arrl.org) and you can write the president, you can write your congressman, you can write your senators you can call 'em.

"Anything like that is helpful because amateur radio has been around for a lot of years and I'd hate to see it end based on a technology like this that any engineer worth their salt would be able to say, 'Well, this sounds fun but it's just not going to work.' "

Haynie says he wasn't blind-sided by President Bush's remarks, but has questions about his fellow Texan's true understanding of the issue.

"If you go back and read his speech he made in New Mexico, I think it was Albuquerque, he alluded to broadband then just as a general term," Haynie says. "Since that time, the actual term broadband over power line has come into his speech and I know he doesn't write his own speeches, other people do."

Haynie says its likely Bush administration advisers believe BPL is an issue that may have some mileage.

"This is an election year and anything that would seemingly stimulate the economy and create jobs is going to be a real political football and this has just got caught up in it," Haynie says.

Haynie says he is now working with the ARRL's Washington staff to arrange a personal meeting with President Bush to lay out the issue for him. And Haynie says he's hopeful that if Bush sees the damaging effect BPL has on radio spectrum - occupied not by just amateur radio - but police, fire, and government services - he may reconsider.

Haynie says he'll also go in with the findings of the National Telecommunications and Information Agency - the president's own advisory arm on radio frequency spectrum management - to make his case.

"When you get into the actual and engineering report, there's some good stuff there," Haynie says. "And I'm glad to see it. I'm also glad to see that they corroborated a lot of stuff that we said in our data.

"And, it gives us more credibility because NTIA has quoted ARRL in there a number of times in this report. But some of their measurements were even more - for lack of a better word - devastating to the industry than ours. They're talking as much as 200 meters. That's a long way!"
Haynie says BPL threatens the future of amateur radio as we know it and it's time to step up and be counted:

"I've been a ham for 32 years, 33 years or something like that and this is the worst, most difficult situation I've ever seen amateur radio in," Haynie says. "And I think whether you're interested in licensing restructuring or you're interested in somebody not identifying every 10 minutes on 75 meters or whatever the case, that all pales. It is insignificant to this particular issue.

"So we need to set all these differences aside in the amateur radio community and come together. This is the time."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

Since before the first test installations went into operation, the ARRL has been warning the public about the potential for massive radio disruption to vital radio communications that BPL has the potential to cause.  More information is on line daily at the ARRL website at http://www.arrl.org (ARNewsline(tm))

**

THE BPL FIGHT:  NTIA RELEASES ITS BPL IMPACT REPORT

The National Telecommunications and Information Administration has issued its long-awaited report on the interference potential of Broadband over Power Lines. Despite a generally-glowing news release, the report itself identifies significant interference risks from BPL and concludes that the methods currently used for measuring BPL noise levels are inadequate and that more study is needed on such areas as ionospheric propagation of BPL signals.

The full report may be downloaded, either in full or chapter by chapter,from the NTIA website at http://www.ntia.doc.gov/new.html  (CQ)

**

POWER PROBLEMS:  INVESTIGATION INTO BLACKOUT FAULTS ENERGY COMPANIES

Power companies may be interested in reeping huge profits by selling high speed Internet access using BPL technology, but a report says that they disregarded voluntary rules that were intended to ensure the flow of electricity.  This is what opened the way for last summer's blackout in eight states and Canada, the report says.

The investigators who prepared the report say that there was a clear understanding long before the blackout last August that the Ohio region was highly vulnerable to power distribution grid instability.  Ohio is where the problem began.

The report continues that had the situation been properly addressed, the cascading blackout that sped across states from Michigan to New York and into Canada probably would have been averted.  In fact, investigators said that something as simple as shutting off 200 megawatts of power an hour prior to the blackout might have kept the problem from spreading.

This is the final report by investigators who looked into the cause of last summers electrical breakdown.  They are urging Congress to impliment strict government standards to ward off future outages.  (Published reports)

THE BPL FIGHT:  NC POWER COMPANY MAKE INTERFERENCE CLAIMS

Meantime, a North Carolina power company says that the interference coming from its BPL system is not harmful to ham radio operations.  As reported last week, Progress Energy claims it has solved almost all of the problems to the Amateur  bands created by its test installation near the city of Raleigh.  But local hams have a different view.  Newsline's Gary Pearce, KN4AQ, takes an in-depth look at the claims being made by Progress Energy and what the ham radio community has to say:

--

The FCC has received its first reply from a BPL system operator to a complaint about BPL interference.  Progress Energy, which operates three BPL trials near Raleigh, North Carolina, says that they are in full compliance with Part 15.  Their letter attempts to set a mark for "harmful interference" to home stations, and makes a claim that BPL doesn't cause harmful interference to mobiles because they drive by so quickly.

When the Progress Energy trial began in January, Amperion, the equipment vendor, set the hardware up with signals on the overhead lines that covered the 10 and 12 meter ham bands, and most of the spectrum in between.  The signals appear as a series of carriers, 1.1 kHz apart, covering 6 MHz of spectrum for each 2000 feet of power line.

Hams complained to the FCC, and Amperion moved the spectrum used. They attempted to operate in spectrum between the 20 and 15-meter bands, with a notch blocking BPL signals across the 17-meter band. They missed the mark a little, with BPL signals starting at 14.3 MHz, 50 kHz inside the 20-meter band. And while the notch at 17 meters did reduce the signal strength, the BPL carriers were still audible, and might be heard by home stations for a block or two, if there were any hams living in the trial area_ but there are no hams living there.

In addition, the BPL signals don't end with a "brick wall" filter at the edge of their spectrum block. They trail off slowly. And those "fringe" signals were still falling inside several ham bands, again expected to be audible to a ham within a block or two of the power line.

After giving Amperion time to correct the apparent errors, hams complained again to the FCC. The result was a meeting between Raleigh hams and a Progress Energy engineer in the trial area on April 6th to review the complaint and the spectrum used. Bill Godwin, the Progress Energy engineer, had arranged to be able to talk to an Amperion technician to make adjustments to the spectrum used in real time - but, the technician was a no-show on the telephone.

On April 13th, hams checked the spectrum used again, and still no changes had been made.

On April 20th, Len Anthony, Regulatory Affairs attorney for Progress Energy, sent e-mail to the James Burtle, Chief of the FCC's Experimental Licensing Division, claiming that after moving the BPL signals off the ham bands, their system "is not causing any harmful interference and is in full compliance with the FCC's Part 15 rules."

Referring to the April 6th observation with Bill Godwin, Anthony says, "These tests revealed a small level of interference at the fringes of certain frequencies. Since that time, further modifications have been made to address this fringe interference. It is Progress Energy's position and interpretation of the FCC's rules with regard to `harmful interference' that any interference that may still exist is not `harmful' as that term is defined by the FCC's rules. This level of interference does not seriously degrade ham radio operation or transmissions or cause repeated interruptions. Importantly" he continues, "since Progress Energy can make modifications to completely eliminate any interference with fixed ham operators, the only impact of any kind upon ham operations is upon mobile operators."

As for mobiles, Anthony continues, "Given that any interference experienced by a mobile operator only occurs within close proximity to the BPL facilities, such interference would be very short lived. Thus, Progress Energy is not causing any harmful interference and is in full compliance with the FCC's Part 15 rules."

An observation of the trial area on April 21st, the day after the e-mail was sent to the FCC, revealed that there had been no changes to the spectrum used.  The overhead line was still emitting a full-strength signal on the top 50 kHz of the 20 meter band; signals were still audible in the notch at 17 meters, and the "fringe" carriers were still encroaching on the bottom 50 kHz or so of the 15 meter band.

This is the first claim by a BPL operator that weak BPL signals do not create "harmful" interference by the FCC's definition, interference that "seriously degrades, obstructs or repeatedly interrupts a radiocommunication service."  Ham operators, of course, routinely tune through quiet spectrum looking for weak signals, and a series of carriers one kHz apart covering the band might be considered to seriously degrade, obstruct or repeatedly interrupt that activity.

And a mobile driving 35 miles per hour along a BPL-carrying power line can be in the interference zone for a minute or more - and much longer in stop-and-go traffic, waiting at signal lights, or stopping in a driveway or parking lot.

Frank Lynch W4FAL, an ARRL Technical Specialist for North Carolina who has been concentrating on the Progress Energy BPL trial, says that he will be filing another complaint with the FCC, responding to the Progress Energy e-mail.  He also says that hams are not opposed to BPL per se, just the interference it causes.  And he notes that it should be easy to clear up interference in a small trial area.  It's BPL signals buzzing around every power line in town that have him worried.

Reporting for Newsline, this is Gary Pearce KN4AQ in Raleigh, North Carolina.

--

Once the new interference complaint is filed it will be up to the FCC to investigate it and to take whatever action it deems necessary. (ARNewsline(tm), KN4AQ)

**

RADIO LAW:  PETITION TO PROHIBIT BUSINESS COMMUNICATIONS ON FRS FAILS

A Petition for Rulemaking to prohibit daily business communications in the Family Radio Service has been dismissed by the Commission.  Amateur RadioNewsline's Bruce Tennant, K6PZW, has more:

--

On August 22, 2002, the Industrial Telecommunciatons Association, Inc. -- or ITA --  filed a petition for rulemaking requesting that the Commission amend Section 95.401(b) of the Commission's Rules.  This,  to prohibit daily business communications on the Family Radio Service frequencies.

In making its case for the prohibition the ITA said that it was concerned about the unlicensed mix of business and personal users.  The ITA said that traditional businesses were using FRS units for daily business needs and thereby limiting the ability of others to engage in the personal communications that the Commission envisioned for FRS.

One of those challenging the ITA petition was the Personal Radio Steering Group.  This is an advocacy group for General Mobile Radio Service users who share part of the spectrum with the Family Radio Service.  According to the  PRSG filing, the FCC specifically indicated in the Regulatory Flexibility Analysis for creating the Family Radio Service that small businesses may use the FRS to conduct their affairs.  Also, while FRS congestion does exist in and near sports and recreational facilities, theme parks and shopping malls, little of this congestion is attributable to recurrent business or commercial communications.

Based on this and other information provided by the public, the FCC has concluded that day to day business communications is a valid use of the Family Radio Service.  That this was intended in the Report and Order creating the service and that there is little merit to the Industrial Telecommunications Association rules change request.

Reporting for the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, in Los Angeles.

--

In other words, it is okay to continue to use FRS channels for routine business as well as personal communications needs. The full story is on-line at   http://hraunfoss.fcc.gov/edocs_public/attachmatch/DA-04-1035A1.doc  (CGC, FCC)

**

ENFORCEMENT:  OFFERING NON CERTIFIED CB'S FOR SALE BRINGS CITATION

The FCC has gone after yet another purveyor of non certified CB radio gear capable of operating in the ham radio bands.  The agency's Daryl Duckworth, NN0W, explains:

--

Duckworth:    "The FCC's Altanta Office has issued a citation to Jim Norton, the owner of CB Sales and Service in Anniston, Alabama for the sale of non certified CB equipment.  Noted in the citation were six different models of non certified exquoipent, five of which had been modified to transmit on Amateur frequencies."

--

The FCC alleges that an investigation by its Atlanta Office revealed that on March 11, 2004, Norton offered for sale at his retail store up to eight models of non-certified Citizens Band transceivers all bearing the Galaxy trade name. According to Commission's records, none of these devices have received an FCC equipment authorization which is required for Citizens Band transmitters marketed in the United States. CB Sales was charged with violation of Section 302(b) of the Communications Act, and Section 2.803(a)(1) of the F-C-C's Rules. (FCC, RAIN)

BREAK 2

This is ham radio news for today's radio amateur. From Auckland, New Zealand and the United States of America, we are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RESCUE RADIO: CA HAMS SUPPOERT MS WALK

Members of the Huntington Beach California Radio Amateur Civil Emergency Service supported the early morning 2004 MS Walk event on Sunday April 18th. The Huntington Beach volunteer radio operators were on hand at each rest stop along the five and 10 kilometer courses, to provide communications and assist state beach rangers and event management in case an emergency occurred.

There were over 1200 walkers on the beach path taking part in the fund raisuing event. Peter Shores, AD6TN, brought his communications van that is fully equipped with communications gear and emergency supplies. It served as a mobile command post. Another volunteer patrolled the entire course on bicycle.

The communications effort continued until about noon. There were no incidents or injuries reported during the event. (KH6WZ)

**

HAMVENTION NEWS : DARA RETURNS TO THE DAYTON HAMVENTION NAME

When thousands of hams return to Dayton, Ohio for Hamvention 2004, they will find that the "Dayton" has returned to the Hamvention. This, with word that the Dayton Amateur Radio Association which sponsors the yearly event has again remamed the gathering the Dayton Hamvention.

According to General Chairman Gary Des Combes, N8EMO, the change is in keeping with the Hamvention's 'going back to the future' theme. It also goes along with the pledge made to return Hamvention to its roots as the biggest and friendliest hometown hamfest, found anyplace in the world.

Des Combes says that for more than half a century the event has been known to the world, and to the world of Amateur Radio as the Dayton Hamvention. He says that Hamvention's ties are to the entire Dayton metropolitan area, to its economy and to the ham radio community of the region.

The 33rd annual Dayton Hamvention opens on Friday, May 14th and runs until Sunday 16th. During those three days the event is expected to draw about 25,000 people from around the world and bring millions of dollars of sales and business to the Dayton area. (Dayton Hamvention)

**

## HAMVENTION NEWS: THE HAM RADIO TOWN MEETING

And since we are talking the Dayton Hamvention, let me take a moment to invite you to join our producer Bill Pasternak, WA6ITF, and an all-star group of guests as we take a trip through time to look at the "traditions" that have made Amateur Radio the great hobby and service that it is today. This, as we at Amateur Rasdio Newsline present the 6th annual Dayton Hamvention "Ham Radio Town Meeting."

This years topic is "IT'S MORE THAN RADIOS -- Keeping The Traditions of Amateur Radio Alive." Bill will be your host and moderator. Joining him will be a whose who group including our leynote speaker Bob Heil, K9EID, of Heil Sound Ltd. Other presenters include Radio School's Gordon West WB6NOA, Worldradio Magazine Editor Nancy Kott WZ8C, Producer/Director Dave Bell W6AQ, Philadelphia newsman Mark Abramowicz, NT3V, to name only a few. Also, if time permits, we will present a screening of the 1990 Icom produced motion picture titled "More Than Radios." This is the story of an "old time ham" who rather reluctantly becomes the Amateur Radio "Elmer" for a teenager thrust into his life on summer.

The festivities begin at 1 P.M. EDT on Saturday, May 15th in Hara Arena Meeting Room 3 and as usual we will have lots of door prizes. If you have the time, we promise you a most entertaining and illuminating two hours reliving the traditions of the hobby and learning that being a ham truly is a lot more than radios. (ARNewsline(tm))

**

## HAM RADIO IN SPACE: CREW CHANGE ON THE ISS

For a time last week there were five astro-hams on board the International Space Station. This as Expedition 9 crew members Mike Fincke, KE5AIT, and Gennady Padalka, RN3DT, arrived at the space outpost on April 21st The trip was made to the Iss using a Russian built Soyuz launcher.

Making the voyage with them was European Space Agency explorer Andr, Kuipers, PI9ISS. The three joined Expedition 8 crew members Mike Foale, KB5UAC, and Sasha Kaleri, U8MIR, who along with Kuipers are on their way back to Earth as this newscast goes to air.

Kuipers may have only spent a bit more than a week on-orbit, but he wasted little time in getting on-the-air. PE1SCW in Deventer in the Netherlands reported hearing PI9ISS in QSO with PI9ESA at 7:50 hours UTC on Saturday May 24th. Bas says that Kuipers signal was very strong signal that was reading 40 db over S-9. A few minutes later Kuipers was in range of Francisco Costa, CT1EAT, in Beja, Portugal. He said that he heard PI9ISS in a scheduled ARISS QSO also at well over S-9.

During their six-month stay on the ISS, Russian Cosmonaut Padalka will serve as the ISS Commander while Fincke will be the science officer and flight engineer. Both are expected on the air before they return home in late October. (ARISS, VHF Reflector, published news reports)

**

## HAM RADIO IN SPACE: K6DUE ISS OPERATING EVENT CERTIFICATES

Certificates for those who took part in the K6DUE International Space Station Commemorative Operating Event held earlier this year have been distributed to the international delegates at the ARISS Meeting in the Netherlands on March 26th and 27th. Those picking them up were to forward the certificates to their national Q-S-L distributors who would then distribute them locally.

ARISS International Chairman Frank Bauer, KA3HDO, says that approximately 130 hams will be receiving certificates. The event was held to honor the memory of the late Roy Neal, K6DUE who founded both the SAREX and ARISS programs. Neal, who also served as the Vice President of Amateur Radio Newsline and as a frequent news anchor passed away last August due to complications following heart valve replacement surgery. (ARISS, AMSAT BB)

**

## WORLDBEAT: NEW ZEALAND TO ARGENTINA COMMEMORATIVE

ZL1AWW is working on plans for a commemorative station to celebrate the 80 th anniversary of the first New Zealand to South America two way contact. This, by Ivan O'Meara Z2AC and Carlos Braggio, RCB8.

The proposed date is May 22nd or 23rd. This original 10,300 kilometer Morse code conversation took place in 1924 and established a world distance record for two-way radio for that era. (GB2RS)

**

## DX

In D-X, word that the Rodrigues Island 3B9C operation finally went QRT on Monday, April 12th. In their time on the air, the operators racked up a very impressive 153,000 QSO's. QSL this one as you were directed on the air. (OPDX)

**

## THAT FINAL ITEM: THE NAB 2004 HAM RADIO RECEPTION

And finally, as most of you know, it was Heil Sound Limited hosted the National Association of Broadcasters ham radio reception on Wednesday night April 21st. It was literally a star studded event. Newsline's Bill Pasternak, WA6ITF, and his tape recorder were there:

--

When Bob Heil, K9EID, and his wife Sarah throw a party, everyone with a ham radio license shows up. And thats exactly the way it was on Wednesday, April 21st when Heil Sound Limited hosted the annual National Association of Broadcasters Ham Radio Reception at the Hilton Hotel in Las Vegas, Nevada. There was food music and lots of prizes. Some were even personalized:

--

Bob Heil Audio: Hear it at www.arnewsline.org

--

That was Bob Heil presenting only one of over a hundred prizes given out over the three hours of the gathering. We finally were able to corner Bob Heil and we asked him how this all came about:

--

Bob Heil Audio: Hear it at www.arnewsline.org

--

Somewhere between 800 to 900 radio amateurs attending the National Association of Broadcasters Convention literally had a hamfest of their own thanks to Bob and Sarah Heil. Thats up by an estimated 40% over past years. Sarah Heil says that for her husband, putting this reception together was a labor of love:

--

Sarah Heil Audio: Hear it at www.arnewsline.org

--

The 2004 NAB Ham Radio Reception sems to have set several records. More important -- a good time was had by all.

Reporting from near the Convention Center in Las Vegas, I'm Bill Pasternak, WA6ITF, for the Amateur Radio Newsline.

--

For those not aware, the annual Natrional Association of Broadcasters

Convention in Las Vegas is the largest gathering of broadcasting and teleproduction professionals in the world. (ARNewsline (tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Meachen, ZL2BHF, in Auckland, New Zealand saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Here's a piece of minutia.

Yesterday, we were approached about leasing a subcarrier on a translator we own and operate.

Question...

Is it legal for a commercial translator to sell it's subcarriers for revenue?   I don't see this addressed directly in the rules? Any thoughts?

Thanks

For sale:

(The "Radio Crazy" it is baaaaakkkkk!!!)

Partial interest in AM/FM station in small Virginia college town. This is a joint venture and there is an element of risk. You heard it first here, kiddies!

Active or inactive "marks" (whoops, I mean investors)with $20,000 or more each are welcome. No individual can hold more than 49 percent. This goes for me!

I am a semi-retired broadcast engineer living in Macon, GA. If you lived in Macon, you'd want to move to Virginia too! (Sarcastic evil leer!)

If anyone in the USA is looking for a car radio with AM stereo, check
local wrecdking yards for the AM-FM cassette radios from
Dodge-Chrysler-Plymoth vehicles in the 1985-1988 time frame.

I had an 88 Dodge Daytona that did AM stereo.

Don't know if any newer makes/models do AM stereo or not.

We use two sets of these and no longer seem to have the manuals. Does anyone know the DTMF codes to set these puppies up to be used remotely? In particular we'd like to be able to operate the repeater relay.

Thanks

Bill Doerner

Absolutely.

The only restriction on subcarriers is injection levels, crosstalk to the main carrier and other technical considerations.

It used to be that the main carrier must be programmed when a subcarrier was in operation, but I think the FCC eliminated that requirement about 10 years or so ago. I don't think (but check with a good broadcast attorney) that there's even decency regulations imposed on subcarrier operations, since it won't be available to the general public.

```
For those stations who wouwld want to do a good thing, one might even
consider giving a non-profit entity, like a local blind association, access
to a subcarrier for a reading service and the like, and thus the in-kind
contribution might be a no-cost writeoff of several thousand dollars a year
(but again, talk with a good tax attorney). --

Former international police officer and international talk show host, Kevin Smith, takes on the issue the recent reports of Iraqi prisoners being tortured by members of the U.S. military.  Seventeen service members have been suspended as a result of photos showing them torturing and humiliating Iraqi prisoners--photos that have hit the media in the Arab world.

"I do not know a single police officer in America who would condone that kind of behavior", says Kevin.  "If they had done this in America, they would be in jail right now."

This is not a little thing.  These guys are ciminals and should be punished immediately and severely asserts Smith.  But he doesn't stop there.  He goes on to take the Islamic world to task for their silence and inaction against their own terrorists.

As usual, Kevin Smith presents a sizzling hot, philosophically astute show in this special production being broadcast May 1 and May 2 at http://kevinsmithshow.com.

How you doing.

It's Phil in London, England.

I'm saving up for the next attack on the US radio market.

I have 15 FM systems to supply to Liberia (free flack jacket and AK47 given out at airport arrivals) if you've never heard of this African country.

Also hoping to clinch a deal to supply and install a tall AM mast in the Caribbean.

I ain't getting no radio station on credit next time round:-)

It's not a subcarrier issue, it's a translator issue.  Translators are not allowed to originate independant programming; they must directly repeat whatever the main broadcast transmitter is producing.

Does this local origination prohibition apply to subcarrier data as well, or just to the main channel?

>It used to be that the main carrier must be programmed when a subcarrier was

Right.  But the issue is the translator, not whether it's permitted to be broadcast on subcarrier.  The question is can you broadcast it on a translator subcarrier without it being on the subcarrier of the main channel of license.

Does anyone know what the A and the R stand for in A & R Men? My son is doing a research project about the early days of the recording industry and they refer to the early producers as A & R Men. Any help you can provide would be welcome.

Thank you,

Roger

```

So what are you asking? You answered your own question (or what moderator? This is a moderated group?!??).

[ Moderator's note: Yes, that'd be me - Steve Sobol. The original poster did not answer the question. ]

And there still is a role for A&R...it's what I'd consider to be the most exciting job in the recording industry, excepting that I'd have to listen to even more crap than what gets on the air now, just to find next year's breakout act.

```

They license most of the music you hear, so it's a good place to start.

How much money you gots?  You're gonna need it.

Digital Millenium Copyright Act is why Americans aren't broadcasting now.

Hello All,

Attention high power people: just thought I'd mention that
there is a Bird dual Line section with 2pcs. 10 KW HF slugs (2-30 MHz)
on eBay right now. Regards.

As has already been noted, A&R stands for "Artists and Repetoire."

One of the most famous A&R men ever was John Hammond, Jr. He worked for many, many years with Columbia Records and is credited with "discovering" Billie Holiday, Aretha Franklin, Bob Dylan, Bruce Springsteen and Stevie Ray Vaughn. Other famous A&R men include Ahmet Ertegun, Sam Phillips and Mitch Miller:

And more importantly, be excited about all that crap and be able to keep a straight face while talking to some radio programmer about said crap, and how that crap is going to be huge, and the real crap is what the other label is trying to push onto that radio programmer.

It's a soul-less job for which the term "record weasel" is interchangable with A&R Man.

Not quite the same job.  Acknowledging that everyone's ultimately a flack, there's still a useful distinction between the recording industry's executive production managers (A&R men) and its line sales "consultants."

So, question.  In the Simon & Garfunkel song where they say "I've been Lou Adler'ed, Barry Sadler'ed", are they referring to the NYC newscaster or to the A&R guy?

Jerome

I visited ASCAP to give him a feeling for what is required.... Assumed
"experimental"..  No income.  and about 25 streams...

Rate Schedule    A
Sponsor Revenue $ 0

Adjustment to Sponsor Revenue $ 0     <for commissions to ad agencies>
Net Sponsor Revenue $ 0
User Revenue $ 0
Total Site/Service Revenue $ 0
Rate Based on Revenue   .01615
Site/Service Sessions   25
Rate Based on Site/Service Sessions $ .00048
Sessions Based License Fee $ 0.01
Revenue Based License Fee $ 0.00
Minimum License Fee $ 264
License Fee Payable to ASCAP $ 264.00

So that is what you pay each month to service 25 total connections.   Figure it will be about that per month for BMI as well.  Interestingly enough, that is more than a classical station I recorded for paid each month, and they had some serious ratings and profits.  Then again, virtually everything they had on the air was from the1700's and 1800's...

Hello,
I'm thinking of creating an online radio program that would showcase music by independent, self-produced musicians; but I have a couple of legal questions I'd like to ask:

- How to protect myself against the possibility of someone sending me copyrighted music, not belonging to them, but pretending it does? It is obviously impossible to check that such or such song was not actually recorded or written by someone else...

- Is there a standard contract enabling an artist to allow a broadcaster to use their music free of charge (knowing in this case that the artist, through the promotion, is very much the beneficary, and knowing that the program itself is non-profit making)?

thank you

Guillaume.

Err.. Guaranteeing that so that you don't have to pay fees will be an interesting task.  But then that's why Insurance gets sold.  Getting covered for this type of liability might be a problem, of course.  Are you prepared to lose your house and car if someone sues?

>- Is there a standard contract enabling an artist to allow a
>broadcaster to use their music free of charge (knowing in this case
>that the artist, through the promotion, is very much the beneficary,
>and knowing that the program itself is non-profit making)?

If someone lifted someone else's music, a contract with the artist wouldn't protect you.  And how much bandwidth are you preparing to buy?  a T1 will support about 30  50kbps streams. Actually less since there is other overhead involved.  They go for between $500 and $1800 a month, depending on which ISP and phone company you have and how far you are from the CO.  Or you could go for a t3 (about 3 T1s)  for about 90-100 streams that wide. Or if you want something a tad better sounding, cut those figures significantly.

ASCAP and BMI might still come after you looking for infringements.  I cut a CD for a trombone quintet at a college north of Charlotte.  They were going to use the recording as a fund raiser.  It was all Black Spirituals, arranged for that group.  Guess what they found after the fact.  One of the pieces that they thought was public domain wasn't... They ended up paying rights after the fact big time.

Sometime when you're fooling around looking at the copyrights on music, go
look up "Happy Birthday", sung illegally at every kid's birthday party.

"Happy Birthday" is copyrighted by AOL/Time-Warner.  If that isn't
hypocracy, nothing is....(c;

> A&R guy?

I've always assumed it was the A&R guy/record company exec/talent
manager.  Considering that "A Simple Desultory Philippic" is a parody

of Dylan and a poke at the music industry, it would seem that he would be the Lou Adler they're referring to.

A birthday party at a private home is not a "public performance" - and so singing it (or any song) in your living room is NOT a copyright violation. It's "fair use".

             Well actually it's not about "streaming". I used the term
"radio" in a broad sense: the idea is to make MP3 files of the program
available on a website which also houses an internet lit mag. Would
that change anything re: rights and risks?

What happens if we sing it for little Billy at Chuck-E-Cheeze's pizza
parlour and video game ripoff emporium?  That's PUBLIC!  Does Chuck-E-
Cheeze have a license?

If you have Ryan's Steakhouses in your area, note that Ryan's employees
never sing it when they do the birthday greeting to the embarrassed party.
They have their own song....

Larry

True.. all depends on local regulations. Copyright varies to some extent from
country to country, but the EU should be reasonably uniform.

>             Well actually it's not about "streaming". I used the term
>"radio" in a broad sense: the idea is to make MP3 files of the program

No.. In the case of the rules here, a download is a stream.  Requires
significant logging and all that, so that you can pay the "right" amounts..
but never less than the minimum.  <ouch>

>> ASCAP and BMI might still come after you looking for infringements.  I cut a

>Thanks for the info. I'd better think more than twice then.
>Guillaume.

Amen.  That one mistake got patched up rather nicely, but it was a tad
expensive..The recording was for a non-profit group. Had they done it all
before production, it would have been a lot cheaper.  (But  the licensing folk
have a minimum, which is well into the hundreds.) -- There were penalties for
not pre-paying.  Sheesh.

If you cross all your Ts and dot all your I's, you can probably get away with
it.  If the content can be edited before placing on the web site, you can
remove anything that you can't prove  isn't cleared for public performance.

But if it is presented "LIVE" then you are at the mercy of the licensing folk and their ability to find a copyright somewhere that you stepped on.

Over here, the Harry Fox agency is always happy to talk to people that are creating content and making CDs.. (they are the publishing/clearing house for the music..) -- and of course, after it is produced, Ascap and BMI want to sink their teeth into it to "protect" the performer...

Idiots who know nothing about sound or electronics get to run radio stations, no news there.  WKRP wasn't real life exagerated for comic effect, it was real life dialed back to make it believable for the viewing audience who had no idea about what life in real small to medium market stations was like.

Wouldn't switching between program and air just show the difference made by the post-board mix processing chain?  Wouldn't proper head cleaning and alignment make both sound better?

Think back a minute:

Herb Oscar Anderson (HOA) did not scream
Ron Lundy did not scream
Chuck Leonard did not scream
Dan Ingram did not scream
Cousin Brucie--does voice cracking constitute screaming???

Howerver:

SuperMax bellowed
Dick Biondi was frantic
Joey Reynolds was nuts
Gary Stevens pushed
Wolfman Jack howled

I could go on and on...I miss 'em all

Absolutely! But we had bigger fish to fillet... the board, or more
accurately the way the board was configured and used, was a big part of
the problem. This was my introduction to the importance of proper gain
staging!

> Wouldn't proper head cleaning and alignment make both sound better?

That's what I thought... but when all the tape decks and cart machines were set up they really made the rest of the system choke. And of course once you start you're pretty much stuck, so we then tackled the console, and once that was set up the difference between the output of the console and the output from the transmitter was so dramatic...

  So the stuff between the board and the xmtr was making the board
signal worse, but the board signal sucked so bad that the additional
suckage wasn't particularly noticable until you started improving the
source and then any improvements in the board signal just made the
deliterious effects of the processing chain that much more noticable?

One thing I haven't heard mentioned yet is the international treaty whose
name I can't remember that says that a bunch of countries including the US
and several members of the European Union will honor each others' copyrights.

That "noisy whisper"- Glad to see that the station and Mr. Limbaugh
have become a noisy whisper. We need as much fresh and QUIET air as we
can get!

I don't find lying about consumer products and spreading medical mis-information to be "entertaining".

If anyone is so uninformed as to ask, "what lies on the radio are you talking about"- I'll be happy to bring my one hour tape-recording with me and we can play it on your local radio station.

We can start with, "Styrofoam is bio-degradable" and "Secondhand cigarette smoke and dioxin are not health hazards!"

You're probably right.  While several of the song's name references come from outside the music industry, the name immediately preceding Adler's is Phil Spector.

(The news guy was probably better known in NYC.  And, um, for a while some may have believed they were the *same* guy.)

Jerome

Amateur Radio Newsline™ Report 1395  May 7,  2004

Amateur Radio Newsline report number 1395 with a release date of
Friday, May 7, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  The FCC denies a request for more time to
respond on BPL, the NTIA report on BPL explained and ham radio will
honor the military.  Find out the details on Amateur Radio Newsline

report number 1395 coming your way right now.

**

THE BPL FIGHT:  FCC REFUSES TO EXTEND COMMENT CUTOFF ON BPL

The FCC has issued a ruling denying a request from the ARRL to extend the Commentary cutoff date on the introduction of BPL as outlined in ET Docket 04-37.

The ARRL had asked the Commission to extend the deadline for Comments and Reply Comments by 45 days in the Broadband over Power Line Notice of Proposed Rule Making.  The League had argued that this would give it and others the time required for the National Telecommunications and Information Administration to conclude its study at BPL, issue an initial report and give commenters time to evaluate it.

In its April 30th release denying the request the FCC gave no overriding reason for turning it down.  Instead the agency said that the now past May 3rd commentary cutoff date stands.  It added that those wanting to address the issues raised in the NTIA report can do so during the Reply Comment period.  That's open now and ends on June 1st.  (ARNewsline(tm))

**

THE BPL FIGHT: NTIA RELEASES LONG AWAITED REPORT ON BPL

Meantime, as reported last week, the National Telecommunications and Information Administration has issued its long-awaited report on the interference potential of BPL.  Amateur Radio Newsline's Mark Abramwicz, NT3V, is here with an in-depth look at the report and the affect it might of on the introduction of BPL technology:

--

The very title: "NTIA Report Lays Groundwork for Responsible Deployment of Broadband Over Power Lines" doesn't sound encouraging.

But like any package - or the glowing press release that accompanied it - the more than 100-page document contains so much more once you open it.

And, you don't have to go beyond the executive summary that accompanies the report to find the glowing praise by Acting NTIA Administrator Michael Gallagher in the press release is quickly muted. Muted by the facts and some disturbing interference problems the agency's own technical review identified.

CQ Magazine Editor Rich Moseson, W2VU, digested and analyzed the NTIA report and agreed to share his findings with the Amateur Radio Newsline audience.

"It is one of the first really objective looks at the real danger of interference caused by BPL," Moseson says. "As of objective as studies by the ARRL might be, they would be perceived as someone with a certain interest here.

"The NTIA is a federal agency and their engineering study should carry a lot of weight with the FCC."

Moseson says he identified five major conclusions. First, among them, that the methods currently used to measure noise levels and interference potential are not adequate, according to the NTIA. Essentially, he says, there's an underestimation of peak-field strength. And, peak field strength is the leading contributor to high-interference risks.

"As applied in current practice to BPL systems, Part 15 measurement guidelines do not address unique physical and electromagnetic characteristics of BPL-radiated emissions," Moseson says. "That's a quote. That's pretty significant that the Part 15 guidelines do not address the unique physical and electromagnetic characteristics of BPL emissions. So the measurement system being used is not right."

Second, he says the NTIA engineers said noise levels must be measured from power lines carrying BPL as well as the device that couples the signal to the power lines.

"What the NTIA is saying here is that you can be 100 feet down the street from the actual coupling device or up to 300 feet down the street and if the signal bumps into one of these corroded connecters or something, then, it's going to start radiating there," Moseson says. "And you have to measure all along the line as well as at the coupling device."

Third, Moseson says NTIA found interference to weak- or medium-strength signals is likely to affect aircraft operation and the navigational frequencies used by aircraft.

"Interference to aircraft reception of moderate to strong radio signals is likely to occur below 6 kilometers altitude - that's 20,000 feet - within 12 kilometer center of the BPL deployment," says Moseson, quoting from the report. "Interference would likely occur to aircraft reception of weak to moderate signals within 40 miles of the center of the BPL deployment area."

NTIA's fourth major conclusion, according to Moseson, is that results of BPL tests and implementation in other countries has met with mixed results. And, in some cases, it has been shut down entirely. He cites an example:

"During an emergency exercise of the Austrian Red Cross in May 2003, communication was massively disturbed - that's their words - by BPL with interference levels exceeding the limits by a factor of 10,000," Moseson says.

The fifth NTIA conclusion identified by Moseson is the agency's desire to conduct more testing.

"They proposed some more stringent measurement standards and procedures along with some of the interference mitigation techniques that were mentioned in the FCC's Proposed Rulemaking and others that weren't," Moseson says. "But they're saying here that they're not even sure that those are going to work. They want to do more testing on them and report on it later in the year."

The bottom line: Will the FCC's commissioner take seriously the findings and red flags raised by the NTIA report?

"In this case, I'm not really sure because they seem to have made up their minds going into this as to what they were planning to do," Moseson says. "So, I am not as optimistic as I might be in other rulemaking proceedings."

So, how soon could the FCC act? Moseson says he wouldn't even begin to speculate.

"At this point the comment period is closed. Comments closed on May 3," Moseson says. "There's a two-week reply comment period. And, then it's up to the commission of what they're going to do and when they're going to do it.

"There is no requirement that the FCC issue a ruling in a given amount of time after the close of comments on a proceeding. So, they very well could wait until the NTIA issues its second report. And, I'm sure that it would be accepted into the record as coming from another federal agency."

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The full report may be downloaded, either in full or chapter by chapter, from the NTIA website.  Its in cyberspace at www.ntia.doc.gov/new.html  (ARNewsline(tm))

RADIO LAW:  LEGALIZING AMBER ALERTS ON THE HAM BANDS

Hams worried that they might get into trouble if they relay lost child or AMBER alerts on the air may soon have regulatory relief. This as wording in an omnibus 71-page, Notice of Proposed Rulemaking on a variety of ham radio issues issued in mid-April tackles the problem had on.

One of the proposals in the April 15th NPRM proposes to � and we quote:  "clarify that amateur stations may at all times and on all channels … make transmissions … which may be instrumental in saving human life and property."  In other words, if enacted as proposed, retransmitting AMBER Alerts and just about any other type of live saving communications would become legal under Federal law.

The proposal is part of FCC WT Docket 04-140.  The  Comment deadline is June 15th.  (CQ)

RESCUE RADIO:  YOUNG HAM TRIES TO GET AID FOR DROWNING VICTIM

A tragic story from the Great Smoky Mountains National Park near Townsend,  Tennessee.  That's where a youngster on a field trip drowned at Cades Cove while a classmate with a hand held 2 meter transceiver tried to get help to save him.  Bill Pasternak, WA6ITF, reports:

--

It started about an hour after the group arrived at the campsite on Friday, April 30th.  According to news reports, a group of people including the ill fated teen took to the water.  In a short time, the victum, identified only as Chris found himself in trouble.  Others tried to save him while teachers using cell phones tried to call for help.

When it was found that there was no cell phone coverage, another student, Jordan Webb, KI4AVG, said he would try ham radio.  Jordan had brought along his two meter hand held radio. He found a near-by high location and called for help over the Knoxville area WB4GBI repeater.  He was answered by Jim Bond, K6SPY, who notified Park Rangers.  Unfortunately they didn't arrive in time to save the victum, but because KI4AVG had the foresight to bring along his 2 meter talkie, his classmate's body was recovered within hours, instead of days.

For the Amateur Radio Newsline, Bill Pasternak, WA6ITF, reporting.

--

Jordan Webb, KI4AVG is only thirteen year old and attends the Vine Middle School in Knoxville.  He has been a ham for just about a year and serves as net control for the weekly Young Amateur Radio Net on the Radio Amateur Club of Knoxville W4BBB repeater.  (K4PZT, KG4UJC, KG4YTT, WBIR.com)

**

ENFORCEMENT:  NET INTERFERENCE FOUND

Authorities in the United Kingdom were quick to act when a propagation net became the target of a jammer.  We have more in this report:

--

Listeners to the DK0WCY Solar Geomagnetic Information broadcast on 75 meters recently experienced interference from an unmodulated carrier on the channel.  The  interference, which appeared to be deliberate jamming, was reported by the DK0WCY team to the authorities in Germany who founf that the interference was coming from from the United Kingdom.

With support from the Radio Society of Great Britain's Amateur Radio Observation Service and other U-K hams, authorities traced the interference to an amateur station in the Chepstow area. The interference ceased abruptly at 0608UTC on the 25th of March.  No explanation was given but it is assumed that government regulators took the station off the air.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP.

--

No word on who the jammer was or what punitive action will be taken by U-K telecommunications authorities.  (GB2RS)

**

ENFORCEMENT:  YOU BETTER STAY OFF THE RADIO

Back here in the U-S-A, the FCC says that a former ham who has been to jail for operating without a license is back on the air and still has no FCC authorization to be there. Again, the FCC's Daryl Duckworth, NN0W:

--

Duckworth: "Richard A. Burton of Harbor City, California, has been sent a Warning Notice of unlicensed radio operation on 2 meters in the Los Angeles area. Mr. Burton has been convicted in 1984, 1990, 1993 and 2000 of unlicensed radio operation under Section 301 of the Communications Act of 1934, as ammernded, and has served time."

--

According to Duckworth, the Notice sent to Burton states that additional instances will lead to -- and we quote -- to the same result. The FCC has also designated for hearing a second General Mobile Radio Service application that Burton had filed with the agency. (FCC, RAIN)

**

## ENFORCEMENT: CRANK CALL TO CUBA'S CASTRO LEADS TO $4000 FINE

The FCC says that a Florida radio station should be fined $4000. This, for permitting the hosts of the Morning High Jinks show placed a crank-called to Cuban President Fidel Castro and broadcast the recording.

As previously reported, Joe Ferrero and Enrique Santos of WXJD FM used snippets of an earlier prank call involving Venezuelan President Hugo Chavez get past a Castro receptionist and up the chain of command in a five-minute broadcast June 17th of last year. They then fed pleasantries to Castro before breaking in and calling him an assassin.

On April 28th the FCC concluded that the station should be forced to pay a fine for the broadcast. The agency rejected claims that a rule requiring people to be notified before their voices are used on the air does not apply to people in Cuba.

WXJD was given the usual 30 days to pay the fine or to file a further appeal. (Published reports)

**

RADIO RECORDS: XL TO UA ON 137 KHZ

Hams in New Zealand and Asiatic Russia have claimed a new world low-frequency distance record. ZM2E at Quartz Hill near Wellington and UA0LE near Vladivostok say that they completed a two-way contact the night of the 20th of March on 137.70kHz. The path length is estimated to be 10,311 kilometers or 6392 miles. (Q-News, GB2RS)

**

AWARDS: YCCC OFFERS SUBSIDY AWARD PROGRAM

The 400 member Yankee Clipper Contest Club has announced that it's First Annual DXpedition Award Program has been funded for the 2004 through 2005 contesting season. The purpose of the program is to encourage new as well as young amateurs to participate in contesting.

As part of the award program, the Yankee Clipper group will award the winning applicant up to $1,500 to accompany a YCCC authorized Dxpedition and / or Contesting operation any where in the world for up to one week, to operate in one of the four major contests.

This a first time program for the club. The winner will be chosen and announced at the Boxboro Hamfest in August and there are some restrictions on who can apply. More information is on line at www.yccc.org or by e-mail to W1LLU@verizon.net (W1LLU)

**

THE SOCIAL CIRCUIT: MARC HAMFEST AND COMPUTER FAIR

Turning to the ham radio social scene, the Mid-Atlantic Amateur Radio Club will be presenting their annual Valley Forge Hamfest and Computer Fair, Sunday, July 11th. The venue is the Kimberton Pennsylvania Fire Company Fairgrounds on Route 113. Admission is $6.00 for hams. Unlicensed spouse and children of licensed amateur radio operator will be admitted free of charge. For additional hamfest information, please e-mail MARC at Hamfest-info@marc-radio.org.  Information is also available on the club website at www.marc-radio.org.  (Via e-mail)

**

## HAMVENTION 2004:  THE ARRL PUBLIC RELATIONS FORUM

The ARRL sponsored Public Relations Forum at the 2004 Dayton Hamvention will be held at 8:30 A-M on Sunday morning, May 16th.  The venue is Meeting Room 1 at the Hara Arena and those planning it say that this  will be a do not miss event for anyone interested in promoting the hobby.

What will be discussed you ask?  Well the major items include public service, spectrum protection and of coarse Broadbnd Over Powerline internet access.  The session will also explain how to tell the world outside the hobby about Amateur Radio and how to address our concerns to public officials and local media.

Again, that's Sunday, May 16th at 8:30 in the morning for the ARRL Public Relations Fourm at Hamvention 2004.  We will see you there. (Dayton Hamvention(r))

**

## HAMVENTION 2004:  A NICE PLACE TO LAND

And if you are a private pilot planning to fly your own plane to next weeks Dayton Hamvention, the events planners have a tip for you. Consider landing and tie-down at Greene County Airport in the near-by town of Xenia.

That field is located just south of Route 35 approximately 7 miles east of Dayton and is the closest airport to downtown.  Its also among the easiest to get in and out of using small aircraft.  Fuel prices are reportedly some of the lowest in the area, and the facility is well kept and capable of handling quite a bit of traffic.

Green County is just one of many airports catering to pilots of small aircraft in the Dayton area.  More information about it is on-line at www.gwaohio.co.  (Dayton Hamvention(r))

EMERGING TECHNOLOGY:  SPAM LOWERING LEGIT E-MAIL

Meantime, a recent survey finds that Americans are e-mailing less and trusting e-mail less because of the growing flood of junk messages. According to the Pew Internet and American Life Project, 29% of e-mail users have reduced their overall use of the medium while 63% of e-mail users say they are less trusting of e-mail overall because of spam. That's up from 52 percent in June of 2002.  (Technology OnLibe)

**

HAM RADIO IN SPACE:  SCIENTIST TO BE NEXT SPACE TOURIST

The next space tourist plans to spend his time on-orbit studying environmental issues. Gregory Olsen, the founder of Sensors Unlimited Inc. in Princeton, New Jersey says that he plans to bring along infrared sensors, which detect varying levels of heat, to analyze pollution in the Earth's atmosphere and the health of agricultural systems on the ground.

Olsen told a recent news conference that he hopes to inspire young people with his mission, and want to arrange a video teleconference with Trenton High School in New Jersey and a school at the Crow Indian Reservation in Montana.

The 58-year-old Olsen has hired Space Adventures to get him to the I-S-S.  This is the same company that brokered the first space tourist trip of millionaire Dennis Tito's flight aboard a Russian spacecraft in 2001.  Olson's eight-day voyage to Earth orbit is currently scheduled for April of 2005. As with all past space station visitors, Olson is expected to be trained in Amateur Radio and operation of the ham gear aboard the I-S-S as well.  (Published reports)

**

WORLDBEAT:  NEW RADIO RULES IN KENYA

Visiting hams now have a way to get on the air from Kenya. Ted Alleyne, 5Z4NU, the Chairman and Secretary of the Amateur Radio Society of Kenya sdays that that the Communications Commission of Kenya announced on April a new and more relaxed policy towards amateur radio licensing.

Until now it was "practically impossible" for most visitors to obtain an amateur radio license in Kenya. The previous stumbling blocks for reciprocal agreements, Security and Police vetting, have been dropped entirely. However, applicants' countries must have diplomatic relations with Kenya and 5Z4NU says that the ARSK will be happy to supply the new license application forms. (GB2RS)

**

WORLDBEAT - GERMANY: PROPAGATION STUDIES WEBSITE UPDATED

Volker Grassmann, DF5AI, says over the VHF Reflector that he recently updated his "Amateur Radio Propagation Studies" web site. Features now include a countdown for the 2004 sporadic E season, a discussion of thunderstorm effects on the ionosphere, notes on the people behind VHF dxing and much, much more. The page is in cyberspace at www.df5ai.net. Volker says come over and spend some time at the site. (VHF Reflector)

**

DX

In D-X, word that GB5JCT is on the air from the fishing trawler Jacinta moored in Fleetwood dock in the UK. The trawler is now a museum dedicated to the fishing fleet that used to be based at Fleetwood. Over the Easter weekend the station was heard on 40 metros SSB and locally on 2 meter FM. (GB2RS)

Also, G3TMA, G3KHZ and IZ1CRR will activate a couple of Borneo's Islands on the Air during the next couple of weeks. If you work them QSL via G3KHZ. (GB2RS)

Lastly, GW3UOF will be active portable SV8 from Kavos, Corfu, in the Greek Isles through May 17th. Look for him on CW, SSB and various digital modes. QSL as directed on the air. (OPDX)

**

THAT FINAL ITEM:  HONORING THE MILITARY

And finally this week, ham radio will be honoring those serving in the military.  Jim Meachen, ZL2BHF, is here with the details:

--

Amateur Radio Military Appreciation Day will be held world-wide on Saturday, May 29th from approximately 10 a.m. to 7 p.m. Central U-S time.  According to Emery McClendon, KB9IBW, this will be a day-long operation to talk to troops, and associated groups around the globe in appreciation of their service and personal sacrifice.

The main operating location will be from Johnny Appleseed Park and Wizards Memorial Stadium in Ft. Wayne, Indiana, using Emery's KB9IBW call sign.  That station will be on from about 4 p.m. Central Daylight Time through the end of the Wizards game.

Planners say that they know of at least 25 military bases and club stations that will be operating the event.  This includes stations in Iraq, Kuwait, and bases around the globe.  More information on this event is in cyberspace at www.fortwaneradioclub.org

--

Again, the website for more information on Military Appreciation Day is www.fortwaneradioclub.org.  (KB9IBW)

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm).  Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org.  You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

Before we go, this word for listeners who use our 661-296-2407 phone line to get the newscast. That line will be down for about a week or so starting on Friday, May 14th as the phone machine that feeds the newscast undergoes repairs. We should have it back on-line by May 21st if not before. In the meantime, please use any of the other lines you find listed on our website.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Davis, W2JKD, saying 73, see you all at the 2004 Dayton Hamvention and we thank you for listening." Amateur Radio Newsline(tm) is

There are two conventions...one, which the United States is signatory to, is the Geneva Copyright convention, and includes most of the rest of the world. There's another one which I can't quite recall (Pan-American?) and it occasionally happens that a copyright under one is ignored by entities controlled by the other.

UNESO apparently adminstrates the Geneva convention (and why this is a surprise, I can't say) but there's an Acrobat document which goes into some detail....

For sale:

Partial interest in AM/FM station in nice small Virginia college town.

Joint venture. Active or inactive investors desired with at least $20,000 each. No investor (including me)can hold over 49 percent. There is an element of risk and you could lose all or part of your investment (Legal disclaimer).

Full asking price is $400,000. Main building and land is included. Tower land for AM is also included. FM tower site is leased at $400.00/month.

Both stations have a 24 hour license.

I am a semi-retired radio engineer living in Macon, GA.

I am NOT on parole or probation and I do NOT have a one-way ticket to Rio on Brazilian Bandit Airways! LOL!

Tel: (478)741-1710.

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"

True enough, but for years they went by the moniker "15 - WLAC"

About.com needs to do their homework. The hypoblurb states "these stations are carrying the Air America lineup" implying that all shows are being carried. I'm sure WJNO in West Palm hasn't dropped their regular schedule to carry the Air America lineup.

All they're carrying is Randi Rhodes. Randi has been on WJNO for years. Long before Air America was a glimmer in an investor's eye.

People need to understand that very few stations carry a network's complete lineup. They cherry pick the shows they want from a variety of networks or do their own local stuff.

Most of what's on WJNO comes from their own company's network. They're owned by Clear Channel and the network is Premiere, also owned by Clear Channel.

With the loss of Los Angeles and Chicago, I believe the only station carrying the complete lineup is WLIB, New York, for which Air America is paying a fortune. I would bet the Air America show most affiliated is Al Franken who plunged a wooden stake into the network's heart by announcing he's thinking about running for office. If he does, the show goes away.

As director of operations for www.theblastingzone.com
I'd like to welcome CNN and Andy Rooney from the CBS Television Magazine 60 Minutes to those who believe the 2004 run for the White House has become a "HEADACHE ELECTION".

For the first time in history over One Billion Dollars is being spent in a "NO-HOLDS-BARED" slugfest, parceled out in near toxic daily doses, designed to make you "PULL THE LEVER DOWN" !

Come hear the song that started it all, "HEADACHE ELECTION" exclusively at www.theblastingzone.com

For sale:

Partial interest in 5 KW Georgia AM station in small city near Athens, GA. 5 KW days, less than 200 watts nights. Non-directional.

Full asking price is about $500,000. No real estate. Station grossing about 1/4 million a year!

Joint venture: Active or inactive investors with $20,000 each wanted. No person can own more than 49 percent. This goes for me, too!

Tel: (478)741-1710. Macon, GA. Note, station is not in Macon, stupid!

Only those fully identifying themselves will be given
callsign and city of license.

73,

Meyer Gottesman, W6GIV

Actually, to push the discussion a bit further, I'd like your opinions
about the following "Terms of use" of an MP3-hosting website, that
enables artists to post their own music (I've deleted the name of the
company). Beyond the "legalese", does this provide airtight legal
protection in your view? In which case I would use something like this
for my "radio program"...

# X.com Music Terms & Conditions

POSTED AND EFFECTIVE � March 25, 2004

[...]

## Submission Requirements

Submitting materials to the Service does not guarantee that we will include them in our music library or place it on X...com Music. For this reason, it is important that you become familiar with the Submission Requirements that we have developed to assist artists during the submission process.

### Your content

By submitting material to the Service, you represent and warrant that:

* X... Networks, our customers and licensees shall not be required to make any payments with respect to material that you submit to our sites, including, but not limited to, payments to you, third parties, music publishers, mechanical rights agents, performance rights societies, persons who contributed to or appear in your materials, your licensors, unions or guilds;
* You have full right and power to enter into and perform under these Terms, and have secured all third-party consents, licenses and permissions necessary to enter into and perform under these Terms,
* The material that you submit to our sites does not contain "samples" of any third party's sound recording or musical composition and will not infringe on any third party's copyright, patent, trademark, trade secret or other proprietary rights, rights of publicity or privacy or moral rights;
* The material that you submit is not and will not violate any law, statute, ordinance or regulation;
* The material that you submit is not and will not be defamatory, trade libelous, pornographic or obscene, and
* You are at least eighteen years of age. By submitting sound recordings or musical compositions or other audio and/or audio-visual content to us, you grant us, our affiliates, and our business partners a worldwide, royalty-free, nonexclusive license to:
    o publicly perform, publicly display, broadcast, encode, edit, alter, modify, reproduce, transmit, manufacture, distribute and synchronize with visual images your material, in whole or in part, alone or in compilation with content provided by third parties, through any medium now known or hereafter devised for the purpose of demonstrating, promoting or distributing your material, to users seeking to download or otherwise acquire it and/or (ii) storing the work in a remote database accessible by users;
    o Make your material accessible as audio streams,
    o Use any trademarks, service marks or trade names incorporated into your material and use the likeness of any individual

whose performance or image is contained in your material.

[...]
Legal Policies and Notices

You hereby agree to indemnify, defend and hold X... Networks, and all of our officers, directors, owners, agents, information providers, affiliates and licensors (collectively, the "X...Parties") harmless from and against any and all liability, losses, costs and expenses (including attorneys' fees) incurred by any X...Party in connection with any claim arising out of (1) any use or alleged use of your account or password by any person, whether or not authorized by you, (2) any claim arising out of the material that you submit to the Service, including, but not limited to, claims for defamation, violation of rights of publicity and/or privacy, copyright infringement, trademark infringement and any claim or liability relating to the content, quality, or performance of materials that you submit to the Service. We reserve the right, at our own expense, to assume the exclusive defense and control of any matter otherwise subject to indemnification by you, and in such case, you agree to cooperate with our defense of such claim.

The listing, or absence of listing, of any document in the Service's search database does not imply any warranty or guarantee by us, for any companies, products, or services described in such documents. We disclaim any and all responsibility or liability for the accuracy, content, completeness, legality, reliability, or operability or availability of information or material displayed in the Service's search results. We disclaim any responsibility for the deletion, failure to store, mis-delivery, or untimely delivery of any information or material. We disclaim any responsibility for any harm resulting from downloading or accessing any information or material on the World Wide Web or Internet using search results from the Service.

WE DO NOT WARRANT THAT THE SERVICE WILL BE UNINTERRUPTED OR ERROR-FREE. IN ADDITION, WE DO NOT MAKE ANY WARRANTY AS TO THE RESULTS TO BE OBTAINED FROM USE OF THE SERVICE OR THE CONTENT. Hello,

I'm in southwestern Riverside County -- Southern California -- and I get both KIIS-FM (102.7, Top-40, Los Angeles) and KFMB-FM (100.7, Hot-ish AC, San Diego).

I like -- and dislike -- both for various reasons. I can only tolerate
about 50% KIIS's library and can't stand the morning programming, but
its a strong signal and the music that they play & I like, I really
like. I listen to KIIS when traveling to and from my dad's place in
Long Beach.

I like KFMB's morning hosts and about 90% of their library, but
outside of mornings they tend to talk more than I want to listen and
they hang on to tracks way too long before moving new stuff into the
rotation. Signal strength is slightly above so-so where I live, but I
listen to them on my way in to school (30 miles closer to San Diego) 5
days a week and strength improves dramatically on my way in [In fact
they're the only English-speaking non-country radio station I can
[usually] hold on to for almost 100% of my commute due to the terain.

My question, though, is this: While flipping between KFMB and KIIS
I've noticed on several occassions that the actual transmission from
KIIS sounds much clearer, livelier, richer... just plain better; KFMB
on the other hand and in comparison sounds... well, hold music was one
of my first thoughts. It's muddy, lacks real rande definition and
clarity and sounds like someone has their compressor wrenched up to 12
on a 1-10 scale.

As far as I know, both are using digital playback systems (as are most
stations, right) but I don't know about the rest of the air chain for
either of the stations. I personally -- with virtually no exp. with
"real" radio -- would venture to guess based on the quality that KIIS
is sending a digital feed to their transmitter vs. KFMB using
[several?] analog link[s] in their STL.

For my own curiosity what is really the likely cause of this vast
difference in quality?

Lincoln
Sophomore, Computer Science, CSU San Marcos

[BTW - If anyone has any tips to score a tour of either of these
stations (or any stations in the LA or San Diego area from an
engineering/behind-the-scenes perspective, I would be VERY interested]

Different processing chains. Both stations are most likely compressed to
the hilt. One station is clearly better at it than the other, though.

>[BTW - If anyone has any tips to score a tour of either of these
>stations (or any stations in the LA or San Diego area from an
>engineering/behind-the-scenes perspective, I would be VERY interested]

Call up the station, ask to talk to the engineer, and ask for a tour.
They'll probably be quite delighted to do it, if they actually have a
staff engineer. It's so hard to get new people interested in the field
these days that interested young people are usually quite welcome.

You might not be allowed to look at the processing rack, though. In
a lot of places there are covers over some of the processing gear so
nobody can steal the processing secrets that make the stations sound
so awful...

Processing can have something to do with it, but another thought is that the KIIS signal is stronger where you're driving and the radio remains in full stereo while the KFMB signal being somewhat weaker is being blended as car radios tend to do.  There's too many variables to tell for sure unless you can talk to the engineers at the stations involved.

I did with the DSP6000 on a TFT STL...make sure the rcvr is wide enough
to handle the B/W....otherwise you have RF level but poor or NO demod on
the DSP boxes....(Moseley's are wider in the IF to allow this)...
(Dave Chance at Moseley put me onto that!)
If you are careful with them, they work ok....just don't run PROCESSED
audio over them :) (light leveling is ok..but put the processor AFTER
the DSP boxes)

clip

Always sort of felt that KIIS was as close to AM sounding as one could
tolerate on FM. Grainy high end, very little dynamic range, muddy
bass.
There are several nice ousnding station on FM in So Cal strating with
KTWV 94.7 and KLON 88.1 (no I am not pushing jazz!!!!!)

[ Moderator's Note: Is 94.7 running "the Wave" format? "Smooth jazz" isn't
real jazz; for that you want to go to what you're calling KLON. Those must
be old calls, because 88.1 is KKJZ at Cal State Long Beach. Now THAT's jazz...
ok, I guess my biases are showing :P ]

They also commented that it was having money trouble.. with late paychecks and the like.. and a business plan that almost guaranteed a failure.

Air America PROGRAMMING of some sort is being carried on approximately 12 stations.  This includes stations like WMNN/Minneapolis, only carrying Al Franken (and destined for Catholic programming later this month or so).  It includes other stations only taking Franken and little else, like KCAA/Loma Linda, CA (San Bernardino)...which also added an hour of Randi Rhodes recently.

WCHL/Chapel Hill, NC carries only Franken and two hours of night show "The Majority Report".

And then there's the silliest claim of an "Air America affiliate" - WJNO/West Palm Beach, FL...a standard Clear Channel news/talker which is only carrying its former local afternoon driver, Ms. Rhodes. Listening to them online, you'll never hear the mention of the words "Air America".  Her show sounds like it did before she went to New York City, and WJNO covers all Air America name mentions with their own local liners.

Anyone in the NYC area that's listened to 1010 WINS news radio could see how a drinking game based on that station might be fun:

2 shots everytime they say "You give us 22 minutes, we'll give you the world"
1 shot when they say "Traffic and weather together on the 10s"
3 shots for every "Breaking news" and its associated background music/effects
1 shot if they say the word "Koszciusko" during a traffic report
2 shots everytime a US Window Factory commercial airs (its VERY annoying)
1 shot for every commercial for a miracle cure for balding heads
1 shot for every time beep
3 shots for the Mayor's weekly speech
4 shots for a live speech from the President
Nighttime bonus: 1 shot every time they mention the GWB "lower level inbound is EZPASS only!"

You could probably get real drunk real quickly with this game. Feel free to post a reply with your additions!!!

Excellent!!   Thanks Gerard.

That's probably the only real purpose in life for that annoying buzzfly of
a radio station. :) :)

I get the Radio World Newsbytes Weekly Digest every week in my inbox, so a couple of weeks ago, I started posting it here on this newsgroup, with the idea that it might contain material that would be of interest to this group.

Now that I have posted it a few times, I've started having second thoughts about its appropriateness for this group. Its first strike is that it is long. Its second strike is that it is of commercial nature.

So I am asking this group to please let me know your thoughts. Do you read it? Do you find it appropriate? Should I continue to forward it to this newsgroup?

I have no stake, financial or otherwise, in Radio World. And it wouldn't hurt my feelings either way.

Thanks!

That needs further qualification. Did they mean 12 stations are carrying all programming from 6am to 11pm ET or that 12 stations are carrying one or more shows. There's a very big difference. I believe the latter is true. If WJNO, West Palm, appears as a fulltime affiliate it's inaccurate. WJNO only carries their long time local personality, Randi Rhodes.

The big problem is that those stations are in small markets and don't provide anywhere near the tonnage a network advertiser requires. The generally accepted requirement for network buys is coverage of 85% of the country.

As it is, spots scheduled to air on WLIB, New York, were, apparrently, run on the network in a show that suggested the President be assassinated. GM, HP and several other advertisers demanded their spots not air on Air America. It's appeared in many trade publications.

As Laura Schlessinger discovered during her gay bashing, major advertisers don't want to be associated with controversy. At ABC we used to distribute a list of shows our advertisers demanded that their spots NOT air within. All dealt with controversy of one kind or another.

If I were you I'd just buy several bottles and drink them. WINS, on a cume basis, is probably the most listened to station in the country. That slogan has been used almost since day one.

WINS is a "just the facts, ma'am" radio station. Those slogans are recognizable positioning statements that everyone in New York recognizes.

If you want radio news in New York you probably go to WINS out of sheer habit. They only break format for wall-to-wall coverage of major events, never for sports or infomercials. They're New York's crisis station. They have the radio news franchise wrapped up tight and WCBS is a distant second in news.

If I owned it I could deal with that.

Air America sounds like an extension of the DLC (i.e. barely middle of the road). We are not supposed to be aware of anything about Kerry except that he isn't Bush. I didn't hear anything about his "not a redistributionist" statement made to the rich. I also don't expect anyone like Biafra to get any reception, except maybe a hostile one.

> On that, we can agree fully.

Thanks all for the comments.
I just wanted info on the Texar not to start a war :o)

In my opinion, the urge to process sound makes sense.

Increasing the average audio level (but keeping the maximum constant)
will increase signal to noise ratio, and the perceived loudness,
whether it's for recording, AM or FM transmitting.

As allways there are 2 sides to a coin, in this case the drawback is
listening fattigue due to decreased dynamics and increased distorsion.

In short we make sure we use our recources fully.
Some don't settle for less then maximum all the time, while others
realise that there is a backside to it, and makes a more balanced
setting.

But as the technology matures, most of the gains are allready made and
further advances takes huge efforts and gives only small advances.

At this moment, all cind of metaphysical terms and decription starts
to florish, and I stop listening and turns my attension elsewhere.

I've never used, or tried to use a Texar. My conclusions about Texars
are based on the results obtained by others in this market.

> All I was saying is that it wasn't the device.  So it must be you.

I had nothing to do with it. But I'm not willing to believe that a dozen
engineers in the SFBA are incompetent. You can make that assertion if
you like, but I'd like to see you back it up. More than a dozen stations
tried Texar; every one yanked them off.

> But I have no need for self-promotion.  I don't so this anymore, because

> money in it, nor creativity, nor sole.

Only if you are mediocre and uninspired. I'm making a fine living in
broadcast engineering, and I'm enjoying the challenges. Don't blame an
entire industry for your own inadequacies.

> And one of the reasons why is
> because, as was

I know that as well. However, I have managed to influence the stations
under my charge to adopt reasonable approaches to their audio processing.

I guess it is all a matter of individual ability and fortitude. Sorry
you couldn't cut it.

>the old WABC trademark reverb-on-screaming-boss-jock sound...<

Sheesh.  Talk about mixing metaphors.

None of the WABC jocks screamed, nor were they known as "boss jocks."  I don't know what station you thought you were listening to, but it wasn't WABC.

For competitive reasons, broadcast audio processing has become an art. If I had my druthers, processing would be absolutely minimal. That aside, I also concede that there are techniques to keep the signal away from the noise floor that do not seriously mangle the music in the process and can actually give the appearance of dynamic range.

In most major markets, there is at least one station that has figured this out. What you can hear are "soft" passages that are actually louder on the dial than other stations' din of squash, and then when the music swells, it seems to get even louder! The effect is an illusion of dynamics while maintaining an ear-grabbing, highly competitive sound.

> As allways there are 2 sides to a coin, in this case the drawback is
> listening fattigue due to decreased dynamics and increased distorsion.

Indeed. Fortunately, DSP has managed to neatly package sophisticated techniques that could only be obtained in the past with considerable experimentation using combinations of devices. The Texar/Optimod combo was an attempt to pre-package such a technique, but unfortunately the Texar was ill-conceived. Its audio bands were in the wrong places. Its time constants produced more artifacts and fatigue than competitive sound. And, of course, it still relied on the Optimod for modulation control.

> In short we make sure we use our recources fully.
> Some don't settle for less then maximum all the time, while others
> realise that there is a backside to it, and makes a more balanced
> setting.

As Arlo Gutherie might say, "You can have anything you want..." in a suitable digital processor. In that situation, everything is on the table, and can be handled with a minimum of audible distortion. (But always keep in mind that audio processing, by definition, IS distortion.) With a Texar, you get hardwired, ill-conceived constants.

> But as the technology matures, most of the gains are allready made and

First and foremost, you need to have an ear for work. It is, after all, all about listening.

Hi John,

This is an interesting thread, as another former broadcast engineer I thought I'd toss in two cents worth...

John Higdon wrote:

In the Philadelphia area we had a number of stations adopt the Texar, and before that the Optimod, and before that the DAP, and before that, well, that was before my time<G>!

In every case there were stations who could make any of the devices sound like their trademark fingerprint, usually excessively loud, and there were stations that made them sound pretty darned decent.

When the Optimod came out the station I worked for was told by our consultants (UGH) to switch from the DAP to the Optimod, and the owner agreed. The other engineers and I were, needless to say, a little miffed, and we didn't spend a lot of time learning how to use the Optimod, and it sounded, predictably, pretty darned bad.

Then the college station where I worked got an Optimod, and for whatever reason, I spent about a month playing with it before I put it on the air. This was before the internet, but I called Orban, and Mr. Orban himself spent quite a bit of time walking me through his design objectives, and a whole lotta other info. (Thanks Mr. Orban!!!).

At that point I invited my fellow engineers at the commercial station to have some fun playing, and we ended up with a pretty decent compromise between the owner and PD request to be the loudest station on earth and our own desire to sound good.

Then along came the composite clipper, and this time we spent some time learning about it before we used it, and while it was audible, we did manage to avoid over-using it.

At which point I left commercial radio...

Still, I have no doubt that one could use the Texar, or any other processor and get really bad results, or really good results. I've heard, but have no direct knowledge, that part of the problem was the people selling the Texar... their focus was on really really loud, to the point where good wasn't an objective.

> Only if you are mediocre and uninspired. I'm making a fine living in broadcast engineering, and I'm enjoying the challenges. Don't blame an entire industry for your own inadequacies.

I think that is great... I enjoyed working as a broadcast engineer, so much so that I acted as technical advisior at the college station until this past Decemeber. But after a point the local market really closed down... most stations cut their engineering budgets, and as they got bought one poor engineer ended up taking care of multiple stations... until there simply wasn't much of a market.

> I know that as well. However, I have managed to influence the stations under my charge to adopt reasonable approaches to their audio processing.

The ultimate challenge!! Congrats on having the chops, both technically and politcally, to maintain some semblence of influence. It isn't easy!

My other recollection from my commercial radio days was rebuilding the production suite. I was just out of school, and really wanted to make an impression... I gave it everything I had, and through some great coaching and a little luck the new production room sounded so good that it made the air chain sound terrible. The owner and PD were furious, to the point where they were convinced that something I had done in the production room had broken the air chain<G>!

If that wasn't bad enough, I then tackled the air chain, and, as I'm sure you've already guessed, everything I fixed made the rest of the stuff sound worse. Sadly, I started at the sources, tape decks and cart machines, so the difference was really obvious when the air staff would switch the monitors from air to program.

I was fired... but the other engineers explained the situation to the owners (I think because they didn't want to spend their evenings, nights, and weekends finishing the task at hand), and I was re-hired, and eventually finished the job, to everyones satisfaction.

I learned a lot of lessons from that adventure... and they still serve me today!!!!!

Ah the life<G>...

Bill

The honeymoon is rocky with the loss of Los Angeles. What you need to understand is that Air America isn't old enough to have a honeymoon and hasn't enough stations to make any impact beyond press release puffery.

As with any Talk network or station, the growth is slow. Air America isn't "saving" anything. It's pleasing you. Period. With fewer than 20 marginal stations carrying perhaps one show (Franken, most likely) it's got a very long road ahead. I wish them luck. I want to see them succeed but they appear to be their own worst enemy. It's been my experience that a company that solves its problems with on air dirty laundry and litigation scares off potential affiliates.

I created the WOR Radio Network about 12 years ago. It took about 6 years to get to the 400 station count and we never paid a penny buying time anywhere. Advertisers generally don't buy networks until they have about 85% national coverage.

Despite what the press releases say, there isn't an industry clamoring for Liberal programming. It's looking for programming that's entertaining and gets ratings. We'll see in about 5 Arbitron surveys whether or not there's an audience clamoring for it. The only station (if they change the call and branding, IMHO) that has a chance for numbers is New York. Even then the WLIB signal is nowhere near comparable to WABC or WOR in the survey areas.

Since Franken is the poster boy and extremely talented, any significant dent in Rush Limbaugh's WABC numbers after those 5 surveys will show there's a market, though even Rush hasn't had the wild success in New York that he's experienced elsewhere.

Rush is handicapped by his loss of passion after all these years. If he escapes becoming a guest of John Ashcroft for drug abuse it'll be a fairly level playing field over the next year in New York.

>NYC and WBAP in Dallas that are *owned* by Disney/ABC obviously have
>different contracts for radio news than say, a Cox or Clear
>Channel-owned station in Atlanta or Chicago.)

If you're a highly rated station in a major market, they may pay you.

They'll compensate you for the spots they require you to run. A network spot brings a fraction of what a locally sold spot brings. In one case you have to be very careful. If you don't meet a required clearance precentage, you get no compensation at all.

In major markets every contract is different because of the compensation terms. At WOR we were an ABC Entertainment affiliate but didn't run the hourly newscasts. We had our own news department, but used their actualities and wall-to-wall coverage when necessary. We ran all their spots. Evenings and overnight we ran Mutual hourlys.

When I was at ABC we watched stations very carefully to make sure they weren't running the network spots in low rated time periods. If we found you were running our spots overnight your risked losing your affiliation.

In other markets it's generally barter. You run a certain number of spots per week for use of the programming.

>2) How long do these contracts last with Westwood One or Disney/ABC?

Every contract varies.

>For example, the Seattle market has two major commercial talk
>stations: KVI and KTTH. KVI acquires their news from Fox News Radio
>and caters to a politically conservative audience.

Surely you're joking. We all know that FOX is "fair and balanced" so it's a cruel accusation to say they're conservative. Roger Ailes will sue you or get very upset.

>The PD for KTTH has publicly stated that they will use
>"ABC News for the foreseeable future" but didn't give any indication
>as to the length of their contract with Disney/ABC.

What's his alternative? There can't be two "fair and balanced" stations in the same market. He'll have to figure a way to take FOX away from KVI.

>3) What are the limitations of re-broadcasting those syndicated news
>briefs by radio stations with Internet streaming audio? For example,
>can an Infinity-owned radio station with a "click here to listen live"
>graphic on their website legally stream the CNN Radio at the top of
>every hour or are they blocked the same way that AFTRA rules block the
>rebroadcast of Howard Stern over the Internet?

It all depends on the policies of the network and the stations. Until recently, Infinity didn't allow any streaming. ABC used to prohibit any streaming of its newscasts. There were many cases where broadcast.com had to black out shows because of network restrictions on webcasting.

A correction here: AFTRA doesn't prohibit anything. Advertising

agencies found that AFTRA wanted their members to be paid for
webcasting if their spots ran in any media other than what they
contracted for. It was the Ad agencies that told stations to remove
their spots from their webcasts. This is the same situation that would
occur if a talent did a TV spot and the advertiser used the audio on
radio. It would cost more. Agencies didn't want to pay for webcasting
where the audience didn't warrant the extra cost.

>the old WABC trademark reverb-on-screaming-boss-jock sound...<

Sheesh.  Talk about mixing metaphors.

None of the WABC jocks screamed, nor were they known as "boss jocks."  I don't
know what station you thought you were listening to, but it wasn't WABC.

In article <c61f0l$nbm$1@xuxa.iecc.com>,
Bill Thompson <bill@audioenterprise.com> wrote:

> When the Optimod came out the station I worked for was told by our consultants (UGH) to switch from the DAP to the Optimod, and the owner agreed. The other engineers and I were, needless to say, a little miffed, and we didn't spend a lot of time learning how to use the Optimod, and it sounded, predictably, pretty darned bad.

I assume you are talking about the Optimod 8000. There is an interesting history behind the 8000, which as crude as it is now by today's standards, was revolutionary in its day. When Bob brought his Moduline box prototype of the 8000 by my station and we put it on the air in 1974 (the first time an Optimod 8000 ever saw the light of day on the air, by the way), I was blown away. I had never before seen (or heard) any processor that had such tight modulation control on ALL program material, while sounding relatively open with remarkably natural-sounding high frequencies.

> Then the college station where I worked got an Optimod, and for whatever

> reason, I spent about a month playing with it before I put it on the
> air. This was before the internet, but I called Orban, and Mr. Orban
> himself spent quite a bit of time walking me through his design
> objectives, and a whole lotta other info. (Thanks Mr. Orban!!!).

The 8000 was designed solely and exclusively by Bob himself. It was not
a collaboration with anyone. It was created as the result of badgering
by some of his friends who happened to be broadcast engineers who
insisted that he apply his considerable design skills to solve the
problem of modulation control on FM. Bob personally walked you through
it because, frankly, he was the only one who knew how it worked at what
became Orban Associates.

> Then along came the composite clipper, and this time we spent some time
> learning about it before we used it, and while it was audible, we did
> manage to avoid over-using it.

I experimented with composite clipping just before the 8000 came to
pass. I (and others) insisted to Bob that there had to be a better way.
But that was well before it was perverted into a processing technique. I
simply used it to shave off the overshoots caused by passing square
waves into low-pass filters for modulation control, not to smash the
audio into it to make it louder.

Back in the dark ages when I was CE at WMNF in Tampa, we had a minimalist approach to processing brought on by a tiny budget.. We had a gates peak limiter at the transmitter, and nothing else..

The station was the cleanest on the air in Tampa.. Mono, but clean.

The problem that made it sound junky at times: Phone lines. I fought with GTE (genital telephone and electronics, so called because when you asked for a "class A line", you had to hunt for hours before you could find someone that knew what it meant. One guy in Tampa, who was usually not at his desk..)

The line to the transmitter in Riverview went past tons of tv transmitters, and the end result was an ugly mishmash of horizontal sync audible in the audio when the weather was right.. A little moisture, and all heck would break lose.. There were times I threatened to drive it with a 100 watt amplifier to get their attention. Didn't happen, however...

They finally got a new studio location. GTE hit them for $10k to change the line from the original old house they were renting to the new location. Then they got a microwave, and got the sound cured once and for all. As far as I know, they are still paying $200 a month for the land line to the transmitter, since it had a 20 year contract.

sheesh.

Since then they've gotten an old Optimod, and are treating it gently, resulting in decent sound on the air.. at least it was last time I was down there.

Since I don't work in radio professionally and I'm just learning about this business, I'd like to get this correct by repeating what I've just learned in this forum using the simplest terms:

1. Major market radio stations that are *NOT* owned by a network but are affiliates don't have to pay for ABC Radio News, any of the Westwood One news offerings (CBS to CNN), Salem Radio News, or any other top of the hour news content providers.

2. Smaller markets do not pay for the news either, but rather "barter" for the content by broadcasting the news content from a provider a certain number of times during a specified weekly schedule.

If these two statements are basically accurate, I would like to know how news content providers make money. It almost sounds like radio stations don't pay for these news briefs at all (almost like a public service).

My expectation was that a radio station would have contracts to pay ABC News a fee (that was determined by number of listeners, demographics, etc.) for broadcasting their news briefs. It sounds like it's much more complex than that and I'd like to understand why.

> >2) How long do these contracts last with Westwood One or Disney/ABC?

>
> Rich

I don't care about the politics; I want to understand the business thinking in the radio industry:

--Two big radio stations in a top market are vying for a similar audience.
--Each station wants to differentiate itself by offering their large target audience content it wants.
--One station is losing business because it's audience does not derive value from "Content X" while the other station with "Content A" is gaining business.
--The station with "Content X" wouldn't win over listeners with "Content Y," "Content Z," or any of the similar offerings.
--Nothing can be gained by having two stations in one market with "Content A" but why wouldn't the losing station switch from "Content X" to "Content B" (especially since "Content B" isn't the same as "Content A" but more closely tracks with what their audience values)?

If a radio station received constant complaints about the network content and it was driving listeners to another station, why would the station want to keep its affiliation with a content provider that everyone hates? Some would say the network pays them too much to *not* change but wouldn't it hurt the station's bottom line to stay affliated with a network everyone in town despised?

Thanks for all the information - it's been very helpful.

For sale:

Partial ownership of AM/FM in nice Virginia college town. Joint venture.

The "Radio Crazy" is baaaaaakkkk!!! Hi!

Active or inactive investors with at least $20,000 each are welcome. No individual may own more than 49 percent. This rule applies to me too!

Email or tel: (478)741-1710. I live in Macon, GA and am a semi-retired broadcast engineer. Last job in radio was Chief Engineer for 5 KW fulltime AM in New York City. Not too shabby! Hi!

References:

a-(My parole office) Mr. Larson E. Rapp, c/o Zing Zing prison, Ossingstink, New York 12345. Tel: 1-800-IMA THUG

b-(Trade reference)Brazilian Bandit Airways, Oshkosh, WI. Purchased a one-way ticket to Rio paying all cash with small unmarked bills.

Only those fully identifying themselves will be given call letters and city of license.

73,

Meyer Gottesman, W6GIV
aka "Radio Crazy"
aka Moron Gottesman
aka Maven Gottesman.

Hi, Guys

I want to know what is the best stereo seperation a commercial receiver can get for stereo AM signal? Could you recommend a receiver to me. The same question to the transmitter. What is the best stereo AM generator that can generates a good stereo seperation.

Thanks

Rich, (and all)...

I would like to ask another question, along these same lines....

What are the limits/penalities, for a radio station that records and re-airs a radio network newscast hours...in some instances even *days* later? I actually know of a station that does this, much to the chagrine of anyone who respects professional broadcasting practices, responsibility and journalism.

Not only that, the networks pay the stations to run network commercials.

>

The "barter" is that they get the news content free in return for broadcasting the commercials, for which advertisers have paid the network.

>

With the exception of the AP Radio Network, which carries no commercials, the networks are paid by advertisers, just like stations are.  APRN is alone among nets in being a cash-for-content deal, although even they are now stepping into the barter business, as fewer and fewer stations are willing to pay cash.

No, ABC charges its advertisers, based on the audience(s) that the affiliate stations deliver for the commercials.

The concept is not complicated.  Networks are an efficient way for advertisers to get national coverage without having to contract individually with hundreds of stations.  The programming content supplied by the network (which may be entertainment programming or news) is provided in return for the stations airing the commercials. Larger stations get paid some money as well -- but generally far less than they would get for selling the same spot directly to an advertiser. The most extreme example I know of in this regard is my own employer, which was being paid $1 by ABC to run a spot we could charge $50 for locally (this was 20+ years ago). We dropped ABC in favor of APRN because it was cheaper for us to buy news than barter for it, and did not have a commercial network affiliation again until we bought another station and put a 24/7 ABC music format on it. It's a niche format we could never afford to do if we had to staff it ourselves, so this time it makes economic sense.

It's very complex. Barter networks take a number of commercial minutes each week from the station's inventory, collect all the audience figures and sell the results to advertisers. When they keep a handle on where those commercials run, they make a very healthy living.

There's a story that when Grant Tinker came to run NBC he was given a tour and asked his guide how much the stations paid NBC to run their programming. When the respectful laughter died down, Mr. Tinker was told the network paid the stations to run the stuff.

It's known as Comp. (compensation).

Many small market stations can't afford to pay cash for programming, so they give up some of their commercial inventory and run the network's commercials. In Talk Radio that can be as much as 50% of the available inventory in each hour of a show.

There are almost as many configurations as there are stations and it's a nightmare to administrate.

Beyond the awesome stupidity of doing such a thing they run the risk of running an out of date commercial (if they rerun the spots) and causing the advertiser much grief. The advertiser causes the agency grief. The agency caused the network grief and the network causes the station grief. This is all beyond the fact that the news is out of date. Any time you rerun a newscast you run the risk of passing on dangerous misinformation in addition to the dangerous misinformation that might have been in the newscast itself because sources weren't properly checked.

Very few network advertisers run dated spots because stations are allowed to run their weekly quota of spots ROS (Run of Schedule). The places where dated spots would be run are newscasts where the embedded spot must be run as it's fed. That's why rerunning a newscast can be dangerous for a station.

Those who do it simply don't care.

Rich

Stations still broadcasting in AM Stereo in North America seem to be using CRL equipment.
Sony made some good receivers.  I have a Sony am stereo walkman (no

longer amde) a Sony two speaker small transistor radio (no longer
made) and a Sony home am stereo receiver (also no longer made)
The two smaller radios were given out to key staff when the station
for which I was working went Stereo years ago.

Yes...but even so, very few of them screamed, at least on the stations that

Bill Drake consulted personally.  He understood listener fatigue and tune-out quite well.  It was usually the imitators who thought every jock had to scream.

Hi.  We have a stereo (two channel) Marti STL-10 system.

A few weeks ago we started noticing noise, and we traced it to the STL link. One of our two STL transmitters was showing a low +13.5 voltage.  We discovered this voltage was +13.5 when not transmitting and dropped to +9v when transmitting.  We pulled the unit and swapped out the power supply and the symptoms disappeared.

BUT - while that unit was out we ran with our supposed good unit (normal meter readings).  All of a sudden we started hearing significant noise on that channel.

Anyone have experience with noisy Marti units?  Where should I search first? Transmitter or receiver?  Noise sounds like HF clipping - all kind of distorted in the high end, almost like an echo on a long distance line. Unit is using 75usec pre emphasis and driven below 100% modulation.

-Andrew

So, you checked the positive regulator?

What sort of noise?  Crackling?  Hissing?  Humming?

Is there ripple on the power supply output?  If you swapped it with a power supply that has been sitting on the shelf for years, I could see why a cap might fail and produce a lot of hum.

HF clipping doesn't sound like noise.  Are you talking about a noise problem
or a distortion problem?

A line echo does not sound like either noise or distortion.

What is the typical network/affiliate requirement regarding this?
What do networks do to stations who re-air old newscasts?  I can't
imagine they would be very happy about it.  What's the usual contract
regarding this?  Do the biggie networks legally penalize affiliates
who do this?

Thanks,
George

Scott:

Thanks for your help.  The regulator was good.  We swapped it with a brand new one and it did not fix the voltage drop (13.5 down to 9).  Replacing the power supply fixed it.  The power supply that failed was the factory original.  The replacement unit was pulled from our other STL transmitter.

The second unit - the one that exhibits noise has a constant white noise that can be heard during both quiet and loud periods.  It also has a raspy high frequency distortion that you can hear, particularly when someone is talking.

It is not a line echo.  But the sound is similar to a bad long distance connection, where you say something and hear a distorted version summed with it.

-A

Right, but what was wrong with the power supply? Knowing what was wrong with the power supply might tell you a lot about what is going on.

>The second unit - the one that exhibits noise has a constant white noise

If you return the new power supply to the other transmitter, does the problem follow the new supply?

Is the received signal strength on the receiver good? If you listen to the signal with a scanner right in front of the transmitter, do you hear the distortion on that as well?

If you're hearing a higher noise floor AND distortion, that makes me suspect that the signal strength isn't high enough to get full quieting on the receiver.

If you put a wattmeter on the transmitter output, are you seeing good deflection? What if you use a dummy load?

Your first goal is to isolate the problem and make sure it really is the transmitter and not the receiver. Your next goal is to make sure you are getting full power output from the transmitter. If so, it's probably a modulation issue.

>It is not a line echo. But the sound is similar to a bad long distance

Does it sound like fringe FM reception?

Most networks only care that their commercials be run as contracted.
The other terms of the contracts generally deal with where the
material can be used.

They want to know if you're simulcasting so they can claim the
additional audience. They want to be sure the material isn't
duplicated in the market. Other than running an out of date
commercial, the network is unlikely to penalize anyone unless it
causes them to appear to be out of date. Stations that rerun newscasts
are, generally, not worth bothering with.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EDT - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

Aside from being listened to for any historical value, be it a major story, down to, "Hey, I used to work with that guy!", there is no value of re

running a newscast, especially given how many 'networks' run 5 minute
newscasts.

Then again, you might be listening to the AP all news network, which when we
ran it,
often used the same copy from a story in consecutive hours.

Some big news for all you fans of "Dude" by Beenie Man and Ms. Thing: The song has officially claimed the #1 position on the NYC Reggae Singles Chart for all songs entering the chart in 2003.  It was believed that "Pon De River Pon De Bank" would have been the #1 song of 2003 until "Dude" started getting mainstream airplay and rode the NYC Chart for 36 + weeks.  According to the chart, it is officially the 5th hottest selling single since 1990.  I would like to say a BIG UP and Thank You to both TK Smith and Clinton Lindsay for their continued work with the chart!!  Also, big ups to Richie Spice, keep it up bwoy!

Thanks to everyone for the continued support!  ReggaeJams Radio is currently #47 on the list of over 400 + reggae stations at live365.  Remember you can tune in from anywhere 24/7 (links are located below).

DISCLAIMER - This is not an "I like or hate Rush" post. It's just one of those little bits of broadcasting trivia (or would it be minutia) that I'd like to resolve, so I can get some sleep at night.

During a recent on-line gathering of kindred spirits, sitting around debating DJs, the following observation came up. Rush Limbaugh has used phrases such as "award winning" and "excellence in broadcasting" that go well back into his Rock and Roll DJ days. On the ReelRadio aircheck site, there is a 1974 tape of him using such lines back the Mid-70s.

In the 1974 KQV Pittsburgh aircheck, "Jeff Christie" actually says, "Some of you are wondering what award I have won, none other than the Marconi Award for Excellence in Broadcasting."

I know he (as "Rush") has several Marconis under his belt as part of his later syndicated talk radio personae. However, according to NAB, the Marconi Award program did not start until 1989. Rush started receiving his in the early 90s.

So, the enigma becomes, how was he able to talk about an award that did not even come into existence for 15 years? Was there another "Marconi" way back when? Did he perhaps invent the award as an "on-air goof" before the NAB even came up with the concept for real?

Any thoughts?

Just one of those little questions that drive radio nuts, even nuttier!

?^) Dave

Go with the flow. Much of what Rush claims is tongue-in-cheek. I can picture Marge and Joe from Dubuque visiting New York looking for the EIB Building. There isn't one. The closest would be 2 Penn Plaza at Madison Square Garden where his show originated in the early days. It also happens to be WABC's address.

The current EIB Building is a tasteful $30 million shack in Palm Beach, FL. If things don't go well with his drug problem, the EIB Building will be run and maintained by employees of John Ashcroft or the civil servants of Florida.

Always remember: Talk Radio is entertainment. Period. Truth and accuracy are not requirements. In fact, they often make the shows dull.

Rich

Can someone explain terms like the "air stream" or recommend a good web site for the lay-folk like myself. I am interested in following discussions like this, but I have no technical background in audio.

Thanks...Michael

>AA has probably had the most successful launch in the history of talk
>radio.

Please explain this statement.  Many other shows have debuted on far more stations at their launch in the past few years.  What definition of success are you using to make this statement??

The coverage of this "network" is way overblown by people who desperately hope it will work.  Liberals at the television networks have given this thing tens of millions in free publicity, but the network itself is an utter joke.

Yes, they have XM and Sirius - that's a good start.  Outside of that, they have weak stations in a few markets and they have already lost two affiliates in two big markets due to a contract dispute.

Air America will die when it runs out of money.  If they have to keep paying for stations, that will be sooner rather than later.

Hi Jianhong, I found the cquam documents I have. The first is a Motorola IC advance information on the MC13020P AM stereo decoder chip. the second doc is by Motorola also, Questions and Answers for the consumer.  I don't know if these will help, but to answer your question about separation of the received am stereo signal, the MC13020P chip claims 30 db channel separation, and at 100% modulation, the output distortion is typically 1.0 % THD. Other than that info, the IC spec sheet gives pinout info on the decoder chip, but no info about the transmitter end at all. Unfortunately, I have no info on the Motorola CQUAM stereo exciter.
Hope this helps,
Tom

It's been a long time, but I seem to recall, when I did KDKA's first stereo
audio proof of performance (with Kahn's independent sideband system) that I
got about 36 to 38dB separation....disappointing when compared to FM specs,
but really good enough for automobiles, where most C-Quam radios were,
anyway.

For sale:

(The "Radio Crazy" is baaaaakkkkk!!(

Partial interest in AM/FM radio station located in small Virginia college town.

This is a joint venture. There is an element of risk. Active or inactive investors with at least $20,000 each are welcome. No individual can exceed 49 percent. That means me too!

Total asking price of the station is $400,000. We can probably get an SBA loan.

I am NOT a broker, agent, shill, owner or part owner.

References:

a)Parole officer....Mr. Larson E. Rapp, c/o Zing-Zing prison, Ossingstink, New York 12345.

b)Trade reference.....Brazlian Bandit Airways, Oshkosh airport, Oshkosh, WI. (You who are on the ball will get the connection!) Purchased a one-way ticket to Rio using all cash. Small and unmarked bills only. Don't worry, I don't leave until I get your funds!

The sales includes the main building and the AM tower/ground system, etc. The FM transmitter/tower site is leased at $400.00/month. Both stations enjoy 24 hour licenses with full power at all times. AM is 1 KW and FM is class "A".

So I was told (I never actually visited the TX, where the unit allegedly
resided). Moreover, having heard a LOT of WABC during its glory days, I can
attest that the reverb was used quite sparingly, particularly by comparison
to some other stations of the time.

Do you mean legal penalties?  If you do, the answer is "none."  In  theory,
a station that broadcasts old, old news might run afoul of whatever's left
of the "licensed operate in the public, interest, convenience and necessity"
doctrine.  I dunno:  Is old news better or worse than no news at all?
Remember, radio stations are no longer obligated to broadcast _any_ news.
In the main, I don't think that radio is taken seriously by many as a
serious source for any than weather news.  There are of course some stations
that are major exceptions.  You may care.  I don't.  To each his own.

Cheers.

We've just recently launched our directory of internet radio shows; with "one click to play" stream links and schedule grids for some of the more popular broadcast or internet webcast radio shows.

http://www.radioshowlinks.com/

A Directory of Internet Radio Shows and Stations; Listen Live or On-Demand.  The directory includes Schedules and Stream links for Talk Radio, Current Events, Business, the Arts, and other programming.

For example, many popular NPR and other Public Radio shows are included in the directory, including streams directly from National Public Radio as well as webcasting internet radio stations from the NPR network.
For example, this channel has top National Public Radio shows:
http://www.radioshowlinks.com/display.aspx?id=72783

It's all free; no registration required.  Please check it out and let us know what you think about it and any suggestions you may have for shows, or stations, that we should add to our Internet Radio guide.

Thanks.

John

In South America, there are a lot of broadcasters using the 120 meter
band down in that area.  Stations have a very large coverage area, and
often are the only communication at all, so 120 meter and 60 meter shortwave
broadcast is used for local programming.

>We tolerate the night time extension in coverage given the d layer. As you

The night time extension is the wonderful thing about these bands, of course.

How much power are you licensed for?  Fair Radio Sales right now has a
bunch of wideband broadcast transmitters for reasonable money.  Are there
type acceptance requirements in your country for that band?  If not, you
might consider using higher grade amateur gear.  Even HCJB is running a
little Viking II transmitter on one band, and it gets out nicely and is
apparently reliable.

Wouldn't it be nice if someone did, though?  Combine that with the Fairness Doctrine and hey, you might have radio worth listening to.

>>
WOWO does have an application for 15 kw nights with a 4 tower DA under its new owners which should restore them to the old I-B status.
>>

No.

That 4-tower DA is intended to further restrict WOWO's pattern, not to increase it, so that Salem may go unlimited time at its Atlanta station (although there are other problems besides WOWO which will impact Salem's plans).

I believe Salem is paying for the new DA, which will be expensive.

So, should this 4-tower DA ever be constructed, WOWO may well be above the 10 kW minimum for Class A status, but it wouldn't automatically be a Class A unless and until it could prove it actually had a protected secondary service area, which it won't because of WLIB and Kansas City, and Canada accepted the new pattern.

So far, there has not been a case of a significant change in a Class A pattern which was accepted by Canada, save for WSAI/1530, and in order for WSAI to implement that change, protection had to be added to 1520 (WWKB) and to 1540 (ZNS-1) as well as to its intended purpose ... increasing the radiation over Cincinnati.

Well, add WBBR to that list as well.

Canada has a Class A priority on 1130, but not on 1530 nor on 1190.

Nevertheless, Canada is the rate-limiting function here, because of its many "notified" Class Bs.

With 5 or 6 stations?  That's a success?  And it apparently has been pulled
from Chicago and LA because their check bounced (per news reports this
evening.)

So they are down to 3 or 4 stations.  That's a HUGE success!

OK, so do you intend to broadcast with AM on the above frequency?

Musical format, maybe some non copyrighted stuff so no copyright fees?

Had a colleague succeed attaining a UK T & D (Testing and Development) license for somewhere around your frequency. This was to carry out some antenna development work. Or at least that was his story!

Played I do believe some old jazz from the 50's which was not copyright.

Now a nice Franklin antenna would do you well for some serious ground wave coverage. I wonder how tall that baby would be on 2368KHz.

Now I've talked to Aus from my mobile ham station on numerous occasions on 160m (1.8-2MHz) albeit on SSB.

If your frequency is clear here in the UK there's no reason you could not be received here under favourable conditions early in the morning.

I searched in vain for both the Aus companies!

I'd be interested therefore what equipment you'll use and if it has to meet any type approval spec.

there's just not many manufacturers out there who offer broadcast transmitters that go as low as 2MHz.

Rhode & Schwarz, but don't ask the price.

Contact Brian Blythe in New Zealand:

http://www.blyth.co.nz/index.html

I'm sure you know of his fine medium wave rigs.

I'm his Euro distributor as you'll see.

He may be able to move one of his boxes down there!

I'm afraid it's pretty much impossible for the 'small guy' to get into station ownership here in the UK.

It's for that reason I'm looking to invest in another US 'small-town' AM or AM/FM combo though the fed's allow only a max of 20% station ownership by foreigners.

Hope I'm not boring you to death. We can take this off list if it's
upsetting anyone.

I downloaded OTS Juke so I play radio on my computer, and I've got some WLS jingles intermixed with my music. And since the program has an excellent dynamic processor, I try to create the Big 89 sound as closely as possible. I'm still in the tweaking stage (as I have been for over two years).

I don't stream my "station" or anything, just play it for my sake till my wife makes me turn it down.

Rich,

The so called 'conservatives' (Right Wing) are not going around
claiming to be the "Champions" of 'the poor' and 'minorities'.
They are not mouthing the hollow words 'i feel your pain'.

But the "Air America" crew of White Liberal Elitists are all
about being the Great White Saviors of 'the poor' and 'minorities'
are apparently to be judged as nothing but Limousine Liberals.

TB,

Lets Get Real and Be Honest 'about' "Air America"
- A lot of AIR !
- Very Little of 'real' America [.]

First - Dealing with the Fact that "Air America"
has a White Liberal Elitist FACE [.]
http://www.airamericaradio.com/

Lets Look WHO is On-the-Air:
*  Al Franken & Katherine Lanpher
{White-on-White}
*  Janeane Garofalo and Sam Seder
{White-on-White}
*  Randi Rhodes
{Yes She IS White Too}
*  Lizz Winstead, Chuck D and Rachel Maddow
{White-on-White with Black in the Middle}
*  Mark Riley, Sue Ellicott and Marc Maron
{Black with White-on-White}
*  Marty Kaplan
{Yes He IS White Too}
Laura Flanders
{Yes She IS White Too}

Oh What is Missing Now in the Mix . . .

```
- No Hispanics ?
- No Asians ?
- No Native Americans ?

Second - Reality Sucks !
The True FACE of Air America's "Mighty White" Management Team:
http://www.airamericaradio.com/pub/resAboutUs.htm

*  Evan M. Cohen - Chairman, Air America Radio
*  Rex Sorensen - Vice-Chairman, Air America Radio
*  Mark Walsh - CEO
*  Jon Sinton - President
*  David Goodfriend - Executive Vice President, General Counsel
*  Javier Saade - Executive Vice President
*  Doug Kreeger - Executive V.P., Electronic Media/Development
*  Jacqui Rossinsky - Executive Vice President, Sales
*  Dave Logan - Executive Vice President, Programming and Operations
*  Shelley Lewis - Senior Vice President, News Programming
*  Lizz Winstead - Senior Vice President, Entertainment Programming
*  Carl Ginsburg - Executive Producer

>Hello, simply read their 'original' Application for the Radio Station License.
 The Devil is in the Details ;-}<

Thanks for ignoring what I wrote.  The "original" application is irrelevant,
especially when programming promises were eliminated from license renewals 30
years ago.

Try paying attention next time.

They added 6 more today.  After being on the air all of two weeks.  That's pretty good.

<http://ln-s.net/X3>

>  And it apparently has been pulled
> from Chicago and LA because their check bounced (per news reports this
> evening.)

Bogus news reports.

Air America leased the two months prior to their debut on WNTD in Chicago and KBLA in Los Angeles, and allowed Arthur Liu (owner of the stations) to run filler during those two months.

Liu, in violation of their contract, leased the LA station during those two months to someone else.  It's as if you rented an apartment from someone but couldn't move in for two months, so the landlord rents it to someone else for those two months -- double-dipping.

When Air America discovered this (two days ago) they notified Liu that they wanted to arbitrate this violation per their contract and stopped payment on one check for the LA station per their contract.  Liu, in violation of BOTH contracts, cut them off in both LA and Chicago.

So now AA is taking Liu to court.  Doubtless, they'll have a TRO in hand and be back on the air in Chicago and LA a few days.

You can read AA's own rant on the subject at <http://airamericaradio.com/pub/resNews.htm>, and their stiffer press release at <http://ln-s.net/X4>.

If you have a really twisted sense of entertainment, you can get your jollies off AA's court filing at:
<http://www.thesmokinggun.com/archive/0414043air1.html>.

If AA wasn't proving to be such a success, Liu wouldn't be motivated to shake them down like this.  They could quietly take this opportunity to get out of their contract with Liu;  but they want back on the air, and are going to fight tooth and nail.

```

WKBW / 1510 / Buffalo - Tom Shannon and others. <--- Always 1520, except pre-NARBA when it was 1480. Now WWKB.

WABC / 770 / NYC / Cousin Brucie. <--- Now News-Talk, aping KGO's highly successful format.

WOWO - Ft. Wayne <--- Dead, dead, dead ... but still consuming considerable electrical power.

WLS - Chicago <--- Now News-Talk, aping KGO's highly successful format.

CKLW / 800  / Somewhere in Canada - came on when our local 800 left the air. <--- Windsor, Ontario, but actually intended to serve Detroit.

WWVA / 1170 / Wheeling - had to love those pre-profit Stair preachers. <--- Proposed move to the Cleveland area, with a reduction in night power by about half, and DA-2 instead of DA-N. Will likely require taking 1150 dark to do this.

Wanna go waaaaayyyyy back?

WCKY / Cincinnati One, Ohio .. Wayne Rainey and the Rainey Family. <--- Back at it as WSAI, with "rock 'n' roll's first generation", and sounding very good. Contract religion after 12 am EST weekdays, 11 pm Saturdays and 9 pm Sundays, returning to oldies at 5 am. WCKY call went to co-owned 1360, from which the WSAI call, and apparently the format came. Night pattern changed to favor Cincinnati, the station's present COL, and Covington, KY, the station's original COL (from whence came W-C-KY). Carries lots of ads for businesses and not-for-profits in the Covington area. Also carries U of KY sports. Essentially a "tri-state" focus (Ohio, Kentucky, Indiana), but with little emphasis on Indiana.

I've been in Talk Radio for a long time. Where do you get that it's "the most successful launch in the history of Talk Radio?" If you mean the most hyped, I'll agree.

This is press release puffery. It came out of the box with sloppy production on six marginal signals and is now accused on not paying its bills, so it's lost Los Angeles and Chicago. Read the "Sludge

Report" on their web site at

http://www.airamericaradio.com/pub/resNews.htm

to see how these TV "professionals" bite the hands, arms, legs and other body parts that feed them. I'm sure that Artur Liu is chomping at the bit to put them back on his stations.

Offers like this are made every day. Broadcasting is win-lose
business. If one show comes in another has to go out.

WLIB is a commercial entity. If it's losing money because no one is
listening and they can't sell time, something has to give. Supposing
BET had a radio network and made the same deal? CAA programming would
go, also.

You can't blame Air America for seeing an opportunity and making
something of it.

Rich

I have recently come over a used Optimod 8100 whitch is modified with
the Texar RCF-1 unit.
Anyone have any info on the Texar mod?
Any info would be helpful.

Robert

Truly cool!  Yes, WLS had a sound that was
fatter than my Aunt Mary Kay, with a huge
bottom, to boot!  I've visited the WLSHISTORY
webpage numerous times, and played the jingles
and listened to the airchecks, and, while I
was doing so, I realized that it isn't too
common to relieve *happy* memories, but I did.

When I listen to old airchecks of WLS, I relive
fishing with my late father, shoveling snow for
pocket money in those gloomy winters, going to
movies with my pals, and a couple of awkward
attempts at dating.

I hate to quote Carly Simon, but "these are the
good old days."  Still, listening to airchecks of
WLS from ages past reminds me of how I came to
be who I am now.

I was feeling nostalgic today, so I went to my favorite WLS tribute site.
Most of you have probably been there, but for the newbies, it's a place
where you can spend days just listening to airchecks and browsing playlists
and other memorabilia.

Right now, I'm in the middle of a John Records Landecker aircheck from
13/5/74 and he's playing Tubular Bells (the theme from the Exorcist) and
it's creepy, but in a good way.

Here's the site:

I don't blame 'em, but this thread has gotten long enough where the
original context, which concerned an article linked to by the original
```

poster, has gotten lost. The author of the article (which was admittedly over the top) found some irony in the fact that a network catering to those who are usually obsessed with multiculturism and speech outlets for the "disenfranchised" would themselves "disenfranchise" this type of programming. Another poster (also above) took issue with this characterization, and it seems to me that who did what to whom -is- relevant in that context. I also think it's a reasonable assumption that had WLIB's programming been replaced by, say, Michael Medved or Mike Reagan, we'd be hearing a lot about the loss of CAA's "voice" from those who support Air America.

The most helpful advice I can probably give you is to attempt to return
the unit to stock Orban and throw the Texar away.

The RCF-1 card is needed if you're using the Texar Prism for
pre-processing before the Orban.  I know Mooretronix at 800-300-0733
often carries used Prisms and can probably get you data if you really

need it, and I know that Gentner took over all the Texar stuff and may have docs.

But I agree with Jon.  Unless you're into massively overprocessing your audio, get rid of the RCF-1.

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EDT - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

Here's the results of the most recent DX test that have been received here:

Monday, April 11, 2004 - WNNR-970, Jacksonville, FL tested 12:00-1:00am EDT:

A pretty good number of DXers from all over tried for this test - DX season isn't quite over just yet! The test was heard mainly by those in the Eastern part of the US, as might've been expected for a FL test. Hearing the test were Bob Foxworth in Tampa, FL, Gerry Bishop in Niceville, FL, John Hunter in Rossville, GA, Barry McLarnon in Ottawa, ON, Bruce Collier in York, PA, Russ Edmunds in Blue Bell, PA, and Tom Jasinski in Shorewood, IL. Jim Renfrew in Byron, NY mentioned he heard the test amid some WZAN-ME QRM; Mike Hardester in Jacksonville, NC and Steve Francis in Alcoa, TN both said they heard the test with lots of difficulty or just barely. In Largo, FL, Greg Myers wasn't certain if what he heard was actually the test. Andersson Sigvard in Sweden commented that he thought he didn't hear the test and described what he heard; Ron Gitscher, who hosted the test, read those comments and responded that Andersson might've heard the test, but he'd need to hear a recording of what Andersson heard to be sure!

But there were several DXers that weren't able to hear the test; these included Marc DeLorenzo in South Dennis, Cape Cod, MA, who said he heard lots of WZAN-ME; Doug Smith in Pleasant View (Nashville), TN; Patrick Griffith in Westminster, CO; Kevin Redding in Mesa, AZ; Phil Greenspan in Marshfield, MA; Bill Dvorak in Madison, WI; Adam Myrow in Memphis, TN; Bruce Winkelman in Tulsa, OK; Neil Kazaross DXing from Grafton, WI; David Hochfelder in Highland Park, NJ; Tim Hall in Chula Vista, CA and Frank Aden in Boise, ID. Neil Wolfish was on a DXpedition in Burnt River, ON, and he reported that the only station in the mess he heard on 970 kHz that he could positively identify was WGTK in Louisville, KY - Eric Berger in Detroit, MI also heard just that station, while Shawn Axlerod in Winnipeg, MB reported that he only heard WDAY on 970.

That's all for now...

Lynn.

You people who always slag the Texars....it's pretty obvious that you don't know how to use them.

In the times when I used Texars, in just this sort of configuration, it was little trouble to have the LOUDEST signal on the dial (with no overmod) yet sound so much like the source that it was virtually impossible to differentiate between the source and the air product.  Before the Texar was the big rage it was in the mid 80's, it was virtually a secret weapon in the processor wars that were running in Pittsburgh....although it's worth noting that most of my competition had them, too...they just couldn't make them sound as good.

Computers are pretty worthless tools when one doesn't know how to use them, either.

Understand that networks aren't like they were in the 40 and 50s where stations plugged in and stayed. Today's networks affiliate on a show by show basis. When someone says "they added 6 more today" it most likely means that they picked up one show, probably Franken.

At some point a decision will have to be made about the viability of a fulltime network if the other shows don't add stations, too. Or, they'll do what many are doing and run reruns of the same day's show. The drawback to that is that you can't be topical because the course of the topic may have radically changed by the time the rerun airs.

As it is, stations that are delaying Franken are getting out of date information when he deals with issues that are happening as he's discussing them. Limbaugh, for example, is run live in all time zones. Only a few stations delay the show and they do it by about an hour, not another daypart.

It is easy to make a station loud. The trick is to keep people from tuning out from fatigue. The Texar is the most easily-recognizable bad processing in the industry (second only to the infamous Audimax/Volumax). I don't know anyone who cannot spot one instantly on the air after ten seconds of listening.

I don't call that "transparency".

Yes, I've heard that one before. Unfortunately, the sound of the
stations don't ever seem to back them up.

Is that why stations sounded so bad on the east coast back then? Thanks
for clearing that up.

It's good to see that the unfettered ego is still alive in audio processing. While you're right...the east coast and Pittsburgh, in particular, sounded like crap...still does, for that matter.  But one station did stand out for quality and loudness...mine.  You don't have to believe me, and I have nothing that requires that you do.  But...if you want to believe that your inadequate skills have no relationship to your inability to get an audio processing chain to sound decent and loud with as little discernable tradeoff, it's no skin off my nose.

Just because you can't make them sound good, doesn't make them crap, either. Just admit that you don't know how to make them sound good, since others have no trouble showing that it's not impossible to do.

```

I don't know...seems all the good ones are going. I grew up listening to  Pat, Ben and most of the WCBS AM crew since the days of " Music Til Dawn" way back when. Pat was a great role model for anyone in radio, past and present. May his legacy live on. ( not to mention a fine name! ;) )

My Condolences to Pat's family and to all at WCBS radio.

Pat Alder
WRNN-TV

Retired WCBS anchor Pat Parson dead at 65

NEW BRUNSWICK, N.J. (AP) - Retired WCBS news anchor Pat Parson, whose rich baritone informed and entertained radio audiences in the New York metropolitan area for 20 years, died Thursday at St. Peter's University Hospital. He was 65.

The cause of death was cancer.

The Newark native, whose real name was Pasquale D. Tominaro, joined the all-news station in 1970 and co-hosted the afternoon news until he retired in 1990.

Much of that time, he shared the microphone with Ben Farnsworth, who now co-anchors the morning news on business-talk station WBBR.

"In New York radio, Pat was a legend," Farnsworth said. "He was an extremely talented perfectionist who always wanted to do things to the highest standards."

Parson was " a radio god," to WCBS afternoon anchor Wayne Cabot, who was 15 years old when he wrote Parson for advice on how to get into broadcasting. Cabot still has the letter Parson wrote back and said he followed the pro's suggestions.

"His flair, his debonair style, was like watching a guy in a nightclub act," Cabot said.

In a statement, WCBS Vice President and General Manager Steve Swenson said, "Pat was the consummate professional journalist but also was a great radio communicator. His voice and style were comforting and friendly, yet also authoritative and credible."

Parson graduated in 1960 from Seton Hall University, where he worked at the school's radio station. He was inducted in WSOU-FM's hall of fame in 1992.

He began his career as a newscaster at WNBF in Binghamton, N.Y., and later became news director at WERA in Plainfield.

After retiring from WCBS, Parson built and owned WQNJ-FM in Stafford Township, where he also anchored the morning newscasts until selling the station in 1996.

The Bridgewater and Beach Haven resident moved to Barnegat in 2001.

He volunteered his voice to Recording for the Blind and Dyslexic, served with Big Brothers of Bridgewater and was involved with Literacy Volunteers of Ocean County.

Parson is survived by his wife of 41 years, Dorothy; his daughter, Dana; and her husband.

Visitation is scheduled for Monday at the Cusick Funeral Home in Somverville. A Mass will be celebrated at 10 a.m. Tuesday at Blessed Sacrament Church in Martinsville.

Instead of flowers, memorial donations can be made to the American Cancer Society of Somerset County.

Chris,
That's really nice but unfortunately I cannot click on the boxes to
type in my info to signup. and the first link that you provided is a
direct link to ABCNEWS. I don't think ABCNEWS would like that if they
saw that :)

Sincerely,
Chris Stevens

There are plenty of PDs who don't want transparency, and in fact who
want processing that specifically puts their fingerprint on the sound
and makes it sound different than everything else on the dial.  Not
necessarily better, just different.

I don't get it, but then I think the whole loudness war thing is silly
anyway.

Indeed. I was simply countering the statement by someone that "Texars are loud and yet sound like the original source". The fact is that they definitely do not. Whether or not a PD would find that coloration pleasing or desirable is an issue I'll let others debate.

> I don't get it, but then I think the whole loudness war thing is silly

On that, we can agree fully.

And you don't know me, you don't know what stations I maintain, you don't know my history and involvement with audio processing, FCC rulemaking, or technical innovation. You have never heard or seen my work, unless you have visited the San Francisco area. And even then, you don't know which stations represent my efforts. Yet, you have no problem assessing my skill level when it comes to broadcast audio. You presume much.

> Just because you can't make them sound good, doesn't make them crap, either.
> Just admit that you don't know how to make them sound good, since others

Unlike you, I'm not going to brag about how my stations sound. I don't have an inferiority complex that requires self-promotion, nor do I need to resort to personal attacks to make my points.

I've given you my assessment of Texars. Take it or leave it. Apparently, at least more than a few others agree since you won't find very many on the air at major-market stations.

I'll leave it at that.

Is anybody still using reverb on the microphone channels?

Amateur Radio Newsline� Report 1392 � April 16,  2004

Amateur Radio Newsline report number 1392 with a release date of
Friday, April 16th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T. Iraqi hams put out a plea to keep ham radio
alive in that war torn nation and the ARRL asks the FCC to extend the

filing deadline on B-P-L. Find out the details on Amateur Radio Newsline report number 1392 coming your way right now.

(Billboard Cart Here)

**

A PLEA FROM A WAR ZONE: PLEASE HELP HAM RADIO SURVIVE IN IRAQ

Even as the bloodshed continues, hams in Iraq are asking their counterparts world-wide to keep Amateur Radio alive in the war torn nation. Amateur Radio Newsline's Bruce Tennant, K6PZW has more:

--

A widely publicized e-mail from Laith Adhary, YI1SRA, in Baghdad asks the worlds radio amateurs for support in keeping ham radio a part of a new Iraq. This, as the June 30th date for handover of the government to local authorities approaches.

Adhary is a member of the Iraqi Association for Radio Amateurs and works at the University in Baghdad. He says that it is urgent that Iraq establish a viable ham radio program in the country before the shift of governing takes place. To accomplish this, Laith and Iraqi Association for Radio Amateurs president Diya Sayah, YI1DZ are asking hams around the globe to and their national societies to a letter of support for the future of the hobby in Iraq.

Both men indicate that this is a time sensitive issue and request support right away.

With thanks to Ian Abel, G3ZHI, for passing the information along, I'm Bruce Tennant, K6PZW, reporting for the Amateur Radio Newsline.

--

The best way to make sure your letter of support arrives is to send it by E-mail We have two addresses. Sayah can be reached at yi1dz@hotmail.com and Adhary is at laithtariq@yahoo.com. (G3ZHI)

**

THE BPL WAR:  ARRL ASKS FOR FILING DEADLINE EXTENSION IN BPL NPRM

Back here in the United States, the ARRL has asked the FCC to extend the deadline for comments and reply comments by 45 days in the Broadband over Power Line Notice of Proposed Rule Making.  Thats E-T Docket 04-37.

The ARRL filing says that it anticipates the National Telecommunications and Information Administration report on B-P-L to go public on or around April 16th.  Also, that the current deadline would allow only a couple of weeks at best to evaluate the study's results and incorporate its findings into comments in the proceeding.

Although the FCC does not routinely grant such extensions, the ARRL says that it is important to allow time for the N-T-I-A to conclude its study at B-P-L field trial locations.  Unless the extension is granted, the last day to file comments is May 3rd and reply comments is June 1st.  (ARRL Bulletin)

**

THE BPL FIGHT:  SWL'S VS. BROADBAND OVER POWERLINES

Short-wave listeners can complain to the FCC if a Broadband Over Powerline installation interferes with their reception, but there are some caveats.  Amateur Radio Newsline's Gary Pearce, KN4AQ, has the rest of the story:

--

Progress Energy has made a concerted effort to move BPL signals out of the ham bands in their trial areas near Raleigh, North Carolina. But the systems, which are governed by FCC Part 15 and are prohibited from interfering with licensed services, are still radiating signals across much of the rest of the short-wave spectrum.  That's leading short-wave listeners to ask if they have "standing" to complain to the FCC, since they don't have licenses themselves.

The - General Council Chris Imlay W3KD says they do, if the BPL signals are interfering with international shortwave broadcasts from other countries, but not if they are trying to listen to domestic shortwave broadcasters. Replying to an e-mail inquiry, Imlay adds that "One does not have to be a licensee of a transmitter in order to receive harmful interference."

ARRL Chief Executive Officer David Sumner K1ZZ noted that the US is a member of the International Telecommunications Union, whose Radio Regulations require member nations to protect HF communications from harmful interference.

RR 15.12 reads, "Administrations shall take all practicable and necessary steps to ensure that the operation of electrical apparatus or installations of any kind, including power and telecommunication distribution networks, do not cause harmful interference to a radiocommunication service operating in accordance with the provisions of these Regulations."

Reporting for Newsline, this is Gary Pearce KN4AQ, in Raleigh, North Carolina.

--

The bottom line: If you are trying to listen to Radio Netherlands and a Broadband Over Powerline installation covers the station up -- complain to the FCC. (KN4AQ, ARNewsline(tm))

**

HAM RADIO IN SPACE: EXPEDITION 9 HEADED TO THE ISS

The International Space Station's next set of ham radio residents will arrive this month. Expedition 9 Commander Gennady Padalka and Flight Engineer Mike Fincke are slated to launch to orbit from the Baikonur Cosmodrome in Kazakhstan on April 18. They will arrive at the I-S-S on April 21 to replace Expedition 8 explorers Mike Foale, KB5UAC, and Sasha Kaleri, U8MIR.

Padalka is a space flight veteran having spent 198 days aboard the Russian Mir space station in 1999. On the other hand, Expedition 9 is Fincke's first trip to space. Both are hams. Fincke holds the call sign KE5AIT and Padalka is RN3DT.

European Space Agency Astronaut Andr� Kuipers will also travel to the Station with Fincke and Padalka and return to Earth with Expedition 8 about nine days later.  Padalka and Fincke will then spend about six months on-orbit.  Their tasks include maintaining ISS operations, continuing science operations, conducting two spacewalks and operating the ham radio station as time permits.  Their tour of duty is scheduled to end in late October when the Expedition 10 crew rockets up to replace them.  (ANS, ARISS, MAREX)

## RESCUE RADIO:  PHONE TUNNEL FIRE BRINGS HAM RADIO CALLOUT

Raynet -- the United Kingdom's version of RACES -- was called on as March drew to a close.  This, as fire rips through a tunnel carrying telephone lines across a wide area.  Jeramy Boot, G4NJH, is in Nottingham, with more:

--

Raynet groups in Cheshire, Greater Manchester and Derbyshire were put on standby following a fire in a BT underground tunnel in central Manchester in the early hours of Monday the 29th of March. The fire disrupted more than 130,000 telephone lines in Lancashire, Merseyside, Derbyshire and further afield. Cheshire Police were concerned about the effects on communications, and via the Cheshire Emergency Planning Department requested the availability of Raynet operators to cover the affected area.

The Greater Manchester ambulance service lost landline and radio communications with their vehicles, but were able to use mobile phones as a means of contact. Other difficulties included a loss of 999 calls and disruption to the broadband data network. Large areas of the High Peak area of Derbyshire were without landlines or mobile phones.

Jeramy Boot, G4NJH.

--

The majority of Raynet members were dismissed by the evening of March 29th, but the Cheshire Group and County Controllers were on call through Wednesday afternoon the 31st.  Thats when the emergency call in 999 service was finally restored to the worst-affected area of Cheshire.  (GB2RS)

**

RESCUE RADIO:  TV CHANNEL 16 GOES TO PUBLIC SAFETY AGENCIES IN NYC

On this side of the Atlantic pond the FCC has permanently reallocated 482 to 488 MHz in the New York City metropolitan area to the land-mobile service.  This, for public safety communications.

482 to 488 MHz which is also known as UHF television Channel 16 has been used in New York for that purpose since 1995 when the FCC issued a Conditional Waiver of its rules to permit the initial operation.

The entire story is on-line at
http://hraunfoss.fcc.gov/edocs_public/attachmatch/FCC-04-80A1.doc
(CGC)

**

RADIO RULES:  BY-BY FORMS

And a change of forms at the FCC.  Effective with Monday, May 3, the Wireless Telecommunications Bureau will dismiss any applications filed on an FCC Form 605 issued earlier than December 2003.

Form 605, the Quick-Form Application for Authorization in the Ship, Aircraft, Amateur, Restricted and Commercial Operator, and General Mobile Radio Service, is the hard-copy version of the Amateur Service application. The FCC has been accepting both older and current Form 605 applications that included room for a Taxpayer Identification Number or a Social Security number. The FCC would then issue the applicant an FCC Registration Number or F-R-N without additional paperwork.

All amateur service applicants must have and use an F-R-N when filing an application such as Form 605 with the FCC. The change does not affect applicants filing on-line with the Universal Licensing System. (ARRL Bulletin)

**

ENFORCEMENT: NEVER UNDERESTIMATE THE VALUE OF CB RADIO

Turning to the enforcement arena, never underestimate the value of an 11 meter Class D C-B radio set in catching a bad guy. Even when the alleged perpetrator happens to be the C-B operator at the controls. Bill Pasternak, WA6ITF, has the details:

--

According to the CGC Communicator, complaints about interference from a citizens band radio led police to the home of one Vernando Malone of South Bend, Indiana. When they searched the premises they found more than $20,000 worth of Nextel cellular telephones and another $20,000 in Motorola phones. Also located was a computer that Malone allegedly used to activate the phones

Malone has now been charged with forgery and theft. This, in connection with what police claim was scheme to fraudulently order large numbers of cell phones, activate them with a home computer, and then sell them on the street at discounted prices.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in
Los
Angeles.

NAMES IN THE NEWS:  W4RWG ELECTED PRES OF SERA

On a more positive note, Repeater Journal reports that Roger Gregory, W4WRG, has been elected as the new President of the giant South Eastern Repeater Association for 2004 through 2005.  Gregory replaces Don Williams, W4VT, who has served in the post for the past six years.

The South Eastern Repeater Association -- better known as SERA Incorporated -- is one of the nations largest repeater coordination umbrella organizations providing service to Georgia, Kentucky, Mississippi, the Carolina's, Tennessee, Virginia and West Virginia.
It also publishes the Repeater Journal magazine four times a year. (SERA)

**

CONFERENCE:  THE DCC IN IOWA IN SEPTEMBER

The 2004 joint Tucson Amateur Packet Radio and ARRL Digital Communications Conference will be held September 10th to the 12th. The venue this year is the Airport Holiday Inn in Des Moines, Iowa. More on the conference is on-line at www.tapr.org/dcc/. (TAPR)

**

CELEBRATIONS: OARC AS K4H IN MAY

The Owensboro Amateur Radio Club in Western Kentucky will celebrate its 50th anniversary as an ARRL affiliated club.  This, by  using the special event call sign K4H.  K4H will be valid for all club members to use both mobile and from their home station location from May 15th through the 31st.

By the way.  Only two members of the Owensboro Amateur Radio Club are still is here from its formation. They are Max Douglas, W4VJV and Jim Rush, W4EWL. Both are were instructors at early Amateur Radio classes run by the club. Also, W4EWL has three "QST Cover Plaque" Awards over the years. (Via e-mail)

TECHNOLOGY: KNRC AM IN COLORADO TURNS OFF IBOC

A broadcaster has shut down its A-M stereo system to avoid interfering with listeners of another near-by station. KNRC A-M on 1150 kHz in Littleton, Colorado, turned off the I-B-O-C or High Definition Radio encoding equipment in response to listener complaints of interference to the signal of KJJD, on 1170 kHz in the town of Windsor.

Rodger Tighe writing in the CGC Communicator calls this is a second adjacent channel situation. He reports that part of the decision to silence I-B-O-C was based on the thinking that interference to a small mom & pop station like KJJD was totally unwarranted since consumers have so few H-D radios in their hands at this time.

Tighe is the Chief Engineer of KNRC. He says that the I-B-O-C encoding equipment is still in the racks and the whole issue could be revisited at a later date. (CGC)

## WORLDBEAT - ALBANIA:  FIRST DX COM JUNE 19-20

Turning to news from around the world.  Datline Albania where that nations hams will hold their first DX convention this spring.  The dates are June 19th and 20th in the city of Tirana.

The actual DX convention will begin Saturday afternoon, concluding with a gala dinner and Sunday morning program.   Sightseeing tours of the region will be available on Sunday afternoon.  More information will be posted on line at www.za1a.com in the near future.  (OH2BH)

**

## WORLDBEAT - JORDAN:  UK HAMS PLAN VISIT

Robin Bellerby, GM3ZYE, is in the early stages of planning an amateur radio trip to Jordan.  The excursion will take place either in May or September of 2005 and  will be mainly - but not exclusively - for members of the United Kingdom's Royal Signals, Royal Naval, and Royal Air Force Amateur Radio Societies.  Between 20 and 60 people  are expected to make the trip.  (GB2RS)

**

RADIO RECORDS:  2413 KM on 70 CM

Congratulations to ZL1AOX and VK3EK for extending the Trans Tasman 70cm distance record. On the 3rd January the two made a path of 2,413 Kilometers using SSB.  The previous record was set on January 13, 1998 when  ZL2TPY and VK4ZSH conversed across 2402 kilometers on the 432 MHz band.  (NZART)

**

DX

In D-X, JE3MAS is in Tanzania for one year and will operate as 5H3HK.  QSL as directed on the air.

And the multi-operator T33C DXpedition to Banaba island started on schedule on the 4th of April.  The island counts as OC-018 for the Islands on the Air awards program.  (Various DX sources)

**

THAT FINAL ITEM:  WORLD CLASS T-HUNTING - PART 1

And finally, a question.  Have you tried ham radio's version of fox hunting?  It's not hard and you might win yourself some medals. Newsline's Joe Moell K0OV has the story of the next Amateur Radio direction finding championships:

--

Most hams know that in Amateur Radio, the term "foxhunt" doesn't have anything to do with horses or hound dogs.  Our foxes are radio transmitters and the object of the hunt is to find them with radio direction finding equipment.  But what many hams don't know is that the equipment for hunting radio foxes can be very simple and inexpensive.  For a two-meter foxhunt in the park on foot, you can do very well by augmenting your handi-talkie with a simple yagi antenna made out of a steel measuring tape and some PVC pipe from the hardware store. For closing in, build an offset-type RF attenuator for about 15 dollars worth of small parts. Plans are on the Web, so warm up your soldering iron. Then maybe you could be like Newsline's Young Ham of the Year Jay Thompson W6JAY, who has won a place on our country's team to the World ARDF Championships. You don't have to be a super-athlete, just reasonably fit.

To see the USA's best on-foot foxhunters in action, to learn from them, and to try it for yourself, make plans to come to southern California this June. The Fourth USA ARDF Championships get under way on June 16th, with practice sessions, a big two-meter hunt, and another hunt on 80 meters. Come out the weekend before, and you can take part in an optional intensive training camp. It's all being put on by the Santa Barbara Amateur Radio Club and it's open to anyone at any foxhunting skill level, with or without a ham license. If you're a senior, don't worry about trying to compete with W6JAY. Equal medals will be awarded in five separate age category for OM's from under 18 to over 60. There are four similar age categories for the YLs.

For everything you need to know about the Championships, including schedules, registration forms and equipment ideas, point your Web browser to www.homingin.com. That's HomingIn, as one word, homingin.com. I hope to see you there. Next week, I'll tell you about a way to get the foxhunting fun going in your own home town.
>From southern California, this is Joe Moell Kay-Zero-Oscar-Victor for Amateur Radio Newsline.

--

More with Joe in Next Weeks Amateur Radio Newsline report.

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline @arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That's in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I'm Jim Damron, N8TMW, and I'm Randy Damron, N8XEA, saying 73 and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

There are a few oldies stations that do, because they're trying to
recreate the sound of the big Top 40 stations of the 60's and 70's.

>> Just because you can't make them sound good, doesn't make them crap,

With reference to the actual subject of this thread someone can correct me hear but I do believe there were mod's available also for the Texar's themselves.

I have a pair of Prisms here and also one of their AM Prisms which I've yet to hook-up to a transmitter.

Aside from the above and possibly a subject for another thread (as this one's getting somewhat frosty) I would be very interested in what processing chains people are using on both AM an FM stations.

I'm sure most of you have seen the processor chain photo's on Gary Blau's site:

http://www.w3am.com/audiocha.html

On my very first visits to your country in the early 80's I accidentally tuned into KHJ/KRTH when they were using the latter call letters on AM 930 and their audio on AM literally 'blew me away'.

 From what I've heard their audio quality was not typical.

I made no presumptions on your skills...you did.  You stated that Texars were, basically, crap, due to the fact that you couldn't make them do what you wanted. Then you blamed the device, figuring that it couldn't be you.

All I was saying is that it wasn't the device.  So it must be you.   And (to the other correspondent, Mr de Cadernet) yes, RKO stations always did sound great. Much of what I know I learned from RKO people.

But I have no need for self-promotion.  I don't so this anymore, because there's no money in it, nor creativity, nor sole.  And one of the reasons why is because, as was noted elsewhere, PDs think that their "signature sound" is actually what the audience wants.  I know better.  And I quit.

Hey, we got a station here where the airchain produces so much audible distortion on voices that the announcer mike goes through seperate and less aggressive processing (including some bizarre EQ but no reverb) and is injected into the airchain after most of the conventional processing chain.  THAT is sick.

Compression and EQ, certainly, but I'm referring to the old WABC trademark
reverb-on-screaming-boss-jock sound...

Super Babe!

4/18/2004

Air-America will fail like the Beatles did.

Quote: Guitars? Nobody wants to hear guitars anymore! Unquote, some record executive in 1962. When the legendary rock band first started out in the 60's, critics predicted they would fail. I think the critics were wrong. For 2 decades now, right wing talk radio was an autarchy. Joe Pine was doing this type of shit way back in the 60's. The appeal of this type of format was the sadistic rhetoric that was spewed by the talk jock. Homeless people were ridiculed as stinky bums. Feminists were portrayed as bull dykes. Environmentalists were made out to be these tree- hugging nuts. Gays were child molesters. College professors were Soviet Communists, ad-nauseam! It started out as a mean-spirted novelty ended up being a well-coordinated propaganda machine that was financed by rich WASP Republicans. You ever notice that all right wing talk jocks say the same thing? They may have different styles, but they sing the same lyrics as composed by Karl Roves writers. Some claim they are independent or just partisans: DOG SHIT!!! So AM radio became a Conservative Pravda. All designed to make you a submissive American. Because Neo-Cons knows what's best for you and never question it you Anti-American scumbag!

About a year ago, there were rumors of a Liberal radio network. All the right wing talk jocks were like biblical characters trying to prevent the birth of Jesus. Abort all pregnant mothers babies. One of the tactics of the right is to spout out presumptive facts. For example: Americans don't care about, "Weapons of mass destruction" anymore. Unless they are the census department, they don't really know how the totality of the USA thinks. Same thing goes for Liberal radio. They claimed the public would not listen to voices on the left. Here comes "Air-America" debuting on March 31 2004. Since they had only 6 stations in the country, the public went to their web site and streamed their broadcast. They broke an all time record on the net for streaming. I don't see that happening for clowns like Hugh Hewitt. Who? So the right wing critics are now saying that the Air-America network won't last another 18 months. Now it's 18 months! Last week they predicted 2 weeks! What are they worried about anyway? Ah�the truth?

The lineup is pretty cool. Al Franken, Chuck D, Janeane Garofalo, and Randi Rhodes! I'm hoping they give Jello Biafra a spot. The criticism that Liberals are punctilious and full of bonhomie sugar couldn't be farther from the truth. True, you got your NPR newscasts and Noam Chomsky, who could put a cokehead to sleep. That's because intelligence was never meant to be entertaining. Think William F Buckley. ZZZZZZZZ. Here comes Randi Rhodes! Ululating the crust off any reactionary shit-head. She's a firebrand that one. And sexy too! If you think she's boring, you are either in a coma or dead. Air-America is in the honeymoon stage. That's all I listen to now. It's so refreshing to hear voices of reason instead of bellowing white men or sarcastic bimbos on the right. So, it is only reasonable to say, Air-America is saving talk radio!

How much do commercial radio stations pay for their "top of the hour" news from Westwood One or ABC News and how long do those contracts typically last?

What I can't find out (and I *know* someone in this group will know for certain):

1) How much would a talk radio station not owned by Infinity or Disney/ABC in a Top 10 market pay for a contract with Disney to broadcast ABC News at the top of the hour? How much would that station pay Westwood One for CBS News briefs? (I know stations like WABC in NYC and WBAP in Dallas that are *owned* by Disney/ABC obviously have different contracts for radio news than say, a Cox or Clear Channel-owned station in Atlanta or Chicago.)

2) How long do these contracts last with Westwood One or Disney/ABC? For example, the Seattle market has two major commercial talk

stations: KVI and KTTH. KVI acquires their news from Fox News Radio and caters to a politically conservative audience. KTTH also caters to that audience, but has ABC News at the top of the hour and is finding that even their P1s will switch to KVI for 3min at the top of every hour because they perceive ABC News as being more left of center politically. The PD for KTTH has publicly stated that they will use "ABC News for the foreseeable future" but didn't give any indication as to the length of their contract with Disney/ABC.

3) What are the limitations of re-broadcasting those syndicated news briefs by radio stations with Internet streaming audio? For example, can an Infinity-owned radio station with a "click here to listen live" graphic on their website legally stream the CNN Radio at the top of every hour or are they blocked the same way that AFTRA rules block the rebroadcast of Howard Stern over the Internet?

Thanks for the info,

Scott

I doubt if you could get a new shunt excited tower licensed today.

However, in the mid-1960s Broadcast Engineering had an article (or was it articles) on shunt excited towers.

Hello Peter,

>Does anyone know where there is a good site on the web for info on Shunt fed
>towers and the like?

I'm sure you'll find something in the archives at the BE site:

http://www.broadcast.net/

Use the drop-down menu.

Also consider joining one of their mailing lists. Full of experienced
engineers who I'm sure can point you to other published work.

Who is Station X AM?

What is the problem that would prevent licensing today?

Thanks heaps guys,

I'm in the land down under. We have here a licensing category where they issue the top end of the broadcast band between1611 to 1701 for what is called Narrowband Area Services. This in Australia is outside the "official" broadcasting bands. Also we are on 9khz steps here. All this is inline with the ITU rules. So it leaves the gap where you finsh at 1710.

I'm not sure of the exact politics but here we follow the same specs as Europe under the conventions of the ITU. We also have TWO regulators here one for RADIO Emmisions (two ways / CB etc etc etc). The other one "regulates" everything termed "broadcasting". This is the Australian Broadcasting Authority the other is Australian Communications Authority.

As one can see one needs to operate within the other for issueing of TV AM/FM radio licenses. When you ask for a freq NOT within the Broadcasting

Bands the fun starts! SW here is not concidered viable but the ACA sees alot of HF Spectrum going to waste so issues TXer licenses. The same thing happened with the little golden bit on top of our Broadcast Band 1611 to 1701. The ACA will issue licenses to TRANSMIT on them under specs less than broadcast and more like a two way quality (no one does though).

By definition you are operating a "broadcasting service" as seen by the ABA,but you don't need to worry about the ABA's silly rules as you are not under their area of control. If they really want to get you they could, on content regardless but you are not running an illegal TX this is covered by the ACA.

Station X runs as a netcaster currently from Australia. I've got a few of these NAS licenses at 400 watts and one SW on 2368khz designed mainly for domestic HF coverage.

There is not much available in Australia on tricky aerial designs. The station is not any really big operation so the investment needs to be comparible. Setting up a 40 meter mast (although needed ) is not going to happen. We have an interesting rule here for town planing that says Amateur Radio operators can erect a tower up to 100 feet without council permisssion. If it was for commercial purposes no dice needs approval----oh dear?????

A power pole and conduit carring the MF wires up with a beam on top some guy wires coming down at 45 degrees sounds like an amatuers setup.

so thanks heaps guys.

www.stationx.com.au to read up on the "X"

The problem isn't with shunt feed in particular. The increasingly popular folded vertical on a grounded base tower is actually a form of shunt feed.

A lot of people associate the term shunt feed with slant wire feed. Slant wire feed is where the problem lies. While there are many of these systems still operating due to grandfathering (KFBC in Cheyenne WY for example) the FCC will generally not allow any new installations with this feed arrangement because the slant wire itself introduces an unwanted directional component into the radiation pattern. However, I have heard that the FCC has allowed a few slant wire feeds for daytime only stations under an STA.

I have started a brand new broadcast station on the Internet.

You can follow the links to http://www.yourhotfm.com

Please comment on the content, and if you have any recommendations for syndicated programs that I could run on the weekends..

We will be a full-time live station during the week starting in a week to two weeks..

Thanks!!

Jim

>>

The polar plot is not circular (which it is, for series excited towers).

Nevertheless, there is at least one DA which uses shunt excited towers.

Incredibly enough, the day and night patters are mirror images of each other
(null towards the west during days, null towards the east during nights).

# Amateur Radio Newsline™ Report 1391 – April 8,  2004

Amateur Radio Newsline report number 1391 with a release date of Friday, April 9th, 2004 to follow in 5-4-3-2-1.

The following is a Q-S-T.  It's ham radio versus BPL in upstate New York. Hear the racket for yourself on Amateur Radio Newsline report number 1391 coming your way right now.

(Billboard Cart Here)

**

## THE BPL FIFGHT:  HAM RADIO VS. BPL IN PENN YAN N.Y.

If you have been wondering what Broadband over Powerline interference will do to your ability to communicate on the high frequency bands, here is a very graphic illustration.  Take a listen:

--
Penn Yan NY Audio - BPL Noise
--

That recording of the 15 meter phone band was recently made by Dave Hallidy, K2DH, operating mobile in Penn Yan, New York and posted to the Rochester VHF Society website.  It was made the weekend of the CQ WPXSSB Contest using a Yaesu FT-100D transceiver, a Tarheel Screwdriver antenna and recorded at a time when the band was loaded end to end with high power contest stations.  And while you cold detect a few of them, the majority were covered up by the BPL grudge.

--
Penn Yan NY Audio With Signals Covered Up
--

In an Internet posting Mark Hoffman, K2AXX, who is Chairman of  Rochester group described it as frightening to hear.  He encourages all ham radio clubs and other organizations to contributed to the ARRL BPL Defense Fund as a way of fighting this threat to the ham radio bands.  (K0BC, K2AXX, K2DH, QCWA)

**

## THE BPL FIGHT:  TIME TO GO TO COURT?

And Hoffman is not alone in his concern.  Others on the Internet are circulating a more drastic approach.  Some hams advocate taking the matter to court and try to have the interfering BPL providers  charged with being a public nuisance or as a threat to our national security.  (Various Internet Posts)

**

## ENFORCEMENT:  UTILITY WARNED TO CLEAN UP RFI

An electric utility has been told for a second time to locate and fix an interference problem to a ham radio operator.  Amateur Radio Newsline's Bruce Tennant, K6ZW, has more:

--

The FCC has sent a second letter to an energy provider warning it to clean up interference to a ham or face punitive action.  The notice was sent directly to Wayne H. Brunetti who is Chairman, President and Chief Executive Officer of Xcel Energy based I n Minneapolis, Minnesota.

In his letter the FCC tells Brunetti that the agency  notified him back in December of 2003 that it has received complaints of harmful radio interference possibly caused by equipment operated by Xcel Energy.  That this interference has been reported by a ham living in Wellington, Colorado and that Xcel had been given 60 days to let the FCC and the ham know what steps were being taken to resolve the problem.

The FCC says that while Xcel did comply with its directive to respond, but as of the date of the latest letter the harmful interference reported to its office still remains unresolved.  So the FCC told Brunetti that the company had 30 days to let the regulatory agency know what action Xcel has taken, or intends to take, in order to identify and correct the source of these radio emissions if they are being caused by its equipment.  If Xcel fails to comply it could face enforcement action.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, reporting.

--

As we go to air there is no word if Xcel's Burnetti has responded to the FCC. (FCC, RAIN)

**

## THE BPL FIGHT:  OPPOSITION GOES PUBLIC IN SOUTH AFRICA

BPL is also a big concern in South Africa and that nations national ham radio society has voiced its concern to the public about the introduction of Broadband over Powerline Communications in that nation. SARL -- the South African Radio League did this during the program “Technologic” which aired on Africa’s D-S-T-V Business Channel.

Society president Graham Harlett, ZS6GJH, was interviewed at the National Amateur Radio Center. He said that the SARL is opposed to Power Line Communication because of its inherent interference to High Frequency radio communication. He noted that the interference is not limited only to frequencies used by Radio Amateurs. That it includes the military, civil emergency agencies and some broadcasting stations as well.

Harlett, says that extensive tests carried out in Europe, the USA and Japan has clearly shown this. A transmission line that carries power will become like an antenna at higher frequencies and render the high frequency spectrum unusable.

Harlett, who is a managing director of a South African consulting company voiced another concern as well. One that has not really been talked about in the United States. That of ingress to Broadband over Powerline systems from other radio spectrum users including hams. Harlett says that radio transmitters in close proximity to users of BPL are likely to cause interference to them because of the antenna effect of the long, unshielded powerlines.

Technologic was broadcast on Monday March 29th and has been repeated twice since its initial airdate. (Q-News)

**

## HAM RADIO IN SPACE: SOLVING HAM-SAT INTERFERENCE

Meantime, the subject of interference to ham radio satellite was one of the topics at the recent meeting of the IARU Region One VHF Managers held in Vienna. Bill Pasternak, WA6ITF, reports:

--

As a result of research performed by OZ1MY, it now been shown that QRM that is occurring to ham radio satellites. Its primarily but not exclusively to 145 MHz satellite uplinks and mainly occurs when the birds are flying over Africa and the Middle East.

According to AMSAT, IARU Region 1 has a Monitoring Service which has been active for some years but which has, up to now, concentrated on frequencies below 30 MHz. In view of the wide area of QRM that can be caused by satellites and their ability to relay signals across international borders, the monitoring team has now agreed to scrutinize the satellite subbands as well.

Right now, what is needed are regular reports detailing instances of interference to the ham-sats along with audio files to back up each claim. The audio files will enable more precise identification of accents and dialects of those heard interfering.  Hopefully, this will be a first step in getting those causing the interference off the satellites and off the ham bands as well.

For the Amateur Radio Newsline, I’m Bill Pasternak, WA6ITF, in Los Angeles.

--

The IARU Region One Monitoring Service team is said to have good contacts which are used daily to remove intruders from the High Frequency bands.  Hopefully they will be able to do the same on VHF and UHF as well.  (AMSAT, Others)

**

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the N8JFA X-WARN Repeater serving Xenia Ohio.

ENFORCEMENT:  FCC INVESTIGATES "PERFECT FIT"

Back here in the United States, the GCC Communicator reports that the FCC has launched an investigation into mattress warmer switching power supplies manufactured by Perfect Fit Industries.  According to CGC, these supplies were never Part 15  RFI tested
and have been shown to create large amounts of problems to radio reception. (CGC)

**

CB NEWS:  VK CB TELNET NODES ON THE AIR

Some interesting news about C-B -- Citizens Band radio -- down-under.  Unlike the United States where C-B operation is hap-hazard with no structure, Australia has a CB Packet Radio System that rivals anything that ham radio has ever set up.  And now, it is being linked over the Internet to C-B operations in other nations including many Europe.  This is making it possible for Australian C-B’ers to  connect with numerous other C-B stations throughout the world using radio and Telnet.  Q-News Graham Kemp, VK4BB, has the nodes and the frequencies:

--

AUS002 Warren reports in Australia there are so far several CB Packet Radio Nodes and BBS's.  These are AU4BNE Node  27.225 Usb Brisbane Q'ld,  AUS011 BBS  27.225 Usb Brisbane, AU6PER Node 476.950 Fm Perth W.A and  AU6BBS BBS  476.950 Fm Perth.

For the Amateur Radio Newsline, In Graham Kemp, VK4BB, of Q-News Australia.

--

So if you are scanning the 11 meter Citizens Band and hear digital signals, now you know exactly what they are.  (Q-News)

**

## RESCUE RADIO:  NEW NYC ARES WEBSITE

Some good news out of the Big Apple.  The Public Information Officer for New York City District ARES reports that the group has a new web site up and running.  Among its features are links to each of the city’s 5 borough ARES operations, a contact list of borough District Emergency Coordinators, a news page and much more.

Want to see it?  You can.  Its in cyberspace at www.aresnyc.org  (K2VMR)

**

## RADIO LAW:  CABLE MAKES DECENCY OFFER

The cable television industry says that it will provide free equipment to allow subscribers to block unwanted channels.  This in reaction to efforts on Capitol Hill to curb indecent programming.

Robert Sachs, president of the National Cable and Telecommunications Association, announced the plan at a recent gathering of cable industry executives.  The offer is directed to about half the nation's 70.5 million cable subscribers who don't have cable boxes that can be programmed to block certain channels or programs.

The companies agreeing to the plan include the 10 largest in the country and reach 85 percent of all cable subscribers.  (Published reports)

**

## RADIO ON THE MOVE:  WWVA MAY LEAVE WEST VA

Famed AM broadcast station WWVA in Wheeling, West Virginia may soon be heading to a new QTH.  This, as Clear Channel Communications confirms that the company has filed an application with the FCC to move long-time 1170 KHz Wheeling radio station out of the state of West Virginia.

According to a report in the Wheeling News-Register, Clear Channel Communications Wheeling Vice President Scott Miller said the company has submitted an application to move the radio station to Stow, Ohio.  This is a town located just north of Akron.  Miller said it has not been determined whether WWVA will actually be leaving Wheeling, and noted that approval of such applications are extensive.

Broadcast pioneer John Stroebel brought WWVA on the air on December 13th, 1926 using home built 50 watt transmitter set up in the basement of his Wheeling home.  By 1929 WWVA had increased power to 5000 watts and became one of the most listened to stations in the East.  And, for many years before Clear Channel Communications bought it, WWVA held the honor of being one of the last clear channel coast to coast broadcasters left in the United States.  It also helped to make the city of Wheeling famous, worldwide.  (Listener reports confirmed by NRCDXAS)

**

## HAMFESTS AND CONVENTIONS:  VISALIA INTERNATIONAL DX CONVENTION

On the convention circuit, the 55th Annual International DX Convention sponsored this year by the Southern California DX Club will be held April 23 to the 25th.  This is the worlds premiere gathering of hams interested in DX and DXing on any band from DC to light.  A show that attracts attendees from Asia, Europe, Africa and Oceania as well as from across the United States.

Scheduled events include a contest forum, antenna forum, DX forum along with seminars for everyone from the newcomer to DXing to the seasoned pro.  The top of the line manufacturers will be there on their own display midway where you can talk to the people who design and use the best of DX equipment made.

As in previous years, the venue is the Holiday Inn in the city of Visalia, California.  For full details visit www.scdxc.org/visalia/ on the World Wide Web.  (SCDXC)

**

## HAMVENTION 2004:  AMSAT EVENTS

Two more special events timed to coincide with Hamvention 2004 to report this week. The Third Annual AMSAT "Pizza 'n' Suds" party will be held Thursday evening May 13th.  Again this year the venue will be Marion's Pizza at 1320 North Fairfield Rd.  The party will begin at 1830 and go until the last pizza is gone! Food will be ordered from the menu and drinks are available at the bar.

Also, the AMSAT Banquet will be held Friday evening at 1800.  Location is the Amber Rose Restaurant at 1400 Valley St. in old north Dayton.   As with past years the meal will be a buffet with a price of $25.00 per person.  Reservations are required and the banquet is limited to 90 people maximum.  Please contact Nancy Makley for reservations.  Her e-mail is KC8GYW@amsat.org.  (N8NUY)

**

## HAMVENTION 2004:  MEDIA CREDENTIALS

Still with Hamvention 2004, this to members of the working press who are planning to cover the event for commercial television, radio,  newspapers or magazines.  Media credentials are available to those organizations planning to send reporters.  Complete information and a downloadable electronic application are on line at www.hamvention.org.  Just scroll down on the left side of the page and click on the word Media. When the page loads, click on the word Media Credentials and follow the instructions that appear. (Hamvention(r))

**

BREAK 2

This is ham radio news for today’s radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

WITH NEWSLINE: NEW SEATTLE ACCESS NUMBER

This note to listeners who get Newsline by telephone access from Seattle. Joybubbles, WB0RPA, tells us he has a new easy to remember number for that line. Its area code 206-333-6397. How is that easier to rember? Try it this way: 206-333-NEWS. And we thank WB0RPA for the information and for sponsoring the line. (WB0RPA)

**

HAM RADIO IN SPACE: ECHO STILL NEEDS $48,000

Turning to ham radio in space, AMSAT reports that as of March 30th it has raised $61,988 of the $110,000 needed to launch the new Echo ham radio satellite. That leaves about $48,000 still needed before the current target launch date of this coming June 29th. Go to www.amsat.org to find out how to donate to this very worthy project. (AMSAT)

**

HAM RADIO IN SPACE: PC-SAT 2 READY TO FLY

Also word that PCSAT 2 has passed its final outgassing tests putting it one step closer to launch. These outgassing tests are some of the most stringent in the space program. They are designed to protest crew members from fumes that might arise out of materials used to construct anything going into space.

Commercial manufacturers who spend millions of dollars to develop space safe materials might want to take a lesson from the hams. All the parts in PCSAT 2 are off-the-shelf ham radio items. The new bird uses Kantronics TNC's and Hamtronics transmitter and receiver boards that include all of the original plastic parts.

PCSAT 2 will go into orbit on the first shuttle when they return to flight next year. Additional information about the PCSAT 2 mission is available at http://www.ew.usna.edu/~bruninga/pcsat2.html (ANS, WB4APR)

**

WORLDBEAT - URUNGA - UGANDA:  NO IT WASN'T APRIL FOOLS

Turning to news from around the world we have a correction on a sound-alike from last week.  No, it wasn't an April Fools joke.  Again, here's Q-News Graham Kemp, VK4BB:

--
Audio report only.  Hear it in the audio newscast at www.arnewsline.org
--

So how did this one happen?  Here is a clue.  Try typing Urunga into your spell checker and see what it spits out.  This one simply got away in the wee hours of the morning.  (Q-News)

**

WORLDBEAT - HOLLAND:  SKED CHANGES AT RADIO NETHERLANDS

This for Radio Netherlands listeners in North America.  As of Sunday 4th April the station has dropped its 1200 UTC shortwave transmission on 11.675 MHz. Also, last week the station broadcast its morning program on shortwave at both 1100 and 1200 UTC due to the discrepancy in the starting dates for daylight saving time.  From Sunday it will be on shortwave for one hour at 1100-1200 UTC on the afore mentioned 11.675 Mhz. (Radio Netherlands)

**

WORLDBEAT - EUROPE:  THE 2004 SIX METER MARATHON

The Rientola Radio Amateur Club, operators of station OH3AG is inviting hams world wide to participate into the first Global Six Meter  Marathon.  The objective of the contest is to work as many DXCC countries as possible between May 8th at 0000 UTC and August 8th at 2400 UTC, doing so on six meters band. The results of this contest will be published during Tampere Six Meters Forum on August 14th when the Magic Band enthusiasts abroad will meet. You can follow this contest and get more information on-line at www.50mc.tk  (RSGB)

**

DX

In DX, F5NQL says that he has been receiving many QSLs for the 5V7C Togo Dxpedition, but he is not the QSL manager for this operation. The correct QSL manager is Franck Savoldi, F5TVG, whose address is PO Box 92, 94223 Charenton Cedex, France. F5NQL is the DX editor for the French magazine Megahertz. (RSGB)

On the air, SM1TDE will operate from Tanzania mainly on CW, RTTY and SSB.  He will be signing his call portable 5H3 through the 18th of April.  QSL as directed by the operator.  (RSGB)

**

THAT FINAL ITEM:  HAM RADIO AND THE AMBER ALERTS REVISITED

And finally, an update to our story two weeks ago about AMBER Alerts. We mentioned that for the most part ham radio seemed to have little interest in this important public notification system designed to help find the victims of kidnappings. Now we learn of at least one Amateur Radio club that's at work preparing to handle AMBER Alerts. It's located in Eastern Pennsylvania where our own Amateur Radio Newsline's Mark Abramowicz, NT3V, is based:

--

Mel Salzman, W-3-M-E-L is the force behind the Dauberville DX Association in Reading, Pennsylvania, getting connected to the AMBER Alert system.

Salzman, Dauberville's president, says he first became interested in AMBER Alert about a year ago and began searching the Internet for information.
The system enables law enforcement to issue bulletins to the public about missing or abducted children.

In some states, messages are transmitted by commercial radio stations similar to an Emergency Broadcast System message. AMBER Alert also relies on highway message boards and cable-television systems to get out information.

Its goal: To enlist thousands of pairs of eyes - whether they be motorists or truckers or neighborhood and community residents - to be on the lookout for the kidnapper of a child.

Salzman says he convinced the Dauberville group to put up a "ticker" or scrolling message on the club's website - D-D-X-A dot o-r-g, to display AMBER Alert information.
Salzman also says he has his home computer hooked up to receive instant AMBER Alert notifications, paying particular attention to Pennsylvania, New Jersey, Delaware and Maryland.

Salzman says his next step in connecting the Amateur Radio service to this effort was getting clearance from the club and the blessing of the FCC to transmit AMBER Alert information as a Q-S-T over the Dauberville group's repeaters.
"We have three repeaters," Salzman explains. "We can link all three repeaters if necessary and actually read the description, license plate number, whose been taken, what the guy looks like, whatever information comes through on my e-mail. That's what I'll put out on the air."

Salzman says the instructions are clear to any ham operator receiving the information and making a possible sighting.

"Call your local police, call 9-1-1 and give them the information," Salzman says. "If you happen to see that car or whatever description is out there, the car, what the driver looks like, call the police immediately."

Salzman says the Dauberville club has a modest, active membership, but many others in the region as well as those passing through the area use its repeaters and are supportive.

"We do have an active membership of, I would say, 20-25, and then people that they talk to," Salzman says. "You know how that could just snowballs. Like I said, the more people hear it, the more people are going to be looking, too."

Salzman says he hasn't publicized the Dauberville club's involvement with AMBER Alert. But Salzman says he's now preparing to reach out to other local clubs in the region as well as the Berks County ARES/RACES unit.

Salzman says he's also working to contact local law enforcement officials in greater Reading area to let them know ham operators are prepared to help by relaying AMBER Alert information.

So far, he says, the AMBER Alert system hasn't been activated much in this region. Salzman says that's a good thing. But, he says, the hams are ready if needed. Salzman says February's abduction and murder of 11-year-old Carlie Brucia in Sarasota, Florida affected him and others. Auto mechanic Joseph Smith is awaiting trial in connection with her death.

"I'd just like to really see this get going because it is extremely important. It just tears your heart out when you see these kids being abducted, especially with Carlie (Brucia), like when you find them and they're gone already. So, the more people involved, the better the results are going to be."

AMBER Alert was created seven years ago in memory of Amber Hagerman of Arlington, Texas. The 9-year-old was kidnapped while riding her bicycle near her home and later found murdered.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

If you want to know more about how you can involve the Amateur Radio service in your area in America's Missing: Broadcast Emergency Response - what AMBER stands for - take your web browser to www.missingkids.com. Then click on the words AMBER Plan. Getting a ham-radio assisted AMBER Alert plan started in your town could eventually save a child's life. (ARNewsline(tm))

**

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB and Australia's Q-News, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline@arnewsline.org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), P.O. Box 660937, Arcadia, California 91066.

A reminder that the nominating period for the 2004 Amateur Radio Newsline Young Ham of the Year Award is now on. This program is open to any FCC licensed young radio amateur age 18 or younger residing in the contiguous 48 states and who has made a significant contribution to the community, the nation or ham radio though the United States Amateur Radio Service.

More information and a downloadable on-line nominating form is at our website. That’s in cyberspace at www.arnewsline.org. The cutoff for nominations this year is midnight on Tuesday, June 31st.

For now, with Bill Pasternak, WA6ITF, at the editors desk, I’m Don Wilbanks. AE5DW, saying 73, a happy holiday and we thank you for listening." Amateur Radio Newsline(tm) is Copyright 2004. All rights reserved.

Quoth "Corbin Ray" <corbinray58@yahoo.com> in
news:c5ea6p$3lc$1@xuxa.iecc.com:

> http://michnews.com/artman/publish/article_3231.shtml

Richard Mullenax is a hypocrytical liar.

I would point out to the peripatetic Mr. Mullenax that contrary to his rabid assertions, Air America didn't steal anything from anyone. Air America has contracted with Inner City Broadcasting, the owner of WLIB (run, by the way, by Pierre and Percy Sutton, African-Americans both) to lease WLIB. Inner City has been losing money on its full-time Carribean programming, and now has an opportunity to make a profitable deal, while at the same time providing a public service to the community of New York, with wide-ranging, informative and entertaining programming. Do black-owned radio stations not have the right to make a profit? Would Mr. Mullenax restrict what Inner City may do with its own property? Or is his problem with the deal more related to the nature of the public service being provided by Air America -- providing a counter to the ubiquitous hail of right-wing hate radio?

The hypocrisy lies not in Air America, but rather in Mr. Mullenax's protestations.

--
"I am afeard there are few die well that die in a battle; for how can they
 charitably dispose of anything when blood is their argument? Now, if these
 men do not die well, it will be a black matter for the King that led them
 to it; who to disobey were against all proportion of subjection." - W.S.

The only "hypocritical and desperate" thing about the linked article is its author, who is severely put upon because one program on WLIB got kicked out by Air America.

As far as I know, WLIB's ENTIRE SCHEDULE was displaced by AA.

Another so-called journalist of the open-mouth-insert-foot school.

Phil,

AM broadcasting here is on the 521 to 1602 khz for normal broadcasting stations. The 2368Khz is concidered a SW freq here although the lowest of them. Yes here it is "shared" with "broadcast" and "mobile or fixed" services. I'm not sure on the exact freq limits but this is the first of the Shortwave Bands as designated by the ITU. It isn't concidered anything too usefull for the purposes of International Broadcasting. That happens from about 5 mhz upwards plus needs to be shared on a time table basis as you would know.

So here we find a lot of long distance two way system for long distance trucking companys and a system here called the Royal Flying Doctor Service. Also a mob that are a FWD club have a network of stations around the country. Alot of this is all done now on Sat phones etc, so the ACA are looking at what to do with stacks of HF spectrum being left dorment.

Here TXers are AWA / Blyth / RVR / Rhode & Shcwarz / Harris -------thats about as far as memory goes for now! ;)

I guess the simple question, shorn of all the rhetoric, is whether Air
America replaced programming by the Coalition of Artists and
Activists or not.  Did they (i.e., is Air America now where this
programming was previously)?

I also find this rather confusing.  You refer to wide-ranging, informative and entertaining programming. But I thought we were talking about Air America?

And he didn't approach the fact that the network is renting two stations in San Francisco, knocking asian programming off the air there. Yet another minority. And of course the spanish talker in Chicago. That leaves spanish music on the air there, however.

I don't care who owns WLIB. But I will never forgive them for killing one of the best radio stations in middle America. Remember what happened to WOWO, 50,000-watt blowtorch from Fort Wayne that covered 38 states and half of Canada? The owner of WLIB bought them a few years ago, decreased their power and changed their directional pattern just so that WLIB could increase its own power to cover NYC. Then the owners dumped their damaged goods and sold WOWO to someone else.

That was one of the saddest days in broadcast history for me. WOWO used to have an incredible signal here in Kentucky. Back in the 70s, my radio buttons were set on WLS, WCFL, WOWO, and 15 WLAC. And even though they weren't still playing music, I was listening to them steadily every night, right up to the sad night when their strong signal became a noisy whisper.

So as far as I'm concerned, WLIB can take a flying leap into the Hudson River and let us have WOWO back.

Hey, all!

Just wanted to let you know that Crystal Air Productions has re-organized and re-vamped, and our sites are up with free daily prep. Check out both http://www.crystalair.com and http://www.rawguffaw.com for the two main offerings.

We also have a lot more material available only via the daily newsletter, which you can read more about at the Raw Guffaw site. Thanks for checking it out!

Chris Adams

Very interesting.

Don't forget Barratt HF transceivers, I have one:-)

AWA must be locally made!

I'm familiar with typical coverage of the above band.

The HF spectrum must be busier here in western Europe than down in the
Pacific. Our UK government do not issue HF broadcast licenses - period.
People have tried, unsuccessfully, to apply.

There again, we now live in a police state.

Thanks for the info.

First, WOWO did not cover 38 states.

There were, at the time of the facilities changes on WOWO, stations with night operations in Kansas City, Anaheim, CA, Portland, OR (50 kw KEX), San Juan, PR and Dallas, TX. In addition, a dominant station on 1190 is KEWK, a 10 kw operation in Guadalajara, Mexico, as well as a half-dozen other fulltimers in Mexico on 1190. WOWO was always directional, going back to when Westinghouse downgraded it a half-century or more ago so KEX could become a 1-B clear channel station. It sent little power to the West, to protect KEX. And KEX did the same so it could run 50 kw. It got a signal into parts of eastern Ontario, some of Quebec and occasionally in the Maritimes... but much of that is Francophone and WOWO was hardly of interest.

WOWO was limited to consistent coverage of maybe a dozen states or parts of them at night, and NE Indiana, South Central Michigan and a piece of Ohio in daytime.

Since very little radio listening is done at night (and hasn't been since the 50's), the important issue is whether the station has decent coverage of the Ft. Wayne market. Even nearby markets and towns, which did not have local stations in the 50's and before, now have, in most cases, too many stations.

A small sidelite on AA. They have evidenly obtained a lease on time from KBLA, 50 kw DA-2 on 1580 kHz. That station is dual licensed to Santa Monica and L.A. and puts a tremendous signal in that area, but out here 11 mi east of the transmitter in the San Gabriel Valley I can't hear it on any radio in my house day or night  and at night it's lost in the mud on the 210 fwy in East Pasadena==Ted Shireman

> Remember what happened to WOWO, 50,000-watt blowtorch from Fort Wayne that
> covered 38 states and half of Canada?

Remember it well. Before FM played rock, night time AM was all we had.
WKBW / 1510 / Buffalo - Tom Shannon and others.
WABC / 770 / NYC / Cousin Brucie.
WOWO - Ft. Wayne
WLS - Chicago
CKLW / 800 / Somewhere in Canada - came on when our local 800 left the air.
WWVA / 1170 / Wheeling - had to love those pre-profit Stair preachers.

Wanna go waaaaayyyyy back?
WCKY / Cincinnati One, Ohio .. Wayne Rainey and the Rainey Family.

I miss 'em all. :-(

[ Moderator's note: CKLW is in Windsor, Ontario, across the river from
Detroit. They are still on the air and you can visit their website at
http://www.am800cklw.com/ . CKLW-FM 93.9 flipped formats from Oldies to
Adult Album Alternative a number of years ago and became CIDR, 93.9 The River.
When I left that part of the country last year they'd flipped again, to some
sort of Soft Rock format. ]

SS,

The 'original' License for certain "Minority Owned" Broadcasters
were to SERVE the 'under-served' Minority Community of a specific
Media Market, and 'create' "Diversity in Radio Broadcasting".

So we now see the selling out of the Minority Community to
'benefit' the interests of a few White Liberal ELITISTS.  These
Liberal Elitists only claim to fame is their Leftist Socialist
Agenda and using a few radio stations to act as propaganda outlets.

"Air America" in 'name' ONLY
In-Fact Very Ugly American Liberal Elitist in Reality !

While I agree that the loss of WLIB to the Black community is a
problem I thought the article was so far off base it was ridiculous.

Air America is paying Percy Sutton for his time from 6am to 11pm.

WLIB wasn't making money and Sutton was honest enough to admit he did
it for the money.

I remember listening not only to WOWO but to all the other stations in the eastern US and Canada that have been mentioned. My radio of choice was an RCA AA5 from the late fifties with Conelrad frequencies marked on the dial. The one thing I remember more than anything else about WOWO is, of course:

The Fort Wayne Komets
http://www.komets.com/index2.html

Without the website, I never would have known that "Komets" was spelled with a "k".

Mark Riley and Chuck D are "White Liberal Elitists"?

They'll be very surprised to hear that.

Actually, it is only licensed to Santa Monica. It does not put enough signal
over LA day and night to be an LA station.

> and puts a tremendous signal in that area,

Actually, it only covers part of LA by day, and very little of it at night.
At night, a flashlight-thin lobe heads from Alvarado and the 101 fwy towards
Santa M�nica and the ocean.

So, if this new network had been Conservative it would have been OK.
You're just in a wringer because it's Liberal. I realize there are no
elitists on the Conservative side, so I won't argue the point.

I know.  I used it quite intentionally.

You should see the number of web sites he's walked this particular essay around to.

<http://tinyurl.com/38chy>

I got three different announcements from Google News Alerts alone.

| "Peripatetic" means "walking" or "one who walks."
|

I thought it meant "wandering around."

Ahh, well, if I spent my time with thesaurus in
hand, I'd have no radio time, and (more importantly)
no time for family.

No, the owners of the station replaced programming by CAA.  With Air America.

By the way, CAA's programming still has a home on weekends.

| news:c5h20b$gnp$1@xuxa.iecc.com...
| >I don't care who owns WLIB. But I will never forgive them for killing one
| >of
| > the best radio stations in middle America. Remember what happened to WOWO,
| > 50,000-watt blowtorch from Fort Wayne that covered 38 states and half of
| > Canada?
|
| First, WOWO did not cover 38 states.
|
| There were, at the time of the facilities changes on WOWO, stations with
| night operations in Kansas City, Anaheim, CA, Portland, OR (50 kw KEX), San
| Juan, PR and Dallas, TX.

Ah, the good old days. There was quite a spirited debate in rrb at
the time. As someone who lived in Kansas City at the time, and who
was well aware of what was then KFEZ, I felt it wasn't quite
the crime against humanity that some made it out to be.

At one time, the 1190 in Boulder, CO also had nighttime service with
a DA, but that was given up sometime in the mid 1990s. There was a
about a year in Kansas City when KFEZ was off the air after getting
struck by lightning *during* a thunderstorm in 1990. 1190 was a very
quiet spot on the dial most nights during that time -- or there was
a very low level hash.

"LW" <kk4tl@aol.com> wrote :
| WLS - Chicago

I actually get a little choked up when I think of
what WLS was.  This was a station I grew up
with.  Fred Winston, Larry Lujack ("Superjock"),

Steve Dahl and Garry Meiers.

Ulp.  It's happening again.

Ditto on CKLW.  I believe John "Records"
Landecker came to WLS from CKLW.

Boy, those *were* the days, no kidding.
I remember the days of "musicradio" (all
one word), and the top 40 format.  I wanted
to be a part of the world of radio, and that
world no longer exists.

Oh, yeah, WLAC, too.

I remember the *good* days of radio.
Nothing sounds better than a fat, well - modulated
good - fidelity AM signal, fading, the phase of the
carrier shifting like a porch swing in the wind.

I thought that made music sound *better.*

>>
... There were, at the time of the facilities changes on WOWO, stations with night operations in Kansas City, Anaheim, CA, Portland, OR (50 kw KEX), San Juan, PR and Dallas, TX. In addition, a dominant station on 1190 is KEWK, a 10 kw operation in Guadalajara, Mexico, as well as a half-dozen other fulltimers in Mexico on 1190.
>>

There were three Class As on 1190: WOWO, KEX and XEWK.

XEWK is grandfathered at 10 kW.

WOWO and KEX were (pre-WLIB) 50 kW DA-N, with three towers nights, the usual complement for a U.S. Class I-B.

Every other 1190 (pre-WLIB, again) is a non-dominant station, and as such they must all protect the secondary service area of all dominant stations. Also, non-domonant stations on first adjacent-channels, 1180 and 1200, must protect the primary service area of the dominant stations on 1190.

Obviously, WOWO's downgrade changes matters a bit. Perhaps a lot.

The primary beneficiary of this is the Kansas City 1190.

If there are secondary beneficiaries, these are likely to be restricted by the existence of the other Class As, which surely aren't going away, to minor adjustments of their existing patterns, rather than dramatic increases in power or astonishing reduction in protection.

Also, Class B 1190 stations anywhere near the U.S.-Canadian border may be restricted by "notified", yet dark, stations in Canada. Those "stations" aren't likely to go anywhere, either.

One will observe that WLIB protects WOWO and a non-existant, yet "notified" station in Canada.

Any west coast 1190 is going to be limited by KEX and XEWK, and Anaheim and Tolleson haven't been able to get around that fact.

That's a reasonable distinction.  So should I assume that Air America
representatives did not approach the owners with an offer, knowing
that acceptance of the offer would result in CAA programming being
replaced?

WOWO does have an application for 15 kw nights with a 4 tower DA under
its new owners which should restore them to the old I-B status.

  <pre wrap=""><!---->
There were three Class As on 1190: WOWO, KEX and XEWK.

XEWK is grandfathered at 10 kW.

WOWO and KEX were (pre-WLIB) 50 kW DA-N, with three towers nights, the usual
complement for a U.S. Class I-B.

Every other 1190 (pre-WLIB, again) is a non-dominant station, and as such they
```

```
must all protect the secondary service area of all dominant stations. Also,
non-domonant stations on first adjacent-channels, 1180 and 1200, must protect
the primary service area of the dominant stations on 1190.

Obviously, WOWO's downgrade changes matters a bit. Perhaps a lot.

The primary beneficiary of this is the Kansas City 1190.

If there are secondary beneficiaries, these are likely to be restricted by the
existence of the other Class As, which surely aren't going away, to minor
adjustments of their existing patterns, rather than dramatic increases in power
or astonishing reduction in protection.

Also, Class B 1190 stations anywhere near the U.S.-Canadian border may be
restricted by "notified", yet dark, stations in Canada. Those "stations" aren't
likely to go anywhere, either.

One will observe that WLIB protects WOWO and a non-existant, yet "notified"
station in Canada.</pre>

AA has probably had the most successful launch in the history of talk
radio.  However, it remains to be seen whether their line-up of mostly
newbies to the talk radio business are going to make it.  So far
there's too much talking among themselves and their guests.  Too few
real callers.  Randi Rhodes is the best

Interesting this is to me Phil!!!!

See in this part of the world WE (Australia) are largely on our own!!! By this I mean the size of this place is mind blowing to most European people. Driving from one side of the country to the other is measured in WEEKS not hours.

Also in a "broad" sence we are as far away from the technologicaly developed countries as you can get without coming back closer. Plus we "almost are" the only ones in the race for the southern hemisphere.  Over your way the SKIP potential would be more pronounced. Thus causing the authorities to think the way they do. I got it here when asking for a HF Domestic license on the 2368.5 KHZ.

We tolerate the night time extension in coverage given the d layer. As you know the groundwave is not too favourable so I was asked a lot of suss questions for wanting one.

Here the "general idea" is everything needs to be big to cover enough area to get a workable audience size. So anything that reduces the effective coverage area is not liked too much with the engineering people.

Also I've bookmarked your site. I'm on the hunt for gear to set up the licenses i have.

Regards

Peter

PS AWA = Amalgmated Wireless Australia (I think-----yes local fellas) Also R.M.E. =Radio Manufacturing Enigineers (Local fellas too---not sure if still around)

My Name is Rich I have opened up a Amateur Radio auction site at http://www.a2zedgifts.bidzfree.com/ It is intended for Amateur Radio (Ham Radio) Other categories listed also.

I have been a ham for over 40 years and have had many call signs, worked and lived all over the world. Now have settled down in NY and decided to try our hand at a branded auction site. A few years ago I opened A 2 Zed Gifts business. "A" being the first letter of the alphabet and Zed being the last letter of the alphabet. We were offering just about anything for sale.

For the past few months we were on eBay and just making it due to the high listing fees. The overhead was killing us. I noticed that one of the biggest auctions were Amateur Radio equipment. (I sold most of my station in a matter of days). With that in mind decided to join Bidzfree and open a branded auction site.

The following categories pertain to Amateur Radio (just click on a category and a subcategory will be shown)

Amateur Radio

Apparel

Business & Industrial

Books & Magazines

Collectables

Antiques & Art

Personalizing

Hobbies

Please come over and take a look.

Are you sure you aren't confusing them with Pacifica?  Not that Pacifica
hasn't gone really quite conservative in recent years.  Used to be I could
tune to WPFW late at night and hear extended rants about killing all the white
people, and that's long gone.  I sort of miss it, actually.

>"Air America" in 'name' ONLY
>In-Fact Very Ugly American Liberal Elitist in Reality !

Hey, if it gets people thinking and it makes a profit, it's doing better
than most of the other services that come in over the bird.  I did notice
a bad buzz when I listened to their feed, though.  Also I heard the sort of
pumping that you get when you try to use a compressor as an AVC device.

It was my understanding (please correct me if I'm wrong on this) that Air

America is leasing WLIB;  presumably, profit for Percy is built into the
lease terms.  Inner City has said that they weren't making a profit with
the old format.

The question then becomes whether Air America will ever make a profit;  and
they have said that their business plan calls for them to lose money for
the first two years.

It's certainly a wonder that the spot load on "News Talk 730" is as heavy as you claim it to be if, as you say, no one is listening. Know what? I'll bet that lots and lots of people are listening. I wonder why these advertisers (and so many of them, too) are paying to have their spots not listened to by anybody. Odd. What's really odd is that the station seems, by your count, to be airing 48 minutes of spots an hour. Isn't that a tad unusual? I really don't know the answer.

So far today, the only advertising has been PSAs, promos for other programs, and an XM trade.  And Franken pushing his books, of course.

G. Gordon Liddy calling in from his show to congratulate Franken on HIS show is a nice touch.

FWIW, Air America is streaming at:

<http://play.rbn.com/?url=airam/airam/live/live.rm>

off of <http://airamericaradio.com>.

Because of all the noise on the AM band, the FCC will not authorize a new AM station.

Hi...

I'm looking for any info on the Bauer FB-5000J 5kW AM transmitter...specifically, how big/heavy it is, tube replacement and reliability, and AC power requirements. If anyone has any pictures of it, that would be helpful too.

Thanks in advance.

Percy Sutton is a very smart man. I'm certain this arrangement brings WLIB into the black financially.  I would bet there's also a piece of the advertising action built in. It's been reported that Air America is chargin $1500 a minute. With 6 stations I can only imagine how many bonus spots that includes.

>The question then becomes whether Air America will ever make a profit;  and
>they have said that their business plan calls for them to lose money for
>the first two years.

Walsh and Cohen were interviewed on 60 Minutes II and declared there was enough money to lose for years to come.

The rollout of Franken was disappointing. He was clearly out of his element and I have to replace the glass in my car that was shattered by the piercing laugh of his NPR sidekick. This should have been the best show they could have done as their debut, having months to prepare. It wasn't. I think there's too much TV influence to understand radio.

The production values were bad, as was the interface between Air America's feed and XM's. Air America's levels were all over the place. When XM took over levels came back to normal. It sounds like AM operators who rely on processing to ride gain. Even the 60 Minutes video showed pinned meters much of the time.

For a few minutes I thought Rush Limbaugh's feed got crossed. Ed Shultz sounds like a wannabe Rush with only the content changed.

I wish they hadn't gotten so much advance publicity and caused expectations to be so high and not met.

Rich

Here's the results of the most recent DX tests that have been received here:

Sunday, March 28, 2004 - KEVA-1240, Evanston, WY tested 1:00-2:00am MST:

As was the case when this station tested on 3/14/04, most of those that heard the test were in the West. Don Kaskey of San Francisco, CA and Pat Martin of Seaside, OR mentioned that the code seemed much weaker this time. However, Tim Hall in Chula Vista, CA reported that he heard the code easily, as was the case with Steve McDonald in BC. Darwin Long in Thousand Oaks, CA heard the test, with several other stations on the frequency. Shawn Axelrod in Winnipeg, MB said he heard KEVA with a poor signal, but was able to hear and understand the code.

Bill Snyder in Omaha, NE, Gerry Bishop in Niceville, FL, and Neil Kazaross in Barrington, IL all reported that they tried for the test but were unable to hear it.

Monday, March 29, 2004 - WXHL-1550, Elkton, MD tested 12:00-1:00am EST:

There wasn't a clear dividing line on who heard this test and who didn't; for instance, Russ Edmunds in Blue Bell, PA, remarked that while his QTH is only 47 miles from WXHL and his loop was pointed right at them, he doesn't think he heard the code from the test due to QRM from CBE and WDZC. However, "rah1962" in IN says he heard the test, albeit the Morse only. Gordon Bell in Troy, NY heard the test well, but Scott Fybush in Rochester, NY reports hearing only a mixing product of some of his locals. Also not hearing the test were Ernest Jones in Greensboro, NC, Bruce Winkelman in Tulsa, OK, Gerry Bishop in Niceville, FL, Kevin Redding in Mesa, AZ, Mike Brooker in Toronto, ON, and Andersson Sigvard in Sweden. Also, John Hunter of Rossville, GA and Adam Myrow of Memphis, TN both heard a station with SS instead of the test.

However, the test was heard by Wade Smith in New Brunswick, Canada, Saul Chernos in Burnt River, ON, Phil Greenspan in Marshfield, MA, Bill Dvorak in Madison, WI, Mike Hardester in Jacksonville, NC, Jim Renfrew in Byron, NY, and Barry McLarnon in Ottawa, ON.

That's all for now...

Lynn.

KFWB has the sports. KNX has the cooking and computer shows that they got by luring people from KFI....

A large number of the January window applications are for new stations.

What I want to know is what CCU hopes to add. Most of the AM stations in Cleveland are crap.

There are 10 AMs in the metro; WSCC is in a virtual 3-way tie for second. It has about a 2.6 share, and bills proportionally to the ratings share.

However, were it not part of a successful cluster, the station would probably not be viable as a stand-alone.

I have on my web site http://users.erols.com/rcarpen , files of lat/long/calls of all AM stations in the FCC's CDBS.  This includes the recent applications from the AM filing window.

You may import these files into any version of DeLorme Street Atlas (R) to see the xmtr locations on a map.

My site also contains a link to Larry Vehorn's site where you can download AMSTNS and TVFMSTNS to find more complete info including antenna patterns.

The site http://fccinfo.com allows viewing of antenna patterns online.

comment on article titled Left Launches a Station, An Attack in 4-2-2004 L.A. TIMES

>>>from laradio.com 4-2-04: Michael Harrison (publisher of Talkers magazine): "...Because of the network's decision to delay its programming three hours for the West Coast, so that Franken's show airs at noon in New York and Los Angeles..."<<<

my phone call to al franken over air america at about 2:25 pm ET and PT (a few minutes before senator hilary clinton called in) on April 1st 2004 suggested to them that the 3 hour tape delay on the west coast was a bad idea because live phone calls (except via internet streaming) could not be made (my pet peeve against anything but live local radio). ironic that the left coast is again being ignored by east coast insiders.

peace, ted alvy

For anyone interested, here's a reminder of upcoming DX tests; if anyone has any additions or corrections, please contact me. (BE SURE TO NOTE THE TIME OF THE TEST; THEY ARE IN THE LOCAL TIME OF THE STATION)

Daily, from 2:55am-3:05am EST - WRIB-1220, Providence, RI - This test is scheduled to run "through at least April (2004) and possibly into May".

Sunday, April 11, 2004 - WNNR-970, Jacksonville, FL 12:00-1:00 am EDT.
E-mail:wgsr1570@nrcdxas.org

Please remember, what's listed as being on, say, Monday *may* be what you think of as Sunday night!

If you try for (or hear) any of these tests, PLEASE post a message letting me know, and please, drop the station personnel a note, via e-mail or snail mail, thanking them for running the test! Also, for brevity's sake, I didn't post the QSL addresses; if you need these, let me know!

Lynn.

The FCC should put the AM band ON HOLD.  Then open a DAB band, coordinated with or
without the Canadians, I don't care.  Open a window for applications to this new
band
with preferential treatment for existing AM owners, then those with AM and FM
operations, and finally FM only licensees FOR THE COL only.  License those, with a
drop dead date for the existing AM operation of 1 year after a station's CP is
completed, and close the AM band , regardless, in 4 years.

It would be ideal for community broadcasters....RDS, heck, just about anything
which
doesn't need to be co-ordinated.  Those who didn't get a license could rent their
towers out for cell phones.

That must be news to the 893 people who filed applications for new
stations earlier this year, in cities as large as Philadelphia...

(I have heard some speculation that the ultra-long-distance moves like
Mississippi<=>Arizona are typos.)

I'm using OtsDJ on my home computer. It even does its own dynamics
processing that makes the music sound like it's coming from a real radio
station if you want to set it that way.

You can download a demo for free.

What games are on KNX?

```

While its stereo equipment may not be completely turned off, around 10 PM on April 2 I noticed that WJR-760 Detroit no longer has stereo separation during its commercials, promos, ID and music. The switch to mono was sometime between March 27 and April 2.

Could this have something to do with the station's recent posting of an opening for a new Chief Engineer?

Given that WJR had broadcast in stereo for some 20 years, this is hardly an encouraging sign for the status of AM Stereo within the industry.

Steven Burns

>Shultz sounds like a wannabe Rush with only the content changed.

For what it's worth, Mr. Schultz is not part of the Air America operation...he's syndicated separately by Jones Radio (in an unusual arrangement...I believe a left-leaning group actually bankrolls the syndication for Jones).

XM picks him up instead of 3 out of Randi Rhodes' 4 hours. They moved him (or are moving him) from the "Buzz" channel, which becomes "America Right" on Monday. One of the other AA affiliates, Clear Channel-owned KPOJ/620 Portland, also carries Ed Schultz separately from AA.

Alan Colmes (Fox News) is also on the XM "America Left" channel, pre-empting some of AA's programming in his live slot of 10 PM-1 AM ET.

Hallo again.

This is specialy for John Umar and Philip.

I just finish the building and testing of my 4CX5000 final.
Buy the way....I build the Broadcast Electronics version.
Today i tested the amp with an driving power of 150 Watts and the
output power was 8000 Watts.  It ran it on 7000 volts and it consume
about 1.8 amp.
I alsow find out that the tube is not a 4CX5000A but a 4CX5000J/8909.
I measure the filament current so thats wy the 10.000 watts is not in
reach.
The difference between these tube's is the maximum frequency range.
The 5000A runs till 220 mhz and it's brother...the5000J runs till 100
mhz.
But still i feel pretty good about this project.
If You wanna see a picture of this final amp just mail me and i will
send You one.
Thanks for advising and supporting me.

Greetings from Holland...........Onno

Looks like I was wrong

http://www.fcc.gov/mb/audio/getstat.html

"Applications for new AM broadcast stations must be electronically filed on
FCC Form 301 during a specified application window period."

It's the expanded band  they will not take new applications for.

geoff

What's the likely cause of the 120 Hz (+harmonics) hum on WFAN's
signal, that's been there for a few months?

It's in the difference channel, between the upper and lower sidebands.
If you listen to both, you won't hear it.  But listen to USB or LSB
alone and it's quite strong.

Some phase modulation of the carrier?  An ancient stereo system
feeding in hum?

Now you're talking:

http://www.bauertx.com/used.htm

The factory still supports all their models.

A 5Kw is for sale in the above link together with showing the tube
lineup.

Nice box.

Not as nice as my Nautel:-)

Number one is Citadel's WTMA on 1250?

Just a guess....(c;

TMA's sister station is WTMZ 910.  It's a bit of a shock for the
visitors to Charleston to hear "good music" on AM, but that's what's
on there.  It failed, miserably, as news-talk, sports, sports-talk,

and some other formats. Not sure it shows up in the rating book, though. The locals all listen to it over 40 years old. Reminds them of Harry Weaver's old WOKE on 1340 I used to work for part-time when I was a Navy sailor. That station actually had a STUDIO, complete with a Steinway grand! There was a big sign up over the board we all had to stare at all day. "If in doubt, DON'T do it, DON'T say it and, for God's sake, DON'T PLAY IT!" Harry, the station's owner and VERY conservative, WAS listening to what you did. I think he had the first speed dial phone in the world...(c; It never made the ratings book, either, but I spent many happy hours sitting at our little home-made console with two old transcription players and 2 cart machines in the middle of Diana's Dress Shop window on King Street actually feeding the station audio into a telephone loop from a permanently-installed jack in the wall direct to the station. For a young kid, ratings or not, this was RADIO in 1968.

Hand me that Harry James album, would you? Lemme cue it up on 2. It's next on the air after John, our silver-tongue, dashingly dressed radio personality those two ladys are blushing over across the room on the other end of the mic cord interviews a customer on why she's buying that particular dress from Diana's. Thanks.

Wireless mic on the end of a Marti in the van my ass.....That ain't radio!

Larry W4CSC

>

It's pretty much the same here in Columbus, they own 2 of the 8 am stations, assuming you do not count 700 WLW Cincinnati as a local station, but it comes in as good or better then some of the local stations..

Well (blush), I may have exaggerated a bit, but you know EXACTLY what
I'm talking about.......I hope.

RESCUE RADIO:  VK HAM BRINGS BOAT TO PORT SAFELY - BY RADIO

A pair of Australian and American hams are credited with being a lifeline to a storm damaged boat with six people on board.  The Australian was at his home QTHand the American was at sea on the stricken ship.  Q-News Robert Broomhead, VK3KRB, in Waverly, Australia picks up the story from here:

--

Bernie VK2ABN on March 4 was in QSO with VK2ABT/VK3ACA and heard a weak and distorted signal, KA7MWL Shawn, who was aboard a Ukrainian registered schooner sailing from Wellington NZ to Sydney Aust., sails  had blown out and they were making slow progress just on 4 knots.

At that speed they had calculated that they would run out of fuel before reaching port.  Bernie VK2ABN ascertained 6 people were on board,  BUT NO EPIRB! All this information was relayed to Sea Safety Canberra.

With the schooners satellite communication system also out of action, the Ham aboard, Shawn KA7MWL operating around 5 watts on 7070 Khz was the only contact.

Sea Safety Canberra QSY'd from 8176 kHz to the 40 meter band but as their  transmitter was in Charleville, SW Queensland, no contact could be established.

Bernie arranged a for sked in 24 hours time, this time things a lot better, radio and safety wise, the schooner expected in Sydney ahead of previously estimated time.

As Bernie said: "I hadn't realised you can now call MAYDAY on the various DISTRESS frequencies but nobody is listening any more. Since the advent of GMDSS a computer scans the frequencies looking for encoded tones. If it finds one it attracts human intervention."

VK2ABN Bernie says " It was a bit like the Tony Hancock Radio Ham Sketch in retrospect, anyway that's what his wife thought and our telephone sure ran hot for a couple days!"

--

According to Q-News, the Sydney Australia Water Police stayed in contact with VK2ABN to keep abreast of the situation. With no High Frequency facilities that could hear the stricken craft, they were totally reliant on ham radio. (Q-News)

## THE BPL FIGHT: CLARIFYING FEMA'S CLARIFICATION ON BPL

The debate surrounding Broadband Over Powerline Internet access has taken a new twist. Opponents are now raising fears about the contents of a letter recently released in the FCC's BPL public comment files. It was sent by the Federal Emergency Management Agency's top administrator to FCC Chairman, Michael Powell. Opponents say the letter clearly shows FEMA is now reversing course on its vehement opposition to nationwide BPL deployment. Amateur Radio Newsline's Mark Abramowicz NT3V has the very latest

--

The letter was written by Michael Brown, Undersecretary of Emergency Preparedness and Response in the Department of Homeland Security. That's where the Federal Emergency Management Agency was placed in President Bush's restructuring of agencies related to the security of the United States.

Brown's letter to Powell actually was briefly mentioned in February articles on the FCC's BPL action that were written for two nationally-circulated computer magazines. But it apparently got little notice and its contents were not fully detailed.

Now that the letter is part of the FCC BPL file, its contents are in the public arena.

Brown tells Powell in the letter dated January 8 that FEMA wants to clarify its December filing so it is "not misunderstood or misconstrued."

Brown goes on to say FEMA is aware that some of what he labels "distinct approaches" to BPL may cause interference to FEMA's H-F emergency communications network.

But then, and this is the section that has BPL opponents worried, Brown writes: "However, we continue to study the BPL proceeding and have not concluded there is a material interference problem or that all of the distinct technological approaches to BPL pose risk of interference."

Compare that to the language in FEMA's December 2003 filing on BPL with the commission prepared by Barry West, FEMA's chief information officer.

West writes: "FEMA has grave concerns regarding the interference that likely would be caused to government communications by unlicensed BPL systems."

Or this comment: "This interference will severely impair FEMA's mission-essential HF radio operations in areas serviced by BPL technology."

In an interview with a Philadelphia radio station, a FEMA spokesman insisted there is no material change in the agency's position.

The spokesman says Brown's letter was sent to Chairman Powell to clarify that FEMA is still studying the issue and recognizes and supports the FCC's desire for a greater broadband capability for the nation.

The spokesman says Brown wants to see more studies on the interference issue and is working with other federal agencies.

However, the FEMA spokesman emphasized that any deployment of BPL should not pose an interference threat to the agency's H-F emergency communications network.

Those close to the BPL debate say Brown's letter, has only muddied the agency's position and sections could be embraced by both sides.
